Promising Young Norwich Canaries

The two fine young Norwich Canaries here shown each won 1st Prize at Cardiff Show. The Bird at the top won 1st in the unflighted Buff Cock class for Mr. W. Crawshaw, Accrington, and the other is the winner in the Unflighted Yellow Cock Class. The latter is the property of the Rev. C. B. Jolliffe of Cardiff.

F. CARL, Publisher, 154, Fleet Street, London, E.C.

Advertisement Charges.

One Halfpenny for each word up to 48, 1d. per word afterwards. Name and address to be reckoned. Minimum, 12 words 6d.

(FOR RULES SEE PREVIOUS ISSUE.)

NOTICE TO BIRD PURCHASERS.

It is advisable that all newly-purchased birds, especially foreign birds, be kept isolated from established stock for a week or ten days, until by their condition they establish the fact that they are thoroughly healthy.

Whiteley, Boston-rd., Holbeach. (752)

Ready 18th January, 1917.

THE GREAT NEW NATIONAL NEWSPAPER,

. Every . Thursday "FOOD," 1D. WEEKLY

How to Produce it, Prepare it and Purvey it.

The most important question of the moment is Food. The Nation calls for an organisation of all its Resources in Food Production. For the first time in our history Agriculture is adequately represented in our National Councils by a Food Controller and a Practical Expert at the Head of the Board of Agriculture. The proper utilisation of waste spaces—the breaking up of big Estates—the development of the allotment system, all these ideas and many others equally beneficial seem in process of fulfilment. It will be the aim of "FOOD" to show the people of Great Britain how to grow their own food—cheaply and well. "FOOD" will bring all Food Growers, Food Dealers and Food Consumers into regular and easy touch with each other. "FOOD" will cover the production of all kinds of Foods and also their method of preparation for the table. The leading experts on Food will be retained for "FOOD" as regular writers and advisers, and readers of "FOOD" will be kept in close touch with the markets and the latest methods. All the work of the smallholding from week to week will be discussed—the plans for Fruit and Vegetable growing debated. The successful raising of Poultry and Pigs, Cattle, Sheep, Goats, etc., will all be comprehensively, simply and practically dealt with. There will be articles on Bee Cultivation and Rabbit Farming. In short, every phase and side issue of the Great Food Problem will be touched on. Under the Editorship of

MR. J. W. HURST,

(Editor of Nelson's Encyclopædia of Agriculture, The Farmer's Annual Register etc.)

"FOOD" will strive to be of real National Service. Place an order with your Newsagent to-day, for the first number. Tell all your friends about "FOOD" and if you have anything to advertise, take advantage of the huge sale and circulation such a Journal is sure to secure. If you desire on patriotic grounds to support such an enterprise by subscribing to it, send 6/- to-day for a year's Subscription to—

The Publishers of "FOOD," 154, Fleet Street, London, E.C.

Champion YORKSHIRES & NORWICH

Once again my Norwich and Yorkshires are proving their quality by securing premier honours at all the leading shows (see show reports). I am now offering a limited number of grand stock and exhibition birds, either Yorkshires or Norwich, which I can guarantee are bred from my own **Bulldog Strain**, at 20/-, 25/-, 30/-, 40/-, 50/- each, cocks or hens. Also a few grand matched pairs at 40/-, 45/-, 50/-, 60/- per pair upwards. These are splendid value and have only to be seen to be appreciated.

I have also a grand selection of stock birds from other well-known strains, as follows:—

YORKSHIRE COCKS, grand lengthy birds, in full song, 15/-, 17/6, 20/-, 25/-, 30/- each, upwards.

YORKSHIRE HENS, smart, racy, typical hens, 7/6, 10/-, 12/6, 15/-, 20/- each, upwards.

MATCHED PAIRS, 20/-, 25/-, 30/-, 40/-, 50/-, 60/- per pair upwards.

NORWICH PLAINHEADS. Grand, thick-set, cobby birds at same prices as Yorkshires.

BORDER FANCIES. I have a particularly good lot of Border Fancies in stock. I can guarantee them to be bred from noted winners and to include many birds capable of winning. Cocks, 12/6, 15/-, 20/-, 25/-, 30/-, 40/- each. Hens; 5/-, 7/6, 10/-, 12/6, 15/-, 20/-. Matched Pairs, 15/-, 17/6, 20/-, 30/-, 40/-, 50/-, 60/- per pair. I have also a grand selection of Crests and Crestbreds, pure-bred Rollers, Mules, etc., etc. Please write stating wants. **Remember,** I send every bird on 7 days' approval at my sole risk. I personally select every bird that is sent away. I have over 4,000 (four thousand) birds in my rooms at the present time to select from, and I guarantee to give absolute satisfaction to every cusomer or return cash in full. Terms: Cash or deposit with Editor.

Travelling cages 4d. extra in all cases.

Make Your Breeding Pay in 1917.

This you can do if you only pair up right; or if you want to purchase pairs, leave it to me; for it is no trouble to me to produce documentary proof that the foundation of many past and present exhibition studs have been laid by birds purchased from me. Great value for money is my forte. I herewith give a few prices of exceptionally good

Norwich Plainheads and Yorkshires.

You may have all the so-called strains and bogus pedigrees in the world, but you cannot purchase better blood than I now hold, and I am certain you cannot procure the same value. Cocks, 15/-, 20/-, 30/-, 40/-, 50/-. Hens, 15/-, 20/-, 30/-. Pairs, 25/-, 30/-, 40/-, 60/-. These prices are for show birds and stock birds to breed winners. For **OTHERS,** really good, containing many of the best combined strains in Great Britain, see New List. Cages, 4d. and 6d.; approval with pleasure. Above prices relate to Norwich and Yorkshires. For Belgians, Cinnamons, Lizards, Scotch Fancies, Borders, Rollers, Mules, etc., also list for 1917. Inspection by appointment. Not a shopkeeper, hence the appointment.—**W. RUDD, Specialist, NORWICH.**

Lancashires.

A WONDERFUL SERIES OF BOOKS

Vast Amount of Valuable Information in the Clearest and Handiest Form.

Encyclopædic Knowledge in 6d. Vols.

READERS of "Cage Birds" have to-day an opportunity to secure at PRE-WAR prices Volumes of the well-known "Everybody's" Series.

Each volume is, on its particular subject, the handiest and clearest written book obtainable. Each is small enough to fit in the pocket, yet each is packed with a vast amount of valuable information, printed in clear, legible type.

PROFITABLE KNOWLEDGE.

"Knowledge is Power," says the proverb But it is more than that—it also is the means of attaining enjoyment—happiness—and of conferring it on others.

Among the list of volumes given here you will find books that give information of profitable—of money-making value—as for instance, "Everybody's Guide to Carpentry," "Everybody's Guide to Poultry keeping," "Everybody's Home Dressmaker," "Everybody's Book-keeping"—others which give useful, money-saving information—such as, "Everybody's Pocket Lawyer," "Everybody's Medical Guide," "Everybody's Cooking and Household Guide"—others, again, that give practical hints on hobbies—"Everybody's Guide to Photography," "Everybody's Book on Angling"—whilst others contain a fund of jokes, of recitations and of curious facts which are aids to popularity and social advancement—books which enable you to give pleasure to others.

Look through the list given here.

Among the books are sure to be some that you need—some that will give you just the information you have been seeking on some knotty point.

Then consider the wonderful price—only 6d. each (8d. post free), strongly bound in cloth, 1s. each (1s. 2d. post free), in attractive leather binding or—

IMPORTANT

FOR HOME TRADE.

To Breeders Wishing to Dispose of their Stock of

CANARIES

for SPOT CASH.

we are prepared to pay the very highest cash prices for large or small quantities of Canaries, including Norwich, Yorkshires, Borders, Rollers, etc.; also Mules. Do not dispose of your surplus stock until you have received our offers. All our birds are for retail trade—not for export—therefore we can pay the very highest prices in the trade. All Canaries we purchase are retained in this country. Do not be misled with idle boast and exaggerated statements. Send your offers to a reliable firm, where you will receive a genuine offer and your cash.

NEWCASTLE-ON-TYNE C.B.S.

Meeting, Jan. 4, Shield Cafe, Bigg Market, M G. Dobson, chair, before a good number of membe After business a discussion arose as to who is t winner of one of the cups at our late show. The has been an error by some of the judges, and t cup has not yet been handed over to the owner the bird which was stated to be the winner at t show. The matter was left over to Februa meeting to try and get a good turn up of membe to attend, so I earnestly appeal to the members turn up and let us have the matter settled. T meeting will also be the annual general meetan We are also going to try to arrange lectures f coming meetings, and if anyone can assist us plea do so.—F. W. Laidlow, Sec.

KIPPAX LINNET CLUB.

General meeting, Commercial Hotel, Kippax, Ja 7; one of the best meetings ever held. Mr. Cooper was re-elected President; Mr. J. Wal Treas.; Mr. R. Plows Sec.; Committee, Messrs. Potter, R. Collinson, T. Lightfoot, B. Norton, Liversedge, jun.; T. Pickersgill. The singing seas commences Jan. 13, at Commercial Hotel, at 3. Fo of our old members are serving their King a Country, and I am sorry to say one of the fo Mr. A. Tomlin, is in hospital. Mr. J. Liversedge discharged after serving nearly two years. We ha every prospect of a good season for 1917. O members who are in France welcome CAGE BIR and will be pleased to see we are making anoth attempt to keep the club on, for we have had year of suspense for 1916. We shall be pleased see both old and new faces at our weekly contes —R. Plows, Sec.

LEEDS ROLLER C.C.

Annual meeting, Griffin Hotel, Boar Lane, M F. Heaton chair, before a crowded attendan Officers elected: Prés., Mr. W. Hall, our wort host; vice-pres., Messrs. Bew, Hallam, Taylor, B nett, Tasker, Simpson, Ward, and Boyd; chair, M E. Peel (vice Mr. F. Heaton); sec. and trea Mr. H. Best; committee, Messrs. Barnett, Atk son, Walton, Hallam, Hunter; auditors, Mess Gallagher and Walton. The annual report and b ance sheet was read by the sec., and although t past year has been very heavy in respect to e penses, it shows the club to be in a very sou financial position. Decided that members' show held on the first Saturday in February, and M H. Roebuck and F. Oldroyd, Wakefield, be invit to officiate. Unanimously decided to give £1 the T. Simpson subscription fund from the clu funds. The following were selected as represent tives of the Leeds Club to act as guides und Federation rules: Messrs. Barnett, Best, Fe Hunter, Walton, and Roebuck.—H. Best, sec.

DULWICH AND PECKHAM C.B.S

Annual general meeting, headquarters, Jan. Quite a large number attended. Balance-sheet f 1916 was presented and passed as correct, showi a balance of nearly £2 in hand, which, taking in consideration the fact that a large number of o members are away on active service, was consider very satisfactory. Officers and committee for 19 elected: Patrons, Fred Hall, Esq., M.P., Mr. Laing; President, Mr. J. B. Crowe; Vice-President Messrs. J. W. Cranfield, J. B. Waterman; C. Grendell, J. Robson, E. S. Lugg, A. Cunningham, Whitlock; Hon. Solicitor, Mr. H. R. B. Twee Auditors, Messrs. F. Cole, C. H. Grendell; Comm tee, Messrs. A. G. Cant, A. J. Clarke, R. Drae W. Gilbert, H. Page, J. R. Taylor, J. Martin, Whiff Roberts, Clemence, Hall, D. Reeks; Hon. Sec. a Treas., W. Hodson. A vote of thanks to retiri officers and committee was duly carried, also vo of thanks to Mr. Cole as chairman. A vigorous p gramme for the year is in preparation, and n members will find plenty of entertainment and i struction.—W. Hodson, Hon. Sec.

LEICESTER (Hand-in-Hand) C.B.

A Good Start for the Coming Charity Show.

General meeting, Jan. 2, White Swan Hotel, Mark Place, over thirty members being present, Mr. G bins presiding. Officers elected for the ensuing yea Pres., Mr. W. A. and Bird World.

A Guaranteed Circulation amongst 50,000 readers weekly

Offices: 154, FLEET STREET, LONDON, E.C.
Telegrams—"Aviculture, Fleet, London."
Tel. No. 5229 Holborn.

The Editor *is always glad to receive and consider suitable* **contributions,** *whether articles, sketches, or photographs. Provided an addressed envelope, sufficiently stamped, accompanies same, every effort will be made to return unaccepted contributions promptly, but he does not in any case hold himself responsible for their safety.*

All matter *intended for publication must be written or typed on* **one side** *of paper only, and must reach us not later than the first post on Tuesday if insertion in the next issue is desired.*

"CAGE BIRDS" will be sent post free weekly, on the day of publication, at the prepaid rate of 10s. per annum for the United Kingdom, and 13s. annually for foreign countries.

Twitterings.

Mr. T. James writes that he and Mr. Escott, who have exhibited as Escott and James, have mutually agreed to dissolve partnership, and show independently in future. Mr. James's address is now 15, Taverville Terrace, Porth, Glam., instead of 13.

Mr. S. Wilcock, secretary Open Norwich Plainhead Club, writes that in his report of the result of the year's competitions (published in our issue of Jan. 6), he should have given Mr. H. Rushton as the winner of Mr. Crawshall's special, not Dickinson as in the report.

I was very pleasantly surprised to see my green Yorkshire cock depicted on the front page of CAGE BIRDS, writes Mr. L. B. Yates, and must congratulate Mr. Norman on the excellent likeness. Bred by me three seasons ago, the bird has several firsts to his credit, and as a stock bird he is one of the best, being sire to both winning cocks and hens, including a green marked cock which won five firsts and seven specials as an unflighted bird. I wish CAGE BIRDS the success it so richly deserves for keeping our hobby together in these trying times.

A Noted Character Dead.

The end of 1916 saw also the end of a character widely known for his knowledge of British bird-life, gained though it was in his pursuit of collecting rare specimens of birds and eggs. He was responsible more than any one person who could be named for the scarcity of Bearded Reedlings in Norfolk. Probably no one rifled more nests of this fast disappearing species than George Smith, of Yarmouth, who died on Dec. 29 at the age of 72. The late Lord Lilford had frequent dealings with Smith, and the Booth museum at Brighton also owes many of its specimens to his handiwork. Nevertheless he did some useful work for the science of ornithology; he is said to have noted the first appearance in England of the Mediterranean Black-headed Gull, although this is doubtful, for there is a record of an immature bird of the species at Barking Creek in 1866, and he was also credited with being the first to record in Norfolk the White Wagtail, Tawny Pipit, Iceland Gull, Greater Shearwater, and some others.

REVIEW OF SCHEDULE.

Larkhall O.S.—Public Hall, Jan 20. Judge, Geo. Marlin; 17 cl.; Brit. 6, Bord. 2, Comm. Can. 1, Nor 2, Yorks. 2, For 1, Mule 1, Hen 1, Sell. 1. Prizes, 10/-, 5/-, 2 6. Fee 1/6. Ent. close Jan. 16. to J. M[illegible], 59, McNeill St., Larkhall.

OUR 16th BIRTHDAY.

KEEPING THE FLAG FLYING.

I DO not think any apologies are needed to my good friends the readers of CAGE BIRDS, for preserving on the occasion of this our 16th birthday our customary War Time style and price, but if any are called for I tender them ungrudgingly, and hasten to assure my many patrons that it is a matter of deep regret with me that the present commercial conditions prevent me from celebrating CAGE BIRDS' birthday in pre-war fashion.

Everywhere we see on the walls flaming appeals for economy, costing perhaps more to print than they save, but useful to the extent that they remind a publisher like myself of the scarcity and high price of paper. Not so much in response to those appeals, but more by reason of the fact that paper is so difficult to obtain, and so expensive when it is obtained, I am compelled to treat this natal issue in the same way as many people treated Christmas this year—namely, without any celebration, but while doing so I give a silent hand to all those old comrades who have been associated with me in the paper for so many years. I think of some of them who have gone down into the dim vale of death in defence of civilisation and of others who are taking their part so gallantly and successfully in the great struggle.

The war is not going to last for ever, and indeed there are portents that it is nearer the end than some people think. Meanwhile, we must all do our duty quietly, taking our individual share in the greatest socialistic upheaval the world has ever known, and biding patiently the time when the Greatest Peace shall have concluded the Greatest War in the World and the Soldier Bird-Fanciers of England will be once more free to turn their attention from strafing the Hun to pursuing the peaceful and delightful hobby of cultivating and keeping Cage Birds.

Once again, my friends, a happier return of to-day in 1918.

FREDERICK CARL.

Correction in Show Report.

Mr. C. Jones, Swansea, writes that he won 1st in the Buff Variegated Yorks cock class at Mardy Show, not James and Wells as stated in our report.

What's in a Pudding?

Leicestershire people are capturing Sparrows for food. The best way to cook the little birds, says "The Globe," is in a Lark pudding.

Out of the Claws of Death.

"W. C.," in the "Manchester Dispatch," tells a story of a Hawk and a Chaffinch to this effect: "One of my correspondents tells me that when out rabbit shooting he and a friend espied a Sparrow-hawk (was it not a Kestrel?) hovering round, which suddenly pounced down into a field and seized a Chaffinch. A shot from the gun put an end to the existence of the Hawk, but the Chaffinch, liberated from its enemy, alighted in a tree apparently unhurt."

NEW YEAR'S WISHES.

It has been a great gratification to note that during the past week nearly every communication received, advertisements, queries, and every kind of letter, has been accompanied by an expression of goodwill and seasonable compliments. The senders will please accept our hearty thanks for their kind wishes and an assurance that they are fully reciprocated. It is a pleasure indeed to know that relations other than those between purveyor and purchaser exist between the staff of CAGE BIRDS and the readers of the paper.

Gratitude from Pontypool.

Kindly allow me a small space to thank those exhibitors who so kindly supported our first venture, writes Mr. W. D. Lewis, Pontypool C.B.S. Birds were packed early to meet their respective trains. We find on clearing that two drinkers were left on the packing table, and if the owner will communicate with me we shall be pleased to recoup him for his loss. From an exhibitor's point of view our show was a great success, entries totalling 312. All prize money will be paid within seven days. Our thanks are due to Blaenavon Society for kindly lending trestles. We trust all birds arrived safely and in the pink of condition. It is pleasant to receive thanks for the condition of birds arriving home, and helps to lighten the show burdens.

A Promising Welsh Society.

We have received the report and balance sheet of the Barry F. and F.S. The balance sheet shows that the cash in hand at the end of 1916 is £16 4s. 4d., an increase of £12 4s. 9d. over the balance brought forward, a very satisfactory result. The assets amount to the fine total of £98 11s., including challenge cups to the value of 27 guineas, staging and trestles, £21, etc. Most of these items of course are on account of the sections other than cage birds, but the society is certainly to be congratulated upon the success reached in its short existence, the present balance sheet being only the third since its institution. Mr H. P. Thomas, secretary, in forwarding the report, says: "We hope some day to see our society the premier society for Wales, and if hard work and enthusiasm are factors that count, I don't think we shall be disappointed."

"OUR CANARIES."

WHAT A PURCHASER THINKS.

I am pleased to say that the book, "Our Canaries," is quite satisfactory, in fact I think it is worth a lot more, especially to such as I am myself, a novice. I think after I have mastered your book, it won't be very long before I am a champion. You can make what use you like of this letter, as the book is worth it.

Wimbledon. J. W. H. OSWIN.

An Important New Weekly.

Readers should not fail to refer to the advertisement of the new weekly paper, "FOOD," which appears on Page 3 of this week's issue. It will be a paper which will be indispensable to everyone who has a piece of ground on which to grow vegetables, or a space upon which livestock of any kind may be kept. Don't miss the first number. Ready Jan. 18. Place an order with your newsagent at once, or you may be disappointed.

ANOTHER LINK WITH THE PAST BROKEN.

Death of Mr. J. Grutchfield.

We are sorry to hear from Mr. J. W. Ramsden that Mr. J. Grutchfield, the veteran "feeder" at Crystal Palace shows, has passed away. About a year ago we had the sad duty to announce the death of his co-worker, Mr. Small, so that the Palace shows of the future will be the poorer for the absence of both the faces which have been familiar for so many years to exhibitors and regular visitors. Generally speaking, the late Mr. Small attended to the Canaries and seed-eating birds, and Grutchfield to the soft-billed British and Foreign. Years of experience had made our old friend experienced in the requirements of all kinds of insectivorous and fruit-eating birds, and his "larder" at the Palace contained everything they could possibly require, while they were in his charge. When it is remembered that the Crystal Palace shows extended from the Friday to the following Tuesday, and that this involved the arrival of the birds on the Thursday, it will be appreciated that the task of attending to 2,000 and more birds was not a light one. Small and Grutchfield, however, were equal to any emergency, and were courteous and obliging to all and sundry, including those who were always troubling them with fanciful complaints. Their places will be hard to fill.

Singing Contests.

Announcements of forthcoming contests in the nature of advertisements must be paid for at advertisement rates, two words a penny.

SHEFFIELD.

Linnet contest, Sportsman Hotel, Paternoster Row, Jan. 7. Twenty birds sang: 1, Jackson; 2, Parlett; 3, Driver. Wainwright and Jackson sang a match after contest. Wainwright winning easily.—E. Phillipson, Sec.

BARNSLEY.

Dove Inn Linnet Club, Doncaster Road, Jan. 7. 18 birds entered for four prizes. Shepherd timer; Bamforth chalker, but a very poor company: 1, J. Norburn, 3.42; 2, France, 3.56; 3, Wright, 3.10; 4, Hardman, 3.16; very good time in 4mins., but no records broken.—J. Hardman, sec.

PONTEFRACT.

Linnet contest, Woodman Inn, Horsefair. Open sing, Dec. 23; 26 birds entered for three good prizes: 1, Jones; 2, Williams; 3, Nelson. Open sing, Dec. 30. Twenty birds entered: 1, 2, Jones; 3, Wingham. Open sing, Jan. 7, 41 birds, four good prizes, and some good singing was done: 1, Nelson; 2, 4, Jones; 3, Williams.—S. Pugh, Sec.

LEEDS.

Open contest, Jan. 7. Glassmaker's Arms, Greyhound-pl., York-rd. 26 birds. Linnets: 1, 2, G. Marshall; 3, 4, Watson. Canaries: 1, Lochwood; 2, Cullingworth; 3, Shaw.—T. Marshall, Hon. Sec.

Linnet singing contest for quality, Clarence Hotel, Skinner Lane, Jan. 7; 19 birds sang, when some extraordinarily good singing was heard. We should like some of the other clubs in Leeds to come and hear the marvellous runs and turns the birds are doing. 1, Binns; 2, Wigfield; 3, Summers. Judges, C. Ward, W. Lipman.—T. C. Summers, hon. sec.

West Leeds Linnet and C.F.A. Linnet contest, Prince of Wales Hotel, a good number of visitors present. Novice competition, 12 birds sang: 1, Wood; 2, Towes; 3, Jennings. Judges, T. Dobson, W. Moss; timekeeper, G. McNichols. Canary Contest, Viaduct Hotel, our invitation to fanciers from the other side of the city has not been in vain: 1, Thompson; 2, Dobson; 3, Stead; 4, Wood. 14 birds competed in close contest, and some very good singing was heard. Judge, J. Goodwill and J. Sellers; timekeeper, W. Moss.

Open Canary contest, Prince of Wales, Jan. 14, 7 p.m.—T. Cawood, Sec.—(Advt.)

The Lesser Redpoll in Cheshire.

In an interesting article in "The Field" of Dec. 30 "M. W.," writing of changes in the bird life of Cheshire, says of the Redpoll:

"Thirty years ago I remember this little finch as a fairly common winter visitor. Any time between November and March fair-sized flocks could generally be found frequenting the alders, but the bird was then almost unknown in the spring and summer.

"Latterly the bird has become quite common as a breeding species, but, strange to say, I now seldom see the flocks that used to be so noticeable in the winter, nor can I think of any explanation that would account for this change.

"Early in April small parties of Lesser Redpolls arrive, and before long the birds pair, though often a considerable time elapses before the nest is built. The date, in my experience, varies to some extent with the foliage of the hawthorn, for although at times these birds build in other situations, a tall, straggling hawthorn hedge is in this district most frequently chosen.

"I have known of five nests all within a few minutes' walk of one another in practically one length of fence, and from the frequency with which I heard the birds in the adjoining fields and lanes it is probable that others had eggs or young at no great distance.

"The call notes of the Redpoll are very easily identified; otherwise, owing to its sombre and inconspicuous plumage, the bird might often escape notice. The song, if such it may be called, is usually uttered on the wing, and consists of a few clear and rather pleasing notes, ending with a trill, which, to me, has a tinkling quality and is very characteristic. In addition, there is a sharp chirp of alarm, common to both sexes, which is often heard near the nest; it resembles a call of the Brambling, and will be recognised, even by those unacquainted with the Redpoll, as coming from a member of the finch family.

"The nest is very small, but varies considerably in size, and also in the materials with which it is composed. Often the lining is of willow down, though, in my experience, this is not used when the nest is placed in a low hedge or other situation where the white interior would show conspicuously.

"The down lining is, for a time, at any rate, very water resisting, though I do not suggest that the bird uses it for that reason. I remember, after a severe thunderstorm, finding a Redpoll's nest in the fork of a Siberian crab. It was some distance from the ground, but with the aid of a branch I managed to raise myself to a higher level, and saw, completely filling the nest, a huge globule of water the size of a golf ball, but on my emptying this out the beautiful white lining seemed perfectly dry and in no way the worse for immersion.

"The Redpoll is a particularly restless and energetic little bird. Even when the hen is sitting she rarely keeps still a moment, and is constantly turning her head, shuffling her wings, or changing her position. The cock pays frequent visits to the nest, often with food, and should his mate be away when he arrives he will occasionally take his place on the eggs, though he leaves at once if she returns.

"When the young are hatched both birds are most assiduous in their attentions, and they become very perturbed if anything approaches their home. Indeed, the nest is very easy to find, however well concealed, and I think that the observant Magpie and Rook, which in my district, at any rate, play havoc with fledglings, are often attracted to the spot by the excited manner and cries of the parent birds."

THE OLD AND THE NEW BELL GLUCKE.

By J. TOMLINSON (Newcastle, Staffs).

(Continued from page 757.)

Notes by a Roller Canary Judge upon a widely-discussed Tour.

I SAID in the latter portion of my first instalment, that exhibitors were waking up to the fact that the judge cannot give justice to these large classes. I can assure you that were the judge out simply and solely for a mercenary object, your club subscriptions and your entry fees would be larger than at present.

That is not the point I had in view, however, when I touched upon the subject of large classes, you who pay the piper have a right to call the tune. You have a right that after your entry fees are paid, and your exhibits accepted your birds shall have a fair hearing. It is for you to say whether the prevailing conditions shall continue, and whether the time limit, that is, the length of time the birds shall remain in the judge's room, shall be left to the judge's discretion, or whether you fix the time limit. Should you desire a time limit, then it is probable a few more birds may be marked no song. On the other hand, if classes are to be divided then your entry fees may be raised a little.

The Judge "Doing Time."

The majority of us are working men, and many of us are trade unionists. Our motto is a fair day's work for a fair day's wage. Now a word from a judge's point of view. Bear in mind I am neither grumbling nor complaining, but simply advocating justice, that fine asset which is an Englishman's pride. Of late, it is getting the usual thing for the judge to sit for 12 hours, with a break for dinner, and a snack of tea taken on the judging table. There is one of your judges who, in his desire to give all the attention he possibly can to the birds, absolutely refuses to leave his judging table to partake of dinner.

Such conscientiousness and honesty of purpose deserve all the praise one can bestow; that gentleman is Mr. Lyons. Other noteworthy actions and self sacrifices are continually being made by not one, but all of your judges, but this one illustration will suffice to show that neither your judges nor yourselves can obtain in the present conditions that justice which is due to both.

There is no necessity for me to describe the renderings of the old Bell Glucke; you will have heard them. Yet it had one virtue, the beautiful and pleasing impression imparted by a good rendering of the tour. It could be heard in all shades of sound, from audible to piercing, and the fact that the tour came frequently from one and the same bird pitched in different keys is one of the conditions that have set up so much misunderstanding. A bird has been on its good behaviour, and has been awarded points, and even a special for its B.G., under one judge, yet on another occasion it could do nothing right, hence the B.G. has been ignored.

A Tour with Imperfections.

An example may be quoted which came under my own knowledge. Two visitors in a show room noticed a bird singing loud, clattering, faulty B.G. "What's that?" asked one: "Oh, that's the B.G.," said the other. "Well, if thats B.G." said the one, "it is no good, as it sounds like chopping." In the end they adjourned to see the judge's decision as given on his judging sheet, and found points awarded. During their discussion I heard the same bird bring a well-rendered B.G., which had been lost to the two critics, through the noise of so many birds singing.

It is a great pity that this tour was ever introduced into a strain of birds which was without a doubt the best strain we had. We always heard the tour at its best in the young birds, and the younger they were, or rather the more quietly they sang the better came the B.G.

Naturally, the birds continued to win, and fanciers wanted the strain; they had it, many to their sorrow. Well, its no use crying over spilt milk, and it's nice to pay for one's learning. There is no misunderstanding now; the noisy rendering has to go, in fact it is going fast, and the strain in which it was introduced, the finest lot of birds that ever we had, has now as a strain, gone to rags

I could tell of one of our fanciers who, even when he was in his hey day with this strain, would not sell a feather to Roller fanciers for stock purposes, and this gentleman had paid £5 each for the cocks from which he had bred the stuff which he, in a self-sacrificing spirit, refused to pass on to the novice fancier.

The new style of singing the B.G. originated a few years ago in a London breeder's room; he did not know that he had it, so one can only conclude that it was lying dormant somewhere, and it came to light through an outcross or by in-breeding, the former I should judge, as he imported many birds privately. Even he, after other judges besides myself had awarded him points for it, was doubtful until I pointed it out to him at his own home.

These birds are now spread all over the country, and can be found on every show bench. The best of them are good, deep toned birds, the cream are scoring nearly all on their low tours, they are full of Glucke tours, but their good old fashioned Hollow-Glucke as "Gluk—Gluk—Gluk—Gluk," has on the whole disappeared. They are good on the H.R. and the Bass, and it was in one of these birds I heard the deepest (although short) and most mellow toned H.R. since the H.R. days. Their chief fault is Aufzug, some will bring bad flutes and sharp bell.

I gave you plenty of warning about the old B.G., and I will now give you just one word about the new B.G. It will not be faultless, for in many cases it will go flat, and flat enough to form a fault sufficiently bad enough to be penalised.

(To be continued.)

A SOUTH COUNTRY BORDER FANCY CANARY.

This pretty little Green Border Fancy Canary won 2nd Prize at Croydon Show for its owner The Rev. G. Soames, Bromley.

CANARY KEEPING FOR BEGINNERS.

By J. NORTH.

(Concluded from page 793.)

The Concluding Instalment of a Series of Helpful Hints on Management, Pairing, Breeding and Rearing, which should make the Hobby of Canary Keeping easy of pursuit by the amateur, and containing information of interest to older hands.

IT is remarkable that nearly everyone, the inexperienced fancier just commencing his career, and the totally uninitiated, both consider the yellow the preferable bird, and this decision is borne out by those who have become efficient in the cult.

It is more difficult to breed in nearly every variety than in the buffs, and it is very curious, but as a matter of fact two buffs will produce all buff youngsters, and if the buffing is not repeated the progeny do not show much evidence of their pedigree. But if two yellows are paired together all the resulting family do not turn out to be yellow, but some are buff and do not possess the stoutness of body or strength of feather which they would have done had their parents been represented by the two colours.

This peculiarity also obtains amongst Finch and Canary Mules, in fact, it is very hard work getting any yellow Mules, even from double yellow-bred hens.

If two quite clear birds are bred together most of the young ones come clear, and of a rather lighter tone of colour, so that it should be remembered that by running a variegated bird with a clear one, the depth of colour is kept up, as the variegated bird holds greater colour producing power than the clear bird.

The Formality of Introduction.

In the early part of the breeding season, say during the whole of March and part of April, when the cock and hen are first put into the breeding cage, they should be placed one in each compartment, so that they may become used to each other, for if they are strangers they will frequently fight no end, and should it happen that they have been in each other's company before it would often appear as if they had a great many things to disagree and wrangle about, and in some cases they take such an ineradicable dislike to each other that it becomes quite impossible for them to agree about starting married life.

Yet as soon as the weather gets really warm in April, after half the month has gone, the Canaries call and sing one to the other incessantly, and unless they are paired up there can be no doubt they are liable to get into a very depressed and unhappy condition, but if allowed to exercise their natural propensities they will set to work without the loss of a moment of time.

It is quite possible for a pair of birds to become the parents of a nest of newly hatched chicks in three weeks from the time they are put together, and, in fact, if the eggs had commenced maturing before pairing even a shorter time than three weeks would suffice.

We do not think a fertile egg could be laid within a shorter time than forty-eight hours after pairing, so if an un-mated hen had built a nest and laid her first egg at, say, 7 a.m., and a cock paired with her immediately afterwards, and not previously, it is quite possible that the third and subsequent eggs might be productive.

Some breeders get their hens to build their nests with any sort of material, and others manage to set their birds breeding without nests at all, although we have never yet found anyone clever enough to rear young birds without a nesting place.

The Beauty of a Natural Nest.

Some of the nest pans or tins are so nicely shaped and the material of their construction so economically contrived that there is not a particle of waste and not a millimetre of unoccupyable space, and being nicely lined with thick felt, the eggs lie snug and well arranged in the centre of the nest, but the correct building of the nest with the supply of suitable material is one of the most picturesque and pleasant features of the cult.

It is impossible to describe processes which will receive the endorsement of all, because means vary so much, and objects in breeding Canaries are so different. Some breed a few birds just as a hobby, others put up several pairs and strive for prizes, while yet a great many people pair up hundreds of Canaries and go in for merchanting them. Those ways of working which would suit one person would, therefore, not be acceptable to another, and our remarks are intended to interest those who share with us the pleasure of viewing well-made and pretty nests.

For this purpose the first or outside parts of the domicile should be constructed of dried grass and the coarsest kinds of moss, then the same in softer qualities, followed by red or brown cow-hair, and finished off with white cow-hair, thistledown, or lambswool.

It is dubitable whether a Canary hen can count up to ten, or even up to five, nor have we ever known one to complain that she had only four eggs to incubate although she had laid five, but we are convinced that they enjoy the prerogative of their sex, and are experts in the differentiation of colours, and know exactly what combinations best suit their style and complexion; they will not take green when they have pitched on brown, neither can you get them to cary away as a gift any red hair if they want white.

We do not care for cotton-wool for lining, nor for tow, although we know both are used, so is cut-up string, but the cotton wick of the old-fashioned "dip" candles has disappeared from the light of day and from the lambent flame of the petroleum hand lamp.

Egg Binding and Its Treatment.

When the hen has employed some few days in building, she will, when the nest is finished, sleep in it, and probably lay an egg in it at about seven o'clock the following morning, but if no egg is forthcoming, and the hen looks ill, "all of a lump," with feathers standing up, you may rest assured she is troubled with egg-binding, and unless speedily relieved will die.

A steam bath, by being held or placed over a jug of hot water, is the usual remedy, and a drop of olive oil may be applied to the vent, and a stimulant such as two drops of gin may be given with a quill by way of the mouth.

We are not old, and we are not green, although we like to admit we are more green than old, so we continue to learn things now and then; in fact, every day, and lately we have been assured that one drop of syrup of hypophosphites (not hypophosphates) is a sovereign remedy, and has saved the lives of some valuable hens during this trouble.

This syrup of hypophosphites is nearly white, or straw-coloured, or—so far as we can remember—the colour of old Scotch whiskey, not red, like Parrish's Chemical Food, which is a compound syrup of hypophosphates. It is somewhat confusing having two remedial agents so similar in name; it is worse than the man with twin sons, "Tweedledee and Tweedledum."

We have not yet had an opportunity of observing its influence, and we should like anyone who has the misfortune to have a hen suffering from egg-binding to try it and send the result of his experience to CAGE BIRDS, because anything that can be done to mitigate this very serious complaint is worthy the attention of any and every fancier. It is one of the most deplorable misfortunes that happen in a bird room.

Most fanciers remove the eggs as they are laid until they get three, and on the evening of that day return them to the nest, when the hen should immediately commence to incubate. The eggs should hatch in the morning of that day fortnight, but there can be no doubt that a high temperature, either generated by the mother, or occurring as a natural consequence of the summer season, will considerably shorten the period of setting, and eggs have been hatched on the twelfth day after the commencement of incubation.

The feeding with egg-biscuit food and the absence or presence of the father bird have already been treated of.

Correspondence.

New Society for Blackpool.

Further Support Needed.

SIR,—Re my letter in CAGE BIRDS of Dec. 30, I am sorry to say only two fanciers have responded to the call. I am willing to make a start and call a meeting if I can get names and addresses of four other fanciers who are willing to join. As soon as it reaches the half-dozen I will call a meeting to see what can be done.

H. KAY.

21, Portland Road, Blackpool.

Birds on the Rail.

A Fancier's Bad Luck.

SIR,—My birds at Gateshead had a similar experience to those of Mr. Hirst, of Accrington. They were despatched by the 6.22 train from High Westwood, a very short run to Gateshead. On the next day, when on my way to the show, the Station Master called me into the office, and there were two of my birds which had returned from Gateshead Station, and had never reached the show. I was very disappointed, as this was the last show but one for the N.B.M. and F.B.C. Cup, and I was leading in points. Since then my birds got through to Darlington, and I should have won the cup for this year.

W. H. CHRISTER.

Standard Cages and Uniform Drinkers for British Birds and Hybrids.

Hamilton, Lanarkshire, Takes a Hand.

SIR,—A meeting of fanciers in Lanarkshire interested in British birds, mules, and hybrids, will be held in Hamilton Town Hall, on Saturday, Jan. 27, at 7.30, for the purpose of forming a society whose aim will be the institution of standard cages and uniform drinkers. Fanciers who wish to support the above object and are unable to attend, can do so by sending their names and addresses to the undersigned.

WM. P. CAMPBELL.

Muirs Cottage, Larkhall.

New Secretary for Barrow.

The Retiring Secretary Returns Thanks

SIR,—I would be most grateful if you would allow me a space in your most valuable correspondence columns to tender my deepest thanks for the valuable support I received from the fancy in general at our recent open show, which was a great success in every respect. I am very grateful also for the great assistance I have received from your most interesting paper, CAGE BIRDS, which I eagerly look for every week end. I have been a reader of "C.B." for many years, and I have benefited during my long experience in bird keeping and exhibiting from the practical advice in its pages. I am retiring from the position of secretary of the Barrow and District C.B.A., as my time is so limited that I cannot possibly give it the time it requires to make it the Society I would like, although my two years as secretary have been very successful, considering the time spent on it. When I took it over there were eighteen members; I leave them with sixty-two. The financial position was £5 19s. 5½d. in hand; they have to-day £17 13s. 1d., and with the able support of the members I have been able to give £34 to various charities. As 1917 brings in a new set of office bearers, I trust they will receive the same valuable support, and that the club may go on to greater success. Office bearers for 1917:—President, Mr. S. Smith; Vice-President, J. Lancaster; sec., T. Croft; treas., T. Hale; auditors, W. Willison and M. Tranter; Committee, H. Edmonson, J. Neal, D. Brown, W. Crosby. All communications in future address to T. Croft, sec., 37, Methuen Street, Vickerstown, Barrow-in-Furness.

D. MCFARLANE.

How to Catch Bullfinches.

A Netting Query.

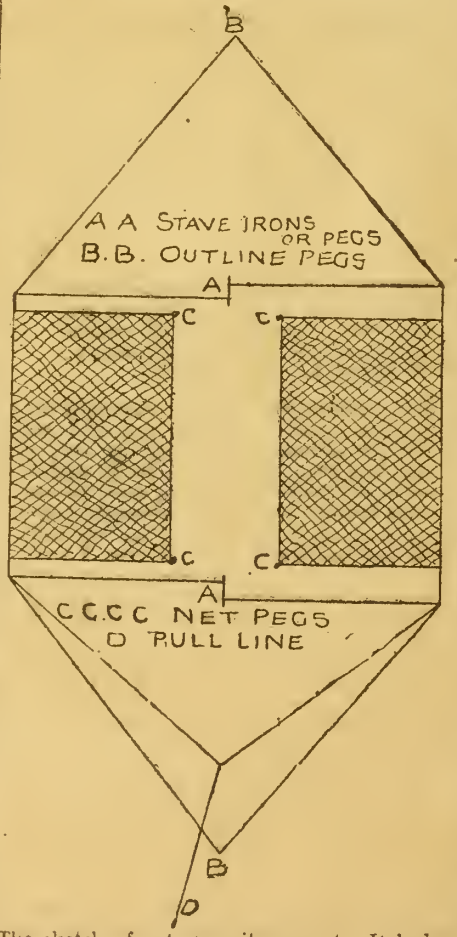
SIR,—I would like someone to explain through CAGE BIRDS how to set and use large clap nets. I have tried several times to set them, and have not been successful with them, as I frightened more birds than I ever got, for always something went wrong at the time to pull, so I have fallen back on the twigs and trip line to catch them. There are any amount of birds feeding on the ground, and I believe if I could use the nets I would get a better catch. I should also like him to tell how he sets his call birds, also whether he uses a bird on a flirt stick. My trouble is to get the birds to go on the limed twigs at this time of the year, as they are feeding on the ground on the seed that is on the ground. I have tried dummy birds on false bushes, but they are of no use, as every time the birds came they landed on the ground.

SPRINGBURN.

[The letter published below, which comes very opportunely, will, perhaps, help our correspondent.—Editor.]

The Nets and How to Use Them.

SIR,—Why is it so many fanciers, when they write in CAGE BIRDS on different subjects, make so many secrets? I mean by not saying all they know. Take the following sentence from the letter, "How to Catch Bullfinches." "Mac" says: "Thanks to the courtesy of a leading advertiser of bird nets, however, I have been able through correspondence both to set and use large clap nets effectively in the south-west of Scotland." Then he asks for more information on Bullfinch catching. Tell us how you set your own nets, Mac; give and take is a good motto. Nets can be laid and used in a field as uneven as a camel's back if there is a clear space large enough for the nets to lie; long grass does not matter so much, but there must be nothing like small bushes, etc., about. The important things in laying are to see that the staves lie flat together (earth can be taken out just where they lie if necessary), to peg nets down where there are no holes in ground, and to stand a little to one side of nets when pulling, as they must drop from the upright to one side together. With plenty of loose net, birds will not escape, as they are in between both nets.



The sketch of nets is quite correct. It looks rather funny on paper, but if the person using the nets will make sure he is standing to one side and not in the middle, by keeping the pull line a little to one side of pegs and not in line with them, the nets will work right. The ground space covered is not so much as if worked the other way. I have used large nets and small nets both ways, on very rough and dirty ground, for Linnets, Finches, and lots of other birds, and have always done very well.

YELNEH.

The Judging at Whitehaven Show.

Why Are Cage Tabs Marked?

SIR,—We beg to trespass on your valuable space again in answer to Mr. McLaughlin's letter. In the first place, why does a judge mark the labels if it is nothing to go by? In all our showing this season our prizes have always corresponded with the number marked on the label. It is only natural, seeing that it was his own bird that profited by the clerical mistake, that he claimed to have won 1st prize. He also makes a very big mistake when he says that our bird had her first and only win at Cleator Moor. She was second there, and her mother first. She had been out four times before Whitehaven, and was in the money three times, in classes ranging from 16 to 23. We know quite well that a judge's decision is final as regards judging, but clerical errors should be made right. We have it on authority that the special was not intended for Whitehaven alone, but for surrounding districts. We think he is trying to belittle our bird when he mentions Cleator Moor, but we are open to show our bird against his.

(Just as we close this letter our birds have arrived from Glasgow show, and we see that the bird in question has been awarded 2nd prize, also the figure 2 is on the label.)

COOK AND ADAMS.

We fail to see why the tabs on the cages are marked at all. All that seems to be necessary for the judge to do is to write the result of his judging on his duplicate slip, and hand the slip to the steward. The prize tickets should be made out from this slip, and placed on the cages.—ED. CAGE BIRDS.)

A Charity Show at Leicester.

Help Wanted for the Local Infirmary.

SIR,—The Leicester Hand-in-Hand C.B.S. are holding a charity show on Feb. 3, at the Vaughan College, Leicester. The proceeds are in aid of the soldiers' ward of the Leicester Royal Infirmary, and Sir Samuel Faire, J.P., has consented to open it. We want to make this a great success, and have decided to give the prizes on the sliding scale, so that the whole of the proceeds go to the fund. It is a deserving object, and the members are taking the matter up enthusiastically, giving birds for gift classes and competitions.

We should be greatly obliged if you would mention this in CAGE BIRDS, as we desire to get the support of all the fanciers in the county who are not members of our society.

D. ROBERTS, Joint Sec.

28, Francis St., Leicester.

Specials at Larkhall 1915 Show

All's Well that Ends Well.

SIR, — Mr. Park stated in his letter in CAGE BIRDS of Dec. 9 that if Mr. Thomson, the late secretary of Larkhall C.B.A., would send his special to the present secretary, he, Mr. Park, would send an equal sum to be added to our funds. I beg to state that I have received a P.O. for 4s. from Mr. Park, being the 2s. special which he won, and an equal amount from himself, and I beg to thank Mr. Park for his kind wishes in his letter to me.

T. H. MCGREGOR.
Secretary and Treasurer Larkhall Red Cross Show.

Is the City of Norwich Asleep?

Wake Up! Norwich Alliance.

SIR,—I believe I am in accord with the ideas of a great many fanciers in the Eastern counties when I venture to express surprise that a large city like Norwich is unable to hold an open show. Small towns half the size of the City of Norwich, with nothing approaching its "birdy" population, are making great successes, and handing over large sums of money to their local charities by means of successfully run bird shows. Norwich can do the same. What has become of the club with the high sounding title, the Norwich Alliance All England Society? Has it fallen into a moribund and parlous condition, or is its present position due to the Society having to contend with an executive, the bulk of whom are not fanciers, and who do not even keep and breed Canaries? That is what is being said quite openly in Norwich, and if that is so the sooner the real fanciers of Norwich bind themselves together the better it will be for the Norwich Canary breeding industry, and those real fanciers who have the well-being of the birds at heart. There is no time like the present. Do it now. Make a clean sweep, and start out with a good secretary and new executive.

EAST NORFOLK.

Why the Scotch Fancy is Not More Popular.

How Lectures Would Help.

SIR,—Once again I crave a small space in your valuable paper. I was pleased when I opened CAGE BIRDS to see a letter from Mr. Jowett, and I am also glad to see by it that the Scotch Fancy has admirers even in Yorkshire. I believe if the variety was properly understood it would have a greater following, and would come to the front once again. I see that some people object to the price; well, I have said several times that if you want a good pair of Norwich or Yorkshires that can win in an open class at a good show they will just cost at much as a Scotch Fancy. I am sorry to say that the Belgian is on the decline. It was once the king of the fancy, and no doubt is a beautiful bird. I cannot understand how it is that it is not more plentiful, as it always commands a fair price and there is a good market for it. I think if breeders of the Scotch Fancy and the Belgian would take the matter up, and pull together, and the clubs would have lectures on the management and breeding of the Bird O'Circle and the Belgian you would see a great change. When the members had a few birds to dispose of an advertisement to CAGE BIRDS would soon get rid of the spare birds. I know in Scotland that fanciers visit each other and exchange or sell to one another. Of course, a champion bird always commands a good price, but in all other breeds it is the same. I hope that out of this discussion some good will come, and that the day is not far distant when the bird of the Land O'Burns will come to the front again.

W. MCKEE DUNLOP.

After Six Years.

A Soldier Writes to His Father Through Reading "Cage Birds."

SIR,—I have just received a letter from my son, Tom Chittenden, from Manchester, saying that he has been in hospital there wounded from the Somme front. We have not heard of him for six years, and he writes that he is going to Glasgow on furlough. He said that he was looking through CAGE BIRDS, and saw that I was ill, and could not judge Halifax, which is correct I am sorry to say, for I have been very ill with congestion of the lungs. He has put no address, and if this letter should meet his eye or any soldier fancier who knows him I should be very glad if they would call his attention to it, and ask him to come home at once.

H. J. CHITTENDEN.

New Roller Club for Nelson, Lancs.

SIR,—At a meeting held on Jan. 2nd, at the Ambulance Hall, Ann Street, Nelson, it was decided to form a Roller Club, to be known as the Nelson and District Roller Club. Twelve members were present, and the following officials were elected: President, Mr. Liddle; Vice-Presidents, Messrs. Mawhood and Harrison; secretary and treasurer, Mr. J Earnshaw. The members of the club to form the committee. Meetings to be held at the Ambulance Hall on the first Tuesday in each month. Entrance fee, 1s., and annual subscription 3s. 6d. Members' wives to have the privilege of becoming members at 2s. per year.

It was resolved that we join the Northern Federation of Roller Clubs. A special meeting will be held on Jan. 11th at Harrison's Imperial Studio, Pendle Street, Nelson, when a few birds will be present, and the tours described.

J. EARNSHAW, Sec.

This letter was received after our issue of Jan. 6 was in print, and the meeting mentioned will have been held before the announcement can appear.—(ED.)

"Cage Birds" in Canada.

A Satisfied Reader Gets New Subscribers.

SIR,—I have delayed longer than I intended in writing to thank you for the 10s. prize money for my letter appearing in the issue of CAGE BIRDS of October 28. It came as a big surprise to me when I read that I was the lucky one.

I have received my weekly copy of CAGE BIRDS since my subscription started nearly a year ago without missing a single week, and as I cut out the interesting articles, etc., and paste them in a scrap book for future reference, I value each number.

The letters appearing each week are always very interesting, and each copy has so many items of interest that I would not feel just right without a copy every week, and I hope to be always able to get it.

I am herewith enclosing my subscription for 1917, along with those of three new subscribers, whom I have secured for CAGE BIRDS.

I hope to receive as good service in the future as I have in the past, for which please accept my thanks and [illegible]

Toronto. WALLACE C. JONES.

(Correspondence continued on next page.)

THE POULTRY WORLD.

CORRESPONDENCE.

(Continued from page 806.)

In Aid of a Stricken Roller Fancier.

Nearly the Full Amount Subscribed.

SIR,—Since my last I have received the following amounts:—Collection at Leeds Roller C.C. meeting, 14s.; grant from Leeds Roller C.C. funds, £1; Messrs. W. Whittlestone, 2s. 6d.; J. Netherwood, 2s. 6d.; H. Roebuck, 2s. 6d.; M. Neugebauer, 5s.; a total of £2 6s. 6d., making £9 8s. in all.

H. ROEBUCK.

72, New Brunswick Street, Thorne's Lane, Wakefield.

(We have ourselves received additional amounts as follows:—Mr. A. C. Westlake, 2s.; W. Shaw, 1s.; J. Bastock, 3s.; A. Smith, 2s. 8d.; G. Parker, 2s. 6d., so that the total amount subscribed is £9 19s. 2d.—ED. CAGE BIRDS.)

What is a Ticked Bird?

The Need for a General Agreement.

SIR,—The discussion on the disqualification of Messrs. Stubbs' bird by Mr. House has been interesting, if only as showing the uncertainty that exists throughout the fancy on the markings of birds. To fanciers of other live stock it must seem almost ludicrous that we, a big fancy, have no general rules governing these matters.

In our inmost minds we all have a feeling that a ticked bird is the nearest to a clear, and that feeling existed with old time fanciers. Yet in one popular variety it is possible to have a ticked bird more heavily marked than a "marked" one. What that means is that given three birds, a clear, a ticked, and a marked, the ticked one would be the farthest from the clear instead of the nearest to it; can anything appear more absurd to one fresh in the fancy?

Fanciers generally recognise the folly of having different definitions for the several varieties, consequently many of them have formulated a rule defining a ticked bird for their own shows. Year after year the number of the societies doing this is growing, consequently in the near future we shall have the curious spectacle of specialist clubs giving their patronage to shows where their own rules are not in force, or in other words they will be following instead of leading.

It is quite time this matter was settled, and unless the specialist clubs take action it will be settled for them; the fanciers custom will become law. The curious part about it is that, invariably all societies (not specialist) making their own rules have hit upon the same definition of a ticked bird, that is a single body mark not larger than a sixpence, or with the addition of one technical mark. What is the objection to it as a general rule? Please discuss it, and see if we can get any nearer to what is required. There is nothing more hurtful to the feelings of fanciers than to have birds "wrong classed," and there is no one more sorry for them than the judge who is obliged to do it. This can be remedied if clubs will unite, and make a simple definition that all can easily understand.

H. NORMAN.

"The Size of a Sixpence."

SIR,—With further reference to this question, permit me to say that the points raised by Mr. Cole do not help to settle the matter in dispute. Nor does the adoption of the sixpenny rule seem a preventive of similar happenings, for when a bird turned up with a mark whose fringe just extended beyond the stipulated size its owner would, unless, like the writer, easily satisfied, quarrel as to who should place the coin. Further, objection could be raised upon the grounds that a multiple of laws is confusing.

I disagreed with Mr. Cole's opinion of his own bird only because I knew that he was wrong on a point of fact. And I disagree with Messrs. Stubbs for the same reason. Although Messrs. Stubbs have written at some length, they have not advanced any well-founded argument in support of their contention, but have made a series of bald statements, and insist in putting their foot down upon everybody who tries to show how and why they are wrong. All have an equal right with themselves to an opinion, and I am of the opinion that before they retire from the fancy they will envy their correct statement on the writer "easily satisfied."

Touching upon the point in dispute, which is really whether their exhibit was a ticked or a marked bird when being judged in the absence of scheduled instructions. I say the bird is then a ticked specimen, and that statement is based wholly upon fact and knowledge of the only cage bird law that deals with the very point in dispute.

I back my reading of that law to the extent of one guinea upon the condition that Messrs. Stubbs' deposit with the editor of CAGE BIRDS an equal amount, together with the bird in question, within fourteen days, and that the editor secures either Mr. J. Barnes, Mr. T. Heath, or Mr. J. Robson to determine who is right. The judge to be guided entirely by the operation of the Yorks rule law referred to above, and not by the opinions of Dick, Tom, or Harry as to what it ought to be. My guinea is enclosed with this letter. Now fanciers see what happens.

F. J. MARTIN.

(We have received Mr. Martin's cheque for one guinea as stated, but we cannot see that a decision by either of the judges mentioned would affect the question beyond deciding the destination of the two guineas if the challengo were accepted by Messrs. Stubbs. It would only mean that Mr. House's decision was confirmed or disputed by one more vote, and the tone of Mr. House's letters seems to indicate that one more vote on either side would not alter his opinion.—ED. CAGE BIRDS.)

A Drawing Suggested.

SIR,—With reference to the disqualification of Messrs. Stubbs' bird by Mr. House, I am suro a little further light on this very interesting subject, what is really a ticked or marked bird, would be instructive to the fancy. If not asking too much, Messrs. Stubbs might give an outline drawing, showing the size of mark in dispute, so that outside fanciers and exhibitors could form their own opinion who is at fault. There are a few fanciers left yet with quite as long expericnce as some who boast of their past history.

MANXMAN.

Marks and "Technical" Marks.

SIR,—Mako the word "heavy" in my letter of Dec. 30 issue read extended, and this will explain to Messrs. Stubbs more fully my meaning. Whether I am in a position or not to give my views I will leave to older fanciers, but a bird without a technical mark will never be a marked proper wherever my opinion is asked.

Do as Mr. Cole tells you, word your schedules right, and all tho unpleasantness will be over.

C. E. SILK.

SIR,—A ticked bird has only one technical "dot" on its plumage. If a bird has more than one dark colour on its feathers larger than a pin's head and otherwise clear it is a marked bird.

If Messrs. Stubbs' bird has a saddle, and if I read properly, has another mark, then it is a marked bird, without any hesitation, and I must stick to this opinion even if I pull the "house" down.

J. KERSHAW.

From the Hon. Sec. of the Yorkshire Union.

SIR,—With regard to the controversy in CAGE BIRDS during the last few weeks as to what constitutes a marked bird, I may state that the Yorkshire Union, the Yorkshire Canary Club, and the other specialist Yorkshire clubs require a bird to be marked on two technical points to be able to compete in marked classes. The "technical points" are eyes, flight, and outer tail feathers. Some of the schedules issued down South, which state that "a ticked bird must show a visible mark or tick not larger than a sixpence or an otherwise clear body" are somewhat confusing to many fanciers. According to our ruling a bird marked or grizzled on the back with no two technical markings would have to compete in the ticked classes.

SAM MIDGLEY.

A National Society Required.

SIR,—I have followed the correspondence upon this question, and although there is no Norwich society that gives a definition as to what constitutes a ticked bird, we in the Midlands give our definition in our schedule, for in our rule 24 we define a tick as being a mark not larger than a sixpence, and a bird having a larger patch of feather than a sixpence must be called a marked bird. If all committees aid this, it would put a scotch on any one putting their own construction upon it. I am surprised that Mr. Roe has not answered Mr. House's statement that he has had more experience than Mr. Roe, which is altogether wrong. Mr. Roe, to my knowledge, has had moro years of experience as a Canary breeder than Mr. House has had months. I see he quotes Mr. Blakston as an authority; Mr. Blakston never posed as one. I remember before he wrote his book he sent a circular to all well known breeders stating he was about to write it, and would be glad of any information anyone could give him on the varieties they were interested in, and no doubt got all the material he wanted. While writing I should like to say I think it is time we had a national society for the protection of fanciers and the fancy, carried out upon lines similar to the Yorkshire Union, with a low subscription, say 2s. 6d. per year. There are a lot of things a good society could deal with. At present, what redress has a fancier like Mr. Andrews got? The judge gave him first prize at one show, and at the next show disqualified the bird for trimming. If fanciers think the time is ripe to start such a society, will they drop me a postcard if willing to join.

J. BASTOCK.

75, Springfield Road, Moseley, Birmingham.

£1,000 to a Grass Seed.

SIR,—Mr. Johnson would have greater respect for me if I would admit myself to be wrong. I am not going to perjure myself to secure the respect of Mr. Johnson. His attitude and that of some others seems to be that if you wish to be thought well of you must have no opinion of your own. I cannot share their views. If personal popularity is to come to me through taking the line of least resistance I prefer not to have it. The satisfaction of knowing I try to do my duty gives me far more pleasure than any that I could derive from trying to be all things to all men, and having no power to stand for honour and duty.

Messrs. Stubbs, like Mr. Johnson, scoff at Blakston. They will not learn from him. I am willing to learn from Blakston, he was one of the great masters of the past. One whom it was my privilege to know and follow. He was one who stood out for what he considered right. He cared not for the popularity which comes from being all things to all men. He was an authority when he was living, and even though he is dead I am proud to learn from him.

Messrs. Stubbs ask if the Norwich Clubs accept Blakston's definition. We have four or five Norwich Clubs, and yet they evidently have not given any definite ruling on this question. The Yorkshire Union has, but this is not a specialist club, it may be said. The Yorkshire Canary Club, the Cinnamon-marked Club, and the Border Canary Club, are in agreement with the Yorkshire Union, and what is good enough for them should be good enough for other branches of the fancy.

If what constitutes a ticked Border, or Yorkshire, does not constitute a ticked Norwich, or any other variety of Canary, where are we to be landed? Are we to have a different definition of marks and ticks for each variety? If we are then there will be trouble everlasting.

Although Messrs. Stubbs argue that their bird is marked, they admit it is grey or grizzly. On this acknowledgment the bird cannot be marked, because it has no solid mark about it. It is ticked all over the saddle, but very lightly ticked. It is not heavily ticked as some birds I have seen. Were it heavily ticked there would be more force and reason in the contention that it is a marked bird.

Why it should be expected that Mr. Silk would agree with me I know not. I mentioned a number of South Country judges, because the bird in question belongs to the South. Had I given the names of Northern judges it might have been said it "is only to be expected." As to what Messrs. Stubbs say about "heavy variegated birds." Their prophesy cannot come to pass because immediately you get heavy variegation you get either marked eyes, wings, or tail.

The object of this correspondence is to secure a definition of what is a ticked bird, at least I take that to be the object for which Messrs. Stubbs started it. That being so they should not scoff and sneer at those who disagree with them. They told Mr. Martin and other readers of CAGE BIRDS how their bird was ticked, and because Mr. Martin gives an opinion on their description he is held up to scorn. Had he agreed with them would they have scoffed at him?

Mr. Cole evidently considers there are marks and technical marks. He, however, considers the bird is marked, at least I draw that inference from what he says. Now, the peculiar thing about this bird is that it has not a mark anywhere as large as a sixpence. It has no solid marking whatever. its saddle is flecked or ticked, there is no solid patch of marking. If there were it is almost certain that the bird would have been one I should call marked, beause had the saddle been solid in its dark feather it is £1,000 to a grass seed the wings would have been marked also.

It seems to me that Messrs. Stubbs are more concerned about my declining to admit my action was wrong than they are to solve the problem—What is a ticked bird? I stand for what I believe to be right according to the rules and traditions of the fancy. Should all the Norwich clubs decide what is a ticked bird I, as a judge, should act according to their ruling, whether it was in agreement with my own view or not. I will recognise an official ruling, be it for or against my opinion, but I will not accept the ruling of any other fancier or judge. I do not allow other men to form my opinions. I exercise my own brains, even as I allow others to use theirs. There is one curious feature about this discussion. Not one of all those whom Messrs. Stubbs described as "all who saw the bird" at Aberavon and Birmingham have written a word on this matter. If they all agree with Messrs. Stubbs why have they not said so?

C. A. HOUSE.

CLUB AND SOCIETY NOTICES

ONE NOTICE of any forthcoming Society meeting inserted free. It must reach us not later than Tuesday morning's post. Specially printed Club Notice Postcards may be had free on application to our Manager. Secretaries should always use them.

Ardwick and Manchester C.B.A.—Jan. 16, St. Thomas's School, 8. Election of officers; rules for 1917. Arrangement of table show for Jan. 27.—A. E. Thorpe.

Birkenhead C.F.A.—Jan. 16, Ableits Cafe Rooms, Market St., 8. Annual pair show; entry fee 7d. Fanciers invited. Subs. 4/- per annum; also prospective candidate to attead.—A. E. Lloyd.

Blaydon C.B.S.—Jan. 13, Co-op. Library, 7.30. Important business; local fanciers invited.—Geo. Havver.

Bolton Woods C.B.S.—Jan. 13, Victoria Hotel, 7. General meeting; business: election of officers, bal. sheet, arrange for smoking concert, prize-money, etc.—H. Fretwell.

Bowling B.F.A.—Jan. 15, Barley Mow Hotel, Last show, judge, S. Wilcock; stage at 3; steward, T. Robinson.—J. Nicholl.

Bradford East O.S.—Jan. 16, Park Chapel School-rooms, 8. Distribution of prizes and coffee supper; consideration of Union shows, etc. A hearty welcome to new and old fanciers.—J. Spencer.

Bradford West C.B.A.—Jan. 13, Shoulder of Mutton, 7.30. Election of officers (Union business), most important.—F. P. Terry.

Cardiff C.B.S.—Jan. 16, Godfrey's Dining Rooms, Trinity Street, 8. Fix date of pair show; elect judges and receive report of the open show.—E. Thomas.

City of Bradford O.S.—Jan. 13, Flying Dutchman, 7.30. Election of officers for 1917; balance sheet for 1916.—W. Helliwell.

East Ham C.B.S.—Jan. 18, East Ham Town Hall, 8. Important business re Inter-Club Show.—F. Onslow.

East Ham F.S.—Jan. 18, Headquarters, 8. Report and balance sheet for 1916. Election of officers, etc., for 1917.—W. A. Harwood.

Wombwell B.F.A.—Jan. 20, Ship Inn, 7. Special general meeting, balance sheet and other important business.—F. Moore.

ROUND THE SHOWS.

PONTYPOOL.

First annual open show of the Pontypool C.B.S., St. James's Hall, Jan. 4. Entries totalled just over 800, a rather disappointing number, considering the classification offered, but no doubt it was largely accounted for by exhibitors being rather afraid of risking their birds any great distance, owing to the restricted railway service. The hall is well lighted on two sides, and the birds were arranged in tiers at a convenient height, giving visitors an opportunity of seeing all the exhibits without the slightest inconvenience. The arrangements were in the hands of Mr. W. Amphlett, the show manager, who carried out his duties in a very able manner, being ably assisted by a hardworking band of stewards. The sec., Mr. W. D. Lewis, is an ideal official, being at all times courteous and obliging. Nor. were very fine, though not large in numbers, Messrs. Stubbs Bros. putting down a grand team, including the much discussed grizzled buff, and carrying off the majority of the awards. Yorks were also good, yet small in numbers, some really splendid exhibits being staged by Messrs. Watkins, Cooper, Pavey, Griffiths and Pritchard. In Borders Mr. Lapworth did the hat trick, and carried off the premier honours in each class. Novices were strong in all departments. Nor. totalled 49 in three classes, and Yorks 59 in four classes, many of the winners being equal in every respect to those in Champion classes. Novice Borders only had one class, Mr. Bevan's winners being a brace of real gems. In British and Mules, Mr. Lloyd James and Mr. Chick put down some of their well-known winners, including the latter's Cl. Greenie-Can. Mule, which was much admired. Mr. J. Houghton judged.

NOR. CL., ETC., YELL. CK. (5): 1, Jones, lovely qual.; grand head and neck, nice deep chest, splendid wings and tail, good subs.; 2, Broome Bros., cl., good size and shape, nicely rounded head, well balanced wings and tail, lovely col. and qual.; 3, Tedstone; vhc, Stubbs Bros.; hc, Edwards. (8): 1, r, Griffiths; 2, Loveday; 3, Sweet; vhc, c, Read; hc, J. Griffiths.

HALIFAX.

3rd annual exhibition, Liberal Club, Haugh Shaw Road, King Cross, Dec. 30. The room is an ideal one for a bird show, being well lighted and free from draughts. Entries numbered 606 from 70 exhibitors—a very good result considering that the show had to be put back a week owing to the railway restrictions during the previous week. Most of the Yorkshire cracks were on exhibition, and the classes throughout were very even. The society have in Mr. A. Sutcliffe a real good secretary, and the way he got through his duties is deserving of the highest praise. He was ably assisted by Mr. E. Stobart, and the stewards, Messrs. Gelder, Mitchell, Priestley, Senior, Clem Wilson, Cundell, and Stansfield. The judge, Mr. A. Radley (Skelmanthorpe) got through his work in good time and seemed to give general satisfaction. The prize money was paid out to all who attended during the afternoon, and the packing up and sending away of the exhibits was got through without a hitch.

CL. OR TKD. YELL. YORKS (11): 1, Stobart, cl., splendid type, feathered like wax, grand head, wings well braced, well up on leg, and shown in best cond.; 2, Brown, grizzle on head, rather stronger in build, lovely qual., nice shaped head, stands correct, rich col.; 3, Lunn, cl., beautifully moulded, only beaten in length; 4, A. Radley; vhc, Padgett; hc, Dykes; c, Hartley. BUFF (12): 1, Sharpe, cl., grand length, lovely shape, wings and tail well placed, sound level col., well staged; 2, Hodgson, cl., close up to leader, type and qual. lovely, stands correct on good legs, fine cond.; 3, Dr. Craig, wonderful length, very stylish, fine silky feather; 4, A. Radley; vhc, Burdekin Bros.; hc, A. Hirst; c, R. E. Helliwell. UNFLIG. YELL. (13): 1, Thomas, cl., standard length, feather like silk, rich col., splendid wing carr., A1 pos., gem; 2, Dykes, tkd., grand length, nice shape, full of nerve, showing breed, nice level col., well shown; 3, Dr. Craig, even mkd., nice length and shape, lovely qual., stands well; 4, Sharpe; vhc, Speak; hc, Burdekin Bros.; c, W. Helliwell. BUFF (9): 1, Thomas, cl., beautiful shape and qual., grand head, well-fitted neck, wings and tail perfect, A1 pos.; 2, Hartley, cl., grand length, fine boxy feather, nice head and neck, hardly as straight as leader; 3, Padgett, cl., very hot col., very stylish, nice qual.; 4, Lunn; vhc, Gledhill; hc, Dr. Craig; c, Sutcliffe. UNFLIG. YELL. HEN (9): 1, Thomas, cl., beautiful shape, nice length, straight as a rush, head, wings and tail well carried, rich tone of col.; 2, Lunn, mkd., another lovely lady, excels in qual., stands correct on best of legs, beaten a shade in length; 3, Sharpe, tkd., very typical, nicely feathered, but less; 4, Gledhill; vhc, Towers; hc, Dr. Craig; c, Sutcliffe. BUFF (6): 1, Thornton and Robertshaw, cl., grand length, nicely moulded feather, tight as wax, wings perfectly carried, a real model; 2, Rigg, cl., plenty of length, nice shape, head nice and round, wings and tail well placed, hardly as full as leader, shown well; 3, Hartley; 4, vhc, Sutcliffe; hc, Ellis. CL. OR TKD. YELL. HEN (8): 1, Dykes, cl., splendid type, straight as an arrow, richly coloured, wings perfectly placed, stands well up on best of legs, well benched; 2, Padgett, cl., plenty of length, fine silky feather, nice pos., good head, well balanced on shoulders, grand wing carr.; 3, Rigg, cl., lovely type, very stylish, only beaten in size; 4, Lunn; vhc, Sharpe; hc, Priestley; c, Walsh. BUFF (7): 1, Thornton and Robertshaw, cl., correct shape, nicely rounded and well drawn, best of heads, well filled neck, wings perfect, fine cond.; 2, W. Helliwell, cl., nice length, fine silky feather, stands well up, showing breed and full of nerve; 3, Burdekin Bros., cl., lovely shape and qual., rather short of bloom; 4, Thomas; vhc, Priestley; hc, Sutcliffe; c, Gledhill. MKD. YELL. (9): 1, Dykes, even mkd., the noted "Dreadnought," splendid shape, wonderful length, rich in col., stands like a guardsman, put down in best cond.; 2, L. Hodgson, sen., var., very lengthy, feather smooth as glass, correct pos., on good legs, well benched; 3, 4, J. Taylor, uneven mkd., nice length, lovely qual., hardly as long in body as leaders, 4th wonderful length, nice qual., wings and tail well braced; vhc, Sutcliffe; hc, Towers; c, Hall. BUFF (10): 1, Gledhill, even mkd., beautifully moulded, one of the best for col., good head, full neck, wings well carried, A1 cond.; 2, Dykes, var., another good one, wonderful length, slim, feathered to perfection, lovely shape and style, only beaten in col.; 3, Brown, uneven mkd., hot in col., very stylish, stands well up; 4, Towers, even mkd., plenty of length, fine qual.; vhc, Hartley; hc, Hall; c, Midgley. GREEN MKD. YELL. HEN (13): 1, Gledhill, even mkd., one of the best, correct length, well up on leg, feather as tight as wax, rich col., shown in faultless style; 2, Midgley, another good one, lovely type and qual., evenly built all round, nice head and splendid wing carr., just a shade less; 3, Hartley, strong in markings, very hot in col., nice qual. and type; 4, Sharpe, even mkd., rather less, fine feather, full of nerve, bit breedy; vhc, L. Hodgson, sen.; hc, J. Taylor; c, Priestley. BUFF (10): 1, Towers, even mkd., beautiful shape, one of the best for qual., good head, well filled neck, wings and tail well carried, best of cond., wins; 2, J. Taylor, mkd. eyes, head and wings, lovely qual., nicely drawn and stands correct, head well balanced, rare wing carr., staged well; 3, Ratcliffe, typical, nice feather, just a wee bit racy; 4, Hartley, uneven mkd., plenty of length, rare qual.; vhc, Padgett; hc, Hall; c, Gledhill. CINN. TKD. OR VAR. YELL. (8): 1, Dykes, mkd. eyes, head and wings, wonderful length, correct type, rich tone of col., rare qual. of plumage, one of the best 2, Dr. Craig, mkd. similarly, very hot in col., tight as wax, lovely pos., hardly the length, best of cond.; 3, Morrison, grand type and qual., hardly as nice in front; 4, Brown; vhc, Towers; hc, Sutcliffe; c, Walsh. BUFF (9): 1, Dr. Craig, uneven mkd., splendid type, feather like silk, sound in col., grand head, round body, wing carr. perfect, well up on leg, shown well; 2, Dykes, uneven mkd., one of the best for shape, nice length, well cut away, A1 pos., hardly as rich col.; 3, Brown, steady as rock, lovely qual., rather less; 4, Priestley; vhc, Ratcliffe; hc, Wooler; c, Midgley. CINN. TKD. OR VAR. YELL. HEN (9): 1, Priestley, nicely mkd., beautiful shape and style, rich col., one of the best for type, well up on leg; 2, Dr. Craig, even mkd., stylish, shows breed slightly, feather of the best, level col., neat wing carr.; 3, Dykes, plenty of length and nicely drawn, will do better; 4, Morrison; vhc, hc, Midgley; c, Sutcliffe. BUFF (8): 1, Morrison, var., best of qual., keeps up well, grand head, back and wings, nice col., pos. good, fine cond; 2, c, Towers, very straight, silky in feather, finely tapered, not quite the size of the winner; 3, A. Hirst, uneven mkd., very stylish, rare wing carr.; 4, Dykes; vhc, hc, Sutcliffe. SELL., 15s. (9): 1, P. Taylor; 2, hc, Savile; 3, vhc, Sharpe; 4, Speak; c, Mitchell. HENS (7): 1, Robinson; 2, Sharpe; 3, Haggis Bros.; 4, Savile; vhc, A. Radley; hc, Jowett and Robertshaw; c, Wooler. BRIT. HARDBILL (6): 1, vhc, Duncan and Macpherson, 1st Chaffinch; 2, Helliwell, Bramble; 3, 4, Dunn, Yellowhammer and Greenf.; hc, Shaw.

THE NOVICE CLASSES. LIMIT £5 5s.

BRADFORD EAST.

Eighth annual show, Dec. 16, in the Park Chapel Schools, West Bowling. Entries numbered 295, the quality all round being well up to the standard. The Rose Bowl classes were a great success, as in previous years, many birds of exceptional merit being staged. The winner having had to be bred by the exhibitor, Mr. J. A. Greenslade, Bristol, won the trophy with a third prize bird of exceptional quality, position and carriage. The arrangements were carried out in an expert and business-like manner. Mr. J. A. Chittenden, Bradford, judged, and gave general satisfaction.

YORKS., CL., ETC. YELL. (11): 1, Dykes, good length, erect pos., rich level col, fine shape, full of qual., wins; 2, Padgett, rare length, pos., and shape; 3, F. Self, paler in col., but a bird of exceptional character, must have pressed for 2nd place; 4, Hartley; vhc, Stobart; hc, Dyson; c, Lunn. BUFF (11): 1, Hartley, A 1 pos., feathered like wax; 2, Thomas, beautiful shape, good flights and tail; 3, Briggs, rare size and col., not so good on leg; 4, Gledhill, good head and feather; vhc, Dr. Craig; hc, Dykes; c, Walker, might have been higher. TKD. YELL. (7): 1, 4, Dykes, leader well known wing tick, a blaze of col.; 4th, check tick, rare qual.; 2, Snead, very neat, grand head and shoulders; 3, Walker, tkd. head, paler in col. BUFF (6): 1, Govier, neck tick, lovely shape, neatly staged; 2, Dykes, wing tick, feathered like glass, close up; 3, Dyson; 4, Snead; vhc, Brown. UNFLIG. YELL. (Rose Bowl) (17): 1, Thomas, nice length, erect pos., a real good one; 2, Dr. Craig, another charmer, unevenly mkd.; 3, Greenslade, splendid quality, position and carr., only beaten in size; 4, Snead, very typical, good head, neck and shoulders; vhc, Rigg; hc, Sunderland; c, Helliwell; good class. BUFF (Rose Bowl) (16): 1, Padgett, a clinker, ought to do well; 2, hc, Thomas, splendid col., rare shape, stylish; 3, Lunn, good size and qual., fails style; 4, Hartley, rare length and style; vhc, Helliwell; c, Briggs. UNFLIG. HEN, YELL. (9): 1, Thomas, charming lady, bad to beat; 2, Bray, neck tick, very neat and racy; 3, Lunn, rare qual. and carr.; 4, Hirst, paler in col., extra length and qual., we thought might have stood 2nd; vhc, hc, Greenslade; c, Helliwell. BUFF (11): 1, 2, Hirst, good one, a credit to owner; 3, Thornton and Robertshaw, fine type and qual., paler col.; 4, Dr. Craig, splendid pos., shape and qual., close up; vhc, Dykes; hc, Hartley; c, Thomas. CL. OR TKD. HEN (7): 1, c, Snead, marvellous col., well up on leg; 2, Dykes, clinker for style and shape; 3, F. Self, good qual., well up; 4, Lunn; vhc, Padgett; hc, Briggs. BUFF (8): 1, 2, Helliwell, 1st, rare size, good head, neck and feather, nicely cut; 2nd, lovely shape, carr., and qual., not so good in head; 3, Bray, head and wing mkd., grand feather and well up; 4, Thornton and Robertshaw, very neat and stylish, must have pressed 3rd hard; vhc, Gledhill; hc, Suddards; c, Govier. VARIEG. YELL. (10): 1, Dykes, old champion, looking in the pink, easy win; 2, Hodgson, Senr., wonderful length, leg and side, have seen him look better; 3, 4, Taylor, 3rd, mkd. eyes, head and wing, beautiful character, lovely wing and pipe tail; 4th, head, neck and wings, rare col. and qual., a brace of good ones; vhc, c, Hall; hc, Walker; c, Sutcliffe. BUFF (9): 1, Dykes, mkd. eyes, wing and neck, well balanced, good nock, wing and tail; 2, Hirst, not looking well, when we

(Continued on next page.)

Nests of Birds, Poultry, etc., should be regularly sprinkled with KEATING'S POWDER, especially when hens are sitting. Don't forget to do this just previous to the eggs hatching, to destroy the Red Mite. Kills all insects. Harmless to everything else.

SHOWS.

(Continued from page 12.)

say it; 3, Towers, mkd. eyes and wings, extra col., feathered like silk; 4, Gledhill, plenty of size, good stand, looking well; vhc, c, Hall; hc, Brown; c, Helliwell. YELL. HEN (10): 1, 2, Midgley, gems for quality, style and pos.; 3, Gledhill, good marking, level col., close up for 2nd; 4, Taylor, head, neck and wings, good stamp, rare qual. and pos.; vhc, Towers, looking well, might have stood higher; hc, Brown; c, Briggs. BUFF (12): 1, Towers, shown to perfection, rare stamp, wins; 2, Hall, mkd. head, eyes and wings, very stylish, cut well away; 3, Hartley, cheeks and wing, rare qual. and pos., fails waist; 4, Taylor, nice col. and qual.; vhc, Padgett; hc, Ratcliffe; c, Dykes. CINN. TKD. OR VARIEG. YELL. (5): 1, 4, Dykes, 1st mkd. head and wings, well up, stylish, easy win; 2, Morrison, mkd. head, wings and checks, rare col., qual. and size; 3, A. Brown. BUFF (6): 1, Towers, gem for col. and qual., well rounded; 2, Craig, well up, full of style, neat wiugs and tail; 3, Midgley, head, eyes, and wing mkd., lovely shape, fails head and neck to leaders; 4, Morrison; vhc, Dykes; hc, Ratcliffe. YELL. HEN (9): 1, Dykes, best of markings, full of qual. and type; 2, vhc, Dr. Craig, erect pos., good head, neck and qual., close up; 3, Morrison, very racy, well cut away, paler col.; 4, Midgley, one we liked well, might have stood higher; hc, Helliwell; c, Sutcliffe. BUFF (7): 1, c, Dr. Craig, real gem, probably quite the best out; 2, hc, Towers, mkd. eyes and wing, lovely qual., very stylish; 3, Morrison; 4, vhc, Sutcliffe. SELL. YELL. CK. (6): 1, 2, Farrar; 3, Taylor; 4, Spencer; vhc, Rushworth; hc, Hodgson, Junr. BUFF: 1, Taylor; 2, 4, Midgley; 3, Nicholl; vhc, Woad. HEN: 1, Pownell Bros.; 2, Hecley; 3, Farrar; 4, Gledhill; vhc, Ormondroyd; hc, Taylor.

NOVICE CLASSES, LINNET. £5 5s.

CL. OR TKD YELL. Ck. (10): 1, McEwen, a clinking good exhibit, should do well in the open, neatly staged; 2, Lloyd, rare length, straight as a rush; 3, Crowther, another good one, good head, neck and tail; 4, Pownall Bros., rare stamp, good style and qual.; vhc, Chapman; hc, Taylor; c, Bloomfield. BUFF (19): 1, Hamlyn, A 1 pos., grand shape, good stand, wins; 2, Hodgson, Junr., lovely col., not so shapely as winner; 3, Robinson, extra pos., style and qual.; 4, S. Firth, our fancy for third place; vhc, H. Firth; hc, J. and F. Haggis; c, Andrews. GREEN MKD. (12): 1, Hamlyn, yell., neatly marked, very nice boxy feather, rare col.; 2, Cowell, Buff, mkd. eyes and saddle, good style and length, in the pink; 3, Crowther, buff, mkd eyes and wings, loses in shape; 4, Robinson, yellow, mkd. eyes and wing, nice type and qual., must have pressed; vhc, Sugden; hc, Hodgson, Junr.; c, Rushworth. HEN (8): 1, Andrews, yell., variec., clean cut, good head and carr.; 2, Chapman, buff, nicely mkd., fine type and qual.; 3, Bolton and Dunn, buff, fair markings, close feather and good stand; 4, McEwen, yellow, cheek and wings mkd., a nice exhibit; vhc, Crowther; hc, J. and F. Haggis; c, Hodgson, Junr. UNFLIG. YELL. (5): 1, Crowther, wing tkd., rare length, lovely type, A 1 quality; 2, Cowell, wing tkd., red-hot col., well up, beaten in size; 3, Chapman; 4, Ormondroyd; vhc, Sugden. BUFF (14): 1, Firth, plenty of size, good head, neck and wings; 2, Alloft, close feather, fine carr.; 3, Fisher, nice front, cut well away; 4, Sugden; vhc, Crowther; hc, Ormondroyd; c, Anderson. YELL. HEN (6): 1, McLaughlin, capital length, good shape and finish; 2, S. Firth, neat shape and nicely braced; 3, Richorde; 4, A. Firth; vhc, Bower; hc, Taylor. BUFF (11): 1, Fisher, charming, neat, staged well; 2, Wilman, another good youngster, of fine qual.; 3, Naylor, good character and finish; 4, Taylor, nice and stylish, close up; vhc, W. Firth; hc, Bloomfield; c, Bolton and Young. CL. OR TKD. YELL. HEN (7): 1, McLaughlin, good size, fine. qual. and pos.; 2, Lloyd, very stylish, well up on leg; 3, Wilman, rare qual. and style, fails carr.; 4, hc, Spencer, extra type, we thought might have gone up; vhc, Earles; c, Anderson. BUFF (12): 1, Hamlyn, rare length, lovely back and finish; 2, W. Firth, very neat, good head and neck; 3, Taylor, nice boxy feather, runs second well; 4, Hodgson, Junr., extra col. and qual., fails carr.; vhc, Crowther; hc, Wilman; c, Cowell. CINN. TKD. OR VARIEG. CK. (8): 1, Hodgson, Junr., neatly mkd., fine head, rare length, well up on leg, very shapely; 2, Andrews, eyes and wing mkd., not so finely drawn; 3, Chapman, not so well mkd., but runs 2nd a good race; 4, Pownall Bros.; vhc, Hamlyn; hc, Robinson; c, McLaughlin. HEN (9): 1, Chapman, yell., head, eyes and wing mkd., rare size, nice col. and carr.; 2, Woad, buff, extra qual. and markings; 3, Hodgson, Junr., yell., head and wing tkd., neat boxy feather, good on leg, well cut away, might, we thought, have been higher; 4, c, Andrews; vhc, Pownall Bros.

CITY OF BIRMINGHAM R.C.C.

Fourth annual contest under patronage of British Rollor C.C., Dec. 13, 14, at Crown Hotel, Birmingham. The same rooms as last year were again used. The record entry of 217 birds for this fixture was received, being 79 more than last year, and twice as many as in 1914. The novice young bird class pulled up well with 80 entries. A nice array of special prizes was in competition, the majority being in cash. In champion and novice young birds the Birmingham C.B.S. gave 10s. for best bird in each class, and the B.R.C.C. 7s. 6d. each for the 2nd prize winners, and seven other cash specials were given by members and friends in each of these classes. Mr. W. Pimra. Birmingham, presented a good specimen of a show cage, also a training cage, for the second best birds in classes 4 and 5. A silver medal was given by Mr. R. Berry for best bird in class 4; the remainder of the specials in these classes, and in class 3, consisted of cash. Mr. W. Taylor, the Hon. Sec., won the members' cup, and Mr. Layland's spl. for most points. Claims were made for three of Mr. Taylor's birds. The winner was put to auction and bought in by the owner. There was a fair attendance of visitors on the Thursday from the Midlands.

A rather unfortunate occurrence took place on the Thursday evening, for after packing up the exhibits the railway company refused to accept them. This necessitated unpacking, and all birds were fed and watered again. All the members turned up on the Friday morning, and all the exhibits were in the railway company's hands about noon. Judges were: Mr. J. Tomlinson (Newcastle, Staffs), Mr. J. Willows (Wednesbury), and Mr. Lyons (Blackburn). This is the third successive year that Mr. Tomlinson has judged at this fixture.

CHAMP YOUNG BIRDS (51). Judge, Mr. J. Tomlinson: 1, spl. W. H. Shepley, HR 4, bass 4, schocked 2, F 3, WR 3, WG 2, BG 4, BT 1, BR 2, GE 5, total 30; 2, spl, J. Tomkins, HR 5, HB 3, S 3, F 2, WR 2, WG 2, BG 2, DBWT 1, BT 1, GE 4, total 25; ex-3, spl, W. Tomkins, HR 4, HB 3, Bass 2, S 2, F 2, WR 2, BG 3, DBWT 1, BT 1, BR 1, GE 4, total 25; 4, spl, J. Heatherley, HR 4, HB 2, B 3, F 3, WR 3, WG 6, BG 3, BT 1, GE 3, 1 off, total 24; ex-4, spl, W. H. Shepley, HR 5, HB 2, B 3, F 3, WR 3, BG 4, BT 1, GE 4, 1 off, total 24; 1, vhc, A. Harper, Miss Dockery, 23 points; 2, vhc, W. Rhodes, R. Grainger, W. H. Shepley, W. G. Bird, 22 points; hc, W. H. Shepley, A. Harper, 21 points; c, T. Twig, W. H. Shepley, A. Harper, Miss Dockery, J. Hunter, A. Gooding, 20 points. NOVICE YOUNG (80). Judge, Mr. J. Willows: 1, spl, Miss F. Dockery, RH 6, B 5, S 4, F 3, WR 2, WG 4, GR 4, GE 4, total 32; ex-1, spl, W. Taylor, HR 6, B 3, S 5, F 3, WR 2, WG 5, BT 1, BR 1, GE 5, total 31; 2, spl, Miss Dockery, HR 5, B 5, S 4, F 3, WR 2, WG 4, GR 3, GE 4, total 30; ex-2, spl, H. Layland, HR 6, B 4, S 4, F 2, WG 3, GR 4, BG 2, BR 1, GE 4, total 30; 3, spl, T. Brookes, HR 6, B 4, S 4, G 3, F 3, GR 4, BT 1, BR 1, GE 4, total 30; ex-3, spl, M. Mason, HR 6, B 4, S 4, F 3, GR 4, BG 2, BT 1, BR 1, GE 4, total 29; 4, spl, Miss Dockery, HR 6, B 4, S 4, F 3, WR 2, WG 3, GR 3, GE 4, total 29; ex-4, W. H. Woodall, HR 6, HB 2, B 5, S 4, F 3, BT 1, BR 1, GE 4, total 29; vhc, R. Berry, W. Robinson, W. J. Plant, C. W. Kimpton, 28 pts. ea.; hc, W. Robinson, H. Roath, W. Taylor, J. T. Dudley, T. Brooks, W. Millward, 27 pts. ea.; c, H. Roath, J. Thompson, R. Berrley, J. Wyre, 26 pts. each; spl. for best glucke, C. W. Kimpton. CHAMP. ANY AGE (15). Judge, Mr. J. Lyons: 1, spl, H. Appleby, HR 5, HB 2, B 5, S 3, G 3, F 2, WG 2, WR 2, BT 1, BR 1, GE 3, total 30; 2, sp, Miss Dockery, HR 6, HB 2, B5, S 3, F 2, WG 2, GR 3, BT 1, BR 2, GE 4, total 30; 3, spl, T. Twigg, HR 5, HB 3, B 5, S 2, F 2, WR 2, WG 2, BG 2, BT 1, BR 1, GE 3, total 28; 4, spl, F. W. Hayward, HR 5, HB 2, B 4, S 3, F 3, WG 2, BG 2, BWT 2, BT 1, BR 1, GE 3, total 28; vhc, W. Rhodes, R. Grainger, H. G. Hill, 28 points; hc, J. Dimmock, J. Heatherley, 27 points; c, W. Harrison, 26 points NOVICE (24). Judge, Mr. J. Lyons. 1, spl, S. Garbett, HR 6, HB 3, B 5, F 2, WR 2, WG 2, BT 1, BR 2, GE 4, total 30; 2, spl, W. Millward, HR 5, HB 2, B 5, S 3, F 2, WR 2, WG 2, BG 2, BT 1, BR 2, GE 3, total 29; 3, spl, J. Aspinall, HR 5, HB 2, B 4, S 3, G 4, F 2, WG 2, BT 1, BR 2, GE 4, total 29; 4, spl, H. Layland, HR 5, HB 3, B 5, S 2, G 2, F 3, WS 2, BG 2, BT 1, BR 2, GE 3, 1 off, total 29; vhc, M. Mason, H. Dalby, 28 points; hc, J. Aspinall, W. Robinson, A. E. Worton, W. Heeley, R. Savigar, M. Mason, J. Lucas, T. Thwaites, H. Appleby, J. T. Dudley, T. Brooks, 27 points; c, J. Drakeley, T. Baker, W. Heeley, A. E. Minett, L. A. Hitchman, J. Mawhood, F. Herbert, 26 points. LIMIT (23): Judge, Mr. J. Lyons: 1, spl, W. J. Plant, HR 5, HB 2, B 4, S 3, F 2, WR 2, WG 2, BT 1, BR 2, BWT 1, GE 3, total 27; 2, spl. J. Hunter, HR 5, HB 2, B 5, S 3, F 2, WR 2, WG 2, BT 1, BR 2, GE 2, total 26; 3, spl, J. Aspinall, HR 5, HB 2, B 5, S 3, F 2, WG 2, BWT 2, BT 1, BR 2, GE 3, 1 off. 26 points; 4, spl, W. Taylor, HR 5, HB 3, B 4, S 2, F 2, WR 2, WG 2, BT 1, BR 2, GE 3, 1 off, total 25; vhc, T. Twigg, J. Barnes, 24 points; hc, A. Harper, H. MacGowne, 24 points; c, F. W. Hayward, W. H. Woodhall, W. Evans, 23.

WEST LEEDS F. AND F.S.

The first open venture of the above society, Dec. 16, resulted in a slight loss, only 81 entries being forward in 12 classes, this, no doubt, owing to lack of advertising. A displayed advert. in CAGE BIRDS would have made a big difference, and this the committee will bear in mind on their next venture. The exhibits, though lacking in quantity, made up in quality, some of the best teams being staged. Yorkshires made a poor display, only 23 in four classes, L. Dykes won sp. most points. British were the feature of the show, 26 in 3 classes; T. H Alexander won sp. most points. Dr. Cumming won cup for most points in show, putting down a grand team of birds. The society room is an ideal room, comfortably heated and well lighted. All birds were on tail before 8 o'clock, thanks to the help of Messrs. Chambers and Wilson, of the Leeds Society, and no complaints received. Mr. T. Bardwinson judged, and gave every satisfaction.

CL., ETC., YORKS. CK.: 1, Dykes, cl., fine type and pos., beautiful feather, well cut away, good wings and tail, 2, A. Radley, neck tkd., grandly moulded, neat head and shoulders, qual. A1, just beaten in length; 3, Cummings, cl., nicely drawn, erect pos.; 4, Richardson. BUFF: 1, sp., Dykes, head and wing mkd., beautifully balanced, stands erect and fearless, feathered in silk, good from head to tail; 2, Thomas, cl., hardly size of winner, stylish, well up on leg, fine qual.; 3, A. Radley, neck mkd., grand length, neat head and neck, good cond.; 4, Cumming; vhc, Greaves. HEN: 1, Thomas, lovely lady, straight as a pencil, good full head, neck and shoulders, well cut away behind, round as a bottle, staged to perfection; 2, Dykes, grand cl. yell., grand length, neat head, well up on legs, stylish; 3, Freeman, wing mkd. yell., typical, beautiful pos. and feather; 4, A. Radley; vhc, Greaves; hc, Cumming. UNFLIG.: 1, A. Radley, yell., fine Yorks., real hot col., good length, straight as an arrow, good qual feather, wings and tail perfect; 2, Thomas, cl., beaten in col., good length, well cut away behind, fearless carr., feather A1; 3, Dykes, yell., nicely moulded, stylish, plenty of swank; 4, Thomas; vhc, Cumming; hc, Richardson; c, Greaves. NOR. CK.: 1, Thomas, a beauty, massive head and thick neck, chest deep and broad, nice short flights and tail, feathered to perfection; 2, W. Wilson, cl. yell., grand Nor., fine subs., grand head and neck, good col., in fine order, beaten in wing carr.; 3, Cumming, cl. buff, good size and type, short flights and tail, good qual., 4, vhc, Mennard; hc, Cumming; c, Chambers and Smith. HEN: 1, Mennard, big cl. buff, excellent head and neck, good deep chest, fine carr. and feather; 2, W. A. Wilson, uneven mkd., hardly size of winner, typical, good short flights, clean underneath, fine qual.; 3 Johnson, cl., yell., medium size, good broad head, nice feather and col.; 4, Thomas; vhc, Cumming; hc, Chambers and Smith; c, Wilson. UNFLIG.: 1, Thomas, cl., real gem, big broad head, well filled neck, deep and broad chest, well across perch, beautiful qual. of feather; 2, Thomas, head mkd. yell., not the subs. of winner, good col., neat and compact, good cond.; 3, Wilson, cl. buff, sweet shape, carr., good qual. throughout; 4, Chambers and Smith; vhc, Mennard; hc, Cummings; c, Johnson. GOLDF. or BULLF.: 1, sp, Alexander, Goldf., nice size, bold head, well cut blaze of deep colour, buttoned to perfection, rich tanning, shone like a looking glass; 2, Cumming, Goldf., pressed winner hard, square blaze, well cut, beautifully buttoned, hardly the polish of winner, in fine fettle; 3, Alexander, Bullf., bold, nice shape, good cap, well cut bib, lovely cond.; 4, Colbern; vhc, Stothard; hc, c, Haigh. LINNET, ETC.: 1, Cumming, Linnet, lovely bold bird, good shade, beautifully laced, good ground col., full of polish; 2, Inman, nice shape, full of work, rich col., good size; 3, Stothard, Linnet, hardly so bold and snapsy as winner, good whites and lacing; vhc, Inman; hc, Cumming; c, Alexander A.O. HARDBILL: 1, Alexander, Hawfinch, smart shape and good col., nice bib, well defined, good cond.; 2, Trueman, Bramble, lovely shape, well spangled, good col., fine cond., pressed hard; 3, Cumming, Chaffinch, good size and shape, grand cap and wings, rich col.; 4, Haigh, Yellow Bunting; vhc, Stothard; hc, Alexander; c, Wilson. SELL.: 1, Wilson; 2, Botham; 3, Walker; 4, Trueman; vhc, Johnson; hc, Page; c, Botham.

Members' Shows.

NOTE.—Secretaries will greatly facilitate the work of ourselves and our printers if they will kindly endeavour to send their reports as nearly as possible as they see these accounts printed, and if they will also write the names of exhibitors as distinctly as possible.

EAST ARDSLEY C.B.S.

Annual 'members' show, at headquarters, Dec. 23. Keen competition ensued for the various specials, Mr. Alexander winning special for best bird in show with his Goldfinch, which was the talk of the show, the Cardiff winner. He also won special for best second with a lovely Bullfinch. Mr. A. Bedford won special best third bird. Mr. S. Wilcock, Eccleshill, judged, and gave every satisfaction.

Linnet (9): 1, 4, vhc, Alexander; 2, c, Walton; 3, hc, A. Bedford. Green. (5): 1, 4, Walton; 2, 3, Alexander; vhc, Boocock. Goldf. and Bullf. (7): 1, 2 spls, Alexander; 3, sp, A. Bedford; 4, vhc, D. Bedford; hc, Boocock; c, Kendrew. Redpoll, etc. (8): 1, D. Bedford; 2, 3, vhc, Alexander; 4, Kendrew; hc, A. Bedford; c, Walton. A.O.S. (6): 1, 2, 3, Alexander; 4, Waltou; vhc, D. Bedford; hc, Boocock. Mules (4): 1, Kendrew; 2, 4, A. Bedford; 3, Alexander. Alexander wins first for most points throughout the season; 2, A. Bedford; 3, A. Walton. Other specials winners: Alexander, silver teapot, presented by the president, W. Waind, Esq., most points A.O.V. and most points hc birds; A. Bedford, copper kettle presented by the president and special most points by 4th birds; A. Walton, most points by second bird and most points Greenfinch; D. Bedford wins special most points by vhc.—A. Walton, sec.

LANDORE AND PLASMARL C.B.S

Twenty mile radius show, George and Dragon Hotel, Landore, Dec. 26. The show room, being decorated, looked spick and span. The judges, A. Maggs, Cardiff, and A. Hitchings, Swansea, had a rare morning's work, having about 250 entries facing them, but seemed to give satisfaction to all. Messrs. A. Bowen and T. James, new to the duties of show managers, seem like old hands at the game, and with Mr. H. Fry at the helm a rare future seems assured for this war society, which has only been in existence six months.

Nor. Yell.: 1, sp, Hopkins; 2, Hitchings; 3, Jones. Buff: 1, Hopkins; 2, Hedges; 3, Jones. Yell. Var.: 1, Liscombe; 2, Hedges; 3, Hopkins. Buff: 1, Hopkins; 2, Wiliams; 3, Hedges. Yell. Hen: 1, Hitchings; 2, Jones; 3, Hedges. Buff: 1, Liscombe; 2, Hitchings; 3, Jones. Unflig. Yell.: 1, 2, Jones. Buff: 1, Jones; 2, 3, Dutton. Non-fed: 1, Phillips; 2, Poole; 3, Davies; 4, Dutton. Yorks. Cl. Yell.: 1, Fry; 2, Coulson and Bremen; 3, Jones; 4, Copp; vhc, Haywood. Buff: 1, Haywood; 2, Cooper. Var. Yell.: 1, sp, Coulson and Bremen; 2, Hart. Buff: 1, Sherratt; 2, Jones; 3, Coulson and Bremen; 4, Fry. Yell. Hen: 1, Fry; 2, Coulson and Bremen; 3, Haywood. Buff: 1, Coulson and Bremen; 2, Fry; 3, Hart. Unflig. Yell.: 1, Loosemore; 2, Jones. Mule: 1, sp, Morgans; 2, Rees.

S. SHIELDS C.B.S.

14th show, Cyprus Hotel, a room often described as of the best, lent free by our host. We are fortunate to have such supporters as Mr. and Mrs. Pattison, who greatly assist us both in money and kind, and provided lunch free for all workers at the show. Sixteen members staged 177 birds, the Norwich again heading the list and causing keen competition. One of the special features of the show was the novice class. J. Learmount's winning buff was an eye-opener, and J. Foreman's 2nd yellow about as good as any in the show. We are not strong in membership, but we still pay 10s. per class. The gift class realised £1 3s. 6d. T. Dixon (Bedlington) judged, E. Deighton winning Mr. Priestley's spl. for best bird in show with a young Yorks. Mr. Thompson's went to J. Richardson's Norwich, and Mr. Priestley's for old and young birds; and J. Dixon won G. Garven's spl. for best British seed-eater with a good Chaffinch. I must again mention that hard-working stager, Mr. Howden, who always seems to be doing yeoman service. Old Birds—Nor. Yell.: 1, Dixon; 2, Duke; 3, Addison; vhc, hc, Thompson; c, Coppock. Buff: 1, Thompson; 2, vhc, Richardson; 3, Howden; hc, Priestley; c, Dixon. Hen: 1, Priestley; 2, Foreman; 3, Addison; vhc, Dixon; hc, Potts; c, Thompson and Pattison. York Yell.: 1, 3, vhc, Deighton; 2, Addison; 4, Hutler. Yorks Buff: 1, Deighton; 2, Addison; 3, Hutler. Hen: 1, 2, 4, Deighton; 3, Addison; 4, Hutler. Bord. Yell.: 1, Addison; 2, Smith; 3 Duke. Linnet: 1, 2, 3, 4, Curry; vhc, Winter. Redpoll: 1, Addison. A.O. Finch: 1, Dixon; 2, 3, Curry. Softbill: 1, 2, Curry. Gift. 1, Thompson; 2, Foreman; 3, Richardson.—W. L. Smith.

The names in this report are printed as nearly as they can be made out. Some of them as written are very difficult to decipher.—Ed.

BOLTON WOODS C.B.S.

Members' show, Victoria Hotel, Dec. 30. Mr. W. Cowgill judged and gave entire satisfaction. 49 birds staged. Points for season (champions): 1, cup, Dykes, 112 points; 2, Boocock, 83; 3, Bloomfield, 81; Chittenden, 65. Novices: 1, Greenwood, 83; 2, Smith, 66; 3, Alred, 39; Close, 24; Lloyd, 21; Goult, 19; Oldrieve, 14; Riddihough, 10. Norwich: 1, Wilkinson, 37 points; 2, Wilcock, 34; 3, Airetou, 20; Markwell, 19; Dykes, 9; Simmonett, 9; Chittenden, 7; Brear, 4. Best Bird, Dykes; best unflig., Dykes; most points champ., Dykes, 24; novices, 21 points; most points Norwich, Wilcock, 19 points.

Champ Class (15): 1, 3, Dykes; 2, Bloomfield; 4, Boocock; vhc, Bloomfield. Class 2 (5): 1, 2, Dykes; 3, Boocock; 4, vhc, Bloomfield. Class 3 (4): 1, Dykes; 2, 3, Bloomfield; 4, Boocock. Class 4 (3): 1, Dykes; 2, Bloomfield; 3, Boocock. Novice, Class 5 (4): 1, Close; 2, 3, Greenwood; 4, Smith. Class 6 (3): 1, Close; 2, Greenwood; 3, Smith. Class 7 (1): 1, Smith. Class 8 (4): 1, Smith; 2, 3, Greenwood; 4, Close. Class 9 (5): 1, 3, vhc, Greenwood; 2, Smith; 4, Close. Class 10 (1): 1, Smith. Norwich. Class 12 (2): 1, Wilkinson; 2, Markwell. Class 13 (3): 1, Wilcock; 2, Markwell; 3, Wilkinson. Class 14 (3): 1, Wilkinson; 2, Wilcock; 3, Markwell. Class 15 (6): 1, 2, vhc, hc, Wilcock; 3, Wilkinson; 4, Markwell.

LANCS. AND LIZARD C.B.S.

Club show, Oldham, Dec. 9, 10. We had a fine show of Lizards, competition being very keen, but not a single Lancashire entry, and this at one of our own shows, right in the midst of the Lancashire Fancy. Mr. Steeples judged and did very well. As this was his first experience as a judge at our specialist shows he made a very good job of it. Messrs. Hamer, Barnes, Rukin, Clegg, and Hampshire shared the bulk of the prizes in champion classes, and Mrs. Burgess, of Bristol, Messrs. W. Clark, G. Ford, W. Hambleton, did best in novice classes, Lizards. This finished the season's patronage shows.

Nov. Liz. Gold: 1, 4, Clark; 2, 3, Ford; vhc, Mrs. Burgess; hc, Hambleton; c, Bosworth. Silver: 1, Ford; 2, 3, Clark; 4, Bosworth; vhc, Mrs. Burgess. Gold Heu: 1, Ford; 2, Mrs. Burgess; 3, 4, Clark; vhc, Bosworth. Silver: 1, hc, Clark; 2, Bosworth; 3, Ford; 4, c, Hambleton; vhc, Mrs. Burgess. Champ. Liz., Gold, Cl. Cap: 1, Barnes; 2, 4, Rukin; 3, Hamer; vhc, Hampshire. Silver: 1, 2, Hamer; 3, Barnes; 4, Rukin; vhc, hc, Hampshire. Broken Cap Gold: 1, 4, Rukin; 2, vhc, Barnes; 3, Hamer; hc, c, Hampshire. Silver: 1, 4, Hamer; 2, 3, Rukin; vhc, Barnes; hc, c, Hampshire. Gold Hen, Cl. Cap: 1, Rukin; 2, 4, Barnes; 3, Hamer; vhc, Rukin. Silver: 1, Rukin; 2, 4, Hampshire; 3, Hamer. Gold Hen, Broken Cap: 1, Barnes; 2, 3, Rukin; 4, Hampshire. Silver: 1, Barnes; 2, 3, Rukin; 4, Hamer; vhc, hc, Hampshire. Gold Liz., Old Bird: 1, Rukin; 2, Clegg; 3, Barnes. Silver: 1, Barnes; 2, Rukin; 3, Hamer; 4, Hampshire. Spl. winners: Most entries, 1, Rukin; 2, Hampshire; most points, Rukin; best novice Gold Lizard, Clark; best Gold cock or hen, Barnes; Silver, Hamer; best Gold hen, Barnes. Class spls. won by Barnes 4, Rukin 4, Hamer 2, Clark 2, Ford 2. Messrs. Rukin and Barnes divided pool with 28 points each; 4 highest birds to count.—John Rukin, Hon. Sec.

MIDDLESBRO' AND TEES-SIDE.

Annual show, Dec. 26, Princess Alice Hotel, with a grand total of well over 200 entries. The birds made a glorious display, and quality was well above the average, some of the leading birds of the season being on exhibition, including winners at Gateshead, Newcastle, Hartlepools, Abertillery and Cheltenham. Judges were Messrs. G. Simison of York, and Nicholson, of Stockton, and their awards were well received.

Yorks. Yell. Ck. (5): 1, 4, E. G. Atkins; 2, vhc Rand; 3, Stothard. Buff (7): 1, 3, Atkins; 2, Barker; 4, Arnison; vhc, Rand. Hens (11): 1, F Stothard; 2, vhc, R. Atkins; 3, 4, hc, c, Rand Unflig. (10): 1, F. Stothard; 2, vhc, hc, Barker 3, Rand; 4, c, Atkins. Nor. Yell. Ck. (5): 1, sp Rand; 2, 3, Carr; 4, Bibby; vhc, Watson. Buf (5): 1, 4, Appleyard; 2, Carr; 3, Firth; vhc, Bibby Hen (17): 1, 2, 3, c, J. Carr; 4, Arnison; vhc Firth; hc, Watson. Unflig. (14): 1, 2, 3, Carr; 4 hc, c, Bibby; vhc, Rand. A.O.V. Ck. HEALTH & STRENGTH

Deals with all kinds of athletics including Football Wrestling, Boxing, Weight Lifting Fencing Running, Jiu-Jitsu, Gymnastics of all kinds Swimming, &c., &c. Gives free advice on all questions of Health. Diet, &c. to all readers EVERY THURSDAY, 1d. Sold Everywhere. Get a copy to-day, or send for Free Specimen to "Health and Strength," Windsor House, Kingsway, London.

Queries Answered

For Rules see last week's issue.

(1)—*All questions must be clearly written in ink (or typewritten) on one side of paper, and conclude with either the correct name or a pseudonym.*
(2)—*The proper name and address in full of querist must always be written on a separate sheet of paper, and enclosed with the query.*
(3)—*Queries intended for different specialists must be written on separate sheets of paper.*
(4)—*Queries must not include or be included in orders for books, instructions re advertisements, or any other matter for publication.*
(5)—*The department to which the queries refer must be stated on the left-hand corner of the query.*
(6)—*Queries received during any week, up to the* **first post on Saturday morning,** *will be answered in the issue bearing date of Saturday in the* **following** *week.*
(7)—*If an answer by post is desired from our specialists, a postal order for sixpence must accompany any query relating to sickness of birds, or a shilling in ordinary enquiries, with a stamped and addressed envelope in either case. Dead birds must not be sent to the office (see Post-mortems).*
(8)—*All who desire letters of complaint written to advertisers must state grounds for doing so clearly and fully, and enclose a fee of sixpence.*
(9)—*All queries must be addressed to the Editor, "Cage Birds," 154, Fleet Street, London, E.C. Postcards are not admissible.*

CANARY QUERIES

Answered by ST. JOHN.

EYE TROUBLE.

Novice.—You do not say whether the affected birds are caged together or not, but if they are I would advise you to keep a sharp watch over them for a time to see if the eye trouble is the result of an injury from a spiteful specimen giving its neighbour a sly dig when it wants a little more elbow room for itself. With one eye only being affected, there does not appear very much room to suspect contagious disease, as might have been the case if the trouble had been less discriminating. But, anyway, you can do no harm, and it may possibly do much good, to give a course of the following treatment for a month or so, though you may discontinue it in a less time if the symptoms have quite disappeared. First see that the birds are not exposed to cold cutting draughts blowing right into the cages, especially when the birds are at roost, and keep the cage floors and perches as clean as possible for the time being. Then get a few camomile flowers from a chemist, and place a teaspoonful, or about a drachm in weight, in a teacup, fill with boiling water, cover, and allow to infuse beside the fire for an hour. Then strain off the clear fluid, add a teaspoonful of boracic acid, stir until dissolved, and when cold it is ready for use. Catch the affected bird, or birds, each morning and evening, and bathe the eyes affected with a little of this lotion, using a small piedget of cotton wool for the purpose, and use a little fresh fluid and a fresh piece of wool for each bird treated, and burn at once that which has been used. After the first week you may discontinue the morning treatment and bathe only once a day, in the evening.

SAMPLE OF SAWDUST.

Novice, Poole.—The sample of sawdust sent is very nice and clean, but it is cut rather too fine for use in cages. You could, of course, use it for this purpose, the real objection to it being that it is so easily blown about and causes much litter around the cages if the birds are at all energetic. This may be largely prevented by mixing the sawdust with about the same bulk of sand; but the best course is to have a coarser cut sawdust, and then you would only need to give a little gritty sand in a small vessel in a corner of the cage. With regard to the sand adhering to the birds' feet after bathing, as you describe, this is probably due to the sand being of an unsuitable kind, most likely unwashed and carrying a proportion of fine dust, which becomes adhesive dirt when wet. The remedy for this is obvious, and you could also help to prevent it by only giving the bath before you cleaned out the cages.

MATES AND CAGES.

G. H. M.—(1) The cock being already a crossbred and of no real use for breeding pure stock, you could not do better than to get a lusty young Roller hen of a good singing strain. As you are not particular about colour and markings, and want good singing birds, you could not make a better selection than this, and to avoid too much variegation in the young, which is not very popular with those who want a drawing-room songster, you should get a clear yellow bird, and if it is itself bred from two clears so much the better, as the cock seems to have plenty of green blood in him. (2) This hen seems to be a very undesirable subject for the breeding cage, unless she improves a great deal before the season comes round. Keep her in a fairly warm place, but do not overdo it, and let the temperature, whatever the degree, be as equable as you can get it. As a staple diet give a simple mixture of three parts canary to one part summer rape. In addition to this, give separately twice a week a small teaspoonful of a mixture of equal parts hemp, niger, white millet, teazle, black rape, and broken groats, with just a sprinkling of gold of pleasure, linseed and mustard. On two other days give a morsel of bread soaked in cold milk, drained, and sprinkled with soft sugar, and on each of the remaining days a morsel of banana, raw or boiled carrot, sweet apple, or watercress when you can get the latter in a fit condition to use. In the drinking water, every second day for a week, add ten drops of lemon juice and as much Epsom salts as will cover a sixpence, and after this give instead four drops each of tincture of gentian, tincture of calumba and aromatic sulphuric acid every second day for a week or fortnight as may seem necessary. If she becomes more active and robust, with plenty of energy, there is no reason why you should not try mating her with the above cock in addition to the mate suggested, but the young would again be only crossbreds and not so good as songsters as the young from a Roller hen. If you used two hens you would, of course, run the cock with them alternately, leaving each hen to hatch out and rear the young by herself. (3) You omit to say whether you have any special object in wanting to do the breeding cages with something other than limewash, nor if that which is now on is soiled. If the coating that is now on is quite clean, and has been recently put on * would advise you to leave it alone until the end of the breeding season. Limewash is a very good dressing for breeding cages. But if the cages are soiled, or you particularly wish to put on something else, you should scrape off the lime as clean as you can, then you may quite safely do them with any of the sanitary distempers on the market, giving two coats to get the proper tint if you use a tinted one. Or by washing out the cages after scraping with a strong solution of common soda you might put on either flatting—a non-glossy paint—or any of the enamels, such as Aspinall's, again using two thin coats to get the proper tint, and allowing the first to dry well before putting on the second. As you are quite a novice you would be well advised to get a copy of "Canary Breeding for Beginners," which our manager would send you for 7d., post free, and be guided by the information therein during the coming season.

STARTED TO COUGH.

A. McI. R.—See that the bird is not exposed to such exciting causes of cough as fumes from burning lights in the evenings, a dusty or irritating atmosphere; the latter is specially likely to be found if the bird hangs high up near the ceiling, or to extremes of heat and cold. Let it have a fairly equable temperature, which need not be a high one, but just sufficient to protect it for a time from the extreme fluctuations of weather we have had of late. Every alternate day for a week give a morsel of bread and milk with two drops of cod liver oil emulsion on it, and sprinkled with maw seed, and on the other days add to the water four drops each of ipecacuanha wine, oxymel of squills, and sweet spirit of nitre. This should suffice to set matters right. There is no reason why you should not run him with two hens in the forthcoming season, leaving him with each hen only until she commences to sit, then removing him and leaving the hens to hatch out and rear the young by themselves. But do not mate him with either before the end of March at earliest.

ABOUT A COLONY.

Thomas Hilton.—Certainly you are at liberty to ask us a few more questions. Pray, do not hesitate to do so any time when you are in any doubt or difficulty. (1) The need for removing the eggs as laid, and returning them to start incubation all at the same time is not nearly so important a matter in colony breeding as when the birds are confined in small cages, as with the greater liberty and space to move about in, the hens are not so apt to begin sitting closely with the first egg as is the case when they cannot get more than a few inches, as it were, away from the nest. I do not remember the size or plan of your room, but if it is such that you can move about in it without unduly disturbing or exciting the birds, or if the nests are so arranged that you could get at them to remove the eggs without any trouble or disturbance you could do so, but the advantage would be but slight, so the matter may well be left to your own discretion. If you decide on removing them, be sure you keep a nest egg in the nest after laying has commenced until you return the clutch for the hen to commence sitting. (2) The same remark will apply to the hens having accessibility to egg and greenfood whilst sitting. When young are in the nests these items must be supplied fresh twice daily, in about such quantity as you find is quite cleared up from one feeding time to the next, and those hens that are still sitting will have to take their chance of having a share if so disposed. But you will not find it so great a trouble as if they were confined in cages. The young on the perches may also partake of the greenfood supplied with little, or no, ill-effect. But this latter point you may very largely avert, if you wish, by removing the young as soon as they can quite do for themselves, to a large aviary or room set apart for them, and thereby also prevent overcrowding in the breeding section towards the end of the breeding season. (3) Instead of turning the cocks directly into the room out of the singing cages, it will be much better to put them in a breeding or small flight cage about the middle of March and hang them in the room, then, when all is ready to begin, fasten the doors open and leave the cocks to find their own way out and about. This will enable them to be more familiar with their surroundings when set at liberty.

BRITISH BIRDS, MULES AND HYBRIDS

Answered by H. NORMAN.

GOLDFINCH MOPY.

R. C. C.—I am sorry you can do nothing with your Goldfinch. Some birds are very obstinate and refuse to drink medicated water, as yours does. I am afraid you will have to handle him, although this should be avoided as much as possible when birds are not well. If you can give him two drops of olive oil direct into the beak, it will help, and then try him with ten drops of glycerine in a tablespoonful of water, perhaps he will drink it, as its taste should not be objectionable. You do not tell me the mixed seed you are giving him, but whatever it is I would advise you to rub it in a damp cloth to remove any dust; also to give a spoonful of soaked rape and teazle daily, and allow a fair quantity of green food. You should keep him warm, but not in a stuffy atmosphere.

COLOUR-FEEDING A BRAMBLEFINCH.

A. Rutter.—To colour-feed or not to colour-feed a British bird is quite a matter of choice. It is mainly a question of the desirability of trying to improve the natural colour. It may appear curious, but, as a matter of fact, birds of a bad natural colour are not improved by feeding, the colour does not "take," so you see if your bird is not of good natural colour it is questionable if you will improve him by feeding. If he will take soft food you can try him by mixing a small quantity of colour-food with it, but, as a rule, Finches do not take kindly to it. They have to be judiciously starved to it, and in doing this there is, of course, the risk of upsetting the bird just when he requires to be feeling particularly well. There is another method of colour-feeding Finches by means of crushed seeds, getting the birds used to eating these, and then mixing a little colour-food with them, adding to it until you get the strength you require. The colour-food sticks to the oil crushed out of the seed, and for this purpose linseed is largely used. If you decide to feed your bird you should experiment a little before next moulting time.

GETTING RID OF RED MITE.

Alpha.—With a single cage you should not have a great difficulty in clearing it of red mite. They live (as you are probably aware) in the crevices of the cage during the daytime; therefore, any cage that is to be operated on should be stood in a strong light for an hour or so previously. This will make certain that there are no mites on the bird. Then if you scrub the cage in the manner you say you have done, and, if you thought necessary, paint the cracks with an insecticide, such as fir tree oil or petrol, or even turpentine, with a few drops of creosote in it, this should be effectual, but be careful they are not hidden in some crevice near where the cage hangs, or they will return to it later. As regards the bird, there is no occasion to hand-wash it. Give it a good spraying with a weak solution of sulphurretted potash; crush up one dram to a pint of warm water. Whenever he bathes, a few drops of quassia essence in the bath will assist to keep him clear of insects. (2) Box cages are mostly used by fanciers. The birds are less likely to be affected by draughts. Add a few sunflower seeds to your seed diet.

THE EFFECT OF MEDICINE.

W. T.—The sweet spirits of nitre is mostly used in recipes for colds and other lung troubles. It is also made use of by some fanciers in making up a mixture to assist the moult, so you see it is not a medicine one should use without reason. It is doubtful if the small quantity you gave would have much effect, but, anyway, no medicine should be given to birds a day longer than is absolutely necessary.

BUILDING AN OUTSIDE AVIARY.

D. J. James.—I much prefer your second sketch, with part of one end of the front boarded up. This should be about 5 ft. 6in., and I think it would be as well to board up the front about 1ft., or even another 6in., and let your roof hang well over the front, as it helps to give shelter to the inmates. I would advise a small square of glass in the boarded-in end. Put it facing the east. You need not have a frame for it—just the square of glass with strips of wood round it to keep it secure and prevent draughts. I would also advise you to have one board along the front, just under the eaves. The boarded end of the aviary should not be boarded inside; anyway, not entirely—just two or three boards near the front would be sufficient. The reason for boarding any of the front is to give some degree of shelter from strong winds, and for that reason I would advise you to plant a few shrubs along the front. Do not put any inside; the birds generally destroy them. Your selection of birds is a very good one and quite enough to do well. If you do not possess a copy of our publication on "Aviaries," you would find it of great assistance in building and stocking your aviary. Our manager would send you a copy, post free for 2s. 3d. In looking at your sketch once more it seems to me that the pitch of the roof is scarcely sufficient. Perhaps you could raise the back another six inches.

FOREIGN BIRDS.

Answered by WESLEY T. PAGE, F.Z.S.

OUTDOOR AVIARY FOR BUDGERIGARS.

W. B. Beveridge.—The only fault I find with your plan and sketch is that the suggested arrangement allows the wind to blow through freely from North to South, and again that you make no provision for the birds to come out into the rain when they desire. These faults can be easily remedied by fastening canvas over the North area of wire netting from Oct. 1 to April 30, or better still a wooden door in two sections (lift off hinges) which could be kept closed for the period named, and also closed during abnormal weather in the summer. As regards the section for the birds to get a rain bath in, construct an all wire projection, i.e., instead of making the 5½ft. of wire netting of the South side level, project it out 1½ft., this portion to have netting top and to be turfed. I further suggest that instead of making the East end seed room that you leave it only 3ft. wide, which will be ample, as for seeds, all you want is a sanitary dust-bin, about 18in. diam. x 3ft. deep, which will hold a little over a sack. Half a sack each of canary and white millet, and 14lb. of oats mixed together would keep you going some time. If you conform to this, do not increase wire netting areas, at any rate not on the North side. If you care to send me a stamped addressed envelope per the Editor I will send you a rough diagram making the above clear. As regards furnishings, hang up about 18 husks and small barrels, and fasten to the walls dead bushes and tree branches; a dead bush or two can also be planted in the ground or in pots to stand clear of the walls. I should advise a suspended food tray, not near any branches, so as to make it as inaccessible to mice as possible. It would accommodate 50 to 60 birds without overcrowding. I advise getting four pairs for a start, each pair from a different source, and procure the largest, richest coloured, and best marked birds you can get, irrespective of cost; you could then retain an extra pair or two from their progeny. A pair of black-cheeked Lovebirds would make a pleasing variety. All glass must be covered with wire netting on the inside.

PARROT WITH GROWTH BY BEAK.

G. Butler.—Bread and milk is permissible in certain cases as medicine, and also when mouth trouble prevents the bird eating seed freely, so that it may get sufficient nourishment; but it should not form part of the regular menu of a seed-eating Parrot. If the bird will allow you to handle it the growth should be bathed (well cleansed) with tepid water, any pus being exuded by gentle pressure, then lightly dabbed with a soft cloth to take off surplus moisture, and then lightly anointed with a little healing ointment. This should be done even if the bird has to be held by gentle force. While you are compelled to give milk-sop, add ten drops of cod liver oil emulsion to it and well mix. Twice a week put one teaspoonful of Dinneford's Magnesia into the drinking water, and on the intervening days well colour the water with chemical food. A little honey and borax should be put into its mouth daily, either from the end of a stick or thinly spread on bread, biscuit, or plain cake, whichever method you find easiest. Ripe fruit (any kind it will eat), pieces of biscuit, shelled nuts, may, in addition to the seed mixture, form part of the daily menu. Treat as above for a month, and then report progress; but if the bird should become worse, write again at once with full particulars.

PARROT WITH SWOLLEN EYE.

Dalesman.—Pleased to learn the bird is making good progress. What hinders the cure of eye trouble is your inability to handle it; but as this cannot be helped you will have to rely largely on Nature doing its own work as the bird's bodily health becomes perfect. It is, however, a great pity there is not someone near you accustomed to handling Parrots, so that the swollen area could be cleansed with tepid water, partially dried, and then bathed with a tepid diluted rose-water and zinc eye solution. This bird must be carefully protected from draught, yet it must not stand in a corner of the room where the air is stagnant. There is one such corner in most rooms. Continue the treatment already advised, and also put a little honey and borax into its mouth daily, either from the end of a stick, or preferably spread thinly on bread, biscuit, or plain cake if it will eat either of these. If you cannot get the eye treated as above, continue the use of the borax lotion; keep the bird strictly out of draught, and leave the rest to Nature. I should say that the zinc eye solution is poisonous and should not be used as a spray, but the eye bathed with it. It will hasten matters if you can have this done. If there should be any broken skin, following any exudation, after cleansing the part and drying dry with a soft cloth, anoint with a little zinc ointment. Shall be pleased to hear how the bird progresses.

BREEDING ZEBRA AND OTHER FINCHES.

S. W. B.—Broadly speaking, if the Finches and Mannikins are in room flight or garden aviary they can be left together to the extent of one pair to each foot frontage of the flight or aviary; but if they are in a flight cage, then about the middle of March each separate pair should be put into a breeding cage, with a suitable nesting receptacle for the species, and be supplied with nesting material about a week later. Hay, grass (coarse or fine), and moss, will meet the needs of the "small ornamental Finches," which term includes Waxbills. This covers all the birds you name. As regards the hen Red-headed Finch, cage her up separately at once, and do not return her to her mate till she is in good plumage. The male is obviously plucking her, and she will continue bald so long as they are together; but after her plumage is perfect, they should go to nest. I should put a teaspoonful of fluid magnesia into the hen's drinking water every fourth day, and well colour the water with chemical food on the intermediate days. Continue this till she is quite fit. Your flight cage you can hold in reserve for young birds as soon as they can feed for themselves, or if short of breeding cages, leave the Java Sparrows in it and put up a nest receptacle for them.

BUDGERIGARS AND ZEBRA FINCHES.

Esperance.—The probability is, that if you had had a post-mortem made of the body of the young bird the verdict would have been pneumonia. Amid such changeable weather as we get, this scourge is ever present. Pair the young hen up with one of the cocks, and she should rear some young, though she may not go to nest till quite late in the season. You can try the Yellow Budgerigars in the cage; they ought to nest in the cage, especially as they get a daily fly in a room; but they should not be changed from one room to another. The cage should be kept permanently in the room it is convenient for them to fly about in. Put in two husks, one at each end of the cage, with the husk opening towards the light. Yes, they must be allowed their daily fly when they are nesting; but, of course, a brooding or incubating bird must not be turned off the nest. Simply open the cage door and leave them free agents. I will repeat my previous remarks. As regards Budgerigars, which have been indoors, they can go out-of-doors during any spell of open weather, from mid-March onwards. Re Zebra Finches, if straight from outdoor aviary they can go out at once. If indoor birds, put them out from 1st April to 1st May, according to the season. They will thrive on the same food, but when they are feeding young give them a little crushed biscuit and crumbled sponge cake. It will do no harm if the Budgies take a little of it.

POST MORTEMS.

Mr. G. Yates, M.R.C.V.S., 1, College Road, Harrow, Middlesex, will examine and report upon dead cage birds for a fee of 1s. 6d. each bird; for reply direct, 2s. 6d.; analysis, 21s. The Post Office regulation is that bodies of birds must be sent at the letter rate of postage, and must be packed in hermetically-sealed receptacles which must themselves be enclosed in strong wooden, leather, or metal cases. If this regulation be infringed the packets may be destroyed by the authorities. **Any bodies sent to the office of this paper will be thrown away,** and if a fee is enclosed the loss will be the sender's.

GENERAL.

Answered by THE EDITOR.

THE BELL GLUCKE TOUR.

T. Twigg.—We are unable to publish letters which are unaccompanied by the full name and address of the senders. Your letter seems to be a mixture of complaints against the standards and the judges, an advertisement of a particular strain of Rollers, and some remarks which are of so technical a nature that it would be very dangerous for any but a Roller expert to revise them for print. It would be useless to send your letter as it is to our printers for setting up in type, for if it were printed as written it would be difficult for any reader to get at the meaning of it, and we must confess that its revision is quite beyond our power, apart from the objection that it is not accompanied by your address.

GREEN SINGING FINCH HYBRIDS.

Kay.—It is not quite clear whether by "Foreign Singing Green Finch Cock" you mean a Greenfinch which has been imported from the Continent, or a Green Singing Finch from Africa. In either case Hybrids may be bred with a Canary hen. The ordinary method of breeding Finch-Canary Hybrids should be pursued. As the Canary hen will probably come into breeding condition sooner than the Finch, she should be paired with a Canary for a first nest, and afterwards with the Finch. Please see Rule 6 at the head of the query columns.

BREEDING CANARY HYBRIDS.

H. Robinson.—You are to be congratulated upon your luck in your first season, and we are glad to hear you are so pleased with the hobby. All the same, we fear you will be trying for too high game if you hope to be successful in your second year in breeding Hybrids ("Mules") between the Bramblefinch and Canary, and the cock Bullfinch and Canary. These crosses have long been the ambition of many experienced hands; but one never knows, success may come in the most unlikely quarters. Your aviary seems quite an excellent one, and you should have a good chance of success with Goldfinch-Canaries and Redpoll-Canaries, but of the other two crosses—well, we hae our doots.

MONTHLY MAGAZINES.

A. Johnson.—"Bird Notes," 1s. 6d. per month, 15s. annually, 10s. annually to members of the Foreign Bird Club, is published by J. H. Henstock, Avian Press, Ashbourne. "The Avicultural Magazine," 1s. 3d. per month, 15s. annually, free to members of the Avicultural Society (subscription 10s. per year), is published by Messrs. Adlard and Son, and West Newman, Bartholomew Close, London, E.C. Your local bookseller would probably get either or both for you to order.

AIDS TO SUCCESS.

Our Books and a Common-sense Application of the Advice therein MUST bring you Profit as well as Pleasure

All the experience of years of careful study by experts is at the disposal of readers.

YORKSHIRE CANARIES, 2/2.—By H. W. Battye (Past President of the Yorkshire Union). Absolutely the very best Handbook dealing with the Yorkshire and its sub-varieties. Contains complete instructions upon Pairing, Breeding, Moulting, and successful Exhibiting, also how to treat in both health and disease.

NORWICH CANARIES, 1/1.—By C. A. House. Tells the fancier all that he needs to know to enable him to become successful as a breeder and exhibitor of the Norwich Plainhead. The chapters on "Forming a Stud," and "How to Produce the Ideal" are worth the cost of the whole book.

THE SECRETS OF HYBRID BREEDING REVEALED AND EXPLAINED.—By many notable Mule and Hybrid Breeders. Among the contributors are such well-known breeders as Messrs. R. Colton, W. H. Vale, C. Boulton, C. J. Ward, J. Beswick, G. Lander, T. H. Kinch, T. Smith, etc. This Handbook, which contains 212 pages, 7 inches by 5, is brimful of the most practical information on the highly interesting subject of Hybrid Breeding. Price 1/-, post free 1/2.

AVIARIES, BIRD-ROOMS, AND CAGES, 2/3 (cloth gilt).—By H. Norman. Contains ten lovely full-page photographic plates. A practical guide which deals thoroughly with the proper Building, Fitting, and Management of Aviaries and Bird-rooms, and the making of Cages.

SEEDS, FOODS, AND WILD PLANTS FOR CAGE BIRDS, 1/2. — By various leading authors. Full information on the seeds suitable for all cage birds, their food values, uses, etc., with descriptions and illustrations of the wild plants indispensable to the successful keeping of British and other birds.

BRITISH BIRD MANUAL, 2/3 (cloth bound).—By H. Norman; or may be had in two parts. Part 1: "Hardbills," and Part 2. "Softbills." Either Part, price 1/1, post free. Each part contains a beautiful and life-like coloured plate and numerous illustrations of birds and cages. Up-to-date information on the keeping of British Birds.

THE STOCK BOOK, 7d.—Of our invaluable "Breeding Room Register" a well-known fancier has said:—"It makes bird-breeding easy." No breeder of birds can possibly afford to be without it. It simplifies the operations in the bird-room and makes it possible for everyone, even the veriest novice, to breed his birds as they should be bred. Contains both Pedigree, Breeding, Young Bird, and Show Registers of simple and unique character, in addition to useful account pages.

HOUSE'S CANARY MANUAL, 1/2.—By C. A. House. A thorough, practical guide to the general management and breeding of Canaries, dealing fully with the breeding, etc., of every member of the Canary family, including the Roller (or Singing) Canary. An illustration of each bird, by the master Canary artist, Mr. H. Norman; exhaustive chapters on aviaries and cages, breeding procedure, moulting, exhibiting, diseases, and seeds a compendium of knowledge.

FOREIGN BIRDS FOR BEGINNERS, 1/1½.—By W. T. Page, F.Z.S., etc., Foreign Bird Expert to "Cage Birds." A highly instructive Manual. It contains a magnificent coloured plate and a number of black and white illustrations. Indispensable to all keepers of Foreign Birds.

CANARY BREEDING FOR BEGINNERS, 7d.—By Claude St. John. A Practical, up-to-date guide to Canary breeding, designed specially for the use of the beginner. Deals very fully with the choice, sexing, and mating of the birds, feeding for condition, the cages and their fittings, the bird-room, egg-food, nest-building, rearing and moulting the young, colour-feeding, training for show, and all the difficulties likely to confront the breeder.

CAGE-BIRD HYBRIDS.—Complete bound in cloth, 7/6 carriage paid. This great work is written by Charles Houlton, an authority with a reputation extending over 25 years as a leading exhibitor and a leading expert and judge. Magnificently illustrated by that great bird artist, H. Norman. There are no less than sixteen coloured and sixteen nrt plates in this work. Each plate is a perfect study of an individual Hybrid.

SECRETS
of Famous Canary Breeders
YOURS for only 1/- down

Judging the position of a bird by the clock.

HOW well-known Canary Fanciers bred their prize-winning birds—birds literally worth their weight in gold—how they trained them—the foods used. All this priceless information and much more is clearly given by the Breeders themselves in this splendid Canary Book. Every page—every line—is full of the *practical experience* of practical men—experts in their line. Fanciers who have specialised in Lizards give valuable information. Breeders of famous prize-winning crested varieties contribute to its 380 pages. Every feature of Canary Breeding and Exhibiting is clearly and fully dealt with—you have only to glance at the comprehensive index to turn up the information you desire.

The book contains 133 illustrations, a few of which are here reproduced. Thus, "Our Canaries" not only *tells* you but *shows* you. If you are a novice, or breed only for pleasure, you will be delighted with the increased enjoyment which the book will enable you to derive from your hobby. If you are an "old hand," or breed for profit, it will help you to *increase* profits.

"Our Canaries" will be sent you for Free Examination—Approval for a deposit of only 1/-. If, after examination, you return the book, your deposit will at once be refunded. If, however, you decide to keep the book, you can pay the balance by easy monthly instalments. Thus you have everything to gain and nothing to lose by sending for a copy. Do so TO-DAY

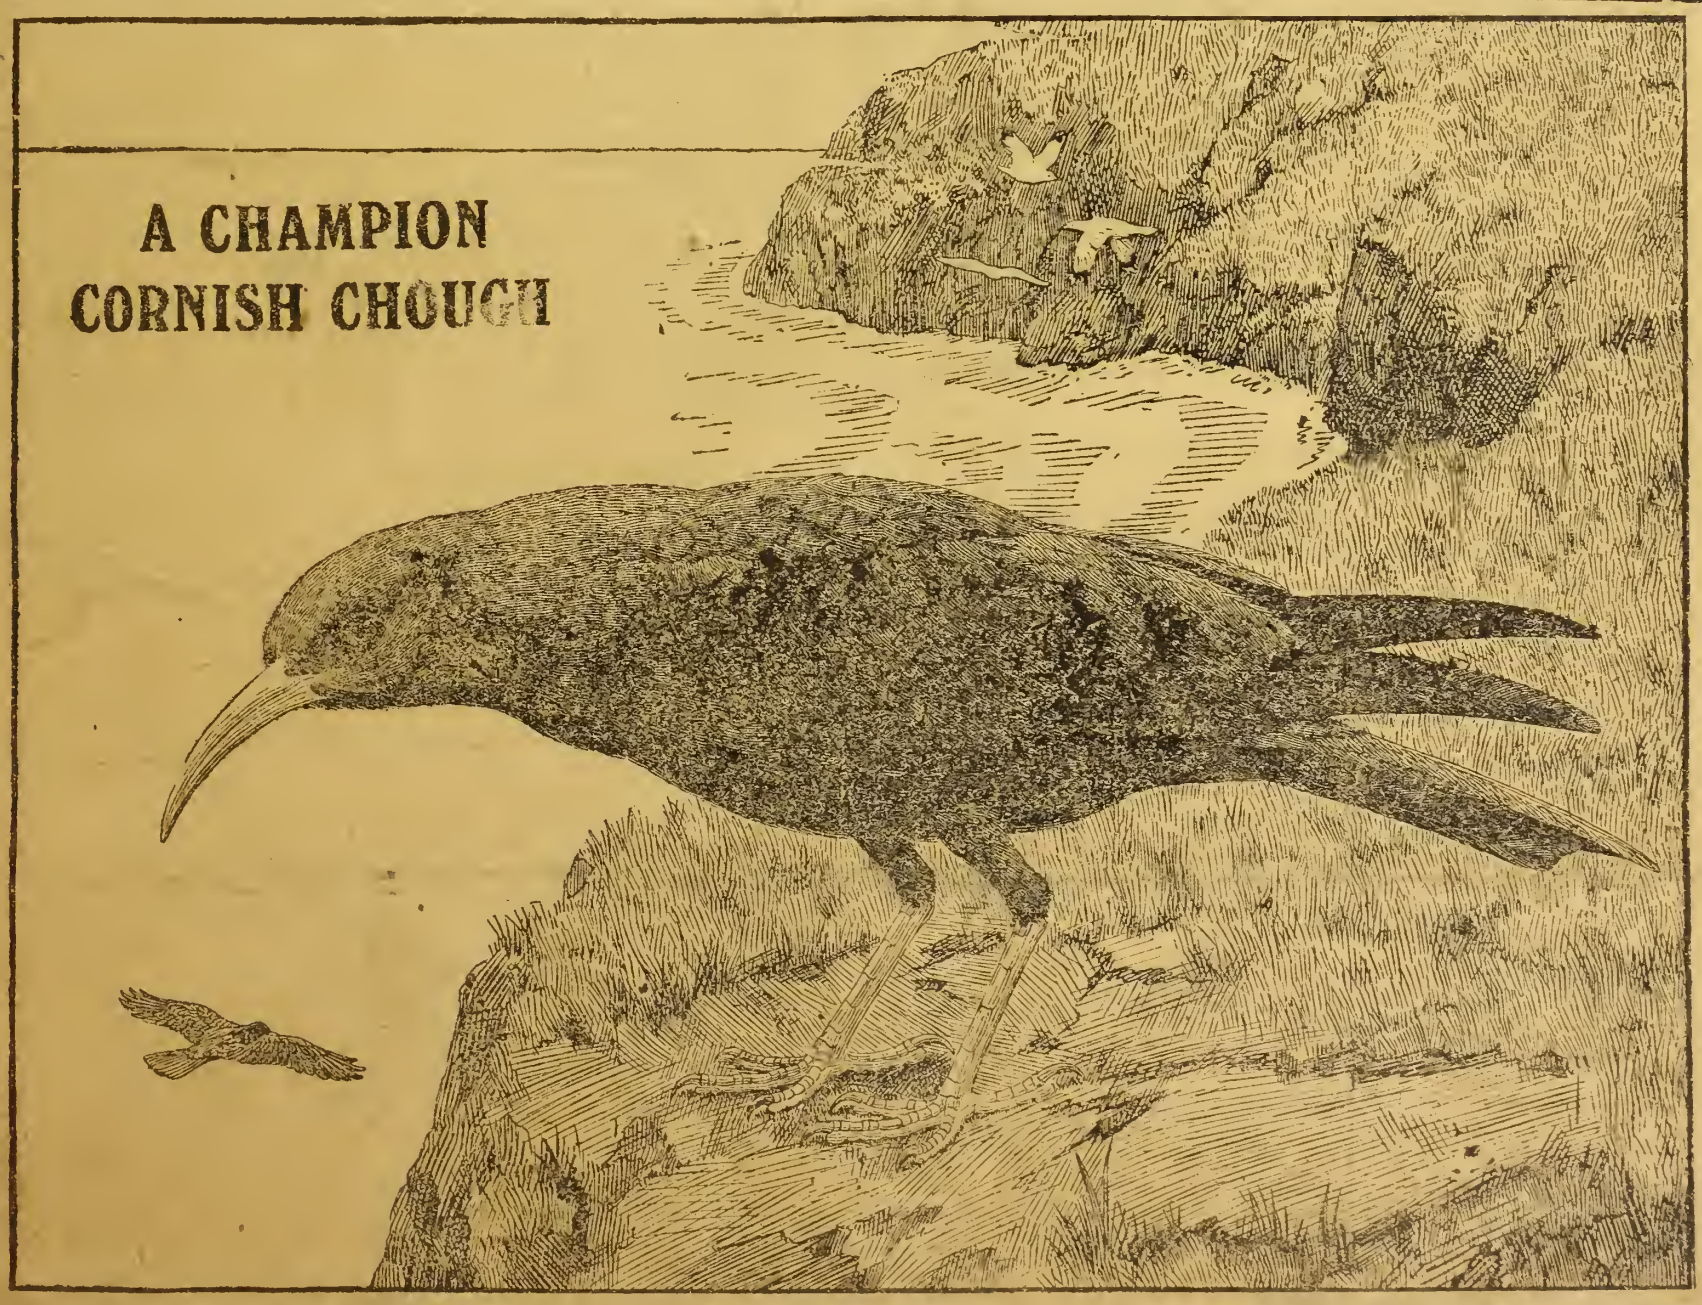
A CHAMPION CORNISH CHOUGH



The great Cornish Chough, one of the very best ever seen on the show bench, is the property of Mr. Peter McQuiston, Ayr. The bird is now at least nineteen years old, and is as healthy to-day as on the first day of his being exhibited. During its long career the bird has won at the principal shows in Scotland and England no less than a hundred and twenty prizes.

F. CARL, Publisher, 154, Fleet Street, London, E.C.

Advertisement Charges.

One Halfpenny for each word up to 48, 1d. per word afterwards. Name and address to be reckoned. Minimum, 12 words 6d.

For rules see issue of Jan. 6th.

NOTICE TO BIRD PURCHASERS.

It is advisable that all newly-purchased birds, especially foreign birds, be kept isolated from established stock for a week or ten days, until by their condition they establish the fact that they are thoroughly healthy.

READY NOW.

THE GREAT NEW NATIONAL NEWSPAPER,

. Every . Thursday "FOOD," 1D. WEEKLY

How to Produce it, Prepare it and Purvey it.

The most important question of the moment is Food. The Nation calls for an organisation of all its Resources in Food Production. For the first time in our history Agriculture is adequately represented in our National Councils by a Food Controller and a Practical Expert at the Head of the Board of Agriculture. The proper utilisation of waste spaces—the breaking up of big Estates—the development of the allotment system, all these ideas and many others equally beneficial seem in process of fulfilment. It will be the aim of "FOOD" to show the people of Great Britain how to grow their own food—cheaply and well. "FOOD" will bring all Food Growers, Food Dealers and Food Consumers into regular and easy touch with each other. "FOOD" will cover the production of all kinds of Foods and also their method of preparation for the table. The leading experts on Food will be retained for "FOOD" as regular writers and advisers, and readers of "FOOD" will be kept in close touch with the markets and the latest methods. All the work of the smallholding from week to week will be discussed—the plans for Fruit and Vegetable growing debated. The successful raising of Poultry and Pigs, Cattle, Sheep, Goats, etc., will all be comprehensively, simply and practically dealt with. There will be articles on Bee Cultivation and Rabbit Farming. In short, every phase and side issue of the Great Food Problem will be touched on. Under the Editorship of

MR. J. W. HURST,

(Editor of Nelson's Encyclopædia of Agriculture, The Farmer's Annual Register etc.)

"FOOD" will strive to be of real National Service. Place an order with your Newsagent to-day, for the first number. Tell all your friends about "FOOD" and if you have anything to advertise, take advantage of the huge sale and circulation such a Journal is sure to secure. If you desire on patriotic grounds to support such an enterprise by subscribing to it, send 6/- to-day for a year's Subscription to—

The Publishers of "FOOD," 154, Fleet Street, London, E.C.

Champion YORKSHIRES & NORWICH

Once again my Norwich and Yorkshires are proving their quality by securing premier honours at all the leading shows (see show reports). I am now offering a limited number of grand stock and exhibition birds, either Yorkshires or Norwich, which I can guarantee are bred from my own **Bulldog Strain**, at 20/-, 25/-, 30/-, 40/-, 50/- each, cocks or hens. Also a few grand matched pairs at 40/-, 45/-, 60/-, 50/- per pair upwards. These are splendid value and have only to be seen to be appreciated.

I have also a grand selection of stock birds from other well-known strains, as follows:—

YORKSHIRE COCKS, grand lengthy birds, in full song, 15/-, 17/6, 20/-, 25/-, 30/- each, upwards.

YORKSHIRE HENS, smart, racy, typical hens, 7/6, 10/-, 12/6, 15/-, 20/- each, upwards.

MATCHED PAIRS, 20/-, 25/-, 30/-, 40/-, 50/-, 60/- per pair upwards.

NORWICH PLAINHEADS. Grand, thick-set, cobby birds at same prices as Yorkshires.

BORDER FANCIES. I have a particularly good lot of Border Fancies in stock. I can guarantee them to be bred from noted winners and to include many birds capable of winning. Cocks, 12/6, 15/-, 20/-, 25/-, 30/-, 40/- each. Hens, 5/-, 7/6, 10/-, 12/6, 15/-, 20/-. Matched Pairs, 15/-, 17/6, 20/-, 30/-, 40/-, 50/-, 60/- per pair. I have also a grand selection of Crests and Crestbreds, pure-bred Rollers, Mules, etc., etc. Please write stating wants. **Remember,** I send every bird on 7 days' approval at my sole risk. I personally select every bird that is sent away. I have over 4,000 (four thousand) birds in my rooms at the present time to select from, and I guarantee to give absolute satisfaction to every customer or return cash in full. Terms: Cash or deposit with Editor.

Travelling cages 4d. extra in all cases.

JOE THOMAS, Breeder, Exhibitor, and Exporter, AMBLER THORN, HALIFAX, YORKS.

Your Last Opportunity.

If you have not already booked your advertising space in "Cage Birds Annual" for 1917, do so at once or you will be too late. No announcement can be dealt with that reaches us after Jan. 25th. REMEMBER the closing date, and make sure of YOUR advertisement for a whole year in the Bird Book of the year.

You are absolutely throwing business away if you do not advertise in our Annual. Surely a constant stream of orders all the year round is a good return for your money. Send in your order NOW without delay.

W. N. TURNER

BREEDER OF CHAMPION NORWICH OF 26 YEARS' STANDING

I have bred and supplied birds which have won this season, and still have a grand stock to select from, related to my winners. See show reports Liverpool Manchester, Sheffield, Barrow, Leicester, Halifax, Huddersfield, Ardwick, etc., etc. This strain heralds itself. Inspection invited. Approval; stamp reply: 3a, Percival-st., Hightown, Manchester.

J. C. BARNES

Well known strain; 25 years' study. One of the finest private collections of Norwich in England; type, quality, colour, and substance combined; to those who can visit me do so and see for yourself; 200 birds to select from, all judiciously bred; grand pairs, 50/- up; odd cocks, 20/- upwards; special pairs, £3 to £5; guaranteed correctly matched and robust; state requirements, stamp; approval; satisfaction ensured; all fanciers welcome and cordially invited: 113, Northfield-rd., Walkley, Sheffield.

12/- Per Pair 12/-

Will give 12/- per pair for good surplus stocks of YORKSHIRES, NORWICH or ROLLERS.

12/6 to 15/- per pair for CRESTS, and will deposit cash with Editor.

I am also open to consider offers of good class birds at higher prices.

I also require BORDERS, MULES, etc. Will pay top prices and deposit cash.

H. GLEDHILL,

Fleet Lane, Queensbury, Bradford

Have the Right Sort at the Right Price from the Right Place on Approval and they Will Pay You Well.

Remember, I possess the birds I advertise; if you want pairs, leave it to me; for it is no trouble to me to produce documentary proof that the foundation of many past and present exhibition studs have been laid by birds purchased from me. Great value for money is my forte. I herewith give a few prices of exceptionally good

Norwich Plainheads & Yorkshires.

You may have all the so-called strains and bogus pedigrees in the world, but you cannot purchase better blood than I now hold, and I am certain you cannot procure the same value. Cocks, 15/-, 20/-, 30/-, 40/-, 50/-. Hens, 15/-, 20/-, 30/-. Pairs, 25/-, 30/-, 40/-, 60/-. These prices are for show birds and stock birds to breed winners. For others at lower prices, of above varieties, see my list. For Belgians, Cinnamons, Lizards, Scotch Fancies, Borders, Rollers, Mules, etc., also list for 1917. Inspection by appointment. Not a shopkeeper, hence the appointment.

Rollers & Singing Canaries

1917-OPINIONS-1917

Following are a few—a very few, a very few I admit—but a very large quantity of similar expressions of satisfaction have already been received during this past fortnight of 1917. Of course, that is very easy for anyone to state, but I am **proving** it by sending a batch to Editor for inspection, bearing 1917 postmark.

Tamworth, Jan. 13, 1917.—Sir,, the songster is a beauty; I have heard some singing cocks in my time, but never one to come up to this. I also purchased two Rollers from you about five years ago, through the advice of a friend, and they were just great.—J. Sands.

Swansea, Jan. 9, 1917.—A line to let you know received bird safe. I'll tell you that I am more than pleased with it. Well, it's a champion. I wouldn't mind having a mate for her in a short time of the same type. I am very glad.—Wm. Matthews.

Merthyr Tydfil, Jan. 1, 1917.—Dear sir, kindly forward me your price list. You are one of the very few honest gentlemen in the trade of birds, which I have proved.—J. E. Bullock.

Southampton, Jan. 1, 1917.—I am writing to inform you how pleased I am with the birds. The cock bird sang the day after he arrived, and he is such a sweet toned bird. This is not the first time we have had birds from you and been satisfactory. When we travel from England to Canada we have taken some of your birds back with us. Wishing you every success. —C. Valentine.

Mossend, Midlothian, Jan. 12, 1917. — Hen arrived all safe, and thank you very much, as I am quite satisfied with her. If I require any more birds I will know where to deal now.—W. Girdwood.

53, Castle St., Nenagh, Co. Tipperary, Jan. 5, 1917.—The Parrot arrived safely last night, and was in wonderful form after such a long journey. It is a very nice bird. I was amazed to hear it talking before it was half-an-hour in the house. With many thanks for your prompt and careful despatch.—Mrs. S. Burchett.

Eton, Windsor, Jan. 12, 1917.—Birds arrived this morning quite safely, in good condition. I am well satisfied with them, and shall not forget to tell my friends where I got the best value in birds.—S. Lawes.

W. RUDD, SPECIALIST, NORWICH.

ROLLER cocks, warranted, 5/-, 6/-, 7/6: Lloyd, Aviaries, Gorseinon, Glam. (739)

AIDS TO SUCCESS.

Our Books and a Common-sense Application of the Advice therein MUST bring you Profit as well as Pleasure

All the experience of years o careful study by experts is at the disposal of readers.

YORKSHIRE CANARIES, 2/2.—By H. W. Battye (Past President of the Yorkshire Union). Absolutely the very best Handbook dealing with the Yorkshire and its sub-varieties. Contains complete instructions upon Pairing, Breeding, Moulting, and successful Exhibiting, also how to treat in both health and disease.

NORWICH CANARIES, 1/1.—By C. A. House. Tells the fancier all that he needs to know to enable him to become successful as a breeder, and exhibitor of the Norwich Plainhead. The chapters on "Forming a Stud," and "How to Produce the Ideal" are worth the cost of the whole book.

THE SECRETS OF HYBRID BREEDING REVEALED AND EXPLAINED.—By many notable Mule and Hybrid Breeders. Among the contributors are such well-known breeders as Messrs. R. Colton, W. H. Vale, C. Houlton, C. J. Ward, J. Beswick, G. Lander, T. H. Kinch, T. Smith, etc. This Handbook, which contains 212 pages, 7 inches by 5, is brimful of the most practical information on the highly interesting object of Hybrid Breeding. Price 1/-, post free 1/2.

AVIARIES, BIRD-ROOMS, AND CAGES, 2/3 (cloth gilt).—By H. Norman. Contains ten lovely full page photographic plates. A practical guide which deals thoroughly with the proper Building, Fitting, and Management of Aviaries and Bird-rooms, and the making of Cages.

SEEDS, FOODS, AND WILD PLANTS FOR CAGE BIRDS, 1/2. — By various leading authors. Full information on the seeds suitable for all cage birds, their food values, uses, etc., with descriptions and illustrations of the wild plants indispensable to the successful keeping of British and other birds.

BRITISH BIRD MANUAL, 2/3 (cloth bound).—By H. Norman; or may be had in two parts. Part 1: "Hardbills," and Part 2 "Softbills." Either Part, price 1/1, post free. Each part contains a beautiful and life-like coloured plate and numerous illustrations of birds and cages. Up-to-date information on the keeping of British Birds.

THE STOCK BOOK, 7d.—Of our invaluable "Breeding Room Register" a well-known fancier has said:—"It makes bird-breeding easy." No breeder of birds can possibly afford to be without it. It simplifies the operations in the bird-room and makes it possible for everyone, even the veriest novice, to breed his birds as they should be bred. Contains both Pedigree, Breeding, Young Bird, and Show Registers of simple and unique character, in adition to useful account pages.

HOUSE'S CANARY MANUAL, 1/2.—By C. A. House. A thorough, practical guide to the general management and breeding of Canaries, dealing fully with the breeding, etc., of every member of the Canary family, including the Roller (or Singing) Canary. An illustration of each bird, by the master Canary artist, Mr. H. Norman; exhaustive chapters on aviaries and cages, breeding procedure, moulting, exhibiting, diseases, and seeds, a compendium of knowledge.

FOREIGN BIRDS FOR BEGINNERS, 1/1½.—By W. T. Page, F.Z.S., etc., Foreign Bird Expert to "Cage Birds." A highly instructive Manual. It contains a magnificent coloured plate and a number of black and white Illustrations. Indispensable to all keepers of Foreign Birds.

A WONDERFUL SERIES OF BOOKS

Vast Amount of Valuable Information in the Clearest and Handiest Form.

Encyclopædic Knowledge in 6d. Vols.

READERS of "Cage Birds" have to-day an opportunity to secure at PRE-WAR prices Volumes of the well-known "Everybody's" Series.

Each volume is, on its particular subject, the handiest and clearest written book obtainable. Each is small enough to fit in the pocket, yet each is packed with a vast amount of valuable information, printed in clear, legible type.

PROFITABLE KNOWLEDGE.

"Knowledge is Power," says the proverb But it is more than that—it also is the means of attaining enjoyment—happiness—and of conferring it on others.

Among the list of volumes given here you will find books that give information of profitable—of money-making value—as for instance, "Everybody's Guide to Carpentry," "Everybody's Guide to Poultry keeping," "Everybody's Home Dressmaker," "Everybody's Book-keeping"—others which give useful, money-saving information—such as, "Everybody's Pocket Lawyer," "Everybody's Medical Guide," "Everybody's Cooking and Household Guide"—others, again, that give practical hints on hobbies—"Everybody's Guide to Photography," "Everybody's Book on Angling"—whilst others contain a fund of jokes, of recitations and of curious facts which are aids to popularity and social advancement—books which enable you to give pleasure to others.

Look through the list given here.

Among the books are sure to be some that you need—some that will give you just the information you have been seeking on some knotty point.

Then consider the wonderful price—only 6d. each (8d. post free), strongly bound in cloth, 1s. each (1s. 2d. post free), in attractive leather binding or—

Any Six for 3/-

(in cloth) or 6 for 6s. post free if leather bound.

THE ADVANTAGE OF ORDERING AT ONCE.

The number of these splendid books is very limited. Owing to the enormous increase in printing and paper *it may be impossible to reprint them at the present price.*

Send your order TO-DAY. Simply fill in the enclosed Coupon with your name and address and P.O. for the required amount.

CAGE BIRDS, 154, FLEET STREET, LONDON.

HAVERFORDWEST

Poultry, Pigeon and Cage Bird Show, **Jan. 25, 1917. Entries close Jan. 18, 1917.** Judges: Poultry, Mr. Dick Richards; Pigeons, Rabbits, Cavies and Cats, Mr. Sid Bowler; Cage Birds, Mr. Wm. Nicholas. Proceeds in aid of Cottesmore Hospital for Wounded Soldiers. For schedules apply—**Wm. H. Davies, Sec., Woodlands Cottage, City, Road, Haverfordwest.**

ABERBARGOED

Fur and Feather Society, **Great Open Show** of Poultry, Cage Birds, and Rabbits, on **Feb. 1, 1917.** We beg support from the Cage Birds Fanciers, this being the first **Open** show ever held in the district. **Judge** in Cage Bird Section, **Ellis Hughes, Esq.** Yorkshires, Class 7, Cock, yellow, guaranteed by L. Grey, Esq. **Valuable Specials.** Schedules, Cage Birds and Rabbits only.—**Asst. Sec., E. Cityerely, 44, Court Cock Street, Aberbargoed; and Gen. Sec., W. J. Ellis, Aberbargoed.**

PENYGRAIG

C.B. SOCIETY.

OPEN SHOW

in aid of British Prisoners of War in Germany, will be held on **Jan. 25th, 1917.**

Good Classification.

Plenty of Open Specials.

Judge, S. J. Nicholas, Esq., Swansea.
Entries close Jan. 21st.
Schedules from Sec., **T. L. Evans, 10, Brook-st., Penygraig, Glam.** (731)

WIMBLEDON'S

12th ANNUAL SHOW

QUEEN'S HALL, WIMBLEDON, TUESDAY NEXT, JANUARY 23.

Admission 7d., including tax and catalogue. Show open 1 p.m. (762)

ABERTILLERY SIX BELLS.

The 8th Annual Open Show, **Feb. 7.** Judges: J. Parfitt, Blackpool, Yorkshires and Borders; H. H. Mortimer, Abertillery, Norwich, Mules, Hybrids, British, etc. Schedules, apply—**W. J. Baker, 161, Alma-st., Cwmtillery, Mon.** (766)

Cage Birds

and Bird World.

A Guaranteed Circulation amongst 50,000 readers weekly

Offices: 154, FLEET STREET, LONDON, E.C.
Telegrams—"Aviculture, Fleet, London."
Tel. No. 5229 Holborn.

The Editor *is always glad to receive and consider suitable* **contributions,** *whether articles, sketches, or photographs. Provided an addressed envelope, sufficiently stamped, accompanies same, every effort will be made to return unaccepted contributions promptly, but he does not in any case hold himself responsible for their safety.*

All matter *intended for publication must be written or typed on* **one side** *of paper only, and must reach us not later than the first post on Tuesday if insertion in the next issue is desired.*

"CAGE BIRDS" will be sent post free weekly, on the day of publication, at the prepaid rate of 10s. per annum for the United Kingdom, and 13s. annually for foreign countries.

Twitterings.

We hear that Mr. E. L. Hughes, of Penygraig, will judge the Cage Birds at Aberbargoed, Mon., Feb. 1.

Swansea C.B.A. is holding a show, open to 20 miles radius, on Feb. 4 at the Elysium, High Street. There will be 40 classes in all.

Mr. W. D. Fryett, hon. sec. of the Crystal Palace and Penge C.B.S., thanks all members who so kindly subscribed to the purse presented to him at the general meeting.

We have received the balance-sheet for 1916 of the Eastleigh C.B.S. Three shows, pairs, nest feather, and open, have been held during the year, and the balance of £1 8s. 9½d. brought forward is increased to £3 5s. 7½d.

I am leaving my business address, 27, Oxford Street, Manchester, owing to expiration of lease on Jan. 22, writes Mr. W. C. Drew, and all enquiries after that date should be sent to my private address, 15, Dudley Street, Brooks Bar, Manchester.

The balance sheet of the Midland Roller C.C. to hand shows a gratifying progress for the year. The 1916 show yielded a profit of £11 7s. 10d., and the cash in hand is £28 12s. 1½d., an increase of £13 17s. 8d. over the amount in hand at the beginning of the year.

"British Birds" for January, Messrs. Witherby and Co., High Holborn, 1s. monthly, has for its leading article some most interesting "Notes on the Breeding Habits of the Red backed Shrike," by J. H. Owen, and this is illustrated by some striking photographs. An article by H. Noble on the "Supposed Breeding of the Barnacle Goose in Ireland," and some especially interesting "Notes" complete a good issue.

Don't Forget Peny-Graig Charity Show.

Entries for Peny-graig Show are very slow in coming in, writes Mr. T. S. Evans, and this being a Charity Show we are trusting that fanciers will give their most liberal support.

Stick Insects as Bird Food.

A letter from M. P. A. Pichot, in the January issue of the Avicultural Magazine, says that the Stick Insect (*Carausius morosus*) increases so rapidly that it may well form a source of food for insectivorous birds in captivity to take the place of mealworms which are now so difficult to obtain.

We hear from the hon. sec., Mr. W. Hodson, that the Dulwich and Peckham C.B.S., has arranged its show dates as follows :—Annual pair show, Feb. 20; judge, Mr. J. Robson. Young bird show, June 19, judge, Mr. H. Norman. Autumn show, Nov. 20; judge, Mr. J. Robson. An interesting programme has been arranged for the monthly meetings including lectures by Mr. J. Robson and Mr. H. Norman, a paper by Mr. E. S. Lugg, Plymouth, a debate opened by Mr. Geo. Sands and Mr. C. H. Grendell, a question night, and a judging competition.

Incorporation of "The Zoologist."

The well-known and old established natural history monthly, "The Zoologist," having been acquired by Messrs. Witherby and Co., will in future be incorporated with the illustrated monthly magazine, "British Birds," published by the same firm at 326, High Holborn.

The old-established natural history monthly, "The Zoologist," which now ceases to exist as a separate journal, has had a long and honourable career of usefulness. Established in 1843 it was edited by Edward Newman until his death in 1876. For the next twenty years it was conducted by Mr. J. E. Harting, and during this time, as was to be expected, ornithology occupied an important part of its space. From 1897 to 1914 Mr. W. L. Distant was editor, and its last editor was Mr. Frank Finn. The incorporation will mean that the scope of "British Birds" will be enlarged to cover articles and notes on the avifauna of Europe and N. West Africa.

The opening article in the Avicultural Magazine for Jan., the journal of the Avicultural Society is "Notes on my birds at Villers Bretonneux in 1916," by M. Jean Delacour. The photograph of the heated corridor and aviaries which accompanies the article will arouse envy among aviculturists. "Swallows at the Front," is a long and interesting article reprinted from "Country Life," and Dr. A. G. Butler writes also on "Our British Swallows." Mr. Allen Silver, now Private A. Silver, contributes articles on the Long-tailed Combasou and "Two Hangnests and a Tropial.

Prize Money Paid.

We hear that prize money has been paid in respect of Mansfield C.B.S. Show.

Hands Across the Sea.

I have received £3 3s. from the Victorian Canary Society and Mr. F. White as a donation to the funds of the London and P.O.S., writes Mr. J. W. Ramsden, and am asked to acknowledge same in CAGE BIRDS, which I now do, with many thanks.

Some Late Records.

Among the "Notes" in "British Birds" for January, are some curiously late records. Four freshly-laid eggs were found in the nest of a Wren on Oct. 10; a brood of House Martins were being fed in the nest on Oct. 19, and a young Cuckoo was seen on Dec. 1.

Corrections in Show Reports.

Mr. J. Smillie, Kilmarnock, writes that he won 1st in the Buff Hen class at Irvine Show, not Mossie as reported. Mr. E. J. Hopkins states that he won 1st in Variegated Yellow Norwich at Landon and Plasmarl, not Lipscombe as in our report, and that he did not win 3rd prize as stated. 1st in the Goldfinch and Bullfinch class and 2nd in the Bramble, etc., class at Mansfield should be Blanchon, not Blacken. Mr. S. Ferguson writes that he won 1st in Unflighted Yorks Hens at Larkhall, not Park as reported.

An Open Letter.

To the Readers of "Cage Birds."

Friends, one and all,—I am writing this letter, as a friend to friends, to tell you something more of the coming of a new weekly paper which has already been mentioned in our columns. The paper, as you already know, is to be called FOOD, and the first number will be on sale when you are reading this. 100,000 copies will be printed, but there may not be enough to go round, so you must hustle if you would benefit by the reading of it.

Coming to Fleet Street from my cottage in the suburbs of London I overheard two fellow passengers by the tram telling of their last year's gardening experiences. One said that from a pound of seed potatoes of a particular kind he had dug six pounds of produce, and the other was quite proud to be able to say that his own pound of the same kind of potato had produced seven pounds.

It is on record that in a strictly supervised competition at Ilkeston, Derbyshire, a working man, by name T. Smith, raised 204½ lbs. of potatoes from a single pound of "seed."

It is scarcely to be expected that everyone can produce nearly two hundredweight of potatoes from one pound of seed, but everyone may do as well as a lady of my acquaintance, to be explicit, my wife, who is by way of being a bit of a gardener. Last season we (that is, she), planted three pounds of seed tubers, and we dug a full hundredweight from the row in the autumn. If you would know how to make 3 lb. of seed potatoes into a hundredweight the new weekly, "FOOD," will tell you.

In my evening paper last week I read a paragraph which ran, "In the poultry farm of the Rochdale Guardians during December 118 head of poultry produced only 54 eggs. Each egg cost the Guardians 2s. 2d." It is such paragraphs as the one quoted which show the want of knowledge prevailing in respect of poultry keeping, even on the part of the writers to the papers.

I have, at least the lady before mentioned has, a pen of seven second season hens. These hens all went into moult at about the same time, and the first egg laid since the happening was produced on the day preceding the writing of this letter. At present prices hens cost about 3d. a week each to keep, so according to the logic expressed in the paragraph quoted this one egg cost fourteen shillings, as the moulting time extended over eight weeks.

But, and it is a very big "but," in the thirteen or fourteen months which constituted their "pullet year," these hens each laid more than 200 eggs, not one of which was sold for less than 2½d. They were from seven to eight months old when they started laying, let us say eight months, so they are now twenty-one months old. At a fair estimate of two-pence-halfpenny per week for food, there is a profit of about fifteen shillings per bird, and we still have the hens. Yet the egg laid yesterday may be said to have cost fourteen shillings!

The new paper, "FOOD," in its article, "How to Begin Poultry Keeping," will tell you how to do as well or better.

By rearing my own rabbits I know I can produce rabbit meat at half the price I can buy it at the provision shop, and at the same time I can get better stuff. If I rear twice as many as I want for my own consumption, and sell the balance, I get my rabbit meat for nothing. So may you if you read "Rabbits for Backgardens," which is to be one of the features of "FOOD."

I don't know much about bee-keeping, but I know they will provide delicious honey at scarcely any cost, and scarcely any trouble. I am going to learn all about it in "FOOD." "Bee-keeping Notes" will be my teacher.

I have not told you a tenth of what you may find out yourselves for a penny. Get the first number, friends of CAGE BIRDS, and you will write thanking me for having written this letter.

THE EDITOR.

Hope for the Bearded Tits.

Lord Lucas, who was killed in France on Nov. 3, bequeathed to the Hon. Ivo Grenfell, the Whiteslea Estate, consisting of between 2,000 and 3,000 acres in the parishes of Hickling and Catfield, Norfolk, as a sanctuary for rare birds, with an annuity of £250 for its upkeep.

SPARROWS & THE NATIONAL FOOD QUESTION.

Mischief Wrought by Humanitarians.

Writing to the "Yorkshire Post," a correspondent says :—"Now that farmers are urged to grow all the corn and potatoes they possibly can, and encouragement is given to the cultivation of allotments in view of the serious outlook for our food supplies in the coming year, would it not be advisable in the first three months of the year, when we may expect the weather to be most severe, to take some steps to reduce the number of Sparrows and Rooks? As a dairy farmer in the neighbourhood of a town, and needing turnips for the production of milk, my experience of corn growing as an alternate crop is very discouraging, owing to the ravages wrought by the House Sparrow.

"At a low estimate, one-fourth of what I grow is consumed and wasted by Sparrows. Indeed, at harvest time it is distressing to see the quantity, sacksful, that is shaken out and lying on the ground, besides what has been consumed by these useless pests.

"Let any observant person go near a cornfield in the vicinity of a town, and notice the Sparrows, rising up in thousands when scared, and notice the cornless ears left in their wake. I also fancy the would-be allotment man will be disheartened when he finds his lettuce and radish beds cleared of seed before it has had time to sprout.

"Away from the towns they have not one Sparrow where we have fifty. And what is the reason? Simply, they are not fed in the winter, but in the towns, to which they migrate at this time of the year, besides the food they pick up in the streets, they are daily fed by scores of possibly good-natured, but unthinking, people, who do not realise the evil results of their good nature. But really it is as senseless a practice as it would be to feed rats or mice."

"W. C.," in the "Manchester Dispatch," says : "The authorities in discussing the food supply of the country should have an eye upon the Sparrow problem. An organised campaign of extermination, either by the formation of Sparrow clubs or rewards for the destruction of the birds, is necessary, for to-day we cannot afford to risk a year's crop. The Sparrow is actually as bad as he is painted, and Sparrow pie is not a bad dish after all.

Rough on New Laid Eggs.

An authority declares that the amount of nourishment obtained from one Sparrow exceeds that of two new laid eggs.

A 21-year-old Canary.

A canary in Belfast is in its 21st year. The bird has gone blind with age, but it is still in perfect bodily health, and is bright and happy.

"If This Should meet the Eye."

Some time ago, writes Miss A. Chatterton, you printed a small article I wrote, and in consequence a gentleman (I think it was from Chester) wrote asking me to send him any foreign birds' eggs I had and did not want, as he collected them. I sent one lot and then unfortunately lost his address, and I am afraid he thinks me very discourteous. If he will write me again I would be happy to send him some more.

A Change of Venue.

Owing to the proprietor, who is a member of the club, being called up, writes Mr. J. W. Norris, hon. sec. British Roller C.C., we find at the last minute we are unable to hold the annual show at the Hall, where we have had the past two shows, but we have succeeded in finding a place now, and the show will take place at the Bazaar Tavern, King Street, Baker Street, London, W., on Feb. 9th. The judges are Messrs. J. Netherwood, Kettering, and F. E. Fisher and W. H. Shepley, A.R.C.M., London. The usual liberal list of special prizes will be given. Will the numerous exhibitors who have written for schedules please make a note of the alteration of the date. Schedules will be sent out this week-end.

An Event of the Week.

Just as we are going to press we have an advance copy of the new weekly journal, "FOOD," the first number of which will be on sale by the time this paragraph is printed. In an editorial note the views of the paper are expressed in terms that should appeal to all. "It is our aim not only to advocate increased production by all available means, but to give our readers the practical information that will enable them to grow food cheaply and well." Admirable intentions shortly and well expressed. It has only been possible to take a hasty glance through the contents of the first number, but we have seen enough to be assured that a good beginning has been made in the direction of carrying out the policy indicated. No one can afford to be without the first number. The price, one penny, is no criterion whatever of the value of the contents. There are articles on Poultry Keeping, Gardening, Goat Keeping, Pig Keeping, Cooking, and a score of other things. The paper should command a very wide circulation, and should be a great power for good.

Readers are advised to use our Deposit System when dealing with Advertisers. See rules at head of small advertisements.

Breeding Yorkshire Canaries for Exhibition.

By J. A. GREENSLADE (Bristol).

A practical article by a successful breeder, showing how to select stock in breeding in order to avoid faults, and to perpetuate and improve desirable qualities.

AMONG the fascinations of our hobby are the many problems that continually confront us, and the subject of "Selection for Mating" presents as many problems as almost any other topic one could mention. The breeding to "type," with the other essential qualities of the Yorkie will never be an easy matter, as Dame Nature sees to that. Only brains and experience can circumvent her vagaries, and then not always.

In the first place, we must bear in mind what material the Yorkshire was produced from, and I believe it is generally accepted that the size and length-giving properties were derived from the Lancashire, and the position, style, and nervy carriage, etc., from the Belgian.

One can readily believe it, especially if the Lancashire cock was mostly used, and the Belgian characteristics derived from using the hens of that variety.

Although the Yorkshire is considered a fixed type and a pure breed to-day, and I think rightly so, there is no doubt that Nature is continually exerting her utmost in the generations of pure bred Yorkshires, either to revert to the Lancs. or the Belgian, and perhaps in some instances, to the Norwich.

The Penalties of Out-Crossing.

Hence the drop tails, flaggy thighs, square shoulders, and flat and browy heads frequently seen in cock birds, generally on the large side, evidently throwing back to their Lancs.' ancestors. Also the extra racy, small and snaky headed, high shouldered hens, generally very much on the small side, unmistakedly showing traces of their Belgian origin.

Further, in some instances you can meet with thick set, wide backed, short tailed, and short legged birds, masquerading as Yorkies, but undoubtedly showing Norwich tendencies, and most likely they have been used largely to obtain colour, but possibly at the expense of type for the time.

In the combating of these natural tendencies of the variety lies one of its chief attractions to my mind, the great idea being to retain the true Yorkie type, with the correct size, grace, and beauty, quality of feather, position, and colour.

One might ask: Is there a proper guide to the ideal bird, and if it were produced, would it win to-day? Yes, I believe the standard fixed by the Yorkshire Canary Club still holds good, and rightly depicts the winner of to-day, except in one direction, and that is length, as the present winners have long left the 6¾ bird behind them, and are being shown anything up to 7¼ inches, and in some rare instances with all of the most desirable points of the standard size bird.

One can easily forgive this breaking away from the standard on this one point when we consider what a big following the breed has to-day, and that it is still rapidly claiming many new devotees. This of course has the effect of producing the standard bird in greater numbers, "good little ones" being now fairly numerous. In my humble opinion, it is much better for the variety for the existing standard to prevail, and give honours to the larger and much more difficult bird to produce, than to alter the standard altogether when winners get plentiful, as is done in some fancies. But let me here sound a warning; in the craze for large winners let us not lose the captivating and essential characteristics of the true Yorkshire.

How to Select Stock Birds.

Before mating to produce the bird of our dreams and the goal of our ambition, it is very necessary that we have kept the right and best available birds for the purpose. I am therefore throwing out the following suggestions, not as the sure and only road to success, but only as they occur to me, and as they are the ideas I have found successful, my reason for doing so being to assist the novice, who I know from my own experience, is often greatly perplexed in this matter.

In the selection of stock birds, we want a maximum of divers good points, with a minimum of bad ones, to enable us to balance the good points to produce the good whole. But the balancing idea must not be carried too far, such as mating the largest with the smallest, or the roughest with the smoothest, etc., neither is it often profitable to mate the best with the worst, or we should be landed into breeding a miscellaneous assortment of oddities.

I do not think that even the "great guns" of the fancy can or do expect to breed winners in every nest, or even showable stock from every pair they put up, but mate some for size, some for style and type, some for quality and colour, with a more or less certainty of breeding something decent from some particular pair or pairs. To my view this idea is good, specially from an economical point, and helps far to lay a self-contained strain, whereas if one bred for quality and colour alone, one would have to go elsewhere for size fairly often, and if one studied size too much one would have to import quality and colour at frequent intervals.

Size versus Colour and Quality.

One general factor holds good in my experience, and it is that size is antagonistic to colour and quality every time, I think some of the reason being that bad colour follows size from the Lancashire ancestors referred to previously. I think it is a fairly general principle with many Lancashire breeders that variegation is no help to them, neither do they seek it overmuch and they also mate buff to buff much more frequently than the breeders of any colour variety would care to do.

The fact remains, if colour or size is carried to an extreme the progeny deteriorates either to course heavy birds without any symmetry or to small hot coloured specimens, very pretty and all that, but of no use either for show or stock.

What I consider is harder than the actual mating of the pairs is to weed out the undesirables, and, starting with yellow cocks, I should first discard all the small pale coloured ones, as from them we cannot expect to get any headway. The only excuse for keeping a small cock at all would be his exceptionally good colour, or if he was extra good on the leg and even at that we really want at least the standard length, and the knowledge that there is some length behind him in his parents.

The only reason for retaining a pale coloured yellow cock would be his size, and a long well-filled-in body, with good leg action, and general good carriage. Any yellow cocks that are short on leg, and with a crouching position, known as "across the perch," can also be dispensed with, as the counteracting properties are rarely met with in buff hens to breed it out. We can also say good-bye to a cock with a mean little dice shaped head, as birds of that description are of little use in the breeding cage. The main features we want in yellow cocks are size, good colour, good and well placed legs, and general typicalness.

The Importance of the Male Bird.

Some might say, and I have heard it given as a good tip, that anything will do for the male bird, so long as it has size, and is mated to a hen that is small and typical, something after the style of mating a bison to a round boxwood ruler; but do not depend on that theory very much, or you will rue it. I have proved to my own satisfaction that cocks with flat heads, drop tails, low chests, or any other bad faults, have a very big say in transmitting their characteristics to the progeny.

About the only thing I am prepared to pass over, providing of course one has the opportunity, is an abundance of feather, also feather that is a bit harsh, and even when allowing that we want to avoid any frills or twists.

Before passing away from yellow cocks, I ought to mention that the small good coloured cocks just referred to that might be kept are very useful for breeding hens from, especially from a quality point of view, providing of course they are not going back in size too much.

In selecting buff hens I should advise discarding those that have mean bad shaped heads, thin and pinched necks, or a bad chuck in the front of the neck just under the cheek, also any with thin and pointed chests. My reason in describing these particular faults is that we cannot get the yellow cocks sufficiently opposite in those directions to balance them.

I do not think it is desirable to keep the very small ones, although many advocate them. I believe it is a wrong theory, and often is the means of bringing down the size, and putting the clock back for some time. A hen that is good enough for show, but hardly large enough to get in the red tickets because of her size, is plenty small enough in my opinion.

Should we have any stock of either sex with big and ugly beaks, we must be careful what we are doing with them, and not retain them unless we are obliged to, as birds showing this fault generally breed coarse and weedy young.

(To be continued.)

Correspondence.

A Netting Query.

Further Particulars Desired.

SIR,—I am quite pleased to see a reply from "Yelneh" to my enquiry about setting nets. I would like to ask him the distance he puts his staff poles from his nets. Also for a sketch of his stave irons, with sizes of same, and a sketch of his staff poles. If I get that I think I will manage to be successful with nets.

SPRINGBURN.

An Ever Recurring Question.

How to Strafe the Red Mite.

SIR,—Now that the time of year is getting near in which we shall be starting to get our cages, etc., in order, I should like the opinion of your readers on the question of how to exterminate the Red Mite, and at the same time do no injury to the cages, if that is possible.

I am quite aware that there are many ways of destroying the pest, but, unfortunately, it always entails the re-enamelling or painting of cages, or nearly always does, and as in the present times both time and money are at a premium, I do not want to spend more of either than I can help. I hope someone will oblige.

"RED MITE."

Late Birds at Llanelly Show.

A Kindly Action.

SIR,—Please allow me to thank the committee and hon. sec., Mr. H. Webster, of the Llanelly show, for their kind attention to my birds which arrived several hours late, although sent off in good time by the previous night's mail. Mr. Webster wired me of their late arrival, and decided to keep them overnight before sending off again. I duly received the birds the following day, looking none the worse for their "joy-ride" to South Wales.

Such kindly acts as these prove the true fancier and lessen the disappointment of being "left at the post."

J. H. HALLIDAY.

Plymouth.

Gramophone Records of Bird Song.

SIR,—I see that in CAGE BIRDS of Dec. 30 one of your readers writes about records for training Bullfinches. Is it not possible to get a Bullfinch record without having one specially made? Some of your readers may not know that there are already on the market bird records; I enclose you a list of them. I have heard the Nightingale one, and I must say it is lovely to listen to. Some of the notes are like the flute.

R. RENNIE.

Dublin.

[Records of the songs of the Nightingale, Sprosser and Song Thrush have been on the market for a long time, but we think there is no ready-made record of the song of the Bullfinch. As a matter of fact the Bullfinch has no natural song worth reproducing. The records suggested in the letter referred to would be for the purpose of teaching the Bullfinch to pipe a tune or tunes.—Editor, CAGE BIRDS.]

The Judging at Whitehaven Show.

Why Are Cage Tabs Marked?

SIR,—In letter under the above heading in the last issue of CAGE BIRDS, I note that Messrs. Cook and Adams make a statement that "in all our showing this season our prizes have always corresponded with the number marked on the label."

As Cleator Moor Show has been brought into this discussion, and as I acted as judge at this show, I beg to inform Messrs. Cook and Adams that if their tabs were marked as they state they were not marked by me.

I may say that I have judged all varieties of Cage Birds at shows during 25 years, and my system has always been as you point out in your remarks at the foot of their letter. Nothing more is necessary than to mark your duplicate slip from the numbers on the tabs as you award the prizes, then hand it to the Steward, and he takes it to the Secretary who makes out the prizo tickets from this slip.

I might further say that in all my experience as an exhibitor, and I have exhibited at all leading Shows in England during the last 40 years, I never yet had a class ticket or tab marked as they describe.

J. NICHOLSON.

The Age of Caged Birds.

A Linnet 23 Years Old.

SIR,—I have been very interested in the correspondence columns of CAGE BIRDS, as I am a regular reader of the paper, and I have seen records of the long lives of some fanciers' birds. I think we can beat some of them, as last week a Linnet belonging to a relative of mine died at the age of 23 years, and it was in full song till the day it died. It always had what we called a fan tail, as it was always open. If any readers can beat this I should like to hear. I wish CAGE BIRDS the success it so well deserves. H. AINSWORTH.

Helsby.

For Wounded Soldiers in Cardiff Hospitals.

A Generous and Kind-hearted Offer.

SIR,—One or two fanciers, having relatives among our wounded soldiers now lying in Cardiff and neighbourhood, have written to me asking if I will kindly visit them at my convenience. It is a real pleasure to me to be of genuine service to anyone in this world, and especially when it happens to be one of our brave lads. Should there be any father, or mother, or relative with loved ones in any of the numerous hospitals in and about Cardiff desiring someone to visit them and report, they can count upon me to render any little service I can in this way if they will please write me and enclose a stamped envelope for reply. Furtber, if the relatives of the sick or wounded would like to come to Cardiff for a few days, say from Saturday to Monday, and are unable to pay hotel expenses, I will do my best to find them hospitality for their short stay.

I am a fancier, but more a minister, and in this capacity I would like to do something in these troublous days.

Perhaps if letters in the first place were addressed to you you would be willing to forward such to me. If you publish my address it would soon be forgotten, but CAGE BIRDS never. (REV.) C. B. JOLLIFFE.

We need scarcely say that we shall be delighted to assist in the way suggested, and will forward with great pleasure any letters that may be sent to the Rev. Mr. Jolliffe, care of CAGE BIRDS, 154, Fleet Street, London, E.C.

Is the City of Norwich Asleep?

Suggestions for an Awakening.

SIR,—"East Norfolk" in the Jan. 13 issue of CAGE BIRDS asks questions in reference to the moribund state of the Premier Society in the City of Norwich which unfortunately can be answered only in the affirmative. The organisation with a high sounding title has lapsed into a status no higher than an ordinary local society. To my mind nothing but a drastic re-construction will place this Society in the forefront, the proud position held in former years.

A commencement might be made in an alteration of its title, and, as suggested, an executive composed solely of those engaged in the Canary production industry should be placed in charge of affairs. Also the headquarters should be at a first-class place centrally situated, and preferably not on licensed premises. It seems that practically the whole of the members are expected to attend the fortnightly meetings or the present executive feel themselves unable to carry on. This position is absurd, as the business of the Society can be all well arranged by an energetic committee. As a matter of fact, and it is deplorable, the committee has probably not been summoned once during the past working year.

Every inducement was offered the Norwich Alliance to hold an open show in 1916. The newly formed East Anglian Norwich Plainhead Club, which is numerously and influentially supported in its restricted area, offered its patronage, and carefully pointed out the benefits which would accrue therefrom, and other guarantees were forthcoming which made failure practically out of the question. It is probably a knowledge of these facts which rightly inspired the letter written by your correspondent.

However, a large meeting of the All England Alliance was held last week, and if the secretary has the time he will no doubt forward you a report. It was decided that at the next meeting a determined effort will be made to arrange matters so that next autumn exhibitors from all parts of the country will have the opportunity of competing at an Open Show in Norwich. Of course, the position of affairs owing to the war will possibly have some influence in respect to this, but it will be an excellent thing to get everything in order for the time when normal conditions again prevail. VERITAS.

Correspondence continued on next page.

CORRESPONDENCE.

(Continued from page 25.)

What is an Irish Novice?

Sir, — May I, through the columns of Cage Birds, ask the different Irish Cage Bird Societies their interpretation of the word "Novice."

Paddy.

The Yorkshire Union and Closed Rings.

An Objection to a Rule.

Sir,—I am not quite sure, but think the time is fast approaching when the Yorkshire Union revises its rules. There is one printed in big type which debars birds wearing closed rings from competing. This rule is a hardship to outside exhibitors who would like to exhibit at Union shows, and excludes a certain number of entries from their shows. I should like the societies forming the Union to consider whether it is necessary to retain this obsolete rule.

T. C. Crawhall.

A Roller Canary Club for Birmingham.

Sir.—At a meeting of Roller Fanciers held Jan. 10 at "Crown Hotel," Hill Street, Birmingham, with M. W. Pimm in the chair, it was decided to form a Roller Club for Birmingham, and the following officials were elected: President, Mr. W. Pimm; Vice-Presidents, Mr. W. Tomkins and Mr. H. Layland; Sec., Mr. W. Taylor, Council School, Hospital St., Birmingham; Treasurer, Mr. W. Millward; Committee, Messrs. Heeley, Worton, Berrcy, Minetts, Savigar, Roath. 1s. Entrance Fee, 2s. 6d. Annual Subs. Meetings will be held every third Wednesday in month at "Crown Hotel," Hill St.,

W. Taylor, Hon. Sec.

Hypophosphites, Not Hypophosphates.

A Very Necessary Correction.

Sir,—May I correct a slight error in Mr. North's article on "Canary Keeping for Beginners." In Cage Birds of Jan. 13 he writes of compound syrup of Hypophosphates, but there is no such article. Parrish's Chemical Food (which is well known) is Syrupus Ferri Phosphatis compositus or Compound Syrup of Phosphate of Iron. The Compound Syrup of Hypophosphites to which Mr. North refers is a splendid tonic in cases of debility, and also indigestion, but needs to be used very carefully, about 4 or 5 drops in a drinker of water.

E. C. Last.

In Aid of a Stricken Roller Fancier.

A Fine Finish.

Sir,—I am pleased to say I have received the following amounts re my appeal for Mr. T. Simpson. Will you kindly acknowledge in your next issue:—Mr. H. J. Clemence, 2s. 6d.; Mr. F. A. Lester, 5s.; collection at Wigan R.C.C. meeting £1 2s. 6d.; collection at the British R.C.C. meeting, per Mr. Norris, Messrs. Aspinall, 2s. 6d.; Attewell, 2s. 6d.; Buffin, 2s. 6d.; Dughill, 2s. 6d., Fisher, 2s. 6d.; Gooding, 2s. 6d.; Gutierrez, 2s. 6d.; Hocking, 2s. 6d.; Peters, 2s. 6d.; Robinson, 2s. 6d.; Norris, 2s. 6d.; and Capt. Bloomfield, 2s. 6d. £1 10s.

H. Roebuck.

[With the £9 19s. 2d. acknowledged in our last week's issue, the total amount subscribed is, therefore, £12 19s. 2d., which is fully sufficient for the need specified. We have sent to Mr. Roebuck the amount we have ourselves received, and are very pleased that such a worthy object has met with such generous support.—Editor, Cage Birds.]

The Need for a National Society

What it Could Do.

Sir,—Mr. Bastock in Cage Birds of Jan. 13 makes the excellent suggestion that a National Society should be formed, which would establish a uniformity of rules, and provide protection for fanciers, thus averting, or if necessary deciding any of the unpleasant disputes now so frequently arising. His invitation for support is evidence that he thinks an organisation of this kind can be brought into existence, and it is very good of him to take the initiative in the matter.

As secretary to the recently formed East Anglian Norwich Plainhead Specialist Club, I would like to ask if it is not possible that the Specialist Clubs, which I believe, taken together, now include almost the whole of the country within the scope of their operations, could be federated under such a title as "The National Federation of Norwich Plainhead Specialist Clubs."

A Society of this character would surely be able to draft rules, definitions, etc., which societies and judges alike would no doubt adopt. The standard of points in reference to type and the definite rules of classification would be impressed upon all judges, and it would be a big step towards establishing confidence amongst exhibitors in showing their birds. Some judges will not give a Plainhead a chance if, for instance, it does not possess an abnormally big head, and others have their own pet ideas as to what constitutes perfection. It would be a great benefit to the fancy generally if a standard, etc., could be established by rule which would make the decisions of judges practically uniform. It is for this reason that I think Mr. Bastock has done well to open a way for discussion of these matters.

There are many other useful things that a federation of Specialist Clubs might do. They could, for example, jointly patronise a conveniently situated show of importance and members could compete for prizes, the honour of winning which would be greater than that of any yet striven for. At any rate, I think this is a matter worthy of careful consideration.

R. Tomlinson,
Hon. Sec. East Anglian Norwich Plainhead Club.

Would Protect the Purchaser.

Sir,—It was with pleasure I read Mr. Bastock's letter referring to the need of a National Society, and I wish him every success in his efforts to make a start, for it coincides with my letter in Cage Birds of Jan. 6, I note Mr. Norman in his letter also hints at the same thing, so let us have this society, for the time is undoubtedly ripe. Here you have the basis for not only minor questions but even the capture of German trade. I know such a society may "hit" some, but only the black sheep will suffer, for they will not be able to sell their so-called big winners to the young novice without producing the birds' credentials. Now come along, you experienced men, and help in this matter, for I am only an

Unflighted.

What is a Ticked Bird?

Cutting the Gordian Knot.

Sir,—Adverting to my letter in Cage Birds of Jan. 13, I find Mr. Norman comes pretty near to my own opinion when he states that "In our inmost minds we all have a feeling that a ticked bird is the nearest to a clear, and that feeling existed with old time fanciers." This is a sound, common-sense statement. A tick as now recognised in the bird fancy is quite as much a mark as a mark is a tick. Throw the tick question out altogether, and we come to mark, and a schedule could be worded "clear, unevenly marked, or even marked, the even marks to include both eyes, or both wings, or both sides of tail." If wings or tail, or both, were evenly marked, and one eye also marked, the bird would go to the unevenly marked class, that is, any other mark or variegation on an otherwise even-marked bird sends it into the uneven marked section.

I also find that Mr. House states about the bird in dispute: "It is ticked all over the saddle, but very lightly ticked. It is not heavily ticked as some birds I have seen." I take it that what is intended to convey is that the marks on the saddle are practically a variegation of small ticks, and here is where I find his object more or less defeated.

To my mind a quantity of isolated ticks renders the bird a marked one. If, on the other hand, the markings were one round solid, although covering a section of different feathers, it would greatly strengthen his argument that the bird is a ticked one.

As it is, the bird is without a definition other than it has a multiple of ticks. This is where I beg to differ with Mr. House, and I feel as justified and as competent to pass an opinion as he himself is, but in a friendly spirit. Of course, the correctly recognised "marks" are on eyes, wings, and tail, and any other variegation, whether on a clear or on an even-marked bird, renders the bird an uneven-marked specimen. As previously stated, there should not be such a thing as a "ticked" bird, and this would be a complete solution to all the trouble as I see it. I should indeed be glad to know the opinion of others on this interesting subject.

I find Nuttall's dictionary gives the definition of "tick" as a small mark, not a multiple of small marks, and if the word tick is to be recognised in the bird fancy the tick should not be larger than an ordinary pin's head, and the only spot on an otherwise clear specimen.

Mr. Bastock suggests a national society to deal with such questions. Even if that were done it would still be only the opinion of a few on a committee. I thought a Cage Bird Union was formed some time ago. What became of it? Personally, I consider that a good discussion in Cage Birds is more stimulating and more likely to get near the mark than any new society would be.

J. Kershaw.

In Favour of the Verdict.

Sir,—Nuttall's Dictionary gives the meaning of the word "Grizzled" as a mixture of white and black-grey. This being strictly adhered to, the word "marked" as used in the Fancy is at once void and should be completely set aside to my mind.

Revert again to Grizzle, one cannot find in a Grizzle a solid mark, only thread-like streaks, dark grey, not exceeding the size of a sixpence. The bird is nothing more nor less than ticked, in my humble opinion.

As to the action taken by Mr. House in "wrong classing" the bird owned by Messrs. Stubbs, I consider he has proved himself quite up to his profession in being fully on the alert.

I note that one of your correspondents classes the bird in question as saddled. I do not understand how this bird can be saddled either, as termed by the Fancy generally. Let us reason together and stick to the point, keeping the origin of the dispute well in front of us, also a friendly spirit. No pulling down Houses. There is no one "Idle" to rebuild them at present.

J. Locke.

The Word "Splashed" Suggested.

Sir,—I have read with great interest every letter on the matter. The short letter by Mr. J. Kershaw in Cage Birds of Jan. 13 is, I think, a good short expression of opinion by a Canary breeder. Myself, I am of Mr. Kershaw's opinion; the very word speaks for itself, so we shall look forward with interest for the Yorkshire Union and Norwich Canary Club settlement.

Respecting a marked bird, I think it needs very little decision. If we had the chance of going round a show with, say, half a dozen new in the fancy, and pointed out to them such a bird as Messrs. Stubbs', I can easily imagine how these novices would describe its markings. Very likely they would say, innocently, that the bird is splashed, and then we should no doubt correct them and say, "No, that is a marked bird." So let me, therefore, endorse Mr. J. Kershaw's few lines.

J. H. Jowett.

Ticked, Flaked, or Variegated.

Sir,—I have noted with interest all that has been said on the above subject. Having been a breeder of Scotch Fancies for nearly 30 years, I should like to give your readers an idea of what we used to term a ticked or flaked bird. I can recall many a friendly discussion on the subject with prominent old breeders, some of whom alas have gone over to the majority, and the conclusion generally arrived at was that if a bird had one or two distinct marks it was considered a foul or ticked bird, but it had three or more such marks it was a flaked or variegated. We did not consider a grizzled patch on a bird a distinct mark, it only being light coloured feathers with dark tips on ends. It was matterless what size this grizzle patch might be, the bird was always considered a foul or ticked. Then again, take a green bird; even if its tail feathers were all light, so long as it was all dark above the perch, it was classed as a green, but if it had a few light feathers on any part of its body it had to be classed as a flaked or variegated. Personally, I consider this is wrong. I think our green class ought to read "self or foul green," that would take in the light tailed and also the birds with a few light feathers on body. I hope that this subject will be so thrashed out in the columns of Cage Birds that a definite and lasting understanding will be arrived at.

C. Lugton.

Yorkshire Union v. Border Fancy Rules.

Sir,—Mr. House says we scoff at Blakston. This is not correct. We simply said we did not accept Blakston as an authority, and where the scoffing comes in we fail to see. It is admitted that the Norwich Clubs have no ruling as to what should be a tick, therefore it is quite plain that they don't up to the present time accept either Blakston or the Yorkshire Union's definition. Mr. House says the Yorkshire Canary Club, the Cinnamon Marked Club, and the Border Canary Club are in agreement with the Yorkshire Union. I would ask him to get the rules of the Southern Border Fancy Club, and then, perhaps, he will alter his opinion.

Now we take it that Mr. House judges by Blakston and the Yorkshire Union rules. Very well. This places him in a worse position than before, and we will state why. At Port Talbot show we had two birds in the marked class, one yellow and one buff, and both these birds are saddle marked. According to the Yorkshire Union rules, given us by Mr. Midgeley in this week's Cage Birds, a bird has to be marked either on the eyes, flights, and outer tail feathers before it can become a marked bird. Mr. House wrong classed the one bird and placed the other first, yet the bird that won has not got the slightest mark of any kind on either eyes, flights, or tail. Mr. House says if the markings of the saddle had been solid it is £1,000 to a grass seed that the wings would have been marked also. I can assure Mr. House that had he been judging under the Yorkshire rules his £1,000 would have vanished like a whiff of smoke. Had he judged under the Yorkshire standard he should have wrong classed both birds, so we ask him what rules he judges by.

Mr. House says that because Mr. Martin passes an opinion on the subject we scoff and sneer at him. What did we say? Simply that he was an easily satisfied man, and placed him as a greater authority than Blakston. He should have felt more honoured than otherwise. We are quite aware that everyone is entitled to an opinion, but what sort of an opinion did Mr. House have for all and sundry in his letters of Dec. 9 and 23? Does it not look also as if Mr. Martin is trying to put the screw on Mr. Cole? Mr. House says while we argue that the bird is marked we admit it is grey or grizzly. We want him to read our letters over carefully and point out to us where we said it.

Mr. Martin says we have not advanced any well-founded argument in support of our contention. We will give him a little bit of evidence to go on with. Since the bird was wrong classed he has been shown four times: Birmingham, Perth, Pontypool, and Llanelly; the judges were Messrs. Roe, Robson, Houghton, and Allsopp, and on each occasion the bird was allowed to stand. Now we ask Mossrs. Martin and House if this is any evidence, or if these judges are not capable of knowing what a tick should be. Please answer us this question.

Now what has Mr. Martin advanced in support of himself? As far as we can see, only his guinea to the Editor. He wants us to have the bird judged by the Yorkshire Union rules. In the first place we would like to point out that we are showing Norwich, not Yorkshires, and if we are to go by the Yorkshire rules why is it we are not showing our birds in the Yorkshire show cages? Would the Yorkshire Union accept the S.H.P.C. definition of a tick? We think not. Not only that, but we should still be in the same position as we are now, for should the Yorkshire Union accept the bird as a ticked we should still have to show the bird in the marked classes according to the generally accepted tick among the Norwich men around here.

Mr. Martin says the Yorkshire Union rules are the only law that deals with the case in question. He is wrong; the Southern Border Fancy Club have their rules, which are entirely different to the Yorkshire Union, and their law stands as much as the other. Can Mr. Martin dispute this? Does he think he has cut the lines of our communications? If so, he is mistaken. We still see the way clearly before us, and we will accept his challenge on the following condition. That the bird is to be judged according to the rules laid down by the Southern Border Fancy Club. We may as well have the laws of this Club as any other, and the winner is to give the two guineas to the Red Cross.

Now, how much progress have we made as regards the bird being a ticked or a marked? Up to the present time the balance of evidence is certainly in our favour. We have the recent decisions of four well-known judges, also of several others which if needs be we could name. Against this Mr. House names Blakston and the Yorkshire Union rules. These are only the rules of a Society and are not accepted by one and all. Mr. Martin says in the absence of scheduled instructions the bird must be judged as a ticked. On the other hand, we take it he will have to be judged as a marked. Therefore, according to this, he is sometimes to be a ticked and at others a marked. Mr. Martin is certainly making some advance.

In answer to "Manxman" we don't think it would be fair for us to make an outline drawing of the bird. It would perhaps be said that we had put the balance of markings in our favour, but perhaps Mr. Norman would help. He has seen the bird on several occasions, and no doubt has got a good idea of his markings.

STUBBS BROS.

[Mr. Norman has a careful sketch of the bird which is causing all this discussion, and we hope to receive this finished in time for reproduction in our next issue.—Editor, Cage Birds.]

(Some interesting letters unavoidably held over.)

Club Reports.

BARROW C.B.A.

Meeting held Jan. 13. Decided to remove the place of meeting to the rooms adjoining Weights and Measures Office, Lawson Street. Next meeting Jan. 20. Entries for forthcoming members' show taken, and general business.—Tom Croft, Hon. Sec.

CRYSTAL PALACE AND PENGE.

Annual general meeting, Alexandra Hotel, Penge, Jan. 10. Balance sheet showed a balance of £2 13s. and more subs. to come in. Usual business was gone into:—Schedule for pair and Finch show, on Feb. 14; presentation of purse subscribed by members to hon. sec. The prospects of club for 1917 are good. Several new members were made and more applied.—W. D. Fryett, Hon. Sec.

LEIGH C.B.S.

Annual general meeting Jan. 10, with a fair muster. Decided to confine the competition for cup to the N.F. show and Old Bird show. Several propositions and amendments were made, and whatever carried was accepted with the sportsmanship that gives credit to the society. The annual dinner and distribution of prizes was fixed for Jan. 27, when we hope to have a good night together. N.F. show was fixed for July 27, same classes as in 1916. Balance-sheet was read and accepted, and the old officers were re-elected for 1917.—R. Charleson, Sec.

SHEFFIELD C.B.S.

Meeting, Jan. 4, Mr. Hemming presiding. Syllabus arranged. The table show of birds for sale proved an attraction, and there were several transactions. Result:—Pairs: 1, 4, hc, Woolhouse; 2, vhc, Wasdin; 3, c, Drabble. Cocks: 1, 4, vhc, Hemming; 2, Jones; 3, hc, Williams. Hens: 1, 2, Williams; 3, Sisson; 4, hc, Gill; vhc, Jones; c, Crook. Messrs. Hobson and Oxley judged. Mr. Hemming paid a tribute to Mr. Jones on the able manner he had performed the duties of President during the past four years, and Mr. Jones suitably responded. The attendance was good, and Messrs. Farnell, Moore, Goodwin, and Thornton were elected members. Next meeting, pairing competition. A vote of condolence was passed with Mr. Bingham, who has lost a son in France.—E. Sisson, Assist. Sec.

SOUTHAMPTON C.B.S.

Annual general meeting, Jan. 9, Mr. W. G. Fellows (chair). The annual report showed that despite the number of members who had joined up, the season had been very successful, the whole of the programme having been carried out with the exception of the outing. The society's financial position had also improved, the balance sheet now showing £10 11s. 8d. to the good; the plate chest, however, had been reduced, one cup having been won outright. The balance sheet and report was passed, and the hon. sec. voted an honorarium. The voting papers were then counted, and it was found that the hon. sec., Mr. G. J. Slade, 34, Milton Road, Fitzhugh, Southampton, had been re-elected, Mr. W. Melbuish to be the hon. assist sec. The chairman, Mr. W. G. Fellows, and Mr. J. B. Hayter, vice-chair, were also re-elected. The hon. treas. from the founding, Mr. A. G. Washer, retained his position, and Messrs. W. J. White and A. A. Winter were re-appointed auditers.

An attractive programme was arranged for 1917, including two table shows, F.F. show, and annual show, and it is hoped that despite all unfavourable circumstances a good season's work will be carried out, and the fancy in Southampton and district will be kept alive; with the hard-working committee who have been elected, all should be well.—G. J. Slade, Hon. Sec.

CHOPWELL C.B.S.

Meeting, Club Hall, Jan. 6, Mr. W. Marsh, chair; prize money was paid out in full to all successful exhibitors, and balance-sheet was read and passed as satisfactory. Our show on Dec. 23 proving, as last year, a success. A good deal of business was got through, and as this was our general meeting the first on the agenda was the election of officers. The following were elected: Chair, Mr. W. Marsh; vice-chair, M. Simpson; auditors, G. W. Charlton and T. Nixon; committee, Messrs. G. W. Barkass, T. Nixon, W. H. Christer, W. Marsh, E. Jamison; sec. and treas., W. H. Chester; assist. sec., G. W. Barkass. New members elected: Messrs. W. A. Ford, J. W. Oxley, John Gardener, J. Brough, J. Oxley. Will new members please note that 1s. per entry for first year is charged, making 2s. 6d. in all; also decided that any person wishing to become a member must be paid up by the young bird show, and in case of no show being held to be paid up by September meeting. Members who have rule cards would do well to send same in as there have been several alterations made and new members should ask secretary for same, price 2d. each. As we have every appearance of making more members, this society should be one of the strongest in the district. The radius is four miles. Meeting was adjourned, the committee to meet again to settle several points in rules which required revising. Thus closed a pleasant and successful meeting.—W. H. Christer, Sec.

LEEDS C.B.S.

Annual general meeting, Griffin Hotel, Jan. 6; Mr. W. A. Wilson, chair. Officers elected:—Pres., Mr. W. Hall; vice-pres., Messrs. W. Greenwood, E. Hallersley and Dr. Cummings; hon. treas., Mr. Sanderson; joint secs., Messrs. W. A. Wilson and R. Watkinson; committee, Mr. Baldwinson (chairman), Messrs. Livingstone, Chambers, Wrightson, Wainn, C. E. Hall, Owen, and E. Reed. Results of various competitions, 1916:—Leeds cup, Mr. Baldwinson, 42 points, 19s. 6d. prize-money; runner-up, Dr. Cummings, 42, 13s. 8d. prize-money; president's cup, Mr. Baldwinson, 66; breeders' special, Mr. Sanderson, 54; section specials:—Ch. Yorks., Baldwinson 86, A. Brown, 60, Ch. Norwich, W. Tose 86, Livingstone 56; Border and A.O.V. Can., Stephenson 40½ points; British Section, Haigh 106, Baldwinson 104, Dr. Cummings 89, Novice Yorks., Sanderson 99, Wrightson 50; members' specials: Haigh 106, Dr. Cummings 99, Sanderson 99, Tose 86, B. H. Wilson 64, A. Brown 60, Livingstone 56, Meunard 56, Richardson 52. Special most points Canary classes only, Mr. Baldwinson; amat. British, Dr. Cummings 134, Dobson 91, Colburn 66 Fisher 14, Chambers and Smith 4. Table show specials:—British, Hunt 25, Dr. Cummings 15; Yorks., Sanderson 35, Baldwinson 17; Nor., Livingstone 29, Baldwinson 25. Most points gained by novice, all table shows to count, Sanderson, 45 points. The annual prize distribution will be held at the Griffin Hotel Feb. 3, and will take the shape of a tea and concert; tea 2s. per head; members intending to come must let secretary know at once, so that arrangements can be made. Mr. Brookhouse, of Bramley, and Mr. Noble, of Pudsey, were elected members.—J. Chambers, Hon. Sec.

W. STANLEY (Patriotic) F.F., &c.

Meeting, held Jan. 13; R. Peart, chair. Decided by a good meeting to hold another patriotic show. Feb. 24. Election of officers: Chair, R. Peart; vice chair, J. Armitage; treas., W. J. Platten; assist. sec., W. Siddle; sec., R. Hutchinson. Will all fanciers in the district help us with this good cause?—R. Hutchinson.

SOUTH SHIELDS C.B.S.

Annual general meeting, January 6, W. Thompson presiding over a good attendance. The business waxed fast and furious on electing of officers, the old ones going back in office with one or two exceptions, though new ones had been nominated for office, and four for the secretaryship. The old secretary gained the largest majority he ever had.—W. L. Smith.

ABERTILLERY C.B.S.

Meeting, Prince of Wales Hotel, Jan. 13, Mr. Wm. Cooper presided over a good attendance. A vote of sympathy was passed with Mr. J. Parfitt in his illness, wishing him a speedy recovery. Unanimously decided to have members' stock pair show Feb. 17. Classes: 2 Norwich; 1 Novice Nor., 2 Yorks., 2 Novice Yorks., 1 Bord., 1 Mules and Hybrids. Members will receive postcard as to time of staging, etc. Judge, Mr. Jno. Hillman. Now is the time for new members to roll up.—J. Webber Hon Sec.

CITY AND COUNTY OF PERTH.

Meeting, Laidlaw's Rooms, Jan. 8; Mr. R. Crawford, president, in the chair. Agreed to hold a judging competition, any variety Canary. Secretary promised a special prize to the winner. Pairs show, Jan. 27, Laidlaw's Rooms, Leonard Street, entry 6d. A discussion arose re rule 14, and it was agreed to leave it as at present. New members elected, Carstairs and Miller. The chairman said he would like to see members attending the meeting better and not leave the work of the club on the shoulders of a few. Meeting closed with a vote of thanks to the chairman.—Wm. Gunning, Sec.

WIGAN ROLLER C.C.

Annual meeting, Jan. 10. There was a record attendance, and seven new members were enrolled. Officers elected: Pres., Mr. T. Kay; vice-pres., Mr R. Barnett; treas. and sec., Mr. P. Greenall; auditors, Mr. Bamber and Mr. Vernon; committee, Messrs. Farrimond, Ashton, Tomlinson, Mather, Smith, Unsworth, and W. Smith. Decided to hold next annual contest Dec. 14 and 15, 1917. Roller clubs please note to avoid clashing.

Meetings will be held monthly, but on every second Wednesday and Saturday alternately. Lectures will be given on Jan. 24, and Feb. 10, by Mr. Kilshaw and Mr. Massey, on the song of the Roller Canary. A number of birds will be present at each lecture. Roller fanciers will be given a cordial welcome. Intending members should write the Sec., P. Greenall, 581, Ormskirk-rd., Pemberton, Nr. Wigan.

YORKSHIRE UNION OF C.B.S.

Results of Competitions, 1916-17.

Skelmanthorpe show brought the Union competitions to a close for the season. The first season's competition for the Yorkshire Union challenge trophy (value 10 guineas) resulted as follows: 1, L. Dykes, 267 pts.; 2, H. H. Towers, 219; 3, A. W. Hartley, 190. Amateur gold medal winners:—C. Padgett 182, John Taylor 156, A. Gledhill 154; novice gold medals:—Yorkshires, W. Chapman 240, W. H. Hamlyn 219, L. Hodgson, junr., 180, W. Crowther 188. Pownall Bros. 182.; Nor., A. F. Isman 23 Winners of Mr. W. B. Atkinson's specials: W. Chapman 274, and W. H. Hamlyn (Harrogate) 247. Errington's colour food prizes: Champ., C. Morrison 180, and J. Taylor, 143; novices, W. Chapman 206, W. H. Hamlyn 187.

Any competitor finding the above points do not agree with his reckoning should write me immediately.—S. Midgley, Hon. Sec.

GLASGOW (West of Scotland)

Annual general meeting, Jan. 13, Nelson's Temperance Hotel, Mr. W. Wood presiding over a good attendance. Financial statement for 1916 was submitted and considered satisfactory. Election of office bearers for 1917: Pres., Mr. G. Smart; vice-pres., Messrs. E. Barron and J. Black; sec., W. Hutchison; committee, Messrs. Begg, Cook, Wood, Jardine, Gunion, Gilbert, Eagesham, Boyd, Kerr, Nimmis; auditors, Messrs. Barron and Boyd. Alterations in cup rules were made. When points cups are won outright in future, cups shall be for best young bird in section; no restriction on number of birds to be shown for cup. Decided that prize money be on sliding scale at annual show. Agreed that fee of 3d. per cage be charged for pair show and F.F. show. Decided to hold pair show Feb. 3, Nelson Temperance Hotel, 7. Messrs. Jeffrey and H. P. Hutchison judges. Decided to add class for variegated in all varieties of Canaries. Specials were presented by Messrs. Barron, Wood, Black, Hutchison, and Black. A vote of thanks to the retiring president terminated the meeting.—W. Hutchison.

GUISBORO' (Priory) C.B.S.

Annual general meeting and social at Headquarters, Year's Rooms, Jan. 6, when the members sat down to a good tea, provided by our genial host, Mr. Wear. After full justice had been done to the good things provided the chairman announced the most interesting item on the programme, viz., the distribution of prizes for most points during 1916. In the championship class, special most points was won by our worthy chairman. Mr. J. G. Cook, nomination special, H. Hood and other specials, Messrs. G. Barker, W. Wilson, M. Graham, Jack Taylor, Bob Mays, and G. Jobling. Novice special, J. S. Campbell and other prizes by Messrs. A. Knaggs, G. Atkinson, and F. Readman. As time was getting limited it was decided to devote the remainder to dealing with matters of business. Election of officers: Chair., Mr. J. G. Cook, re-elected; treas., Mr. Fred Jones, re-elected; committee, whole of members. Owing to pressure of business and other circumstances the sec., Mr. Knaggs found it impossible to carry on the secretarial duties, and Mr. J. S. Campbell was unanimously elected. Unanimously agreed that the society place on record its appreciation of the services rendered by Mr. Knaggs. Decided to hold four shows: Pair show first Saturday in February; N.F. show July, young stock Oct., and a table show. Decided to give a medal to the member breeding the best bird during 1917, and to hold a judging competition in connection with our pair show. A prize to be given to the member coming nearest to the judge's awards. This ended a pleasant and enjoyable evening. It rests with the members now to rally round their new sec., and make this society one of the best in the Cleveland district.—J. S. Campbell, Sec.

CLUB AND SOCIETY NOTICES

ONE NOTICE of any forthcoming Society meeting inserted free. It must reach us not later than Tuesday morning's post. Specially printed Club Notice Postcards may be had free on application to our Manager. Secretaries should always use them.

Accrington C.B.S.—Jan. 25, Crown Hotel, 8. Special meeting. Balance-sheet. Arrangement of cup competition for show, Jan. 27.—W. Parkinson.

CITY AND SUBURBAN A.C.B...

Annual general meeting, Jan. 8. Officers elected:—Messrs. Burt, Runchman, Offord junr. and sen., Prance, Mugford, Hohden, Curtis, Brock, Marks, Weston, and Wills, for the Council; Mr. J. Chard, chair; Mr. G. W. Sanders, vice; Mr. V. Wynn, treas.; Mr. H. Shepherd, trustee and custodian; Messrs. Sayer and Prior, auditors; Mr. Thynne, assist. sec.; and F. J. Martin, sec. Mrs. Alice Cook was elected a vice-president. Young bird show, July 4; judge, H. Norman. Annual show, Nov. 7 and 8; judge, Mr. T. Heath. Pair show judge, Mr. J. Robson. The balance sheet, as audited, was read, and showed that the income had exceeded the expenditure by about £5, making the society's cash balance about £27. During the year no less than £12 in cash had been given to the members in special prizes, in addition to other prizes, and the guinea special won by Mr. Hannaford. There were also the cups for competition as usual. Four fanciers were elected members. The pair and British bird show is being held on Jan. 31. Fanciers please note.—F. J. Martin, Sec.

WALLSEND (Mid-Tyne) C.B.S.

General meeting, Station Hotel, Jan. 10. Mr. L. Simpson presided over a good attendance. Officers elected:—Col. E. R. Pinkney, pres., our worthy host; vice-pres., Messrs. Johnston, Robertson, Arkley, Young, Forest, Elcoat, Morris, Craig, Liddle, Lennox, Ewan, Dr. Spencer, Dr. Phillipson, Dr. Aitchison, Dr. Wilson, Dr. Hepplewhite; chair, Mr. L. Simpson; vice-chair., Mr. R. White; committee, Messrs. Wilson, Heslop, Couchman, Mathewson, Couchman, Muse, W. Studholme, R. Studholme, Scott, Heron, Messenger, McKie, Masterman, Stephenson, Bevoor, Montgomery; auditors, Messrs. Stephenson and Robson; sec. and treas., Geo. Greenwell. Annual report and balance sheet was read by the sec., and although the past year has been very heavy in respect to expenses, it left a balance of £8 0s. 6d. after paying £15 prize-money, in addition to entry fees. Mr. J. Johnston, Border Green fancier, was elected a vice-president. Decided to leave question discussion over till next meeting. We are having table show for British next meeting; classes: Linnet, Greenf., Goldf., and Bullf., and Siskin, Redpoll, or Twite; 6d. a cage. Members please turn up at 7, prompt. We have to be out by 9. Mr. W. Curry, Newcastle, will judge. New members: Curry, J. Leghorn, Baker, South Shields; Barnes, Tyne Dock; Henderson, Byker; Graham, Blaydon; Stephenson, North Shields; Simpson, Blaydon; Brown, Wallsend; J. Dobson, Ryton; Purvis, Wellington; Scott, Byker; Chapman, Newcastle; Lyons, Walker; Moat, Backwroth; Ridley, Ryton; Dick, North Shields; Boyd, Winlaton; Coomber, Low Fell; Kirkpatrick, Newcastle; Waters, Sunderland; Young, Beamish; Clarkson, Pelton; Mulgrove, North Shields; McVay, North Shields; Smith, Sunderland; Armstrong, Tyne Dock; Hindmarsh, Seaton Delaval; Foster, Cramlington; Archbold and Lascelles, Seghill; Wood, Wallsend. We have extended our radius for membership to 20 miles; fanciers wishing to join send names to sec. 1/- to join and 2/6 subs.—Geo. Greenwell, Sec., 17, George Road.

HIGHGATE, HAMPSTEAD C.B.S.

Annual general meeting, Jan. 8, Spencer Hall, Dartmouth Park Hill, Mr. P. Johnston, chair, and a good attendance. Mr. J. Hyde was complimented on his compilation of the balance-sheet, which was considered very satisfactory under present conditions. Judges for coming year were elected: Pair show, Jan. 27, Mr. H. Norman; Young Bird show, July 7, Mr. J. Hodder; Annual Autumn show, Nov. 16-17, Mr. H. Norman. An excellent syllabus was outlined, covering the third Monday in each month throughout the year. At the last three meetings, 15 new members have been elected. Mr. H. Wills nominating six and Mr. F. C. Knight, 9. Officers elected: Pres, G. A. Zouche, Esq., M.P.; vice-pres., Messrs. C. W. Law, E. R. P. Moon, G. Gardner, and G. E. Weston; patrons, Rt. Hon. W. H. Dickinson, M.P., D. S. Waterlow, W. Reynolds, Alderman C. A. Dixey, Dr. P. Barragry, L.R.C.P. and S.C., Councillor A. Soloman, and Mr. T. R. Trower; chair, Mr. P. Johnston; vice-pres., Mr. H. T. Dann; treas., Mr. J. M. Kent; Hon. Sec., Mr. J. Hyde; corresp. Sec., Mr. F. C. Knight; auditors Messrs. W. Shearer and G. Gardner; committee Messrs. W. H. Browbridge, E. T. Bush, J. Carrington, E. Mound, W. Shorter, G. Street, G. Stretton, W. Shakespeare, A. Gambrill, A. Knight, W. H. Wills, and F. Walmsley Members were reluctantly obliged to elect new members on committee owing to the difficulty in obtaining a quorum at meetings, several officers being on war service, or in H.M. Forces. A vote of thanks to the chairman concluded the meeting. Fanciers wishing to join society should apply to F. C. Knight, 40, Spencer-road, Dartmouth Park, N.W.

Singing Contests.

Announcements of forthcoming contests in the nature of advertisements must be paid for at advertisement rates, two words a penny.

LEEDS.

Leeds Linnet and Canary F.A., Albion Hotel Saville Green, York Road. Open contest for quality Linnet singing, Jan. 7, 19 birds sang: 1, Stead; 2, Sellers; 3, Hollingworth; 4, Ward. Judges, Grant and Hayes.—W. Naylor, Hon. Sec.

Linnet singing contest for quality, Clarence Hotel Skinner Lane, Jan. 14; 19 sang: 1, Binns; 2, Summers; 3, shared, Summers and Balmfield. Judge, T. C. Summers; timekeeper, W. Rayner.—T. C. Summers, Hon. Sec.

Open contest for Linnet singing, Glassmakers' Arms, Greyhound Place, York Road, Jan. 14: 1, 3, Marshall; 2, Buckley; 4, Watson. Canaries: 1, 2, Lockwood; 3, Appleyard. Judges, Dearlove and Biss.—T. Marshall, Hon. Sec.

West Leeds Linnet and Canary Assoc., Viaduct Inn. Linnet singing contest, 20 birds sang: 1, 2, T. Dobson and Jarrow, shared; 3, 4, Dobson and Dagless, shared. Canary contest at night, Prince of Wales, Wadsworth: 1, Cunliff; 2, Thompson; 3, Wood; Dobson and Thompson shared 4th; 16 birds sang.—T. Cawood, Sec.

Canary Contest, open to all comers, Jan. 21, Viaduct Inn, at 7.—T. Cawood.

PONTEFRACT.

Linnet contest, Woodman Inn, Horsefair, open sing, Jan. 14. 39 birds entered for four prizes, and some good singing was done: 1, Jones; 2, Scott; 3, Cox; 4, Foster.—S. Pugh, Sec.

SHEFFIELD.

Linnet contest, Sportsman Hotel, Paternoster Row, Jan. 14. 20 birds sang: 1, 2, Holmshaw; 3, Robinson. Wainwright and Jackson sang another match for £1, Jackson again suffering defeat.—E. Phillipson, Sec.

BARNSLEY.

Dove Inn, Linnet Club, Jan. 14. 19 birds faced the judge in a four minutes time sing; Shepherd, timer; Bamforth, chalker: 1, Norburn, 3min. 46sec; 2, France, 3.35; 3, Hardman, 3.11; Wright, 3.4; Jones, 3.1; Norman and Ginger tie for 5th prize, 2.52 each; very good singing in snowy weather.—J. Hardman, Sec.

KIPPAX.

Kippax Linnet Club, headquarters, Commercial Hotel, members' sing, Jan. 13, finest contest since Dec. 18, 1915, when 32 birds entered for three good prizes: 1, Cooper; 2, Collinson; 3, Wallis; timekeepers, O. Potter, J. Cooper; tappers, J. Liversedge, J. Wallis. Five new members turned up. All entered birds for contesting, and some of them look like having good birds in a few weeks' time. Next contest, Jan. 27.—R. Plows, Sec.

Nests of Birds, Poultry, etc., should be regularly sprinkled with KEATING'S POWDER, especially when hens are sitting. Don't forget to do this just previous to the eggs hatching, to destroy the Red Mite. Kills all insects. Harmless to everything else.

ROUND THE SHOWS.

LLANELLY.

The one day show of the Llanelly C.B.S. was held Jan. 7. The entry was a shade less than that of last year, but otherwise the show was quite as successful. The Market Hall is a grand building for a big show, and looked well with its tiers of birds cages, palms and ferns. Although the top lights were shaded, the side windows gave a good light for both judging and sight-seeing, and the day being fine, the numerous visitors and everybody concerned appeared to enjoy the display. The secretarial work this year was in the capable hands of Mr. H. Webster, and he managed everything splendidly; he, of course, had the able assistance of Mr. Daniel John, the vice-chairman, who ran the show for many years, and they had several willing assistants. Among them were Councillor R. D. Jones, the chairman, Messrs. Gregory, Gregory, sen., Jones, Sam Lewis, L. G. Lewis, Jenkins, Teague, Macdonald, Owen, Morgan, Jenkins, Jones, Mathias, Speck, and Davies. Messrs. T. R. Gregory and D. R. Jones acted as joint managers, and their work was quite up to date in every respect. We understand Mr. Gregory was responsible for the staging and preparing the hall for the event, and the way all this was arranged was sufficient proof of his ability in this particular direction. He was not the only Gregory that did useful work that day; his little daughter acted as doorkeeper, with the result that a record amount of cash was taken (trust a lady for looking after the money); the society should retain her services by offering an honorary membership. We were sorry to hear a few entries failed to arrive in time for judging, but it is one of the risks incidental to exhibiting in these times. Mr Allsopp, Cardiff, judged the Canary section in the absense of Mr. Hirst, and Mr. H. Norman the Hybrids and British.

The open Canary section did not quite come up to expectation in numbers seeing the classification offered. In Norwich, Messrs. Stubbs Bros. staged a fine team, and turned out the cup winners. Yorks were good in quality, splendid teams being put down by Messrs. Dykes, Owens, Thompson, and Bevan, but unfortunately many of the birds were very thick whilst being judged. The local crack, Mr. Owens, held a strong hand, staging some real gems including a brace of unflighted hens of great merit, and easily accounted for the open cup in this section, and also the local cup. Borders were really splendid and proved quite a feature of the show. Entries totalled 74 in the six open classes, competition being very keen. The cup in this section was won by Mr. D. Jenkins, who staged some of his well known cracks, the runner up, Mr. Morgan Thomas being only one point behind. Novice Borders were also fine entries, totalling 52 in four classes, the cup being won by Mr. Bevan, who staged some really excellent exhibits. Some fine teams also being staged by Messrs. Geo. Evans and E. J. Evans, in fact all those in the money could have upset some of the awards in the open classes. Local cup for most points in open Nov., was won by Mr. D. H. Davies.

The Hybrid section was only fairly well filled, but contained some notable examples. Mr. Chick's well known clear Greenfinch-Canary was accompanied by a ticked brother. Mrs. Lilian Dalton had out three exceptional dark Mules, they led an excellent class and are all fine examples of their particular cross, the leader, a grand Greenie, being in wonderful fettle.

As usual, the British birds were a splendid lot. The two Goldfinch classes, each containing over twenty birds, were excellent, the H.M. birds showing the colour, condition, and quality obtainable by careful keeping and judicious feeding. In the Bullfinch classes the excellence was reversed, the F.M. birds being an exceptional collection, either of the first dozen were tip-top show specimens. The winner staged by Mr. Jeffreys is an outstanding bird, he is so big that at any other time it would be dangerous to stage him as a native. Mr. Nicholas staged a charming Linnet, a good all-round specimen, thus adding to his many wins at this fixture Other particularly good birds were Mr. Chick's Yell Bunting and Hawfinch, Mrs. Dalton's H.M. Lesser Redpoll and Siskin.

THE CANARY SECTION.
Judge: Mr. E. W. Allsopp.

NOR., CL. ETC. YELL. (5): 1, Morris, cl., grand col. and qual., neat head, good deep chest, well cut away, good subs. and cond.; 2, Stubbs Bros., tkd., another good one, lovely col. and qual., grand shape and subs., tip top wings and tail; 3, Jenkins, cl., good rich level col., neat head and neck, splendid type and qual.; 4, Davies.; vhc, Jones. BUFF (6): 1, Davies, cl., good col. and qual., nice round head, good shapely body, plenty of daylight behind, splendid subs. and cond.; 2, Matthews, cl., good head and subs., nice cobby shape, well braced wings, fine col. and cond.; 3, Mrs. Bridgwater, cl., plenty of subs., good head, shapely body, nice wings and tail, perhaps hardly as cobby as leaders; 4, Lewis; vbc, Jenkins; abs., Stubbs Bros. VAR. (6): 1, Matthews, var., lovely col. and qual., fine size, very shapely, good wings and tail, best of wings; 2, 3, Stubbs Bros., gems, both grizzle mkd., grand heads and neck, fine deep chest, good cobby shape, beautiful col. and qual.; 4, Jones; vhc, Morris; hc, Lewis. HEN (9): 1, vhc, Hitchings, varieg. yell., lovely rich col. and qual., good round head, nice deep chest, nicely cut away behind, good subs. and cond.; 2, 4, Davies, cap mkd. buff, nice head and neck, grand cobby shape, best of wing carr., nice size, qual. and cond.; 4, cl. yell., medium size, neat head, shapely body, grand col. and qual.; 3, Jenkins, cl. buff, good head and neck, deep chest, well cut away, good wings and tail, grand subs. and cond.; hc, Matthews; c, Breslaner. UNFL. CK. (11): 1, 4, Stubbs Bros., cl. yell. blaze of col., good shapely head, grand subs., tip top wing, lovely qual and cond.; 4, var. buff, grand head, deep chest, well cut away, splendid subs and cond., a real good one; 2, Jenkins, cl. buff, fine head and neck, shapely body, grand col. and qual., neat wings and tail; 3, Hitchings, cl. yell., nice col. and qual., good cobby shape, plenty of subs.; vhc, Mrs. Bridgwater; hc, Davies; c, Lewis. HEN (7): 1, 2, 3, Stubbs Bros., a fine team, leador lightly var. yell., lovely col. and qual., grand cobby shape, best of wings, good subs. and cond.; 2, cl. buff, good round head, shapely body, splendid wing carr., grand col. and qual.; 3, cl. yell., tip top col. and qual., splendid type, well moulded, nicely cut away; 4, Davies; vhc, Hitchings; hc, c, Lewis. NOVICE (4): 1, Jones, cl. buff, good head, very shapely body, splendid subs., cond., qual. and col.; 2, Thomas, var. buff, grand size and shape, nice col. and qual., shade weak in head; 3, Phillips; 4, Davies. YORKS., CL. ETC., YELL. (8): 1, Dykes, cl. blaze of col., good head and shoulders, fine back, wings, and tail, feathered to perfection, lovely length tex. and nerve; 2, 3, vhc, East, shade paler col., shapely head, fine shoulders and back, grand pos. and nerve, well up on leg; 3, another cl., hardly as neatly rounded head, good back, wings and tail, fine leg, grand pos., col., and qual.; 4, Bevan, grand head, good shoulders and back, lovely wings and tail, rather patchy in col.; No. 3, Thompson, a real good one, soft when judged. BUFF (7): 1, vhc, Bevan, cl., good head, fine shoulders and back, splendid length, grand leg and pos., nice col. and qual.; 2, Griffith, lovely col. and qual., neat head, grand flights and back, splendidly moulded, nice leg and nerve; 3, Owen, cl., fine col. and qual., neat head, shoulders, and back, best of flights and tail, splendid nerve and leg; 4, Dykes. VAR. (9): 1, Dykes, yell., lovely col. and qual., neat head, good shoulders, back, and flights, well moulded, fine pos., and nerve, grand leg; 2, Brennan and Coulson, yell., good head and shoulders, nice straight back, well packed flights and tail, grand length, fine leg and nerve; 3, vhc, Owens, buff, nice col. and qual., good back, best of flights and tail, well moulded, splendid leg and pos.; 4, Bevan, yell., nice col. and cond., grand type, fine length and pos., good leg and nerve; hc, Jones; c, Morris. HEN (11): 1, 3, 4, Owens, eye tkd. yell., leading, grand col. and qual., nice head and shoulders, good flights and tail, splendidly moulded, stands well on leg; 3, grizzle mkd. yell., very shapely, splendid pos. and leg, good flights and tail, lovely qual. and cond.; 4, cl. buff, neat head, good shoulders, straight back, well packed flight and tail, lovely leg and pos; 2, Fry, cl. yell., nice col. and qual., well moderled throughout, lovely length and pos., grand leg and nerve; vhc, Dykes, soft when judged; hc, c, East. UNFLI. CK. (9): 1, Tucker, tkd. yell., nice col. and qual., good head, lovely shoulders and back, well moulded, splendid length, pos., and nerve, well up on leg; 2, Griffiths, lightly var., another good one, neat head, good back and shoulders, very shapely, lovely length and pos., fine leg.; 3, hc, Owens, cl. buff, nice col. and qual., good head, shoulders, and back, well packed flights, splendid length and nerve, stands well; 4, vhc, Thompson, cl. yell., lovely col. and qual., beautifully moulded, c, Jones. HEN (9): 1, 2, Owens, cl. yell., nice col., and qual., very typical, splendid flights and tail, good legs and pos., 2, cl. buff, neat head, good back, well packed flights and tail, fine length and nerve, grand leg and pos.; 3, Fry, cl. buff, good length, splendid type, nice nerve and pos., good col and qual., well up on leg; 4, Bevan, wing tkd. yell., lovely col. and qual., good head and shoulders, fine nerve and pos.; vhc, Dykes; hc, Tucker; c, Coulson and Brennan. NOVICE (9): 1, Fry, cl. yell., good col. and qual., neat head and shoulders, well moulded throughout, splendid leg and nerve; 2, 4, Griffiths and Thomas, cl. yell., nice back, flights, and tail, good shape and style, splendid leg and pos.; 4, eye tkd. yell., good col. and qual., nice back flights and tail, splendid length and pos. good leg; 3, Williams, cl. yell., lovely col. and qual., fine shoulders and back, well packed flights and tail, nice shape, grand leg, pos., and nerve; vhc, Thomas; hc, Sherrat; c, Lewis and Jones. BORDER, CL., ETC., YELL. CK. (13): 1, 3, Jenkins, both cl., real gems, feathered like wax, beautifully moulded, lovely wing carr. and cond.; 2, 4, Thomas, tkd. and cl., another brace of good ones, splendidly typical, grand feather, cond., and col.; vhc, Edgington; hc, Madagan; c, Macdonnell. BUFF (17): Grand Class: 1, Thomas, cl., lovely col. and qual., grand shape, best of wings, lovely type, well put down; 2, hc, Macdonnell, cl., nice col. and qual., very jaunty, good wing carr. and cond.; 3, Jenkins, cl., another good one, splendidly feathered, lovely type and cond.; 4, Owens, cl., splendidly feathered, correct type, fine col. and cond.; vbc, Denyard; c, Edgington. CL., ETC., YELL. HEN (9): 1, vhc, Jenkins, lovely, rich col., good waxy feather, splendid type, qual., and cond.; 2, Thomas, fine col. and qual., good type, very jaunty carr., grand cond.; 3, Pte. Blake, cl., nice tone of col., well feathered, true Border type, tip top cond.; 4, Madagan, cl., grand col. and qual., sweetly moulded, beautiful cond.; hc, c, Hutchinson. BUFF (18): Another grand class: 1, Macdonnell, cl., lovely col. and qual., good head, fine shape and cond.; 2, Owen, close up, good waxy feather, splendid type and qual., well moulded; 3, vhc, Thomas, cl. good head, sweetly moulded throughout, tip top wing carr., fine qual. and col.; 4, Davies, cl., nice col. and qual., rather heavily built for a Border; hc, Jenkins; c, Daniels. VAR. (11): Splendid class: 1, Jenkins, yet another win for the noted cinn. mkd. buff, often described, a real gem, feathered like a Java, grand type; 2, Davies, head and wing mkd. yell., good col. and qual., very shapely, tip top wing carr.; 3, c, Thomas, var. yell., splendid tone of col., true Border type, very jaunty, lovely qual. and cond.; 4, Macdonnell, var. buff, neat head, grand shape, correct wings and tail, fine qual. and cond.; vhc, Denyard; hc, Daniels. GREEN [illegible] (10): 1, vhc, Nicholas, well-known cinn., in good order; 2, 3, Nelmes, yell. green, neat head, shapely body, best of wings and tail, grand col. and qual.; 3, yell. cinn., nice tone of col., lovely qual. and cond., good shape, jaunty carr.; 4, Boven, green, neatly moulded, good wings, fine cond., qual., and col.; hc, Sampson; c, Bowen. NOV. YELL. CK. (15): 1, 3, Geo. Evans, lightly var., lovely col. and qual., neat head, very shapely, tip top carr., well put down; 3, cl., splendid type, grand feather, very jaunty, lovely col. and cond.; 2, E. J. Evans, cl., nice col. and qual., correct type, good wing carr., jaunty action, well put down; 4, Davies, good cl., nice size, very shapely, splendid wing and carr., tip top col. and qual.; vhc, Myles; hc, c, Morgans. BUFF (12): 1 James, cl., good col. and qual., neat head, good shape, fine wings and tail, very stylish; 2, Geo. Evans, cl., close up, correct type, nice action, good feather and cond.; 3, Mrs. Bevan, cl., another good one, nice style, grand type, tip top wings fine col. and qual.; 4, vhc, hc, Davies, cl., very shapely, nice col. and qual., well put down; c, Morgans. YELL. HEN (9): 1, vhc, Mrs. Bevan, var., grand col. and qual., neat head, shapely body, correct wings and tail, tip top order; 2, c, Davies, cl., nice tone of col., grand type, nice action, cond., and qual.; 3, Lycett, eye, wing, and neck mkd., lovely col. and qual., fine eye, very shapely, beautiful order; 4, Pattison, cl., nice style and shape, good col. and qual; hc, Morgans. BUFF (16): 1, 2, Mrs Bevan, gems, leader lightly var., tip top col. and qual., nice size, grand shape, jaunty action, good wings; 2, tkd., neat head, very typical, splendid wing carr., grand col. and qual.; 3, E. J. Evans, cl., neat head, shapely body, true Border type, splendid wings, col., and qual.; 4, James, lightly var., yet another good one, splendid shape, good action, good col. and qual., put down in faultless cond.; vhc, Pattison; hc, Myles; c, Bowen. A.O.V. (5): 1, 2, 3, Edwards, Crest, Crestbred and Crest, all good subs., and fine cond.; abs., Mrs. Burgess (2). SELL. (5): 1, 3, D. H. Davies; 2, Edwards; 4, W. C. Davies; abs., Addison. LOCAL, NOR. (3): 1, hc, Davies, cl. yell., fine col. and qual., good head, shapely body, nice wing carr.; 2, 4, vhc, Jones, cl. buff and cl. yell., both good type and qual., nice size and cond.; 3, Jones and Jenkins, non-fed, cl. yell., nice tone of col., good size and shape; c, Jenkins. YORKS (10): 1, 2, 3, Owen, a brace of cl. yell., and cl. buff, all grand type and qual., fine style, good nerve and leg, nice pos.; 4, hc, Speck, cl. buff, nice length, good leg and col., hardly qual. of leaders; vhc, Mathias; c, Lewis and Jones.

THE HYBRIDS AND BRITISH BIRDS.
Judge: Mr. H. Norman.

CLEAR MULE (3): 1, 2, Chick, the now well-known cl. yell. Greenf., leading, a wonderful example, followed by a tkd. buff of the same cross both in grand fettle; 3, Evans, very nice variegGold-Can. DARK (11): 1, 2, 3, Mrs. Dalton, three grand birds, leader lovely dark Greenf., fine size beautiful shape, nice rich col., and lovely qual feather, followed closely by an excellent Goldf., nice size and shape, sound col., good blaze, fine qual feather, 3rd splendid Linnet, fine size, nicely proportioned, grand depth of col., beautifully mkd.; 4 Oldham, another good Greenie, big bold buff, rare subs., fine qual., feather excellent cond. VAR. (3): 1, Andrews, lovely Goldf., good size, beautiful shape, deep rich col., grand qual. feather, very fit; 2, Chick, nice Greenf., shapely, excellent feather, very fine cond.; 3, Evans; vhc, Gorton; hc, Sampson; c, Richards. HEN: 1, Welsh, very fine Greenf.-Bullf., bold massive bird, nicely put together capital depth of col., excellent feather; 2, Gorton, charming Goldf.-Bullf., fine size and shape, nicely built; 3, Wren, Goldf-Chaffinch, not a particularly good specimen, but accepted by the judge as genuine, a rare cross; 4, Sampson. GOLDF. (23): 1, Ford and Regan, nice, wide full face, grand rich col., capital body col., good wings, lovely qual., in the pink; 2, James, another beauty, not far behind, grand, clean-cut blaze of good depth of col., well up in tanning, well buttoned wings, fine cond.; 3, Jeffreys, a splendid example, grand bold full face, rare size, good tanning, richly col. wings, loss of a primary put him back; 4, Richards, grand face, rich col., well tanned and buttoned, fine cond., loses in size only; vhc, Andrews; hc, Jones and Jenkins; c, Edwards F.M. (21): 1, Jeffreys, grand bird, capital size and shape, good wide cleanly cut face, grand col., good chestnut body, capital wings, A1 cond.; 2, Andrews, scarcely so wide at top, but full spreading face, rich col., capital wings; 3, c, Messer, good size and shape, nice col., clean cut blaze, rich body col., scarcely so nicely finished as winner, should make a good one; 4, Mrs. Dalton, another nice one, charming shape, richly col. throughout, pure qual.; vhc, Lucas Bros.; hc, Morgan. BULLF., H.M. (13): 1, Gibbon, well-known, a beauty for type and all round excellence, in pure feather; 2, c, Alexander, fine bold big bird, nicely built, grand cap and bib, excellent body col., good wings, pure cond.; 3, Caunt, nicely built, good bold head, dense cap and wings, good depth of col., grand cond.; 4, Thomas, nice size and shape, good cap, nicely mkd. wings, fine cond.; vhc, Williams; hc, Robinson. HEN (10): 1, Andrews, grand size, thick-set, good bold head, densely col. cap, good wings, A1 col. and qual.; 2, Jones and Jenkins, nice size and shape, excellent wings, very fine qual.; 3, Chick, shapely bird, fine size, grand depth of body, neatly formed cap, lovely cond.; 4, c, Holborrow, shapely, good size, fine feather; vhc, Osborne; hc, Thomas. F.M. (22): 1, Jeffreys, wonderful size and shape, good bold front, grand cap and bib, rich col. throughout, very fine cond., a grand bird; 2, Thomas, beauty, beaten only in size, grand shape, bold full front, nicely formed cap, lovely col. and qual.; 3, Davies, excellent example, good bold head, nice depth of body, well mkd. wings, rich col. throughout; 4, Mrs. Dalton, shapely, fine size, good back and wings, excellent body col.; vhc, Roberts; hc, Chick; c, Edwards. HEN (10): 1, Lucas, good size, boldly built, nice wide cap and bib, excellent col. throughout, fine cond., 2, 3, Holborrow, a good one, capital Bullie shape, nice back and wings, fine col. and cond., 3rd close up, lovely qual.; 4, vhc, Gregory, shapely, neat cap and wings, fine cond.; hc, Lewis; c, Andrews. HAWFINCH (4): 1, 2, Chick, well-known birds, grand richly col. cock leading, with the well-known hen 2nd, both in the best of fettle; 3, Hiden, good size and shape, nice bold head, should make a good one; 4, Burrows, shapely, good size, well up in col., scarcely the finish of winners. LINNET (10): 1, vhc, Nicholas, fine size, beautifully proportioned, good bold head, grandly mkd., in the pink; 2, Davies, fine bold bird, good size and shape, beautifully pencilled throughout, grand col. and qual.; 3, Richards, nicely built and proportioned, rich col. and well mkd., very fine cond.; 4, Lewis, good size, bold full front, nicely mkd., sound qual.; hc, Bobbett; c, Rees. F.M. (17): 1, Williams, bold bird, good size, nice shape and proportion, beautifully mkd. throughout, sound col. and qual.; 2, 3, Davies, beauties, capital shape, well pencilled, excellent cond.; 4, James, nice style, good bold head; vhc, Nicholas; hc, Thomas; c, Jeffreys. GREENF. (14): 1, Caunt, big bold bird, splendid shape, nicely balanced, grand depth of col., lovely qual.; 2, Oldham, good one, scarcely so nicely modelled, but grand col. and qual., fine cond.; 3, Holborrow, taking bird, good size, beautifully proportioned, full bold head, capital wings, A1 quality; 4, Edwards, a good one, capital wing bars; vhc, Wren; hc, Nobler. F.M. (12): 1, Osborne, a beauty, very shapely nice style, good depth of natural col., capital wings, fine qual. feather; 2, Holborrow, fine size, well modelled, smart wings, good col. and cond.; 3, Ford, shapely, good size, nice bold head, good wing bar, fine cond.; 4, Gregory, neatly built, lovely qual., nicely proportioned, capital wings; vhc, c, T. J Gregory; hc, Fairhurst. BRAMBLEFINCH (5): 1, 2, Chick, leader wonderful size, nice shape, richly Spangled and laced, good col. throughout, fine qual.; 3, Ford, another big one, hardly so full of polish as winners, nice depth of col., well spangled; 4, Edwards; vhc, Austin. CHAFFINCH (7): 1, Ford, bold bird, good shape, capital depth of col. throughout, good wings, nice qual.; 2, Andrews, good one, shapely, full size, good cap and wings, nice cond.; 3, Gregory, smart and shapely, good col. and cond.; 4, Chick; vhc, Jones and Jenkins; hc, Holborrow. YELLOW BUNTING (8): 1, hc, Chick, grand size and style, nicely moulded, beautifully mkd. and spangled, fine col.; 2, Mrs. Dalton, another beautiful bird, scarcely so cleanly mkd., otherwise equally good, fine col., pink of cond.; 3, Gregory, lovely bird, beautifully mkd. and spangled, fine col. and qual.; 4, Edwards; vhc, Ford. REDPOLL, F.M (12): 1, Nicholas, rare size, good bold head, splendidly pencilled, sound col., in the pink; 2, Holborrow, beauty, close up, rare subs., nicely laced, sound rich col.; 3, Alexander, smart bird, full of work, neat full head, good wing bar, fine qual.; 4, Lewis, scarcely so large, but rare qual., beautifully pencilled; vhc, Tonks; hc, Osbourne; c, James. H.M. (7): 1, Mrs. Dalton, fine bold massive bird, good full head, splendidly pencilled, lovely qual.; 2, Lucas Bros., nice size, well proportioned, capital wing bars, well mkd.; 3, Ford, scarcely so massive, lovely qual. and cond., splendidly pencilled; 4, Jones and Jenkins; vhc, Morgan; hc, Andrews. MEALY OR TWITE (6): 1, Fallhurst, grand Twite, fine size and shape, full of work, in grand order; 2, Jeffreys, similar, splendidly pencilled, capital col., fine cond.; 3, Sampson, very tight in feather, good tone of col., capital wings; 4, Nicholas; vhc, Edwards. SISKIN (9): 1, 2, Mrs. Dalton, very fine cock bird leading, grand size and shape, beautifully laced and full of col.; 2, smart hen, shapely, nice size, richly pencilled; 3, Jeffreys, very hot col. cock, big bold bird, good shape, nice qual.; 4, no name; vhc, Andrews; hc, Oldham. A.O.V. (2): 1, Chick, well-known Corn Bunting; 2, Edwards. HEN: 1, 2, 4, Chick, grand team, all well-known birds, in the pink, Corn Bunting leading; 3, Edwards, very fine Bramble, grand size and shape, sound col., lovely cond. SOUTHILL (7): 1, Cole, grand bold Thrush, rare size and shape, beautifully spotted; 2, 3, c, Lewis, charming heavily Spotted Thrush, rare cond., 3rd good bold Blackbird, fine depth of col.; 4, hc, Teague; vhc, Speck. SMALL (3): 1, Chick, very fine Wheatear, grand size and col., grand cond.; 2, 3, Lewis, very nice Skylarks. LOCAL MULE: 1, Morgan, fine bold var. Goldf.-Can., grand cond.; 2, vhc, Jenkins, capital dark yell., nice size and shape, grand col.; 3, Davies, big bold buff, shapely, fine qual.; 4, Reynolds. BRITISH (22): 1, Jones and Jenkins, very fine Bullf., thick-set, bold head, lovely rich col.; 2, Jenkins, charming Pipit, shapely, full of work, excellent cond.; 3, Miss Webster, nice Greenf., capital shape and style, nice qual.; 4, Jones, another good Bullf., very rich col.; vhc, Lewis; hc, Gregory; c, Williams.

NORTHERN YORKSHIRE C.C.

Third annual show, Bird Market, Clayton Street, Newcastle-on-Tyne, Jan. 1. Since the war began the club has found it difficult to grant its full patronage to shows in the district owing to so many shows being cancelled or confined to members, so the members decided to run a show among themselves and to engage a specialist judge from a distance, so that the cups and trophies might be competed for under the most favourable conditions. This year Mr. James Bailey, Bradford, was the judge, and he did his work well and to the satisfaction of all. The entry was not very great, especially in the Novice section, which had an extended classification; it is difficult to understand why it should be so, as at other shows novice classes have filled well, better than the champion classes.

Of course the pick of the birds in the North were present, and enthusiasm ran high. The spoils were well spread about, no one exhibitor running away with all the prizes. Mr. Stewart, of Whitehaven, was present with a fine team, and was warmly congratulated by all upon winning the Club's Challenge Cup with his unflighted yellow, a bird of great merit, lovely position and feather, and staged to perfection. This is his second successive win, and thus the Cup becomes his own property. Mr. Stewart had run second for many seasons, and well deserved the honour. The Ramsden Cup winner for second best bird was won by Mr. J. T. Reed, Leadgate, with a lovely clear yellow hen. Mr. Reed is a novice, and is to be congratulated upon staging such a fine team of birds; he practically swept the decks in the Novice classes, and his birds were staged to perfection. Amongst the other young birds which ran the winners a close race may be mentioned Mr. Hands' ticked buff, a bird of lovely position and a coat like silk, Mr. Havis's yellow hen, a bird of great length, good colour and feather, and Mr. Crawhall's buff hen, a bird of lovely type, extra good in quality, but just a bit small. The winners in the Novice classes were all nice birds, Mr. Reed, besides winning the yellow hen class, also won 1st and 2nd in the unflighted yellows with a brace of nice birds. Messrs. Studholm and Son won in young buffs with a beautifully feathered bird; if only he had had more size, but there, we can't have everything. Mr. Shields won the buff hen class with a hen of good size, type and quality. Special winners: Challenge Cup, Stewart; Ramsden Cup, Reed. Special given by the President, Mr. T. C. Crawhall, for most points, donor not competing, Stewart. Most points, classes 1 to 10, Crawhall; 11 to 18, Reed. Mr. Coomber's special for best closed ring in novice, Collins. Best champion, given by Mr. Shield, Stewart. Best Novice, Reed. Most points, Crawhall. Most points, Novice classes, Reed. Best unflighted closed ring champion, Mather. Crawhall Cup, most points, with three closed ring unflighted, over patronage shows, Coomber.

The club is in able management. The President, Mr. Crawhall, who founded it when there was hardly a Yorkshire exhibitor in the district, was present, and had a cheery word for all. Mr. Tindale acted as show manager, and was ably assisted by Messrs. Wigglesworth, Mather, and Studholm, senior. Mr. Studholm, junior, was door steward, and one man above all to do his duty was the secretary, Mr. Havis, who carried out his work in a most pleasing and thorough manner.

CL., ETC., YELL. (9): 1, 4, Stewart, father and son, father leading, both exceptional length, type and qual., the older bird wins on size, but the 4th is a little neater drawn; 2, Havis, great length, exceptionally high col., nice pos.; 3, vhc, Crawhall, Gateshead winner, lovely, typical bird, good back, nicely piped tail, good wing carr., unwashed, which pegged him back; hc, Leck; c, Tindale. BUFF (3): 1, Stewart, beautifully rounded, teeming with col. and qual., in the pink; 2, Crawhall, bigger bird, longer, and if anything straighter, but again wants a tubbing; 3, Tindale. TKD. OR MKD. YELL. (2): 1, Mather, mkd. wings and head, long and well drawn, nice pos. and qual.; 2, Leck. BUFF (4): 1, Crawhall, wing tick, beautiful pos., nice straight back, well carried wings, close compact tail; 2, Stewart, eye tick, last year's cup winner, well-rounded, beautiful salmon col., feather shone like satin; 3, Wigglesworth; 4, Havis. YELL. HEN (4): 1, Leck, Newcastle winner, good length, nice pos. and feather, we have seen her looking better, closely pressed by 2, Stewart, beautiful hen, just on small side, nice boxy feather; 3, Tweedie; 4, Tindale. BUFF, A.V. (5): 1, 2, 3, Crawhall, Whitehaven winner leading, followed by her mother, the Blaydon winning hen, wins on condition, though a little smaller; 4, Tindale; vhc, Hands. UNFLIG. YELL. (13): A grand class: 1, Stewart, tkd. side of head, wins challenge cup, charming bird, good length of side, stands like a guardsman, clothed in the most silky feather, just tins his wings a little at times, but well worth his place; 2, Coomber, very breedy, nice feather, good wing carr., inclined to run thin in neck, but his other good points well outweigh that, well piped tail; 3, 4, Crawhall, beauties, 3rd, nice qual., full of breed, well clothed; 4, Newcastle, Blaydon and Whitehaven winner, long bird of exceptional qual. and nice pos., unfortunately was a bit wild, which pegged him down; vhc, Tindale; hc, Coomber; c, Hands. BUFF: 1, Hands, grizzled back, and wing, breedy, full of qual., shows for all he is worth, if anything a bit short in flights; 2, 3, Tweedie, nice birds, clears;

(Continued on next page.)

SHOWS.

(Continued from page 28.)

2nd, longer; 3rd, better qual., hard to separate; 4, Coomber, mkd. wings, eyes and head, lovely qual, of great promise, good shaped head, well filled neck, close fitted wings, nice tail; vhc, c, Tindale; hc, Crawhall. UNFLIG. YELL. HEN (16): Hot class indeed, some charming damsels left cardless: 1, vhc, Havis, grand big hen, good col. and qual., some doubted its sex, but most decided it could only be a hen, and one to be proud of, too; 2, Mather, another charming damsel, plenty of breed, long flights, grand tail, bit paler in col., but a Yorks. lass through and through; 3, Tindale, head capped, good col., lovely silky feather, good head, neck, wings and tail, nice pos.; 4, Crawhall, head and eye tkd., as long as winner, lovely back, straight as an arrow; hc, Hands; c, Mather. BUFF, A.V. (10): Good class; 1, vhc, Crawhall, lovely little thing, as though chiselled out of marble, straight as a rush, could do with a little more position, but seems nervous; 2, F. Johnson, larger, a brighter col., real Yorks. type, good feather, nice oval head, well filled neck; 4, Coomber, smart, excellent type, good feather, pos. of the best; hc, Wigglesworth; c, Coomber. NOV. CL. YELL. (5): 1, Frost, nice qual., good head and neck; 2, Studholm and Son, hotter col., nice shape, long, well carried wings; 3, Shield, Gateshead winner; 4, Studholm and Son; vhc, Collins. BUFF (5): 1, Reed, excellent qual., good pos., straight; 2, Shields, grand head and neck, nicely laid on wings, feather of the best, stands well; 3, 4, Studholm and Son; vhc, Collins. YELL. HEN (4): Reed, cl., good length, nice qual., stands to perfection; 2, Studholm and Son, cl., good pos., nice soft feather, not quite so hot; 3, 4, Collins. BUFF: 1, Reed, heavily variegd., good pos. and feather. UNFLIG. YELL. (5): 1, 2, Reed, 1st cl., nice long bird, good pos.; 2nd, wing tick, hotter col., good length, tight waxy feather; 3, Studholm and Son, variegd., plenty of length; 4, Frost; vhc, Studholm. BUFF (4): 1, Studholm, cheek tick, not large, but nice qual., all through, good head, neck, well packed wings; 2, Collins, larger, and bit heavier, some thought might have won, good type, nice head, full neck, long, well drawn-out body; 3, Frost; 4, Key. YELL. HEN (4): 1, Reed, Ramsden Cup winner, not a big one, but lovely feather, one of the best hens in the show, cl., nice col., good wings and nice pos.; 2, Collins, wing tick, nice hen, but beaten to-day; 3, Studholm; 4, Kay. BUFF (5): 1, Shields, nice size, good qual., stands well; 2, Frost, another nice bird; 3, Shields, good pos., and shape, but dirty; 4, Key; vhc, Studholm and son.

NORTH LIVERPOOL C.B.S.

FINE FINISH TO A SUCCESSFUL SEASON.

Nearly 500 Entries at a Members' Show.

Boxing Day proved a happy choice for the annual old show of the North Liverpool C.B.S., for it seemed to suit the convenience of all concerned and the results were most gratifying. The committee and members are workers, and during the year all the shows have been well patronised, also the social events, but the Boxing Day show beat the lot. Five hundred exhibits for what is practically a members' show, constitutes a fine record, and there was quality as well as quantity throughout. The show was opened by Mr. J. Meade, who also distributed the prizes in the evening. The chairman, Mr. A. E. Wilkins, whose presentation set of seven own make British show cages was greatly admired, and realised 25/6 for the benefit of the society, rendered his valuable aid, whilst the hon. sec., Mr. Harry Holden, who has so splendidly filled the secretarial shoes of Private Edgar Broadbent, now on active service, never put aside his pen until all the prize cash was paid out. Plenty of solid work was put in by the stewards, Messrs. Huyton, Worral, Satterthwaite, Foxcroft, Hammond, Leadbetter (vice-chair), Sinclair, Cattle, and Davies. In addition to a lengthy subscription list for "specials," the following members gave birds: J. Kewn, W. Blaylock, R. P. Roberts, H. Satterthwaite, and Mrs. Holden. All the gift birds were sold, thanks to the cajolery of Mr. J. W. Metcalfe, who wielded the hammer with deadly effect. Mr. T. Costello promised the society a valuable silver trophy, most probably a challenge shield. Mr. E. Battersby promised to replace the Novice Border Cup with another, and several offers of financial assistance were forthcoming. Among the numerous visitors to the show were Messrs. J. W. Cutmore, R. Lobb (Bootle), E. Bunner, J. Geenan, J. Jones (Garston), etc. Judges: Messrs. W. Cowgill (Bradford), A. Wellings (Prescot), R. Hunter (Dunskirk), and T. Rowlands (Liverpool).

A pair of Norwich belonging to Private G. Hodson were claimed at £3. The sale of the Gift birds realised £5, and Mrs. Holden's gift bird was raffled and brought in 22s. 6d.

Season's cups and the day's specials: Premier Cup, Satterthwaite; Champion Yorks., Rowlands; medal, Huyton; Novice Yorks., Jordan; medal, Worral; Champ. Bord., Longmore; medal, Bratherton; Novice, Battersby; medal, Satterthwaite; Brit., Satterthwaite; medal, Mrs. Holden; Norwich medal, Pvte. Hodson. Most exhibits in Novice section Hammond (27 birds). Most points, Satterthwaite, 152 points. Most entries in Nor. and Boxing Day shows (British), Lonsdale. Most entries in Norwich, Barr. Most points Champ. Yorks., Rowlands; 2, Huyton; 3, Roberts. Best Bird, Rowlands; most points, Nov. Yorks., Satterthwaite; 2, Worral; 3, Jordan. Most points, Bord., Longmore; 2, Parsons. Most points Norwich, Metcalfe; 2, Hodson.

KENDAL C.B.S.

A most successful show, held Dec. 26, in the Town Hall. The entry was up on last year, there was a good gate, and quality generally was excellent, especially in Norwich and British. The committee, headed by Mr. J. Thompson, had all the arrangements well in hand, and everything passed off smoothly. Mr. W. Heywood made a courteous and efficient secretary. Mr. C. A. House judged.

NOR. CK. (17): 1, Townley, tkd. neck and wing, lovely shape, grand qual., level col.; 2, 4, Hoyle, tkd. head, a lovely exhibit, but not so smart in wng carr., 4th variegd. buff, small, feathered like a Java; 3, Hawthornthwaite, variegd. yell., grand feather; vhc, hc, Rainford; c, Higginson and Heywood. HEN (10): 1, 4, spl, best in show, Townley, magnificent yell., grand head and chest, rare carr., lovely feather, very fit; 4, buff, grand qual., nice carr.; 2, Higginson and Heywood, grand qual. buff, short and compact, in nice form; 3, hc, Rainford, stylish buff, nice qual., hardly so stout; vhc, Hawthornthwaite; c, Dickinson. UNFLIG. (8): 1, Townley, buff, very short, stout bodied, good head, nice qual. and col.; 2, 4, Dickinson, nice headed buff, hardly so stout, but nice qual., 4th variegd. buff, grand feather; 3, Dr. Allen, tkd. necked yell., capital shape and qual., looks like a hen; vhc, Hawthornthwaite; hc, Hoyle; c, Dent. HEN (7): 1, Hawthornthwaite, very smart, neck and wing tkd. yell., capital col. and qual., nice type; 2, Dr. Allen, shapely head, tkd. buff; 3, Hoyle, nice qual. variegd. buff; 4, Rainford; vhc, Crossley; hc, T. J. Allen; c, Wells. NON-FED CK. (7): 1, Dr. Allen, very neat cap and wing mkd. buff, grand type and feather; 2, 3, Higginson and Heywood, stout, shapely buffs, not so tight in feather; 4, Dickinson; vhc, Dent; hc, Dixon; c, Crossley. HEN (7): 1, Alexander, nice yell., not well shown; 2, Higginson and Heywood, head and wing mkd. buff, very wild and so lost its chance; 3, Crossley, nice wing tkd. buff; 4, hc, Dixon; vhc, c, Dent. NOV. (6): 1, vhc, Millroy, shapely, neat feathered, head and wing tkd buff; 2, hc, Wells, cinn.-mkd., lovely shape and feather, easily 1st had it been washed; 3, 4, Dixon. YORKS. YELL. CK. (9): 1, 3, 4, Harrison, very neat, slim, well tapered yell., nice qual., 3rd face and wing mkd., longer, but not the shape and feather; 2, vhc, hc, Douglas, very shapely, nice feathered cheek tkd. HEN (7): 1, 3, 4, Harrison, charming hen, said to be a nest-mate of the winning cock, a good pair to get from one nest, 3rd rattling good cinn.-mkd., not so fit; 2, Douglas, nice length and shape; vhc, T. J. Allen; hc, Higginson and Heywood; c, Dr. Allen. BUFF CK. (9): 1, 2, 3, Harrison, long, slim, well tapered variegd., grand style, 2nd cl., more length, lovely qual., not quite the style and fineness, 3rd nice shapely cl.; 4, hc, Higginson and Heywood, neat, stylish variegd; vhc, Douglas; c, T. J. Allen. HEN (9): 1, 3, vhc, Harrison, very smart cinn.-mkd., capital shape and style, 3rd nice shape, not so fit; 2, c, T. J. Allen, stouter, nice style; 4, Parkinson; hc, Higginson and Heywood; No. 5, Higginson and Heywood; No. 9, Dr. Allen, passed as yell. NOV. (6): 1, 2, 3, Millroy, 1st neat stylish yell., 2nd cinn. mkd. yell., rather small; 4, Parkinson; vhc, hc, Dennison. BORD. YELL. (12): 1, 2, Hill, very neat and slim, grand style and qual.; 2, quite as smart in body and style, hardly so silky in feather; 3, T. J. Allen, grand body and style; 4, hc, Newby, very neat, but not steady; vhc, Townley; c, Little. BUFF (11): 1, hc, Allen, neat head, grand wings and tail, a little swell; 2, 3, c, Newby, nice wings and tail, 3rd good shape and style; 4, Hill, grand style and qual.; vhc, Townley. HEN, YELL. (8): 1, hc, Allen, very sweet and neat, grand style and feather; 2, 3, Newby, not quite so neat in head, good body; 3, nice style; 4, Bell; vhc, c, Townley. BUFF (9): 1, 2, 4, Newby, grand feather and style, shapely body; 2nd just a shade stouter; 3, Allen, very nice shape and qual.; vhc, hc, Townley; c, Higginson and Heywood. VARIEG. (14): 1, Allen, very smart, stylish 4-pointed buff, grand qual.; 2, 4, Newby, self yell. cinn., very shapely, grand col., nice pose, 4th wing and head tkd. buff, nice shape and style; 3, hc, Hill, variegd. yell., nice shape, close compact feather; vhc, Parkinson; c, Dickinson. HEN (8): 1, 2, 4, Newby, yell., self cinn., capital col., shape and style, neat feather, 2nd wing mkd. buff, good shape and qual; 3, hc, Higginson, variegd. yell., smart, stylish, nice feather; vhc, Parkinson; c, Hill. NOV. (6): 1, Hill, very sweet neck tkd. buff; 2, 3, Millray, head and neck tkd. buff, nice style, and a neat yell.; 4, Parkinson; vhc, hc, Dennison. A.O.V. (6): 1, 2, Hawthornthwaite, good yell. cinns., 1st best in shape and size, 2nd soundest col. and best qual., bit open in flights; 3, hc, Dickinson, variegd. crest, large crest, good frout; 4, Wells; vhc, Alexander. GOLDF. (4): 1, 2, 3, Higgiuson and Heywood, a good team, 1st wins by richness of col. and closeness of feather, quickly claimed at catalogue price, 2nd larger, deeper cut blaze, not so bright; 4, Wells. BULLF. (8): 1, 2, Fisher and Dixon, lovely shape, col., and qual., very steady, 2nd not quite so shapely, rich col.; 3, 4, Alexander, lovely col., grand back and bars, not so steady; vhc, hc, Higginson and Heywood; c, Bell. LINNET, ETC. (6): 1, Fisher and Dixon, nicely mkd. Twite, excellent col. and feather; 2, Dennison, nice shapely, well mkd. Linnet, good qual., steady; 3, Alexander; 4, vhc, Wells; one Linnet was disqualified for stainiug. A.O.V. (4): 1, 2, 3, 4, Fisher and Dixon, lovely Redstart, grand col. and feather, very steady, well mkd. Meadow Lark, rich col. Bramble and nice Chaff. HYB. (4): 1, 2, 3, 4, Alexander, rattling good Goldf.-Greenf., splendid col. and qual., rich col., nice shaped Linnet-Bullf., well mkd. Goldf.-Bullf., and a nice hen Goldf.-Bullf. VARIEG., ETC., MULE (6): 1, 2, 3, 4, Fisher and Dixon, the largest Siskin-Can. we have seen, very nicely mkd., good col. and feather, 2nd shapely, nice col., variegd. Linnet, 3rd rich col., dark Greenle Can., lovely qual., 4th lustrous variegd. Goldf.-Can.; vhc, Alexander; hc, Higginson and Heywood. SELL., 15/-. (6): 1, Higginson and Heywood; 2, 3, vhc, Dickinson; 4, Allen. 10/- (7): 1, vhc, hc, Dickinson; 2, Allen; 3, Rainford; 4, c, Crossley. GIFT (10): 1, Allen; 2, Newby; 3, Dickinson; 4, Higginson and Heywood; vhc, Hawtbornthwaite; hc, Townley; c, Hoyle.

Members' Shows.

NOTE.—Secretaries will greatly facilitate the work of ourselves and our printers if they will kindly endeavour to send their reports as nearly as possible as they see these accounts printed, and if they will also write the names of exhibitors as distinctly as possible.

GT. HORTON (Good Intent) O.S.

Last members' show of the season, Jan. 13; 53 birds staged; judge, Mr. L. C. Casey. Cl. or Tkd. Yell. Yorks (4): 1, 2, 3, Firth; 4, Widdop. Buff (5): 1, 2, vhc, Firth; 3, 4, Oldfield. Mkd., Ck. (5): 1, Bartle; 2, 3, 4, Firth; vhc, Ackroyd. Hen (5): 1, 2, 4, vhc, Firth; 3, Bartle. Cl. or Tkd. Yell. Hen (6): 1, 2, Ackroyd; 3, Oldfield; 4, Widdop; vhc, hc, Firth. Buff (8): 1, c, Warburton; 2, 4, Ackroyd; 3, vhc, hc, Firth. Unflg. Ck. (9): 1, vhc, hc, Firth; 2, 4, Washurton; 3, Bartle; c, Widdop. Hen (8): 1, 4, vhc, Firth; 2, c, Warburton; 3, Oldfield; hc, Ackroyd. Brit. (3): 1, 2, 3, Bartle. Most points for year's specials, A. Firth, 100 points, wins cup outright (three years in succession), and gold medal. G. Ackroyd and G. H. Washurton divide the 2 and 3 prizes, 96 points each. L. Widdop 4, 77; T. Oldfield, 5, 71; D. Bartle, 6, 65; sp. for most points in classes 1 and 2; marked classes, also unflighted, A. Firth; most points hen classes, G. Ackroyd; most points Norwich; also British, D. Bartle, without opposition; novice special, L. Widdop.—A. Firth, Sec.

CHOPWELL C.B.S.

7th annual show, Dec. 23, Workmen's Club Hall; an ideal hall for a show, with plenty of light. An entry of 110 was very satisfactory, and many birds were on view. The hall was well filled with visitors throughout the day. Norwich and British were the feature of the show, and Mr. Christer's team of Foreign proved a great attraction. There being 39 specials, competition was very keen. Cup for most points was again won by Mr. G. W. Charlton, also spl. most points in Borders. Special best bird, R. Johnson, spl. most points British and Mules, and most points Bullfinch and hen Finch or Bunting. The Stewards (Messrs. G. W. Barkess, W. Marsh, G. W. Charlton, M. Simpson, W. Carr, E. Jameson, were always at their posts, and everything went on smoothly under their direction. The duties of secretary were carried out by Mr. W. H. Christer, assisted by Mr. R. Johnson. The judges were Mr. W. Curry and Mr. Jos. Lindsay, of Westwood, and their awards were highly satisfactory.

Nor. Yell. (11): 1, 2, spl, Page; 3, hc, Makepeace; vhc, Simpson; c, Marsh. Buff (7): 1, 2, spl, Cresswell; 3, vhc, Page; hc, c, Marsh. Nor. Hen (8): 1, hc, Page; 2, 3, spl, Makepeace; vhc, Simpson; c, Marsh. Yorks. Ck. (4): 1, spl, vhc, Nixon; 2, Simpson; 3, Dodds. Hen (2): 1, spl, Simpson; 2, Nixon. Bord. Yell. (4): 1, 2, 3, spl, Charlton; vhc, Dodds. Buff (3): 1, 2, spl, Charlton; 3, Dodds. Hen (5): 1, spl, 2, hc, Dodds; 3, vhc, Charlton. Crest or C.-B. (5): 1, spl, 3, c, Marsh; 2, hc, Charlton. Mule or Hyb. (4): 1, Simpson; 2, spl, 3, vhc, Charlton. Goldf. (3): 1, spl, 2, Simpson; 3, Charlton. Bullf. (8): 1, spl, 2, c, Johnson; 3, vhc, Simpson; hc, Jameson. Linnet (6): 1, spl, 3, Johnson; 2, Carr; vhc, hc, Simpson. Chaffinch, etc. (7): 1, spl, 3, vhc, Simpson; 2, hc, c, Johnson. Siskin, etc. (5): 1, spl, 3, Johnson; 2, Barkess; vhc, hc, Carr. Hen Finch or Bunting (10): 1, spl, Carr; 2, Marsh; 3, vhc, Johnson; hc, Charlton; c, Simpson. A.O.V. (2): 1, spl, Charlton; 2, Johnson. For Large: 1, 2, spl, Christer. Small: 1, spl, 2, 3, Christer. Sell. (10): 1, Simpson; 2, spl, hc, Cresswell; 3, Marsh; vhc, c, Charlton.—R. Johnson.

HOLYHEAD C.B.S.

Members' British and Mule show, Headquarters, Jan. 2. Mr. J. Maker and Mr. Roberts judged, and gave general satisfaction. Goldf.: 1, Jones; 2, Evans; 3, E. Doughty. Greenf.: 1, J. Doughty; 2, Jones; 3, Roberts. Linnet: 1, H. Doughty; 2, E. Doughty; 3, Maher. Redpoll: 1, Maher, 2, Roberts; 3, Evans. Chaff.: 1, Jones; 2, J. Doughty; 3, H. Doughty. Light Mules: 1, Roberts; 2, Maher; 3, J. Doughty. Dark: 1, J. Doughty; 2, Griffiths; 3, E. Doughty. A.O. Hardbill: 1, Evans; 2, Griffiths; 3, Jones. Softbill: 1, E. Doughty; 2, Jones; 3, Roberts. Special best British, Jones; best Mule, Roberts.—J. Doughty, Sec.

MORLEY C.B.S.

Annual members' show Dec. 30, at Headquarters. Keen competition ensued for the various specials, Mr. B. Cook winning special for best bird, with a very good unflighted hen, and special most points for the five shows with 85 points: T. Booth, 2nd, 76; J. Scholes, 60; W. Robinson, 42. Mr. O. Atkinson judged and gave satisfaction. Class 1: 1, 3, Cook; 2, Robinson. Class 2: 1, 2 Booth; 3, c, Robinson; vhc, Cook. Class 3: 1, 2, Cook; 3, vhc, Booth; hc, c, Robiuson. Class 4: 1, 2, Booth; 3, hc, Robinson; vhc, Scoles. Class 5: 1, 2, Booth; 3, vhc, Robinson; c, Cook. Class 6: 1, sp, Cook; 2, vhc, c, Scholer; 3 Booth.—B. Cook, Hon. Sec.

BRADFORD EAST O.S.

Final show of the season, Park Chapel School rooms, Jan. 3rd, which decided the winners of the various competitions. Mr. H. Sutcliffe, Shipley, judged. Champ. Cl. Tkd. Yell. Yorks.: 1, Walker; 2, Midgley; 3, Farrar. Buff: 1, Walker; 2, Stables; 3, 4, Farrar. Unfl. Yell.: 1, 3, Walker; 2, Farrar. Buff: 1, vhc, Midgley; 2, Stables; 3, 4, Walker; hc, Farrar. Ev. Etc.: 1, 2, Taylor. Cl. Tkd. Yell. Hen: 1, 3, Stables; 2, Taylor; 4, Farrar. Buff: 1, 2, Stables; 3, Walker; 4, Farrar. Ev., Etc.: 1, 3, hc, Midgley; 2, Taylor; 4, Farrar; vhc, Walker. Nov., Cl. Tkd. Yell. Yorks.: 1, Wilman; 2, Hargreaves; 3, Rycroft; 4, Spencer; vhc, Verity. Buff: 1, 2, 4, Wilman; 3, Anderson; vhc, Hargreaves; hc, Verity; c, Naylor. Unfl. Yell.: 1, 4, Verity; 2, Spencer; 3, Denton; vhc, Wilman. Buff: 1, 4, Naylor; 2, Spencer; 3, Anderson; vhc, Verity. Un., Etc.: 1, Denton; 2, 4, Hargreaves; 3, Verity; vhc, Spencer; hc, Anderson; c, Wilman. Cl. Tkd. Yell. Hen: 1, 4, Wilman; 2, 3, vhc, Spencer; hc Denton; c, Verity. Buff: 1, Deuton; 2, c, Wilman; 3, 4, Spencer; vhc, Hargreaves; hc, Naylor. Even. etc.: 1, 4, Spencer; 2, Hargreaves; 3, Verity; vhc hc, Naylor. Sell. Ck.: 1, Anderson. Hen: 1, Anderson.

The winners of the various competitions are as follows:—Mr. A. Farrar's Cup, winner J. Farrar, 260 points; Mr. J. Farrar's Cup, winner C. L. Walker, 336; members' specials, Champion section, Walker 99 points, Midgley 84, Farrar 83, Stables 66, Taylor 50, Northrop 30; Novice: Wilman 93, Spencer 92, Hargreaves 83, Naylor 83, Verity 82, Denton 65; Selling Competition, Champion: Rushworth; Novice, Anderson.—J. Spencer, sec.

NORTHERN CREST CLUB.

Members' show, Dec. 26th, at Sunderland. Mr. W. F. Swan had everything in hand, and looked after the birds with great care, also the stewards of the Sunderland C.B.S., assisted our judge, for which I thank them. Entries did not come up well, on account of the railway companies refusing to take live stock. The twelve classes received an entry of eighty birds. Geo. Dobson's old Crested cock won the Challenge Cup, and gold medal for best old bird, and the same exhibitor won the gold medal for best Cresthred bred 1916. Mr. R. Armstrong's buff marked Crested cock won the Challenge Cup and gold medal for the best Crest, bred 1916. Mr. Armstrong also won special best second bird in the first three classes, and best second in the next three classes. Geo. Dobson spl best second in the next three; J. Morgan won special best second in the last three classes. Mr. J. Clark, Sunderland, judged. Buff Crest Cock: 1, 3, sp, Dobson; 2, Smitb; 4, Armstrong. Hen: 1, vhc, Bewick; 2, sp, Armstrong; 3, hc, Swan; c, Farrer. Yell. Crest: 1, sp, Riseborough. Buff C.B. Ck.: 1, sp, Dickinson Bros.; 2, Armstrong; 3, Bewick; vhc, Smith; hc, Dobson; c, Riseborough. Hen: 1, sp, 3, Dobson; 2, Dickinson Bros.; vhc, Bewick. Yell. C.B.: 1, sp, 2, Swan; 3, Riseborough; vhc, Bewick. Buff Crest, 1916: 1, sp, Cup, 3, Armstrong; 2, Dobson; vhc, hc, Swan; c, Bewick. Buff C.B., 1916: 1, gold medal, Dobson; 2, 3, Simpson; vhc, Riseborough; hc, Armstrong; c, Bewick. Yell. Crest, 1916: 1, Armstrong; 2, Bewick. Yell. C.B., 1916: 1, Bewick; 2, Riseborough; 3, Dobson. Nov. Crest: 1, 2, 3, Morgan; vhc, hc, Dobson. C.B.: 1, 2, Morgan.—Geo. Dobson, hon. sec.

Please see note at head of members' shows.—Ed.

LEEDS C.B.S.

Show, Griffin Hotel, Leeds, Dec. 26. Judge, Mr. E. Clegg (Dewsbury), who gave entire satisfaction. Yorks Yell. (5): 1, 2, A. Brown; 3, Richardson; 4, Baldwinson; vhc, Simms. Buff (6): 1, 3, A. For Rules see last week's issue.

CANARY QUERIES

Answered by CLAUDE ST. JOHN

A SONGLESS NORWICH.

E. W.—You say nothing about the apparent health and condition of the bird, nor whether it moulted in the autumn or is now losing feathers. These are points which might easily explain its silence. Assuming the bird was in a healthy condition and really a cock, it certainly ought to have been in good song by this time. See that it is kept in a bright, comfortable position, not necessarily overheated, free from direct cold draughts, extreme fluctuations of temperature, and do not hang it near or over burning lights in the evenings. Then give a staple diet of three parts canary to one part summer rape only. In addition, give separately every third day half a teaspoonful of a mixture of hemp, niger, white millet, teazle, and a slight sprinkling of linseed and mustard. On the intervening days give first a morsel of bread and milk sprinkled with sugar, and next a morsel of banana, boiled or raw carrot, or sweet apple. In the drinking water add ten drops of lemon juice and a crystal of sulphate of soda the size of a small pea, every second day for a fortnight. If it has not commenced to sing in, say, three weeks hence, write again and give full particulars as regards the above-mentioned points, and I will advise you further.

ALWAYS LOSING FEATHERS.

Nash.—I should suspect that the bird is much exposed either to cold direct draughts, damp, or rapid extremes of heat and cold, which, either singly or in combination, are the great exciting causes of the condition. You must first of all see that any, or all, of these conditions are quite removed. Keep the bird in a bright and cosy place, not necessarily overheated, but yet not on the chilly side at present, and whatever the temperature, see that it is fairly equable. Do not hang it high up near the ceiling nor near or over burning lights in the evenings. In addition to the staple seed diet, give a piece of bread soaked in cold milk, drained, two drops of cod liver oil emulsion on it and sprinkled with soft sugar, every second day for two or three weeks as may be necessary, and on the alternate days give either a morsel of banana or boiled or raw carrot. Dissolve half a drachm of ammoniated citrate of iron and quinine in an ounce of sherry, i.e., two tablespoonfuls; add 20 drops of syrup of buckthorn and give 20 drops of this mixture in the drinking water two days in every three until the feathers have quite ceased dropping..

NORWICH WITH COUGH.

E. V.—It would certainly be best to cage up the bird for the present and keep him in a quite warm place where the temperature is fairly equable until the symptoms have quite disappeared. Give a staple diet of three parts canary to one part summer rape, and in addition give separately twice a week half a teaspoonful of mixed seed, and every second day a piece of bread the size of a hazel nut soaked in cold milk, drained, two drops of cod liver oil emulsion on it and sprinkled with soft sugar. In the drinking water add ten drops of lemon juice and as much Epsom salts as will cover a sixpence, for three consecutive days, and afterwards twelve drops of the following mixture, which any chemist will make for you, every second day until the symptoms have disappeared. Mixture: 1 dr. each of tinct. of squills and sweet spirits of nitre, ½ dr. each of elixir of ammon. and fod. of potass., and ½oz. liq. ext. of liquorice.

BREEDING CANARIES ABOARD SHIP.

W. B. B.—(1) You omit to say whether your query refers to a vessel engaged on any active service or likely to be lying in port. In the former case I suspect you would have to run a certain risk of things being very much hashed up at times when the storm fiends are abroad on mischief bent. Apart from this risk, I see no reason why you should not succeed very well in breeding Canaries on board. I note you have heating arrangements at command, but if the vessel is engaged in trade or on any service entailing passage over high and low latitudes, I would advise you to use it chiefly to equalise the temperature somewhat during such passages. For instance, when in cold latitudes and at keeping the temperature somewhere between 60 and 65, and gradually reduce it in warmer climes are approached, and in the hotter climes you would rather need to reduce the temperature as much as possible by ample ventilation. It would also be a good thing to have a curtain so arranged that you could draw it over the cages at any time. Then, if the elements were likely to cause any serious disturbance whilst hens were sitting or had young in the nest, draw the curtain closely during the disturbance so as to induce the hens to sit closely for the time being, and they would weather the storm and get to work afterwards with the best of the tars. (2) You do not mention any marks on the Norwich cock at all, so I presume he is a clear yellow. In this case you should get a moderate-sized buff hen, lightly ticked, in one or both wings for preference, as a mate for him. Get as good head qualities as you can, a nice round full chest, and well-braced wings and tail. (3) The panting when you go near the cock is due to nervousness. If it appears in an overfed condition, add a pinch of Epsom salts and ten drops of lemon juice to his water daily for a week. Do not approach such a bird suddenly in any alarming kind of dress, especially headdress. The turning on the perch is merely an idiosyncrasy. (4) The escaped Budgerigar would live for some time, but they generally disappear after a time, and none know where.

LOSS OF PLUMAGE.

H. Latchford.—Our comp. being a comedian in a way, one needs to keep a sharp eye on his vagaries. I just notice that in my reply on Jan. 6 in advising you about giving the bath, he makes me say you should "choose the wildest days for offering it." I am only hope the meaning was sufficiently obvious. I meant, of course, to say the "mildest days."

A VARIED TRIO.

N. C. Mayes.—(1) I am not aware that one can tell if seed has been kiln dried by pouring water over it and judging by the sulphury colour of the water. This naturally implies that the seed had absorbed a proportion of sulphur, presumably used in the drying process, which was dissolved out again by the water, and as sulphur is practically insoluble in water, I should hardly think such a test was reliable. Any colour in the water when washing or soaking seed is just as likely to be due to the solution of a proportion of clayey dust which the seed contains. (2) The cause of the excreta sticking to the bird's feathers is more often than not due to some digestive or intestinal trouble, which may be due to some dietetic error. You should have given full particulars as to how you are feeding it. Add six drops of syrup of buckthorn and a crystal of sulphate of soda the size of a small pea to the water every second day for a week, and in the next week give instead five drops each tincture of gentian and dilute sulphuric acid every second day. (3) No, a temperature of 45 to 50 degrees is not too cold for Canaries. On the contrary, if you keep it within these limits of variation, or, say, within five degrees on either side of 50, void of direct draughts, you may regard it as the ideal winter temperature.

KEEPING ROLLERS.

H. H.—No, it is neither necessary nor advisable to keep Rollers constantly in darkened cages or song-boxes. It is only highly trained birds, such as schoolmasters or contest singers, which are kept partly, but not constantly, in these cages, and birds in training which show too much disposition to get "wild" and run out of bounds in song from a Roller fancier's point of view. Such matters as these, and the necessity of having a control over the song of certain birds, and to tone down faulty notes or delivery are the main purpose of these song-boxes, which are not really meant for the birds to spend their lives in them continually in perpetual twilight. The actual breeding of the birds, and general management, does not differ materially from that of other breeds. You would find a chapter devoted to the breed in Part XVI. of "Our Canaries," and another in House's "Canary Manual," post free, 1s. 2d. Our manager could send you either.

TO PREPARE FOR BREEDING.

Walter.—The birds are certainly being fed much too liberally for the time of year, but as they have been brought up and accustomed to this high feeding from hatching, you will need to bring about any material change by degrees. As they have hitherto been kept in a good-sized aviary, the ill-effect of high feeding would not be so pronounced as if they had been kept in closer confinement, and if you are now going to keep them in cages it will be almost a necessity to reduce the dietary somewhat, or the birds will most likely be forced into premature breeding condition at the first few mild days that may come now at any time. To commence this reduction I would advise you to give a staple diet of three parts, by measure, of good sound canary seed to one part of summer rape. In addition to this, keep a supply of the mixture which the birds have been accustomed to as staple hitherto, and give a small teaspoonful separately from the staple diet every second day, and on the alternate days give a morsel of bread and milk, crushed sponge cake, or any other soft food you may prefer, and give a morsel of green salad daily as long as you can get it in a fit condition for use. After the first week or ten days reduce the quantity of the mixed seed to half a teaspoonful per bird, and a week or so later begin to give it every third day, and the soft food ditto. Then, finally, bring them on to the staple, as above, with half a teaspoonful of the mixed seed per bird twice a week only, and the soft food once or twice a week. If you can get it in good condition, quite free from frost and snow, a little green salad may be given daily all through the winter, but otherwise give as a substitute a morsel of banana, raw or boiled carrot, or sweet apple three times a week, on those days when you are not giving either of the other extras. Keep them on this dietary until the middle of March, and then you may feed as advised on pages 32 and 33 of "Canary Breeding for Beginners," of which you should get a copy from our Manager, who will send it you for 7d., post free. These birds will probably not need much extra feeding to prepare them for breeding. Mate them at the end of March or beginning of April, according to the weather prospects at that time. Don't be over anxious to mate very early, which is rarely any real advantage, and a mistake many beginners fall into.

AN IMPROVED ROLLER.

D. O'B.—Glad to hear you are working at evolving a new type of Roller, and wish you every success. I think I can quite see your ideal, which is one I fully sympathise with, and am quite sure if you succeed in getting it fixed, and there is no reason why you should not, without any serious detriment to the song tours, it will prove an immensely popular one, and be worth all the patient labour necessary to fix it in the breed. You will do quite right to mate the perfectly marked bird back to its father in any circumstances, and if your birds have not been previously much inbred, I would advise you to select the cock that comes nearest in markings to the ideal and its own brother to the perfectly marked hen back to its mother, and make another pair of a cock and hen, brother and sister which are full brother and sister to the perfectly marked bird, choosing a clear hen, or the nearest to it, and a cock with the nearest approach to the desired marking for this pair. The young from this brother and sister mated back with the progeny of the other two pairs should give you a very material advance towards your ideal, both in markings and in fixing the type permanently in the strain. Avoid as far as possible saddle, breast, neck and head marks, but ticks round the eye orbits may be tolerated more freely.

CANNOT PERCH PROPERLY.

A. H. F.—Seeing that the bird is so lively, and sings as usual, I do not think there can be much seriously wrong with it. See that the perches are of a proper size and shape, fixed securely, and examine the feet to see if the claws are much overgrown. The latter point alone may, at the bird's age, quite account for its inability to retain an upright position on the perch. First make some perches of a nice soft wood, about half an inch in diameter, and round in shape, then flatten off the top surface to an oval shape, and fix these in so that they do not wobble about when the bird moves on them. Next catch the bird and soak the feet for a few minutes in quite warm water, cleaning them quite free from dirt meanwhile, and finish off by holding them in cold water for a minute, and if the claws are overgrown cut them back with a sharp pair of nail scissors to a normal length, being careful not to cut too far back and make them bleed. By holding the claws up in front of a strong light you will see a thin pink streak extending a little way down the centre of the horny part of the claw, which is the vein, or "quick." Cut a little short of the extremity of this streak and no harm can be done. Finally, anoint the feet with a little vaseline, but do not leave on any surplus grease to collect dirt or sand from the cage floor. You may, with advantage, be a little more generous with the diet. In addition to the present staple, give half a teaspoonful of a mixture of equal parts hemp, niger, white millet, teazle, and broken groats twice a week, and on two other days give a morsel of bread soaked in milk, two drops of cod liver oil emulsion on it, and sprinkled with soft sugar. In the drinking water add six drops of syrup of buckthorn and a crystal of sulphate of soda the size of a small pea every second day for a week, and after this give six drops of tincture of gentian and four of dilute sulphuric acid every second day for another week.

CAGES AND CONTESTS.

D. R. S.—(1) I doubt if you will get as good results all round from running a cock with two or more hens in a flight cage, as by keeping the hens singly in single breeding cages. Although the cages are of good size they afford the minimum of privacy and seclusion for each hen's nesting arrangements and consequently the maximum of interference is likely to accrue, which is the real stumbling-block to successful breeding with several birds flying together in a limited space. The most I would advise you to attempt is to divide the larger flight into two and run two hens in each compartment, using one cock for both compartments, running him in them alternately. Two hens each in the smaller cages would be quite sufficient, and if the cock proves himself trustworthy and does not interfere with the hens' nesting arrangements, you might leave a cock permanently in each of these cages after the season begins. Keep four nesting sites in each compartment to serve each couple of hens. If you could divide the smaller flights into three compartments each, you might keep a hen in each space, and run a cock with them alternately, which would give you six breeding hens instead of four in these two cages. (2) To enter the contests of the B.R.C.C., unless it was such as were specified to be "open to all," you would need to be a member of the club. But there are many contests held in many parts of the country into which you might enter without being a member of this club, if that is what you mean. (3) This question is not very clear. You say "thus rung," but omit to say how rung, or with what ring. Birds wearing B.R.C.C. rings are, of course, entitled to compete in the club contests, and there are some open contests in which they would be able to compete. This point should be clear to you from rules of the club which you would obtain on entering. This applies just the same if the birds are bought or sold, provided always the sale is a bona fide one. (4) The indiscriminate mixing of strains is most undesirable. Birds highly developed on the lines of performing deep hollow tours may easily be ruined by the introduction of an outside strain not so developed. It is safest for a novice to stick to the same strain, not necessarily doing close in-breeding, or at least, introduce only such strains as are developed along similar lines.

EXPECTING TOO MUCH.

Boy Roy.—Sorry to disappoint you, but you are really expecting too much. You cannot in any circumstances turn a number of Canaries of different breeds into an aviary, however large, to breed at their own sweet will, and expect the breeds to remain pure. The birds would be practically certain to mate up indiscriminately irrespective of variety, even if one or two of the most lusty cocks did not monopolise the whole harem. Besides this, two cocks, five hens, and one of unknown sex, are too many birds to stock a cage for breeding 5ft. long and 2½ft. wide. The height is of little importance. One cock and three hens would be ample to stock the aviary. If you could put in a division about midway between floor and roof so as to make it into two sections 2½ ft. high, each having the same floor space as now, you might keep the three Norwich in one part and the four Yorkshires in the other, with just the same chance of success as you would have by devoting the whole space to one trio of birds, and you would then keep the breeds pure. The Border Fancy you would, of course, discard altogether in these circumstances.

A BAD MATCH.

Old Man.—Two rather heavily variegated buff birds, of unknown parentage, are not a suitable match for pairing together by any means. So far as colour is concerned, you might expect the progeny to consist chiefly of heavily variegated buffs, with a sprinkling of broken greens and possibly a stray self green now and again. Whether you would get any birds less heavily marked than the lightest of this pair depends entirely on how they have been bred and it would be best not to expect any lighter marked ones. If you wished to stand a reasonable chance of getting clear or lightly ticked birds you could not do better than replace either of your birds, but preferably the cock with a clear yellow bred from two clears. Glad to know you can still, after many years, learn something from "Cage Birds," we are never too old to learn evidently.

LUMPS ON WINGS.

Chas. Taylor.—You ought to have described the appearance of the lumps as nearly as you could, and especially said whether they appear to arise from the base of a feather. I rather suspect that they are abnormal growths of feathers, the feather-making material having become in the quill stage, a mass of furfuraceous matter, which forms the substance of these apparent growths. Try slightly moistening them with a small feather dipped in tincture of iodine once a week for a month, give a morsel of bread and milk dusted with flour of sulphur and then sprinkled with soft sugar every fourth day for two or three weeks, and on the day following each time add to the drinking water twelve drops of Fluid Magnesia. If this does not have the desired effect in causing them to disappear, write in, say, a month and give the above particulars, and also say if there is any neck, or stalk, so to speak, between the base of the growth and the bird's skin, when I will advise you further.

BRITISH BIRDS, MULES AND HYBRIDS

Answered by H. NORMAN.

HOW TO PAIR FOR MULES.

K. E. C. — I should feel inclined to try the old Goldfinch with one of the Yorkshire hens, the produce as a rule are smart birds, but have scarcely enough substance for exhibition purposes. The best are bred from Norwich hens, but if you only want yours for song, the Yorkshire should do. The other Finch I would also pair with a Yorkshire in preference to a Roller hen, as these are as a rule too small. Now, about the Siskin hen it would certainly be good if you could manage to breed a Goldfinch-Siskin Hybrid, and I should feel inclined to try them together and see how they go on; you could do this and still use the Finch with the Canary. If you ran him in with her when she was quite ready to go to nest; two or three matings would be sufficient. Any eggs you get from the Siskin you could put under one of the Roller hens. If you saw any possibility of getting any young I would advise you to add a little insectile mixture with the ordinary egg food, and get the Roller hens used to taking it, so that they could feed the young hybrids should you have any luck. It is very disappointing to get choice young and then fail to rear them.

TO KEEP FINCH IN COLOUR.

Leo. — I gather you have a field-moulted Goldfinch, and want to retain the brilliant plumage later on. Now as a matter of fact it is quite exceptional for a Finch to moult out quite as bright in colour as he was before he moulted. You see it is quite against Nature, because after the moult, birds are not quite as fit as they were before, and until they have recovered there is little improvement, but as time gets on the circle begin to come "up in colour" as fanciers term it, and are at their richest when ready for breeding. As regards moulting the Goldfinch, semi-outdoor treatment is the best. The healthier the bird the quicker he moults, and the better he comes through in colour. There is no secret about it; keep the bird healthy, look after him well, giving plenty of wild food, and a judicious use of rain water for bathing purposes when he is three parts through. When he is through, do not neglect him if you feel disappointed in his appearance, for if he has good natural colour, it will appear again in time.

BULLFINCH-CANARY HYBRIDS.

A. D. G.—Several have claimed to have bred Hybrids from the cock Bullfinch, although he is not a model breeder. I must say I have never seen any of these Hybrids yet, and unless I had a cock Bullfinch and a suitable hen that appeared to take to each other I should prefer to try them in the usual way. Don't let me discourage you if you feel like having a shot at them, one never knows what will happen with birds.

BREEDING BRITISH BIRDS IN AVIARY.

C. Young. — As a rule birds like to pair with their own species, but even if you did get a cross you could only get something that would be more valuable than the true breed. I think your best plan would be to let each pair fly by themselves in a separate cage during the winter months, and then turn them into the aviary some time during March. I fear if you wait until the hens show signs of wanting to nest you will possibly waste your time. If you turn them in when I say, each pair will keep together, and if the place is suitable and the birds healthy none of them will soon start feeding their partners. Put in plenty of old cages, nest boxes, and pans, and two or three old Finch nests if you can get them, if not, abundance of moss and cow hair.

LINNET WHEEZY.

F. C. M.—As your Linnet is still in full song there cannot be much the matter with him, possibly you are feeding him a little too well. You do not say what seed you give him. Go to the chemist and get some syrup of buckthorn and give five drops in a tablespoonful of water, leaving it for him to drink for six hours, then repeat two days later. If he is a big drinker as some Linnets are, do not let him have it so long. I gather from your asking about shepherd's purse that you are not giving him greenfood. You should let him have a spray of chickweed or watercress, or a piece of apple if he will eat it. You cannot buy shepherd's purse, it grows on waste land, it has a tiny white flower at the top of the plant, with branches down the main stem, with a purse full of seeds at the end of each branch. (2) All Goldfinches knock their beaks against the wires of the cages, especially when they are recently caught. I would advise you to send 2½d. to the office for the Nutshell booklet on the Linnet, it will tell you the correct way to feed him.

FOREIGN BIRDS.

Answered by WESLEY T. PAGE, F.Z.S.

AMAZON SCRATCHING ITSELF.

R. W. C.—The bird is evidently suffering from some form of skin irritation, occasioned by some internal trouble. It should have ripe fruit daily; also nuts, shelled and unshelled, such as Barcelona, monkey, and walnuts. It can also have biscuit, plain cake, and stale crusts, and once or twice weekly a piece of raw carrot. Add a good portion of white oats to the seed mixture. Do not omit to keep a continuous supply of cuttlebone and grit in the cage, also a chunk of wood for it to exercise its mandibles upon. It is not desirable to give a purge to a Parrot except in very special cases—any corrective should be gentle in its action and soothing, and for this reason I almost always use and advise fluid magnesia. Spray or bathe the nostrils with dilute glyco-thymoline, it will do no hurt if a little is swallowed. Put a little honey and borax into its mouth once or twice daily, either from the end of a stick or feather, or give it thinly spread on bread, biscuit, plain cake, or anything similar that it will eat readily. Keep the bowels moving freely by a gentle laxative, there must be no purging—every fourth day should be sufficient to give a mild dose, and on the other days put ten drops of Byno-phosphates in the drinking water. If the bird is at all thin give 15 drops of cod-liver oil emulsion daily, thinly spread on, or soaked into, anything it will eat. Report progress in a few weeks.

GENERAL.

Answered by THE EDITOR.

THE TICKED BIRD QUESTION.

T. J. Reynolds.—If you will send us a shorter letter, keeping entirely to the point, and authenticated by your proper address, we shall be pleased to publish it. As we understand the controversy, it is a question of whether a grizzle marking may be considered a tick, a variegation, or a "mark." The show points of a Norwich or a Yorkshire Canary are not in question, neither have the definitions 2, 4, or 6-pointed anything to do with it. Further, your letter only names your county, not your full address.

POST MORTEMS.

Mr. G. Yates, M.R.C.V.S., 1, College Road, Harrow, Middlesex, will examine and report upon dead cage birds for a fee of 1s. 6d. each bird; for reply direct, 2s. 6d.; analysis, 21s. The Post Office regulation is that bodies of birds must be sent at the letter rate of postage, and must be packed in hermetically-sealed receptacles which must themselves be enclosed in strong wooden, leather, or metal cases. If this regulation be infringed the packets may be destroyed by the authorities. **Any bodies sent to the office of this paper will be thrown away, and if a fee is enclosed the loss will be the sender's**

W. T. V. P.—Lung disease of some standing, whilst both lungs were affected with pneumonia, small portions of these organs had undergone necrosis.

Advts. continued from page 28.)

WANTED ! ANY QUANTITY OF BRITISH BIRDS

From one to 1,000 pairs weekly for spot cash. Goldfinches 3/- pair, Bullfinches 2/6 pair, Siskins 4/- pair, cock Linnets 5/- doz, hens 1/- doz.; Redpolls 3/6 doz., cock Larks 4/- doz., cock Chaffinches 4/- doz., cock Goldfinch Mules 7/- each, hens 1/6 each; cock Linnet Mules 6/- each, hens 1/- each. Dealers and bird catchers who are not satisfied where they are sending their birds, should give us a trial; we do not want to talk of how long we have been established, or of how many bird catchers are supplying us, as we do not believe in paper bluff, for we are without doubt the largest wholesale and retail British bird dealers in Great Britain; cash on receipt of birds, or deposit with "Cage Birds"; bankers, London City and Midland Bank: Power and Russell (Est. a century—not five minutes and call it years), 77, Sclater-st., Shoreditch, E. (742)

WANTED

ANY QUANTITIES OF

NATURAL COLOUR OR COLOUR-FED

CANARIES and MULES

BOTH SEX.

'PHONE, AVENUE 1738; OR WRITE

PALMER'S,

66, 68, 70, SCLATER ST., LONDON, E.

"CAGE BIRDS" SYSTEM RECOGNISED.

SALE or EXCHANGE.

Mainly Canaries.

PURE Brown Leghorns, will exchange for Roller Canaries, outside bred: John Royle, Hale-rd., Ditton, Lancs. (764)

GRAND buff Border cock, 1916 bred, 10/-; exchange yellow Norwich 1916 hen; on approval: B. Pope, 18, Keyford Gardens, Frome. (763)

WANTED yellow Norwich cock, will give three cock Bullfinches, could win; one hen, two Linnets: R. Pinnell, Warminster. (769)

GREEN Crestbred cock, 15/-; Yorkshire cock, winner, 15/-; yellow Yorkshire hen, 6/-: Abbot, 12, Frederick-st., Long Eaton. (767)

WHAT offers in British or Canaries for three silver fawns, buck and two does, prize bred, or sell 20/-: Bray, 8, Bradford-st., Coventry. (763)

TWO pairs of Norwich, 15/- a pair; four Yorkshire hens from 4/6 each; exchange entertained: Brooks, 157, De Beavior-rd., Dalston, London. (763)

ROLLER cock, prize bred, heavy marked, 10/-, exchange for good bred, clear Roller hens: hens first: Parker, 25, Woodseats House-rd., Sheffield. (764)

WHAT offers in Borders or British for one or more pairs of good racing pigeons, good strains,: Robt. Ferguson, 12, Garnock-st., Dalry, Ayrshire. (761)

TWO Scotch Fancy cocks for sale, one yellow and one buff, first crosses, or exchange either for buff or pied hen: Murdock, 82, Main-st., Holytown. (764)

EXCHANGE three pair pigeons, rung H.P., pedigree for Canaries, Rollers, or Borders, same value, or sell £2: Rush, 53, Laurel-rd., Kings Norton, Birmingham.

EXCHANGE Jones' hand lockstitch sewing machine, perfect working order, value 35/-, for Norwich yell. hens: W. Waraker, 17, Whitwell Terrace, Guisbrough, Yorks. (762)

ROLLER cock, 8/6; Roller Norwich cock, 7/6; two 1915 hens, good feeders, 7/-, or exchange high-class Rollers to value: Harrison, 28, Queen-st., Sutton-in-Ashfield. (765)

SELL two handsome cock Bullies or exchange for unfrighted yellow or marked Mealing hen; two hen Bullies, 2/6; offers; approval; stamp: Pugh, Church Bank, Llandovery. (764)

EXCHANGE two large, clear body, Crested hens, both winners, feathers to end of beak, for good gramophone and records or offers, or sell 50/- the two. Apply: Abel, The Grove, Neeton, Swaffham, Norfolk. (767)

TWO Black-red Modern Game Bantams, cock and hen, 10/-, or exchange for anything useful; also few Yorkshire hen Canaries, 4/6 and 5/- each; Seifert Roller hens, variegated, 3/6, 4/6 each: 163, Derby-rd., Southampton. (766)

MUST sell, nine hen Canaries, 3/- each; two cocks, 8/- each; cock Greenfinch Mule, 6/6; Siskin Mule, 7/6; H.M. cock Bullfinch, 5/6; hen Greenfinch Mule, 1/6; offers the lot; stamp: Dunham, Mount Pleasant, Clapham, Bedford. (757)

Mainly British.

TWO field-inculted cock Goldfinches, fine birds, 4/- each, exchange.—Lidgett, Grocer, Newark. (766)

EXCHANGE six Bullfinches, house-moulted, little cash, for Canaries: Norton, Winslow, Bucks. (764)

COCK Siskin, H.M., big bird, good colour, 8s.; exchange Goldfinch.—Withers, 12, Exmouth-st., London, W.C. (766)

FROM aviary, cocks, Redpoll, Greenfinch, Brown Linnet, on song, hen Chaffinch; exchanges: Rhodes, 273, Stretford-rd., Manchester. (765)

COCK Goldfinch hen Canary, mulers, and cock Mule, exchange prize-bred Dutch rabbits: T. Morgan, 61, Sparrow-hill, Loughborough. (766)

GRAND trio Black Wyandotte Bantams, 15/-, exchange Goldfinches, Linnets, or offers: Simpson, 34, Park Avenue, Cowdenbeath. (767)

FOUR hens, one cock, Bullfinches, two Redpolls, 7/- lot, exchange pair Budgerigars.—Tom Dawson, 37, Grosvenor Place, Carnforth. (766)

EXCHANGE six new spring net traps for Bullfinches, Goldfinches, offers: Davison, Dovecote, Boulter End, West Wycombe, Bucks. (762)

HOUSE-MOULTED hen, Grennie bred, with Goldfinch last season, 7/6. Some fine yellow cocks, Grennie, 1/- and 2/- each, or exchange birds to value for house-moulted cock Goldfinch or variegated Norwich cock Canary, your first. George Foster, Limekilnburn By Quarter, Lanarkshire. (761)

ROBERT LAMBIE, Whitburn, Linlithgowshire, clearing out British, Linnets, Yellowhammers, Greenfinch, and Redpolls, exchange Green or Cinnamon Norwich. (768)

OFFERS in exchange, catching outfit, carrying box, two house-moulted Redpolls, 3 cages, compartment for caught birds, 6/-: Woods, 17, William Hepwood-st, Blackburn. (768)

TWO cock Goldfinches, C.M., 6/- each; two Linnets, C.M., 5/6 each; Goldfinch hen, 1914 bird, 2/6; two hen Bullies, 3/-; exchange for yellow hens, Yorkshires or Norwich; yours first: White, 33, Cromwell-st., Swindon. (765)

FINEST cock Goldfinches, 30/- per dozen; hens, 1/-, will exchange six cock Goldfinches for pair Norwich or Yorkshires, birds first; only genuine birds taken; cash or deposit: Stephen Isaacson, Church Lane, Birr, Kings Co., Ireland. (759)

GUARANTEED upright, bargain, Goldfinch, two Linnets, one Redpoll, 1915, H.M. cocks, Norwich; one Bullfinch hens and cages, 26/- lot; exchange three pullets, Minoreas; offers; approval, yours first: Stone, 8, Watling-st., Leicester. (764)

EXCHANGE house moulted Goldfinch, bred Mules last season, only two years old; also good cock Mule of above, in full song, Goldfinch song, 17/6; for good Yorkshire cock, singing, or sell 17/6; no rubbish wanted or given; yours first; approval, seven days, each way: James Brady, Bridge-st., Cootehill, Ireland (761)

EXHIBITTORS.—Linnet, winner, 20/-; Greenfinch winner, 15/-; Twite, winner, 20/-; Chaffie, 2nd 10/-; Yellowhammer, a topper, 12/6; Goldfinch, 25/-, perfect; Indian Gouldian Finch, 20/-; Bullfinch, 25/-; big winner; dark Linnet Mule, 15/-; Sib. hen, mother of clear Mules, 25/-; Redpoll, 10/-; unbeatable; exchange yellow Norwich hens or cocks, or double breeding cages: G. Holloway, 15, Ganna Park-rd., Plymouth. (765)

Mainly Foreign.

COCK Grenadier Weaver, 12/6, or exchange for good Roller cock or Norwich hens: H., 21, Portland-rd., Blackpool. (764)

EXCHANGE splendid Amazon Parrot and cage, good talker, whistler, etc., for Canaries, etc., or sell 60/-: Wells, 61, Mount-st., Chorlton-upon-Medlock, Manchester. (764)

AFRICAN Grey Parrot, red tail and square cage, 3½ years old, thoroughly acclimatised, talks, whistles, mimics, sell lot for £5; exchanges considered: 346, Oldham-rd., Newton Heath, Manchester. (767)

Miscellaneous.

SECRETS
of Famous Canary Breeders
YOURS for only 1/- down

Judging the position of a bird by the clock.

HOW well-known Canary Fanciers bred their prize-winning birds—birds literally worth their weight in gold—how they trained them—the foods used. All this priceless information and much more is clearly given by the Breeders themselves in this splendid Canary Book. Every page—every line—is full of the *practical experience* of practical men—experts in their line. Fanciers who have specialised in Lizards give valuable information. Breeders of famous prize-winning crested varieties contribute to its 380 pages. Every feature of Canary Breeding and Exhibiting is clearly and fully dealt with—you have only to glance at the comprehensive index to turn up the information you desire.

The book contains 133 illustrations, a few of which are here reproduced. Thus, "Our Canaries" not only *tells* you but *shows* you. If you are a novice, or breed only for pleasure, you will be delighted with the increased enjoyment which the book will enable you to derive from your hobby. If you are an "old hand," or breed for profit, it will help you to *increase* profits.

"Our Canaries" will be sent you for Free Examination—Approval for a deposit of only 1/-. If, after examination, you return the book, your deposit will at once be refunded. If, however, you decide to keep the book, you can pay the balance by easy monthly instalments. Thus you have everything to gain and nothing to lose by sending for a copy. Do so TO-DAY

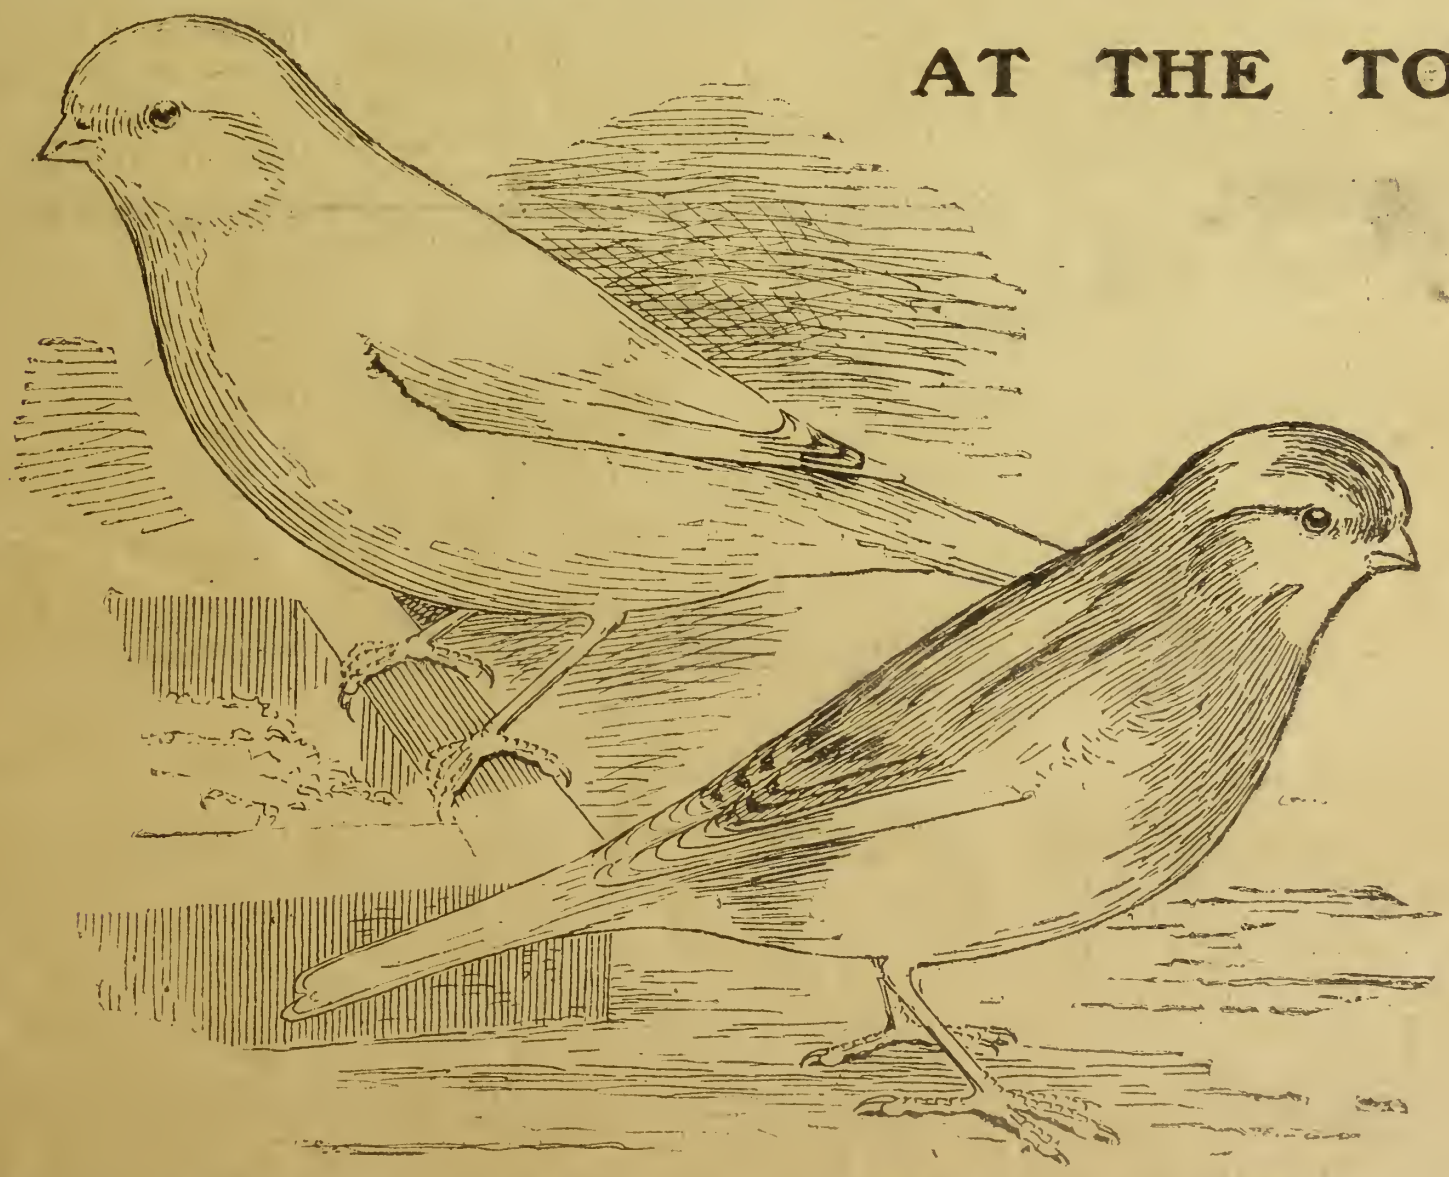
AT THE TOP.



PRIZE WINNING NORWICH CANARIES AT BIRMINGHAM.

Here are the portraits of two of the fine team of Norwich Canaries which have been exhibited so successfully during the season by Messrs, Stubbs Bros., Cheltenham. Each won 1st in its class at Birmingham Show; the clear bird being the winner in the Clear Buff Cock Class, while the heavily variegated won in a fine class of unflighted. Both are winners of many other prizes.

F. CARL, Publisher, 154, Fleet Street, London, E.C.

Advertisement Charges.

One Halfpenny for each word up to 48, 1d. per word afterwards. Name and address to be reckoned. Minimum, 12 words 6d.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even it sent in different names, are reckoned together, and are charged at two words a penny up to 48 words; after that 1d. per word. No single advertisement, even if accompanied by others, will be charged at less than the minimum price, viz., Sixpence.

Headlines or Footlines, 9d. 1/-, 1/6, 2/-, 2/6, according to size.

The rate for displayed advertisements is 7/6 per inch. Rates for a series on application.

ADVERTISEMENTS UNACCOMPANIED BY CORRECT REMITTANCE WILL NOT BE INSERTED.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL.

The Proprietor reserves the right to refuse any advertisement, or to cancel any advertisement ordered for a series, at any time, without assigning any reason for so doing.

Advertisements must in all cases bear the bonafide name and address of the advertiser, and no advertisement will be inserted if addressed to a receiving office, or similar place of call.

Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

ALWAYS USE "CAGE BIRDS" DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor of the *bona-ides* of either buyers or sellers in all transactions the adoption of our Deposit System should be insisted upon

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from both parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has not been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty-eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit will be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion. The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10. DISPUTES.—In case of a dispute, the decision of the Editor is final.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient plus the extra postage incurred has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

NOTICE TO BIRD PURCHASERS.

It is advisable that all newly-purchased birds, especially foreign birds, be kept isolated from established stock for a week or ten days, until by their condition they establish the fact that they are thoroughly healthy.

MEDICINES.

"AILING Cage Birds and How to Cure Them," "Nutshell No. 6," an account of the troubles which beset captive birds, with the treatment and list of medicines to restore our pets to health. This will save you much discouragement and money, and costs only 2½d. post free. From "Cage Birds," 154, Fleet-st., London, E.C. Or 2d. from agents (1st frequently published).

BRONCHITIS AND WHEEZING.

We have the grandest medicine ever introduced for chest and lung affections in cage birds. Ditchfield's Special Lung Tonic is a guaranteed cure for Colds, Bronchitis, Wheezing, Hoarseness, and Inflammation of the Lungs. A pleasant, safe remedy that can be fully relied upon. Ditchfield's Tonic Drops, for Soft Moult, Not Singing, Going Light, Feather Plucking, and Inflammation of the Bowels; a wonderful Tonic for birds that are stuck in the moult or gone off song. Ditchfield's Famous Revivo, for Constitutional Weakness and Debility; this medicine is unequalled for giving new life and vigour to the birds, and for producing that smart, tight appearance of the plumage so much desired by all fanciers. All the above remedies are sold in 8d., 1/2, and 2/2 bottles; two 8d. bottles for 1/2, two 1/2 bottles for 1/11, or three for 2/8. P.S.—The 1/2 bottle are treble the 8d. size. All orders sent per return, post free, from—

KNOWLEDGE IS POWER.

You can get it in 6d. Vols.

READERS of "Cage Birds" can to-day secure at pre-war prices volumes of the well-known **"Everybody's" Series.** Each volume is, on its particular subject, the handiest and best book obtainable. Although small enough to fit one's pocket, each book is packed with a vast amount of valuable information. Consider the wonderful price—only **6d.** each (8d. post free), strongly bound in cloth; in attractive leather binding, **1s.** each (1/2d. post free). The number of these books is very limited, and owing to the enormous increase in the cost of printing and paper, it will be impossible to reprint them at present prices. There are sure to be some of these books that YOU need—some that will give you just the information you have been seeking on some knotty point. Send in your order **NOW.** It is only necessary to state the *Number* of each book as given opposite the name in the list shown here.

1. Everybody's Guide to Poultry-keeping.
2. Everybody's Guide to Carpentry and the Doing-up of the House.

FILL IN THIS COUPON AND POST TO-DAY

Messrs. BRINDLEY & HOWE, LTD.,
29, Fetter Lane, London, E.C.

Sirs,

Please send me the following "Everybody's Books"

No's..... for which I enclose P.O. value .....

Name.....

Address .....

[illegible] cock Skylark, feeds from hand, 8/-; beautiful amber-beaked cock Blackbird, chanting [illegible] full song, 3/-; all on approval: Mrs. Bartholomew, Dunstable.

SOFTBILLS: the smaller species; full information upon their proper feeding and management in captivity, is given by H. J. Fulljames in "Nutshell No. 25," which also deals with hand-rearing, and describes the collection of ants' eggs, 2½d. post free, from: CAGE BIRDS, 154, Fleet-st., London, E.C. (2d. from agents; see list on another page.)

SALE or exchange; cocks, Chaffinch, Linnet, Lark, 2/- each; hand-reared Blackbird and cage, in song; Magpie, hand-reared, commencing talking; Fox Terrier dog puppy and Black Pom. dog: Stanley Roper, Prospect-pl., Keighley. (776)

SPECIAL select singing cock Skylark, real contest bird, too loud for indoors; contests were won by my Skylarks last week all parts of the country; try one on approval; 1/6 each; secret of feeding free: George Holt, Dunstable. (778)

SKYLARKS, Skylarks, healthy specimens, in song, for shows and contest-singing. Learn how to obtain them and keep them. "Nutshell No. 3" tells you. 2½d. post free from CAGE BIRDS, 154, Fleet-st., London, E.C. 2d. from agents (list frequently published)

ON receipt of 1s. 6d. will send securely packed the loudest singing cock Skylark ever heard, measuring 14ins. from tip to tip; also my method of feeding, which keeps them in full song nine months out of twelve; free: Gale, 118, West-st., Dunstable. (678)

SOFTBILL keepers, take expert advice before proceeding to buy and keep the larger species of Insectivorous birds. You will then have no trouble in keeping your pets in the best of health. This advice is offered in "Nutshell No. 26," by H. J. Fulljames. It is a wonderful little work, dealing with most varieties in a highly interesting and instructive manner. Foods and their preparation, and the various styles of cages also receive full attention. Can you breed Mealworms? This booklet tells you how. Post free, 2½d. from CAGE BIRDS, 154, Fleet-st., London, E.C. Look at our list of agents; call on the nearest and get it for 2d.

Miscellaneous.

WANTED TO PURCHASE!

YORKSHIRE AND NORWICH CANARIES

FOR EXPORTATION ONLY
FOR PROMPT CASH PAYMENTS.

In Quantities of 5 Pairs to 1,000 Pairs.

To save time, I beg most respectfully to state that my limit for the remainder of the season

is 12/6 pair.

It is absolutely essential that pairs should be sent. Cheque is sent the day following arrival, for every bird has to be examined and reported on by a well-known Canary Judge and Breeder. Don't send hens for cocks, that is now useless.

JOHN HAMLYN, 221, St. George's Street, LONDON, E.

WANTED, COCK NIGHTINGALE guaranteed a really good songster, with pure wild notes, and in good health and condition, not more than two years old.
HUBERT ASTLEY, Esq., BRINSOP COURT, HEREFORD.
(Credenhill Station, M.R.).

THE STOCK BOOK

Simplifies the operations in the Bird-room and makes it possible for everyone, even the veriest novice, to breed his birds as they should be bred. It affords facilities for the recording of the complete pedigree of all your birds; of your experiences during the season; an account of every bird reared. Contains also Pedigree, Breeding, Young Bird and Show Registers of simple and unique character; Cash and Profit and Loss Accounts for the year. Gives valuable hints for times of emergency during the breeding season.

Price 6d., from your Newsagent, or 7d. (postal order), post free, from "CAGE BIRDS," 154, Fleet Street, London, E.C.

Still They are Arriving by Every Post!

in large quantities—**Testimonials, I mean.** Thousands can be seen at my office by anyone asking for production.

WHY? Simply because I possess what I advertise, and advertise not myself, but what I have for disposal.

Get the Right Sort at the Right Price from the Right Place on Approval and they will Pay You Well.

If you want pairs, leave it to me, for it is no trouble to me to produce documentary proof that the foundation of many past and present exhibition studs have been laid by birds purchased from me. Great value for money is my forte. I herewith give a few prices of exceptionally good

Norwich Plainheads & Yorkshires.

You may have all the so-called strains and bogus pedigrees in the world, but you cannot purchase better blood than I now hold, and I am certain you cannot procure the same value. Cocks, **15/-, 20/-, 30/-, 40/-, 50/-.** Hens, **15/-, 20/-, 30/-.** Pairs, **25/-, 30/-, 40/-, 60/-**; cages, **4d.** and **6d.** These prices are for show birds and stock birds to breed winners. **Useful Pairs, that will pay you to breed from, 21/-. cage 6d.** For others at lower prices, of above varieties, see my list. For Belgians, Cinnamons, Lizards, Scotch Fancies, Borders, Rollers, Mules, etc., also list for 1917. Inspection by appointment. Not a shopkeeper, hence the appointment.—**RUDD, SPECIALIST, NORWICH.**

(782)

Champion YORKSHIRES & NORWICH

NOW IS THE TIME TO PROCURE YOUR BREEDING STOCK, to ensure getting **the best birds,** and to get them settled in their new home before pairing up. I have an enormous stock of all varieties on hand, and, having almost finished my export trade for this season, I can now concentrate my attention to the requirements of the home trade. My long experience as a breeder and exhibitor, and the large stock of birds I have to select from place me in a position to send you just such a bird or birds as you require. As regards the quality of my stock, it is surely sufficient to refer you to the reports of all the leading shows, from which you will find that both my **Yorkshires** and **Norwich** are not only maintaining but adding to, their great reputation. In addition to this, I have sold several birds that have won leading honours at all the principal shows. Kindly write, stating wants. I am now offering a limited number of grand stock and exhibition birds, either Yorkshires or Norwich, which I can guarantee as bred from my own **Bulldog Strain,** at **20/-, 25/-, 30/-, 40/-, 50/-** each, cocks or hens. Also a few grand matched pairs at **40/-, 45/-, 50/-, 60/-**per pair upwards. These are splendid value, and have only to be seen to be appreciated

I have also a grand selection of stock birds from other well-known strains, as follows:—
YORKSHIRE COCKS, grand lengthy birds, in full song, **15/-, 17/6, 20/-, 25/-, 30/-** each, upwards.
YORKSHIRE HENS, smart, racy, typical hens, **7/6, 10/-, 12/6, 15/-, 20/-** each, upwards.
MATCHED PAIRS, 20/-, 25/-, 30/-, 40/-, 50/-, 60/- per pair upwards.
NORWICH PLAINHEADS. Grand, thickset, cobby birds at same prices as Yorkshires.
BORDER FANCIES, Real good birds, both for stock and exhibition. **Cocks, 12/6, 15/, 20/-, 25/-, 30/-** each. **Hens, 6/-, 7/6, 8/6, 10/-** each. **Matched Pairs, 17/6, 20/-, 25/-, 30/-, 40/-** per pair.
CRESTS AND CREST-BREDS.—A few real good pairs at **30/-, 40/-, 50/-, 60/-** per pair. Odd birds, Cocks or Hens, at proportionate prices.

ROLLERS! ROLLERS! ROLLERS!

I have a magnificent collection of pure British Rollers from the best and purest strains, at following prices:—
HIGHLY TRAINED COCKS, 20/-, 25/-, 30/-, 40/- each.
PURE-BRED HENS, 6/-, 7/6, 8/6, 10/- each.
MATCHED PAIRS, 25/-, 30/-, 35/-, 40/-, 50/- per pair.
Travelling Cages, **4d.** extra in all cases.

One word more—**Please remember, I invite you** to come at any time and make your own selection, but if you cannot come, **Don't Forget** that I send every bird on 7 days' approval, at my sole risk. I personally select every bird that is sent away. I have over 4,000 (four thousand) birds in my rooms at the present time to select from, and I guarantee to give absolute satisfaction to every customer or return cash in full. Terms: Cash or deposit with Editor.

JOE THOMAS,

Breeder, Exhibitor & Exporter, AMBLER THORN, HALIFAX, YORKS

Established over 35 years at same address.

THE SORT YOU WANT!

W. N. TURNER

BREEDER OF CHAMPION NORWICH OF 20 YEARS' STANDING

I have bred and supplied birds which have won this season, and still have a grand stock to select from, related to my winners. See show reports Liverpool, Manchester, Sheffield, Barrow, Leicester, Halifax, Huddersfield, Ardwick, etc., etc. This strain heralds itself. Inspection invited. Approval; stamp reply: 3a, Percival-st., Hightown, Manchester.

J. C. BARNES

Well known strain; 25 years' study. One of the finest private collections of Norwich in England; type, quality, colour, and substance combined; to those who can visit me do so and see for yourself; 200 birds to select from, all judiciously bred; grand pairs, 30/- up; odd cocks, 20/- upwards; special pairs, £3 to £5; guaranteed correctly matched and robust; state requirements, stamp; approval; satisfaction ensured; all fanciers welcome and cordially invited: 113, Northfield-rd., Walkley, Sheffield.

12/- Per Pair 12/-

Will give 12/- per pair for good surplus stocks of YORKSHIRES, NORWICH or ROLLERS.

12/6 to 15/- per pair for CRESTS, and will deposit cash with Editor.

I am also open to consider offers of good class birds at higher prices.

I also require **BORDERS, MULES,** etc. **Will pay top prices and deposit cash.**

AIDS TO SUCCESS.

Our Books and a Common-sense Application of the Advice therein MUST bring you Profit as well as Pleasure

All the experience of years of careful study by experts is at the disposal of readers.

YORKSHIRE CANARIES, 2/2.—By H. W. Battye (Past President of the Yorkshire Union). Absolutely the very best Handbook dealing with the Yorkshire and its sub-varieties. Contains complete instructions upon Pairing, Breeding, Moulting, and successful Exhibiting, also how to treat in both health and disease.

NORWICH CANARIES, 1/1.—By C. A. House. Tells the fancier all that he needs to know to enable him to become successful as a breeder and exhibitor of the Norwich Plainhead. The chapters on **"Forming a Stud,"** and **"How to Produce the Ideal"** are worth the cost of the whole book.

THE SECRETS OF HYBRID BREEDING REVEALED AND EXPLAINED.—By many notable Mule and Hybrid Breeders. Among the contributors are such well-known breeders as Messrs. R. Culton, W. H. Vale, C. Houlton, C. J. Ward, J. Beswick, G. Lander, T. H. Kinch, T. Smith, etc. This Handbook, which contains 212 pages, 7 inches by 5, is brimful of the most practical information on the highly interesting subject of Hybrid Breeding. Price 1/-, post free 1/2.

AVIARIES, BIRD-ROOMS, AND CAGES, 2/3 (cloth gilt).—By H. Norman. Contains ten lovely full-page photographic plates. A practical guide which deals thoroughly with the proper Building, Fitting, and Management of Aviaries and Bird-rooms, and the making of Cages.

SEEDS, FOODS, AND WILD PLANTS FOR CAGE BIRDS, 1/2. — By various leading authors. Full information on the seeds suitable for all cage birds, their food values, uses, etc., with descriptions and illustrations of the wild plants indispensable to the successful keeping of British and other birds.

BRITISH BIRD MANUAL, 2/3 (cloth bound).—By H. Norman; or may be had in two parts. Part 1: "Hardbills," and Part 2. "Softbills." Either Part, price 1/1, post free. Each part contains a beautiful and life-like coloured plate and numerous illustrations of birds and cages. Up-to-date information on the keeping of British Birds.

THE STOCK BOOK, 7d.—Of our invaluable "Breeding Room Register" a well-known fancier has said:—"It makes bird-breeding easy." No breeder of birds can possibly afford to be without it. It simplifies the operations in the bird-room and makes it possible for everyone, even the veriest novice, to breed his birds as they should be bred. Contains both Pedigree, Breeding, Young Bird, and Show Registers of simple and unique character, in addition to useful account pages.

HOUSE'S CANARY MANUAL, 1/2.—By C. A. House. A thorough, practical guide to the general management and breeding of Canaries, dealing fully with the breeding, etc., of every member of the Canary family, including the Roller (or Singing) Canary. An illustration of each bird, by the master Canary artist, Mr. H. Norman; exhaustive chapters on aviaries and cages, breeding procedure, moulting, exhibiting, diseases, and seeds a compendium of knowledge.

FOREIGN BIRDS FOR BEGINNERS, 1/1½.—By W. T. Page, F.Z.S., etc., Foreign Bird Expert to "Cage Birds." A highly instructive Manual. It contains a magnificent coloured plate and a number of black and white illustrations. Indispensable to all keepers of Foreign Birds.

FANCIERS' PRINTING.—Fanciers requiring business notepaper, postcards, trade envelopes, etc., should write us for a quotation. We are now in a position to supply these at specially low rates combined with first-class work. Artistic memos., with block of any desired bird, and fancier's name, address, and words of description as desired, 250 5/-, 500 7/6, carriage paid.

CANARY BREEDING FOR BEGINNERS, 7d.—By Claude St. John. A Practical, up-to-date guide to Canary breeding, designed specially for the use of the beginner. Deals very fully with the choice, sexing, and mating of the birds, feeding for condition, the cages and their fittings, the bird-room, egg-food, nest-building, rearing and moulting the young, colour-feeding, training for show, and all the difficulties likely to confront the breeder.

CAGE-BIRD HYBRIDS.—Complete bound in cloth, 7/6 carriage paid. This great work is written by Charles Houlton, an authority with a reputation extending over 25 years as a leading exhibitor and a leading expert and judge. Magnificently illustrated by that great bird artist, H. Norman. There are no less than sixteen coloured and sixteen art plates in this work. Each plate is a perfect study of an individual Hybrid.

JUST Out! Nutshell No. 27, "The Care of the Cat." A highly interesting and instructive little booklet, dealing fully with the Housing, Breeding, Mating, Rearing, Feeding, Exhibiting, Management, Diseases, Varieties, etc., etc. Price 2d., from our Nutshell agents, or 2½d., post free, from CAGE BIRDS, 154, Fleet Street, London, E.C.

CAVY-Keepers Note! Nutshell 23, "Profitable Pet Cavies (or Guinea Pigs)," is now ready. Deals fully with the Housing, Breeding, Mating, Rearing, Feeding, Exhibiting, Management, Diseases, Varieties, etc., etc. Price 2d., from any of our Nutshell agents, or 2½d., post free, from CAGE BIRDS, 154, Fleet Street, London, E.C.

Twitterings.

Mr. F. Harrison writes that all prize money has been paid out to exhibitors at Clay Cross Show, and thanks all who have sent entries.

Although our recent show resulted in a loss, writes Mr. H. Walker, Hon. Sec. Leeds F. and F.S., we have handed a cheque for 10s. to the Red Cross Fund.

Mr. J. Webber, hon. sec. Abertillery C.B.S., writes that he omitted to report in last week's club report that Mr. H. H. Mortimer is giving four 2s. 6d. specials for the coming pair show.

Mr. J. W. Norris, hon. sec. British Roller C.C., writes that further specials have come in for the contest of Feb. 9, and these will be printed in the catalogue. Mr. Norris will be pleased to send another schedule to any exhibitor whose schedule has gone astray.

Kindly thank all exhibitors at our show on Jan. 20, writes Mr. C. Cunnah, sec. Sutton-in-Ashfield and Hathwaite C.B.S. All exhibits were packed and sent away before 3 o'clock on Saturday night, and I hope they all arrived home safe. I have two drinkers which were left behind; if the owner will send his name and address I will forward them.

Wanted to know that fanciers can see the art of pairing to produce winning results by visiting the great Pair and British Show of the City and Suburban A.C.B. on Wednesday next, Jan. 31st, at the Church Institute, 60, Paddington Street, Baker Street, W.—(Advt.)

The Cinnamon Marked Y.C.C. Competitions have resulted as follows, writes Mr. R. Garnett: Open: 1 Craig, 229 pts.; 2 Morrison, 178; 3 Dykes, 170; 4 Towers, 161; 5 Brown, 49. Amateur: 1 Midgley, 84 pts.; 2 Sutcliff, 72; 3 Ratcliff, 28. Novice: 1 Pownall Bros., 112 points; 2 Hodgson, jun., 99; 3 Chapman, 63; 4 Woad, 38; 5 H. Hamlyn, 25. Any member disputing these points must write secretary at once.

We hear from Mr. A. J. Watcham that in view of the unsettled times it has been decided not to hold the annual show of the London C.B.A. This of course refers to the amalgamated show of the three societies, the L.C.B.A., the National and British Mule Club, and the Foreign Bird Club. A pair show will be held by the London C.B.A., Feb. 1, at 7.30, at headquarters, 2, York Street, Piccadilly. There will be 14 classes; Mr. J. Robson judge.

Ramsden's Pure Peppers.—Thirty cases of new season's Pepper have arrived. My business had been classed as non-essential, and facilities for shipping and labour refused. Every effort will be made to secure further shipments, but the difficulties are very great. Fanciers intending to colour feed this season should purchase at once, as they may not be able to secure supplies later on. Orders will be executed in rotation while the stock lasts. Prices as last year; no advance—½lb. 1s. 6d.; 1lb. 2s. 6d.; 3lb. 6s. 6d.; 5lb. 10s.; 22lb. 37s. 6d.; carriage paid.—J. W. Ramsden, 11, Josephine Avenue, Brixton, London, S.W.—(Advt.)

OBITUARY.

E. W. GABBITASS (Mansfield).

Sad death of a young fancier.

I am sorry to inform you, writes J. Miller, chairman Mansfield C.B.S., of the sad loss our Hon. Sec., Mr. Bernard Gabbitass, has sustained through a fatal accident to his only son, Ernest W. Gabbitass, who was killed by a runaway tub of coal at the Mansfield Colliery on Jan. 10, while following his employment as a pony driver in the pit. Although only 14 years of age, he has been a member of our Society for over two years, and was a great help to his father during show business. As a society we shall miss him very much, and I am sure that all our members will join in sympathy with Mr. and Mrs. Gabbitass in their sad bereavement.

Mr. A. E. JAMRACH (London).

We regret to have to announce the death, on Jan. 1, of Mr. Albert E. Jamrach, the famous London naturalist. The name Jamrach is of course known all over the world. The business in wild beasts and foreign birds carried on by the deceased gentleman and his father, Charles Jamrach, before him has been established in St. George's Street (Ratcliffe Highway) for very many years. Apart from his dealings in beasts, birds, and reptiles, Albert Jamrach was an enthusiastic collector of foreign curios, and the premises at the back of his live stock shop formed a veritable museum. He succeeded his late father in the business in 1891, and all who had dealings with him felt that they were dealing with a gentleman in the true sense of the word. He spoke several languages fluently, and in the course of his business had become possessed of a wonderful accumulation of information. A conversation with him about the unique subjects in the collection in which he took such a pride was an education in itself. Many indeed will feel the loss of the deceased naturalist. He was laid to rest at Hampstead on Jan. 5, at the age of seventy-one.

Judging at Llanelly Show.

My absence from judging at Llanelly show, writes Mr. A. Hirst, was by the desire of the Committee and not through any fault of mine.

An Address Wanted.

Will Mr. C. H. Bamford, Bristol, or similar name, who had birds from me a fortnight ago communicate with me, writes Mr. G. Cotton, Market Place, Northallerton. Address mislaid.

Corrections in Show Reports.

In the report of Llanelly show, 2 and 4 in the novice cock class should be G. O. Thomas, not Griffiths and Thomas as printed. Mr. J. Jones writes that he got vhc with 25 points in the young bird novice class in the Bacup Roller contest. D. H. Davies won the members' Norwich cup at Llanelly, not the novice cup as reported. In the report of the Northern Crest Club show, he Dobson should read he Robson. In the report of the Birmingham R.C.C. contest the 1st prize in the champion any age class received 2 points for H.R., not 1 as stated. 2nd in novice cock and he in hen class at Pontypool should read Thomas, not Thomson.

I have taken over secretarial duties of the Stockton-on-Tees C.B.S., writes Mr. T. Carlisle, and all communications should be addressed to me at 37, Webster Street, Stockton-on-Tees.

Mr. Challenger, the late hon. sec. of the Porth and Rhondda Valleys C.B.S., has resigned, writes H. S. Legg, and I have taken on the position. All correspondence in future should be sent to me at 7, Primrose Terrace, Llwyneelyn, Porth, Glam.

We have received the balance sheet of the Plymouth Western Counties O.S. It is gratifying to note that the balance in hand has nearly doubled itself during the past season. £9 6s. 1d. was brought forward from 1915, and the amount carried forward to next season is £18 1s. 5d.

Will you kindly notify readers of CAGE BIRDS, writes Mr. A. E. Moule, that I have changed my address to business premises, 105, Alexander Road, Abertillery; also kindly allow me to thank the members of the Bristol East C.B.S. for their great kindness in coming forward to act as bearers in our recent bereavement.

As will be seen by an advertisement under show advertisements in to-day's issue, the Glasgow and Western Counties Club is holding its annual show to-day, Jan. 27, in the Good Templars' Hall, Ingram St,. Glasgow. Three popular judges will officiate, and the birds on exhibition will embrace all kinds of Canaries, as well as Hybrids, British and Foreign birds.

THE GREAT NEW PAPER "FOOD."

The following extract, taken from a letter on a subject concerning our own paper, CAGE BIRDS, is one of the many kindly references to the new weekly "FOOD," which was mentioned in our Open Letter to readers last week:—

"Whilst writing, I cannot pass without a word about the New Weekly Paper, "FOOD," which you have the honour of publishing. I have read the first issue with very great interest, and I must say that it is a few years late in coming, for such a paper issued in peace times could not have failed to attract attention. I am more than certain that in view of the vast interest that will and must be taken in allotments and backyard farming the success of the paper is assured, dealing as it does with every item in detail, and if kept it will make a most useful and interesting book of reference in the times to come. Allow me to congratulate you on the first issue of "FOOD." May its popularity increase, so that it may become a permanent institution

R. T. LONSDALE.

Garston.

A "Correction" Revised.

I notice in last week's CAGE BIRDS, writes Mr. H. Fry, Llandore and Plasmarl C.B.S., that Mr. Hopkins claims to have won 1st prize in the Var. Yell. Nor. instead of 3rd as reported. Mr. Hopkins did not exhibit in that class, and the awards should read: 1, Lipscombe; 2, Hedges; 3, Williams.

Our Annual for 1917

Is now in course of actual preparation, and there are still one or two special advertising positions left open. No matter how much rates may increase in the future, those who advertise in our Annual will be sure of a whole year's publicity at present low rates. ABSOLUTELY the final date for receiving advertisement matter is Jan. 31st, so send in your order NOW. **Note what an old advertiser says.** After explaining that he is not at present advertising the "Filup Feeder" because of difficulties in manufacture, Mr. C. H. Goodman says, "The results obtained have always been good, and I am afraid people during next season will still read my advertisements of past years. Your Annual appears to go all over the world."

In Aid of a Stricken Roller Fancier.

Too late for acknowledgment last week we received a further contribution of 4s. 6d. in aid of the fund to provide a self-propelling chair for Mr. T. Simpson, and Mr. H. Roebuck writes that he has received 2s. 6d. from Mr. R. F. Brown. The total amount subscribed is, therefore, £13 6s. 3d., and as this is quite as much as is needed we close the list with thanks to those who have so kindly subscribed in response to the appeal of Mr. H. Roebuck and ourselves. In his letter announcing the receipt of the 2s. 6d. referred to, and acknowledging our cheque for the amount sent to us, Mr. Roebuck says: "I can assure all Roller Canary fanciers and the others who have so generously subscribed, that they have helped to make more bearable the monotonous life of Mr. Simpson."

Singing Contests.

Announcements of forthcoming contests to the nature of advertisements must be paid for at advertisement rates, two words a penny.

LEEDS.

Linnet singing contest for quality, Clarence Hotel, Skinner Lane, Jan. 21; 19 birds sang: 1, Wigfield; 2, 3, shared, Wigfield, A. Summers, and Binns. Judges, A. Butler and W. Lipman.—T. C. Summers, Hon. Sec.

Open contest for Linnet singing, Classmakers' Arms, Greyhound Place, York Road; 26 birds:—1, ,, Marshall; 2, Benson; 4, Buckley. Canaries: 1, 2, Lockwood and Shaw, divided; 3, Lockwood.—T. Marshall, Hon. Sec.

West Leeds L. and C.A. Linnet singing contest, Prince of Wales Hotel, Wadworth Street, Jan. 20. 1, Jarrow; 2, J. Long; 3, T. Dobson; 4, Chadwick. 20 birds. Canary singing contest at Viaduct Inn, Kirkstall Road, Jan. 21. 1, J. Wood; 2, Nichols, 3, 4, Thompson. 14 birds.

Linnet and Canary contests, Jan. 28. Linnet at Viaduct Inn, Canary at Prince of Wales Hotel (members only).—Sec, T. Cawood.—(Advt.)

PONTEFRACT.

Linnet contest, Woodman Inn, Horsefair, opening, Jan. 21, 46 birds entered for four prizes. 1, 4, Williams; 2, Scott; 3, Scotson.—S. Pugh, Sec.

SHEFFIELD.

Linnet contest, Sportsman Hotel, Paternoster Row, Jan. 21, some very good singing was done considering the severe weather, 20 birds sang: 1, 3, 4, Parlett; 2, Wainwright.—E. Phillipson, Sec.

Birthday Greetings.

From a very large number of expressions of good wishes and congratulations on having passed our fifteenth Birthday Anniversary we select the following for publication, and beg that all our kind friends will accept our grateful thanks:—

Heartiest felicitations upon your Natal Day, and I sincerely hope peace may reign in the land ere you celebrate your next birthday.

Meanwhile, you are to be heartily congratulated upon keeping the old flag flying in view of the almost insuperable difficulties which I know beset your profession at the present time. Again best wishes.

JOHN B. WATERMAN,
Vice-President Dulwich and Peckham C.B.S.

A FINAL HINT.

To Cage Bird Judges.

CAGE BIRDS ANNUAL for 1917 is already in the hands of the printers, and those judges who do not send in their names for insertion in our Directory of Cage Bird Judges may find that they have not been included. Many of the entries in the old list are out of date because of removals, deaths, retirements, etc., and the list in the 1917 ANNUAL will be revised according to the information received from the judges themselves. No charge whatever is made for the insertion, and the information should be sent in the following form:

Smith, E. V., 125, Long Street, Southampton, A.V. (if all kinds), or. Spl. —— (if certain varieties are specialised in).

No other information need be given in the communication, and the cards must reach us not later than Jan. 31.

Strange Freaks of the London Disaster.

Among the many extraordinary vagaries of the recent disastrous explosion were the curious escapes of some caged birds from the prevailing destruction. A Canary in its cage was being carried by one of the homeless people who were seeking shelter, while another had an Amazon Parrot, and amid the ruins of one house which had been demolished, the occupants being killed, two birds were still hopping about in a cage which remained hanging on a broken wall.

A FANCIER'S TERRIBLE EXPERIENCE.

BURIED FOR FIVE HOURS.

My brother William, writes Mr. Thos. Thwaites, Leeds, had to join the colours last July and landed in France in November. On December 22, he, along with seven of his comrades, got buried by a shell exploding near their trench. After five hours they were dug out and four of them were dead, and my brother and the other more fortunate three are now in hospital recovering from their terrible experience. Before joining up, he closed down his business, and another brother, who is a railway worker and therefore exempt, is doing his best to keep everybody supplied with his famous Nest Linings, till he returns to civil life. I myself will no doubt have to close down also, and get into khaki in a few weeks' time, so it is useless for me to repeat my Breeder's Card at present. However, should I be fortunate enough to return all right, I shall most certainly resume my hobby as a breeder of High Class Rollers, and I shall not forget to duly advertise same in CAGE BIRDS and its Annual.

BIRDS IN WINTER.

IN AND AROUND TORONTO, CANADA.

The following extract from the "Toronto Star Weekly" has kindly been forwarded by a Canadian reader, Mr. Wallace C. Jones. Many of the birds mentioned are familiar here, as well as in Canada, and we have pleasure in reproducing the interesting article for the benefit of our readers.

MUCH is said and written about the birds that come in the spring, but what of the winter birds, our little feathered neighbours who stay with us the year round? What do they feed upon, where do they protect themselves from the storms of winter, what are their habits, and just which birds are hardy enough to brave the rigorous Canadian climate?

The Cosmopolitan House Sparrow.

Most birds are so obtrusive during the winter that the casual observer hardly knows that they are present. Of course there are the English Sparrows, which are an exception. They are noisy, bold little fellows, and come so close to our houses and depend so upon civilization for their food, that they have come to be almost domesticated.

It is a much discussed question whether these little birds are to be looked upon kindly or not. They have multiplied to such an extent since being introduced to this country from England that in some localities they have become a pest, consuming grain and tree buds so extensively as to be almost classed as parasites. On the other hand, the amount of insects and worms injurious to trees that they consume in the spring almost justifies their destructive habits.

Another small bird very much in evidence during the winter is the Snow-Bunting. Not the little bird commonly called Snowbird, for he, paradoxically, is not a bird of winter at all, leaving for the South at the first sign of snow.

Justifies its Name.

The Snow Bunting is the one genuine snow bird. He seems to really delight in the snow. Many of the birds that stay all winter just seem to worry along in spring, getting barely enough food to keep themselves alive, but the Bunting remains cheerful through the coldest weather.

His coat is a greyish brown, and the breast a beautiful white, so that he really seems to fit into the winter landscape. He breeds as far north as Lapland, and comes here to a warm (?) climate for his winters.

The Chick-a-Dees and Nuthatches are two other of our truly winter birds. The Nuthatch, so called from its habit of cracking and extracting nuts from the shell for food, is of a warm buff and brown colour, and is very numerous in just this locality. The Chick-a-Dee, that cheery little bird, needs no description. His sprightly motions, and call of "Chick-a-Dee" makes him easily recognised.

The other morning while walking in the deserted garden I was startled by a huge flock of these little birds rising suddenly almost from my feet. Wondering what had drawn such a crowd, I examined the spot, and found that the feathers of a chicken had been stripped and left there, and these little birds were probably taking advantage of the find to make cozy their winter quarters. No doubt they felt like a person coming unexpectedly into a fortune—their whole winter furnishing all in one spot.

But most interesting to me of all the winter birds is the Woodpecker—the Red-headed Woodpecker, though to be correct it is only the male which has the red tuft on the head.

Fresh Quarters Every Year.

There are many different kinds of Woodpeckers, but the one which winters here in Canada is the Downy Woodpecker, and a very interesting neighbour he is.

He is such a very busy little fellow that he drills himself a new house each year in a stump or hollow tree. But he only occupies this the one season.

The next year he drills another, the discarded holes being occupied by the female Woodpeckers—that is if Mr. Downy will allow his abandoned wife to occupy it, for, I am sorry to say, that there is very little chivalry among the birds except during the mating season, and a Woodpecker will fight and keep the female out of the discarded hole, even though he does not want to occupy it himself.

An incident is told of a Woodpecker who had tried in vain to keep the female from wintering in his last year's house, but in spite of all his efforts she managed to establish herself in the retreat.

But Downy was not to be outwitted. Unable to keep the intruder out, he decided to make it so uncomfortable for her that she would leave voluntarily. So he set to work and bored a large hole in the bottom of the retreat, thus making such a draught that Mrs. Woodpecker had to leave. This incident seems almost too human to be true.

All the birds appear to live a solitary life in the winter, there being no pairing off except in the mating season. The Woodpeckers, as well as the Chick-a-Dees, find plenty of food during the winter months. They eat the insect larvæ and eggs from the trees. The Woodpeckers towards spring tap the maple trees, and drink the sap. When they can get this they eat very little else.

A Natural Provision Against Winter.

In the fall birds of all kinds become very fat. Mice and squirrels lay by a supply of food in their retreats, but the birds carry the equivalent in their systems in the form of fatty tissue. It serves as a protection against the cold, and also in severe seasons when food is scarce, it supplies the demands of the system for sustenance.

Crows have been found covered with a layer of fat a quarter of an inch thick, and have been known to go two weeks without one morsel of food.

Of course the smaller birds I have spoken of have not such an abundance of fat. The little creatures really become very hard pressed for food during some of the severe months, and no doubt many of them die off. At any rate by spring many of their little bodies have become so light that to hold one of them in the hand seems hardly more than holding a bunch of feathers.

The birds mentioned above are the ones that we are the most familiar with—the ones that come close to our habitations and seem to be more friendly with, and to a certain extent dependent upon man.

But there remain those larger birds, the natives of the far North. They breed in the North, and come to us for the winters. Others breed right here in our vicinity. The huge pine trees found in the Don valley prove a favourite nesting place, and away in the tops of these waving pines I have seen many of their huge, rough-looking nests.

These large birds are enemies of the smaller birds, as they feed upon them, but the number of field mice that they consume is incredible, and they therefore are entitled to the protection of the farmer.

Cannibals Among Birds

A queer, eerie kind of bird is the Owl. It is a permanent resident of Canada. It seems more mysterious, I suppose, because most of its goings and comings are at night, and being rather inert, it does not attract the attention that the more active ones do.

It is a great enemy of the smaller birds, and is the real bogey of the Chick-a-Dee, Nuthatches, and Woodpeckers, as it can put its long talons down in the hollow tree and draw out its little victim.

I once found a deserted Owl's nest in an old hollow tree in the vicinity of High Park. In the bottom of the nest were all sorts of feathers and quills, from Jays, Bluebirds, Woodpeckers, and other small birds, very eloquently telling the tale of the probable end of some of these little songsters.

The Hawk, with which we are all familiar, stays throughout the year with us. He is not a very popular bird, I fear, as he is too fond of loitering near the chicken yard. But he, too, has his use; during the breeding season the amount of destructive field mice he requires for his food is tremendous.

Impales Its Victims.

One of the larger birds deserving of most dislike is the Shrike, often called the Butcher Bird. He is harmless-looking enough, and consequently the smaller birds do not fear him as they otherwise would. He comes down from the North in the winter, and lives almost entirely upon smaller birds. He often impales his victims upon thorns or twigs, thus acquiring the name Butcher Bird.

Rarer visitants here are the Grosbeaks and Eagles. The last named I have never had the good fortune to see in this vicinity, but they are known to nest in numbers along the rocky cliffs of Lake Ontario. Their nests are huge, sometimes six feet high by four in diameter. The same nests are used year after year, and each year added to, hence their enormous dimensions.

Many other large birds I have seen in this locality in the winter, with which I am not familiar. Winter seems to change the status of many wild creatures, and birds that would not venture near civilization at other times are forced to come beyond their usual haunts for food. At any rate we need not limit our study of the birds to the spring, for, though the greatest number are with us then, not one bit less interesting are our little winter visitors.

Correspondence.

The Disqualified Hawfinch at Bristol.

How Judges Differ.

SIR,—I am sorry to see that Mr. House has not replied to my letter re my Hawfinch at Bristol Show. This same bird has won 1st and special and special for the best British bird in the show at Northampton on Boxing Day under Mr. Robson, and after the cards were up I asked Mr. Robson to have a good look at it, and see if he could find any trace of trimming about his bib; he did so, and said decidedly no. I then told him it was the bird Mr. House threw out of competition a few weeks ago because he thought I had trimmed his bib. Mr. Robson said it was absolutely ridiculous. It is kind of Mr. House to give me the credit of performing such a delicate operation, so I thought I would try on a Siskin's bib. I did so, with the result that he was cardless at Llanelly, so I don't think I shall try again.

R. ANDREWS.

THE TINIEST BRITISH BIRD.

This charming specimen of the Golden-crested Wren, the smallest of all British birds, is the winner of 2nd Prize at Sheffield Show and many other prizes for its owner, Mr. P. Walsh, Sheffield.

"Mistakes in Judging."

A Different Complexion on the Matter.

SIR,—In reply to H. S. Walter in your issue of Jan. 6, I think that before he solicited your valuable opinion a better thing to have done if he had no clear conception of what really did happen, or doubted the version of his informant, would have been either to write to Mr. J. H. Roe, the judge, or lay the facts as explained to him by me before the general meeting of members of Bristol C.B.S., where he was present last Wednesday.

Instead of so doing, he has nursed his supposed grievance for two months, and then asked your opinion on a case distorted and perverted out of all recognition. To do that is hardly fair to himself, his fellow club members, or our journal, CAGE BIRDS, and only clouds the issue.

Further, the possibility of judging classes "ad lib" is, to say the least, absurd, and very far fetched, and nothing at all to do with his case, the bone of contention being that very old cause for dissension, "A members' cup." May the "Deil" take 'em, they do more harm to Societies and individuals than they ever do good.

Now, sir, I would like to state the whole circumstances of friend Walter's case, and how it happened.

At the annual show of Bristol C.B.S., held Nov. 4 last, Mr. J. H. Roe judged, and Mr. H. S. Walter won first prize in Yorkshire unflighted novice class, and was also awarded members' cup for the best unflighted bred by a member.

In the champion unflighted Yorks class, the first prize bird was number 5 in the class numbers, and as it was not shown by a member, it was not brought out for the cup.

I, and others, noticed that this latter bird did not deserve his position, and I trust his owner will pardon my saying that he was an inferior bird to the others in the lower cards, and others out of them, in my own opinion. I could only conclude that a very palpable mistake had been made, and the Secretary and myself inspected the judges' slip, which did not throw any light on the matter, as the slip was quite in conformity with the gum labels on the cages.

When the judge had finished his work, and was at liberty, and all the cards up, I asked Mr. Roe where this No. 5 bird surpassed the others, and why was it first prize. I do not think any exhibiting fancier will question my right as an exhibitor to put the judge those querics, even if the matter was in order, and the awards looking satisfactory.

After some discussion, Mr. Roe came to the same conclusion as I had, that the No. 5 bird did not deserve first prize, and thought there had been a mistake. He thereupon took his judging book from his pocket, and showed me and the Secretary, Mr. J. S. Withers, that No. 6 was first prize in his judging book, and was his proper and only award, but unfortunately he went up a line when extending the awards to the tearing out slip, and inadvertently placed first against No. 5 instead of against No. 6, as in his book, where No. 5 was cardless. Justice, if belated, was given the No. 6, and first prize was removed from the No. 5 bird, where it was first placed.

As the number six bird was shown by a member, and nominated for the cup, I pointed out to the Secretary and the Judge what a great injustice had been done the owner in excluding his bird being judged for the cup, through the judge's clerical error.

Now, Sir, there were two courses open to the Judge to take. He could have said regarding the class award and the cup, it is through my mistake, but I won't alter the position although wrong, or he could take the course he did, which, to my mind, was the only honourable one to pursue (and I have no two opinions about it), namely, to take the No. 6 bird, the rightful champion class winner, and the first prize novice class winner of Mr. H. S. Walters, and adjudicate between them for the cup. I do not even admit this as rejudging, as the No. 6 bird was not brought out when the cup was first awarded to Mr. Walter's bird. The result was, that he declared the No. 6 bird in champion unflighted cock class, his original first prize bird as per his book, to be the cup winner, the owner being Mr. G. Hiscox.

Now, if this is "opening a very wide gate," and that gate leads to a fair field and fair play for everybody competing, well, may it ever be kept open, and if the day comes when it is held to be wrong to adjust such an error as here occurred, especially as it was not too late to do so, as the judge had only just finished, and no visitors had come, and if the gate leading to the field of fair play has to be shut tight because of the possible mistrust and suspicion of fellow members, I shall be sending you, Mr. Editor, a nicely worded advertisement like this: "Declining the fancy; good stock for sale; cages, appliances, etc; stamp reply to

J. A. GREENSLADE.

The opinion given in our issue of Jan. 6 was based on the statements made in the letter as published. As stated in the letter above, the case assumes a different complexion, for it appears that all that was done was to correct a clerical error on the part of the judge, and not to re-judge the class. The correction of the error brought the winning bird into competition for a cup, and this cup it won, so that the alteration involved more than the simple shifting of a card from the cage of a bird which was not entitled to it and placing it on the card of the actual winner. Strictly speaking, we think it an irregular proceeding to alter the judge's slip when once it has passed out of his possession. The slip which is handed to the secretary, should be the actual record of the judging, not a copy from the judge's book, and the counterfoil which remains in the possession of the judge should be a copy of the slip. Then such a clerical error as has here occurred would not matter.

In the ordinary course of proceedings the judge's slips only remain in the possession of the secretary long enough to allow of the prize and award cards to be written; they are passed on as quickly as possible to the printer to be printed in the catalogue, and then no alteration is possible. We think, therefore, that such an alteration cannot properly be made in a case when the slips happen to remain in the hands of the secretary.

It may seem a hard and fast ruling, but it is good law that the end does not justify the means when the means are irregular. The judge should be responsible for his mistakes as for his decisions. However, in this case the judge chose to make the alteration, and his decision is final, right or wrong. The first prize and the cup must go to the bird to which they were finally awarded. After all, we take it that it is admitted that the best bird won in the end, so no harm has been done to anyone except that the two exhibitors who would have profited by the mistake if it had not been corrected do not get the prizes which would have accidentally fallen to their lot.—ED., CAGE BIRDS.

Correspondence continued on next page.

CORRESPONDENCE.

(Continued from page 41).

New Society for Skewen, Glam.

SIR. It might interest your readers in this district that a Cage Bird Society has been formed at Skewen, and that we would gladly welcome new members. Two very successful meetings have already been held, and the third meeting will be held on the first Monday in February. Any further information that intending members may want can be had from the Secs.,

T. PATTINSON AND L. DANIEL.
177, New Road, Skewen.

Roller Canary Club for Haslingden.

SIR.—At a meeting held, Jan. 9, at the Victoria Hotel, Haslingden, it was decided to form a Roller Club, to be known as the Haslingden and District Roller C.C. Eleven members were nominated and the following officials were elected:—President, W. F. Thacker; vice pres., A. Taylor; sec. and treas., H. Nuttall. The members of the club to form the committee. Emergency committee, the sec., pres., V. Coupe and J. Barnes. Meetings to be held at the Victoria Hotel on the first Tuesday in each month, at 7.30. Entrance fee 1s., and annual sub. 3s. It was resolved that we join the National Federation of Roller Clubs. A special meeting will be held Jan. 27, at the Victoria Hotel, Haslingden, at 2.30, when Mr. Lyons, of Blackburn, will describe the different tours of the Roller Canary. Any intending member will be welcomed.

H. NUTTALL.
37, Sultan-st., Accrington.

In Aid of a Stricken Roller Fancier.

Grateful Thanks from the Recipient.

SIR.—Please allow me to thank all those fanciers who have given their valuable support, including the secretaries of Roller Canary Societies and those outside the Roller fancy. I am sure it is very kind of all to respond so well to Mr. Roebuck's appeal on my behalf.

I thank you all most sincerely for your kind support in helping to raise the amount required to enable me to purchase the hand-propelling chair, and thus enable me to get out by myself without anyone having to push me. I used to have to wait weeks before I could get out, but now I shall be able to get out every day when it is fine, so you will all see what a great difference it will be to me. I can assure you I am gladly looking forward to spring coming round again, so that I can get out and enjoy the fresh air, and when I get into the country lanes I shall think of all those kind friends who have been the means of my getting out and enjoying myself. I thank you also, Mr. Editor, for your valuable help through the columns of your paper.

THOMAS SIMPSON.

The Judging at Whitehaven Show.

Why Are Cage-tabs Marked?

SIR.—Please permit us space to reply to Mr. Nicholson's letter. Cleator Moor Show was only brought into the discussion in an attempt to holster up a mistake, and has nothing to do with the grievance we first wrote about. We did not intend to say that all judges marked the tabs or tickets, but that where they were so marked our prizes have always corresponded. At fully two-thirds of the shows where we have exhibited this season the tabs have been marked. A well-known judge stated in conversation with us that he had always followed the system of marking the tabs or tickets, although it was not really necessary. Some of the leading judges follow the same system, the steward checking the numbers and marks. We don't know whether Mr Nicholson doubts our word when he says that in 40 years he has never had a tab or ticket so marked, but to confirm our statement we enclose the Whitehaven tabs, also the Glasgow tickets.

COOK & ADAMS.

Where the Steward Comes In.

SIR,—I myself have acted as steward on many occasions for some of the leading judges, and I have seen the system of marking the tabs, etc., carried out by a good few of them. Their method has been, as a rule, the following.—They first counted the birds to see if all of them were present, then put their book in their pocket and proceeded to select their birds, put them in the proper rotation, mark them, and then take the numbers down in their book. The steward then checks the numbers and marks. Any mistakes happening to be made the steward draws the judge's attention, and matters are righted there and then. I have had over 12 years' experience in breeding and exhibiting, so I think I am not altogether a greenhorn at the job.

T. COOK,
of Cook and Adams.

[It is certainly something fresh for us to learn that the steward helps to see that the judge does not make mistakes. There may, of course, be nothing wrong in such a proceeding, but we have always understood that the duties of a steward consisted only in removing the birds from the bench to the judging table, standing by while the judge is making his awards, carrying the judge's slip to the secretary's office, and replacing the birds on the bench.—Editor, CAGE BIRDS.]

New Roller Club for Pendlebury

A Meeting Called.

SIR, — Having been requested to form a Roller Club in this district, kindly allow me through the medium of CAGE BIRDS to say that a meeting will be held for the above object at the Bridgewater Arms, Worsley Street, Pendlebury, on Tuesday next, Jan. 30th, at 7 o'clock. Intending members are invited, and birds will be on exhibition. Walkden and Farnworth Roller fanciers please note.

R. BUMBY.

What is a Ticked Bird?

Marked is Marked; That's All.

SIR,—I am one of the many who take a great interest in what we read and see in good old CAGE BIRDS. I have had it every week for well into the teens of years, and it moults better every year. As times go on it will require a greater cage for its useful knowledge for us young birds (I call myself young, although I have been pecking a long while, over fifty years). Now, what is all this talk about ticked, flaked, or variegated Canaries? I have kept birds, in fact, I have been a breeder for over forty years, ever since I knew what birds were, and my father kept scores as long as I can remember.

Now I will give you my opinion of a marked Canary of any kind. If a bird has a mark, large or small, I call it a marked bird; a clear must be a clear; a green must not have a light feather anywhere. When I am speaking of my birds, if a bird has more light feathers than dark, I call it a yellow or buff marked, whichever it might be; if it has more dark feathers than light then I call it a green-marked. "Ticked, variegated, or splashed" is off the map with me.

SQUIRE CLIXBY.

Getting No Farther.

SIR, Messrs. Stubbs ask me two questions: these I answer and then leave them. First they ask is it not proof that their bird is a marked one since Messrs. Robson, Roe, Houghton, and Allsopp allowed it to compete in a marked class. No certainly not. All the above judges would, I venture to say, allow the bird to compete in the ticked class if it was not barred by schedule. Some judges are generous and I do not quarrel with them.

Their second question is why shouldn't their bird be judged under the Southern Border Club rules, and not the Yorkshire Union. For this reason: The latter club not only covers Yorkshire, but the whole of the United Kingdom, including, of course, the South, with the affiliated Southern Yorkshire. There are also other clubs in the North that adopt the Union definition, so that the fanciers that come under its influence must number many thousands. The membership of the Southern Border Club would be about forty. It is not difficult, therefore, to determine which rule ought to operate.

That a bird is under some schedules a ticked and in others a marked is no fault of mine, so why blame me? I have not said what a tick ought to be, and I am not concerned on that point, but I do know what is at the moment the generally accepted definition. Mr. House honourably performed his obligation as judge at the show in question, and it is worthy of note that not one writer has supported Messrs. Stubbs in their contention that Mr. House had no right to wrong class their exhibit.

F. J. MARTIN.

The What-is-it Bird.

In the drawing here reproduced our artist, Mr. Norman, shows the character of the markings of the Norwich Canary disqualified by the judge at Port Talbot show, Mr. C. A. House, as being ineligible for competition in a class for marked birds.

The Standards of the Yorkshire Union.

SIR,—Since sending you my last letter I have had my attention drawn to a slight mistake in the wording. It should have read "wings," not "flights." The following is an exact copy of the Yorkshire Union standard:

No. 5.—That an evenly-marked bird must be four pointed (both eyes, both wings), or six pointed (both eyes, both wings, both sides of tail); these are called "technical" marks.

Markings—wings, for exactness, decreasing in value as the marking extends beyond the secondary flights.

No. 7.—That an unevenly-marked bird may have two, three, or five "technical" marks on eyes, wings, or tail, separately or in addition to any other variegation on its body. A bird with four or six marks, if variegated on head or body, is also considered an unevenly-marked bird.

At a sub-committee meeting of the Yorkshire Union, Jan. 18, it was decided to recommend the Union to consider the standard for marked birds, and that the National Green Marked Yorkshire Canary Club and the Cinnamon Marked Yorkshire Canary Club be invited to each send three representatives.

S. MIDGLEY.

The Loose Using of Technical Terms.

SIR,—May I just point out a confusing element that is creeping into this correspondence, when read by new recruits and a great number of novices, by some of the writers, who certainly know better, describing patches of colour on the body, apart from the technical marking points, as "marks." This loose writing is doubtless done thoughtlessly, but it is none the less likely to give rise to confusion, especially when it comes from those to whose opinions beginners are apt to attach weight. Both J. Bastock and J. Kershaw fall into this error. As is generally known, the technical points where only "marks" can exist are the eyes, inner flights, or secondaries, and the outer sides of the tail. To avoid any confusion coloured feathers on any other part of the body should be referred to as ticks or variegation. In the Yorkshire and Border fancies the term variegation is, of course, obsolete, but even in these breeds I doubt if a bird can properly be termed an uneven marked unless it has a mark on at least one technical point.

In the old days when Blakston's work was written the trouble was not to differentiate ticked from marked specimens, as there could be no dispute then whether a bird was marked, even or uneven, but the novice was more likely to be puzzled to distinguish ticked from lightly variegated. A ticked bird might show much more dark plumage than a lightly variegated one. But by Blakston's ruling no one need ever make a mistake in classifying them correctly. A bird having an unbroken run of light colour from the beak to the tip of tail, above and below, was a ticked specimen, but when this line was interrupted by any dark colour the bird was classed as a lightly or heavily variegated, according to the amount of dark plumage the bird had as a whole. That, at least, was a definite rule, which the tyro might easily understand.

A bird with only one technical "mark," however good and perfect it may be, competes at such a disadvantage with other "marked" specimens that it is rightly allowed to compete as a ticked, but apart from this a clear and definite rule as to what constitutes a ticked bird seems to be badly needed.

CLAUDE ST. JOHN.

The Judge Replies to His Critics.

SIR,—I cannot understand Mr. Kershaw's argument. Here we have a bird which all who know it are agreed has no solid mark, but a number of small faint ticks or fleckings. Yet because it has no mark but these tiny specks, he says it is "a marked one." Such fine spun arguments as this of Mr. Kershaw's do not convince me that a number of pinheads are anything but a number of pinheads. Mr. Kershaw would argue that they were a mass of metal.

Mr. Jowett suggests the word "splashed," but as I understand that word it means something more solid than these very small faint ticks.

It has taken Messrs. Stubbs two months to discover that my judging at Port Talbot was inconsistent. They now trot out another bird, and try to show that both my judging and my arguments are illogical. This is no personal matter with me. It is no pleasure to me to wrong class a bird, or to take part in such a discussion as this. I have enough writing to do without engaging in personal discussions.

Messrs. Stubbs quote Mr. Midgley's words, and not mine, when they speak of this other bird. By so doing they are trying to raise a fresh and a false issue, because the two birds are not alike in the colour which they carry. Such argument is unfair, and Messrs. Stubbs must know it. If the birds were alike there would be some reason in their bringing in this other bird, even though it is so late in the argument, but the birds are not alike.

Had the bird which I "wrong classed" satisfied me as to its rightfulness to be in the class at Port Talbot it would have been placed first. I did not throw out the best bird in the class without considering what I was doing. Four other judges have given the bird first prizes since I threw it out. This does not prove I acted wrongfully. Much depends upon the wording of the schedules at the shows mentioned. Judging by the reports in CAGE BIRDS the wording was not the same, and this is important to notice.

Messrs. Stubbs seem far more concerned with proving their bird is what I say it is not than in getting a settlement of a vexed question. The judges they name are entitled to their opinion, even as I am to mine, but none of them has ventured to give the readers of CAGE BIRDS his opinion on this bird, judged according to the Port Talbot schedule.

I can say nothing about the shows they judged, because I have not seen the schedules, but if they were all worded in the same manner I say unhesitatingly that had I been in their position I should have wrong classed this bird at all five shows instead of one.

You mention a reproduction of the bird, Mr. Editor. I have, as a newspaper manager, considerable knowledge of reproduction processes, and knowing this bird I say it is impossible to give a correct reproduction of so faintly ticked a bird. The artist's sketch would show the ticks, but in the processes of engraving, and printing on fast rotary machines, such as CAGE BIRDS is printed upon, the faint ticks would be lost.

C. A. HOUSE.

[The drawing referred to is published this week, and must take its chance, subject to the limitations mentioned by Mr. House. It does not profess to show each individual marking or tick, but only gives an idea of their general disposition.—Editor CAGE BIRDS.]

(Some interesting letters unavoidably held over.)

Members' Shows.

NOTE.—Secretaries will greatly facilitate the work of ourselves and our printers if they will kindly endeavour to send their reports as nearly as possible as they see these accounts printed, and if they will also write the names of exhibitors as distinctly as possible.

ALFRETON C.B.S.

Members' show, Jan. 6, 66 birds staged. Some splendid birds were on view. British were a nice level lot. Mr. J. Sinnis, Sutton, judged and gave satisfaction. Nor. Yell. Ck. (3): 1, Smedley; 2, 3, Admitt. Buff Cock (5): 1, 2, Smedley; 3, Butler and Barlow; vhc, hc, Admitt. Hen (2): 1, Admitt; 2, Smedley. Unflig. (2): 1, 2, Smedley. Nor. Yell. Ck. GREENOCK, PORT GLASGOW, AND GOUROCK.

Annual Club Show, Jan. 6, Boilermakers' Hall, the event proving a great success. The officials were as follows:—President, Mr. D. Milloy; vice-presidents, Messrs. J. Smith, T. Watson, and W. L. Stewart; treasurer, Mr. D. Rolls; committee, Messrs. D. Brown, W. McDiarmid, M. E. Campbell, J. Allison, J. Rodden, D. Best, G. Wyke, and G. McKee, with Mr. J. M. Dooley as secretary. The judges were: Canaries, Mr. J. Craig, Brechin; British, Mr. W. Bishop, Stirling, and their awards gave full satisfaction. About 300 birds were forward and some of the best have already won in Paisley and Glasgow this season. Special winners were: Championship cup and gold medal best young Canary, bred by a member, Watson; rose bowl for best young Canary, Mule or Hybrid, and gold medal, D. Rolls; rose bowl, best old bird, M. E. Campbell, with a light Mule; Cameron cup and gold medal, for best British, W. M. Dairmid; Club cup, best young Mule or Hybrid, A. Laird, with a Goldfinch; Border medal, presented by the B.F.C.C., A. Craig.

Scotch Fancy, Ck.: 1, Rolls; 2, 3, Rodden; 4, Archibald. Hen: 1, McAleese; 2, 5, Rolls; 3, Rodden; 4, Archibald. Cock, 1916: 1, 2, 3, 4, 5, Rolls. Hen: 1, Rolls; 2, 3, Rodden. Yorks., Cock: 1, Wylie; 2, Mount; 3, Moody; 4, McDongall; 4, Graham; 6, Mount. Hen: 1, 5, Mount; 2, 4, Moody; 3, Wylie; 6, Graham. Cock, 1916: 1, 5, Moody; 2, 3, 4, 6, Graham. Bullf., H.M.: 1, Cartney; 2, Dairmid; 3, Martin; 4, Cameron. F.M.: 1, 4, Martin; 2, Kerr; 3, Dairmid; 5, Molloy. Linnet, H.M.: 1, 3, Dairmid; 2, Campbell; 4, Laird; 5, Molloy; 6, Mount. F.M.: 1, Fleming; 2, Cartney; 3, Dairmid; 4, Martin; 5, Kerr; 6, Molloy. Greenf., Ck., H.M.: 1, Cartney; 2, Campbell; 3, Dairmid; 4, Hargreaves; 5, Molloy. Greenf., Ck., F.M.: 1, Kerr; 2, Dairmid; 3, Molloy. Siskin: 1, Dairmid; 2, Fleming; 3, Martin. Lesser Redpoll, H.M.: 1, Campbell; 2, 4, Cartney; 3, Martin; 5, Wylie; 6, Wylie. F.M.: 1, Cartney; 2 Mount; 3, Dairmid; 4, Kerr; 5, Molloy; 6, Martin. Twite or Mealy Redpoll: 1, Molloy; 2, Fleming; 3, Dairmid; 4, Martin. Chaffinch or Bramble.: 1, Campbell; 2, 3, Martin; 4, Cameron; 5, Dairmid; 6, Kerr. A.O. Brit., Ck.: 1, Dairmid; 2, Urquhart. Hen: 1, Martin; 2, Campbell; 3, Dairmid; 4, Cartney; 6, Molloy. For.: 1, 2, 3, Cameron.

Nests of Birds, Poultry ... should be regularly sprinkled with KEATING'S POWDER, especially when hens are sitting. Don't forget to do this just previous to the eggs hatching, to destroy the Red Mite. Kills all insects. Harmless to everything else.

Club Reports.

BOLTON C.B.S.

Annual tea, Dec. 23, Church Inn, Folds Road, when a good number of members sat down to an excellent spread, provided by Mrs. R. Spilby, Farnworth. After tea we had our annual meeting for fixing shows and dates for 1917, and it was decided to have two young bird shows and one old bird show, the four highest birds to count in each for specials for 1917; this ended one of the best meetings for a long time. —J. Brooks, Sec.

WALKLEY C.B.S.

Meeting, Jan. 11, Mr. Ridal, chair. Syllabus settled. Sec. read a paper on bird ailments and their cure, which was appreciated. Winners of specials for table shows:—Yorks., Messrs. Williams and Hagshawe; Nov., Gill and Sisson. Next meeting, Feb. 15, pairing competition. The new quarters, Oxford Street Schoolroom, Bond Street, are a great improvement, and old and new fanciers will be heartily welcomed.—E. Sisson, Assist Sec.

SUNDERLAND C.B.A.

Annual meeting, Jan. 13, Station St. Cafe, Mr. J. Farrar presiding. Balance sheet for 1916 was presented, and showed a balance in hand of £9 1s. 6d. The officers for 1917 were re-elected, excepting the treasurer. Owing to Mr. G. Davidson having tendered his resignation as treasurer this was adjourned until next meeting. Decided that the club be made open to the United Kingdom, and that the subscription be reduced to 2s. 6d., entrance fee on nomination 1s. A vote of thanks was passed to the judges of our show, and to Miss Farrar for her services in connection with bird and cage competition. Decided to hold a pair show Feb. 10, when it is hoped to have a good turn-out.—F. Riseborough.

CARDIFF C.B.S.

Meeting, club-room, Jan. 16, Mr. E. J. Banks chair, and a fair attendance. Sec. stated he was unable to present balance, as we had two accounts not settled, also a couple of members had not returned tickets. Resolved that we hold our pair show on Feb. 21. Entry fee 3d. and no prize money. Mr. A. Maggs (Port Talbot) to judge Canaries, and Mr. E. J. Davies British and Mules. The following members promised specials: Messrs. Bankes, Pugh, Pearce, Maggs, H. C. Smith, Wilson, Norwood, Ball and Thomas. We are still a few short, so members send on and let me know what you wish to give. At next meeting, Feb. 20, the nomination of officers will take place. I make an earnest appeal to members who have the welfare of the society at heart to attend, as owing to so many of the boys being called up it is our duty to see that the society is kept going until they return. All contributions must be paid by next meeting, as the books have to be in the auditors' hands after that date. E. Thomas, Sec.

READING C.B.S.

Annual general meeting, London Tavern, Jan. 10. Election of officers: President, Messrs. G. W. Palmer; vice-pres., Messrs. L. G. Sutton, A. Palmer, A. W. Sutton, W. H. Palmer, C. E. Keyser, T. Murton, Lieut. Col. Wilson, D.S.O., M.P.; auditors, W. H. Pyke, A. J. Foster; treas., pro tem., A. J. Foster; sec., O. C. Smith; managing committee: chairman, Mr. G. Munday; vice-chair, Mr. J. Brooker, Messrs. T. Yates, F. Wilson, R. Meadowcroft, G. Larkcom, W. Frewin, W. H. Pyke, A. J. Foster, G. Towndraw, C. Upton. Pair show was arranged for Feb. 14, Mr. Robson judge. Honorarium was granted sec. Four new members were elected, a good start for new year, and everything points towards a favourable season. Subs. are now due, and should be sent to sec. without delay.—O. C. Smith, Sec.

PLYMOUTH W. COUNTIES O.S.

Annual meeting, Oddfellows Hall, Morley Street, Plymouth, Jan. 26, with a good muster. Hon. Sec. presented the annual report, and stated that it was gratifying to note that although the country was in such an unsettled state, the society had made good progress during the year. In February last an extra Canary show attracted 45 exhibits, while in March a British show brought a grand entry of 70. There were also Nest Feather shows in June and July, with good results, the entries nearly 300. The annual show, Nov. 1-2, was all that could be desired in numbers and quality. The year concluded with a pair show of 50 entries in December. Members congratulated the secretary upon a splendid balance sheet, which showed an increase of £9 on the year's working. Officers elected:—Chair, Mr. W. G. French; vice-chair, Mr. W. Smale; hon. sec., Mr. W. A. Dyer; assist. sec., Mr. O. Moffitt; auditors, Messrs. E. S. Lugg and J. Hayne Pillar; committee, Messrs. Spillman, Gill, Savage, Hutchings, Garland, Geach, Mitch, Large, Deakin, Rapson, Pridham, F. A. D. Hills, and Woodley. The following judges were appointed for the table show, Oddfellows' Hall, Feb. 20:—Yorks., Mr. W. A. Dyer; Nor., Mr. S. Gill; Crest, Mr. W. G. French; any Cinn., and A.O.V., Mr. W. Spillman. Members please note, this is also the date of next monthly meeting. Non-members are specially invited, as there will be a big discussion on the business of the society. This, together with the show, ought to prove interesting. —O. Moffitt, Press Corres.

ARDWICK & MANCHESTER C.B.A.

Annual general meeting, St. Thomas's School, Ardwick; Rev. J. W. Wragg presided over a fair number. After the election of three new members, letters were read from the nominated judges for next open show. Decided to engage Mr. Battye and Mr. Beswick, along with Mr. Robson, who had been previously engaged. Sec. announced that the last open show showed a profit of nearly £5, and it was decided that the sec. send a cheque for the amount to the Blinded Soldiers' Fund, as arranged. Agreed that there be a slight alteration on the rules 9, 10, and 12, which the members will shortly be notified about. Office-bearers for 1917:—Pres., Rev. C. E. Paul; vice-pres., Messrs. A. E. Long, Oldham, Walshaw, Warburton, Robinson, Parish, Lane Moss, Boothman, Downing, Peters; committee, Messrs. Fairhurst, Stratford, Fletcher, Blinston, Schofield, Warcing, Whitney; auditors, Messrs. Lane, Parish, Walshaw; chairman and treas., Mr. J. Spencer; sec., Mr. A. E. Thorpe; assist. sec., Mr. Redditt. We learned that the Rev. J. W. Wragg would not be at liberty to be re-elected as chairman, owing to being appointed as vicar at St. Neots. Members will be sorry to hear that Ardwick will be deprived of the services of such an enthusiastic exhibitor, worker, and official, one that has rendered valuable assistance in bringing the society so prominent. Not only the members, but every one who has come in contact with him at our shows will wish him every success. Table show fixed for Jan. 27, in St. Thomas's schoolroom. Birds staged 3. A good list of special prizes is offered, admission free.—J. Spencer.

CLUB AND SOCIETY NOTICES

ONE NOTICE of any forthcoming Society meeting inserted free. It must reach us not later than Tuesday morning's post. Specially printed Club Notice Postcards may be had free on application to our Manager. Secretaries should always use them.

NOTE.—Only the details asked for on our cards can be published. Such phrases as "a large attendance desired," etc., must not be included. Classification for forthcoming shows, appeals for new members, and any other matter in the nature of an advertisement will only be inserted if paid for at advertisement rates.

Bolton Woods C.B.S.—Jan. 27, Victoria Hotel, 6.30. Distribution of prizes, etc. A hearty invitation to all.—H. Fretwell.

Blaydon C.B.S.—Feb. 3, Co-op. Library, 7.30. Annual meeting; election of officers. Local fanciers welcome.—G. Hasser.

Clay Cross C.B.S.—Jan. 27, Angel Hotel, 6.45. Paying prize money to members and allotment of specials and balance-sheet of show.—F. Harrison.

Croydon F.A.—Jan. 31, Ruskin House, West Croydon, 8. Annual general meeting; pass accounts; elect officers; alteration of rules; fix pair and young stock show dates, etc.—F. B. Roberts.

Doncaster C.B.S.—Feb. 3, Black Bull, 7.30. Show business; arranging for distribution of cups and general business.—H. Lumby.

Edinburgh and Mule Breeders' Society.—Feb. 1, 142, High Street, S. Pair show: Norwich, Border, Muling, or Hybrid. General business.—A. Bell.

Edinburgh Western O.S.—Feb. 1, Riego Street Hall, 8. Enrolment of new members. Lecture on Mule breeding by Mr. A. Watson.—R. Lile.

East Ham F.S.—Feb. 1, headquarters, 8. Election of officers, fixing show dates, etc. W. A. Harwood.

Fife C.B.L.—Feb. 3, Gothenburg Hall, Coaltown of Wemyss, 6.—J. Sneddon.

Guisboro' "Priory" C.B.S.—Feb. 3, Wears Room, 2. Pair show. Usual classification, with Linnet, Goldfinch or Bullfinch, A.O. Brit. added. Judge, Mr. T. Hill. Friends welcome. Monthly meeting after show.—J. S. Campbell.

Gt. Horton O.S.—Jan. 27, Station Hotel, 7.30. Special meeting, business very important.—B. Hainsworth.

Wallasey C.B.S.—Feb 1, headquarters, 8. British birds and pair show. Judge, G. Benson, Liverpool.—W. Mallinson.

West Stanley Patriotic F.F. and C.B.S.—Jan. 27, Empire Club, 6.30. Tickets, etc.—R. Hutchinson.

HULL ROLLER C.C.

Meeting, club's headquarters, Argyle House, Anlaby Road, Mr. F. Seaman chair, before a good muster. Items of interest were discussed. It was decided to hold our members' show, Feb. 21; a well-known Roller judge was selected. More new members were made, and we are still asking for more full particulars from the Sec.—A. Baggaley, 18, Somerset Street, Hull.

PORTH AND RHONDDA VALLEYS

Annual general meeting for the election of officers and other important business. Mr. Thomas James presided over a full attendance. A letter from Mr. Challenger, the late hon. sec., asking to be relieved of his office, was agreed to. Officers for 1917 elected: Chair, Mr. T. Jones; Vice-Chair, Mr. Hollingshead; Hon. Sec., Mr. Legg; Treas., Mr. T. Emanuel; Auditors, Messrs. Hollingshead and J. Hall. New members elected: Mr. J. Hall, Mr. W. Baker. Several others have promised to join at next meeting, Feb. 1, when there will be a table show of British—Goldf. ck., Bullf. ck., Linnet ck., Goldf. hen, Bullf. hen, Linnet hen. Mr. Legg judge. Decided that all entry fees go to the funds. The annual pair show will take place some time in Feb., when a bumping entry is promised. Schedules will be considered next meeting, Feb. 1. Audit, Jan. 30. —A. H. C. Legg, Hon. Sec.

CHELTENHAM C.B.S.

Annual general meeting, headquarters, Jan. 17. Considering the number of members who are in the army or otherwise engaged in war work, the attendance was very good. The Hon. Sec. and Treas. (Mr. A. S. Treasure), in presenting the report and balance-sheet for the year, said that in spite of all the difficulties which had had to be faced, the society had had one of the most successful years since its formation. During the year the meetings had been well attended, and both the pair show and the F.F. show were above the average; in fact, the latter was a record. The open show was also very successful, though not quite so large as had been hoped for; it was, nevertheless, an excellent show in every respect. The show had also been a financial success, resulting in a balance of over £5, which had been divided between the two local hospitals. The balance for the year was also good, being on the right side by over £12. The balance-sheet having been passed, the election of officers took place, and the officers of last year were re-elected, viz., President, Capt. W. Theobald; Chair, Mr. J. Madagan; Vice-Chair, Mr. A. Hayling; Hon. Treas., Mr. A. S. Treasure; Joint Hon. Secs., Messrs. Treasure and Pounsett.—A. S. Treasure.

BORDER FANCY C.C.

Annual general meeting, St. Cuthbert's Halls, Edinburgh, Jan. 1, Vice-Pres., J. Patterson, chair. Chairman referred to illness of the President, and all hoped that he would soon be restored to health. A question arose out of the minutes regarding the word champion. Decided that a champion was one who had won a medal in open competition, and any member showing from the same house must be held as a champion, and that a member showing from the same house as a member who had won a medal at a confined show, be allowed to compete for novice medal. Annual balance-sheet read and approved. The marked cage question at East Lothian show was discussed, and after a fully satisfactory explanation had been given it was agreed that the members in question be exonerated from all blame. The retiring office-bearers were all re-elected, and Mr. J. B. Richardson, late Pres., was elected an Hon. Pres. On the motion that the club adopt a standard show cage, three cages were before the meeting—one a collapsible cage made by a fancier—and after a great discussion it was agreed that our show cage was already well standardised, and it was decided not to adopt any special make of cage. A further motion that standard spars be adopted was put forward, and it was agreed to leave the matter over till next general meeting, when samples of same could be submitted for members' approval. A discussion arose about distinguishing marks on show cages, and it was agreed to alter rule re same, to take in all such marks in addition to those already stated in rule. On the motion that plain canary seed only be used in show cages, Mr. J. Johnston said this, in his opinion, was one of the worst things that anyone could use in his show cage, as if birds were away at a show for a few days they were filthy when they arrived home. Agreed that the club recommend the use of corn husks for show cages, and any member having difficulty in obtaining same should write Sec., who would be pleased to supply same. Decided that any bird broken either in eye or wing marks be considered a variegated. Sec. was instructed to write Editor of CAGE BIRDS pointing out the irregularity of show reports and advertisements appearing throughout the season, a suggestion re appointment of judges was remitted to committee when granting patronage. A recommendation from Edinburgh Show Committee that a Border Fancy Derby show be held annually for young birds, was considered. Agreed to let matter lie over to end of war. Mr. Patterson presented a handsome cup to the club for annual competition at the Edinburgh show, or if the exhibition was held in conjunction with Scottish National, to be won twice in succession, or three times in all, for most points. Mr. J. J. Johnston was then presented with the cup, being winner this year. Mr. Lumsden, as show president, gave an estimated statement of income and expenditure of show, and thought it would work out better than last year, members agreeing that any deficiency be met out of club funds. Show auditors, Messrs. Sibbald and Stevenson. Vote of thanks to chair concluded the meeting.—W. B. Smart.

MANCHESTER & N. COUNTIES.

Annual general meeting, Jan. 8, Deansgate Hotel, a good number present. Officers elected: Mr. W. E. Kearns, pres.; vice-pres., Messrs. A. G. Smith, Sam Cook, W. Smith, W. N. Turner, W. Broughton, B. R. Appleton, and E. Dooley; chair, Mr. Raynes; treas., Mr. J. F. Mitchell; sec., J. Green; assist. sec., Mr. F. Wilkinson; auditors, Messrs. A. G. Smith, J. Coldbeck, and W. Fairhurst; committee, Messrs. Moorby, McTurk, Bruce, Hubbard, Coldbeck, Wilson, Hayward, Warburton, Jones, Fairhurst, and Riley. The rules were gone through, and a few alterations made. The subscription was put to 5/- for the year, and meeting nights altered to the second and last Monday in the month. Two new members were made, and three nominated, and this brought a pleasant night to a close.—J. Grun, Hon. Sec.

LIVERPOOL B.B.A.

Annual meeting, Oldham Hall, Jan. 11, Mr. Ewan, chair, and a fair attendance. Annual balance sheet was presented and passed, showing a very satisfactory balance on the right side. Thanks are due to our asst. sec. for the energy he displayed during the past year to bring our association to its present position. Officers elected:—Pres., Mr. W. R. Knowles; vice-pres., Mr. F. C. Minoprio; chair, Mr. E. Bunner; vice-chair, Mr. T. Evans; sec., T. B. Jones; asst. sec. and treas., Mr. R. Bratherton; committee, Messrs. W. Jones, F. Handley, A. Scott, J. Abbott, F. Leatherbarrow, R. Costello, and J. F. Hart; auditors, Messrs. J. McDermott & J. Walker. New novice rule proposed and passed: "One who has not won a 1st in open shows, or three 1sts in open novice classes, or six 1sts at annual shows in full classes (six birds)." The most pleasing feature of the meeting was when Mr. Walker, chairman pro tem., presented to Mr. Bunner, on behalf of Mrs. Bunner, a small token of respect for the kindness and energy displayed on behalf of the officers and members of the association during the past year.—Thos. B. Jones, Hon. Sec.

ROUND THE SHOWS.

CITY OF GLASGOW O.A.

A Magnificent Array of 1,200 Birds.

61st annual show, in the Central Halls, Bath St., Glasgow, Jan. 3-4. The halls are most comfortable and well lighted, spacious, and free from draughts, and are without doubt the finest suite of halls in the city for an exhibition of the kind, and although the show was well patronised by fanciers and the general public, there was nothing approaching the general crush and squeeze often experienced in shows which are less fortunate for space and comfort. For quality and numbers the present collection was close up on anything held here in previous years, and mustered 1,200 strong, every section being a feast for the eye, and a real joy to behold. The Scots Fancies had one of the small halls on the first floor to themselves, while the other housed the Cresss, Borders, and Yorkshires. The large hall upstairs was practically the same space as the two lower halls, but without division, and made a most commodious place and entirely to one's liking both for personal comfort and for the welfare of their feathered friends. The management here is O.K., and with expert hands attending to the various section there was no need for feeling worried over the most delicate of the exhibits. A few well-known exhibitors were unfortunate enough to have their boxes delayed on the railway till their specimens were late for judging, a matter which undoubtedly had its effect on the placing of the cards. President, Mr. Thomas Thomson, still heads the list of officials, and they are few who do not know "Sammie," as he is familiarly called. He is one of the association's oldest members, and has seen it through some trying ordeals. Mr. J. McLay, vice-president, is well known, and an old associate of the society. Messrs. Young and Heggie, secretaries and treasurers, are men in the right place, well known as leading fanciers, and highly respected in all branches of the Fancy. The above quartette, with the following committee, make up a set of workers hard to equal anywhere. Everything was well in hand, and nothing left undone that could be bettered: Messrs. McClure, McLaughton, Vernall, Harvie, Gray, Muir, Campbell, Stewart, junr., Phillips, Robertson, White, Taylor, Hutchison, Erskine, Craig, Sloan, Taylor, Honston, Smart, Barron, Fulton, Boyd, Steel, Crawford, Sinclair; auditors, Messrs. Fleming and Thom.

Judging was started punctually, and was carried out to the letter. Most of the gentlemen who were responsible for the placing of the awards grappled matters in a systematic fashion, and got through their duties in good time and to the general satisfaction. Some ado was caused in the Border section by the different types of cages, and the more varied types of perches, many of which spelt the owner's name in unmistakable fashion. Something is likely to be done to remedy the matter through the efforts of the B.F.C.C. The judges were:—Scots Fancies and Belgians, Messrs. Dalgleish, Edinburgh; Carlaw, Falkirk; Higgins, Meikle-Earnock; Watson, Glasgow; Caldwell, Baillieston; Black, Govan. Norwich, Messrs. Martin, Kirkintilloch, and Cameron, Kelso. Crests and C.B., Mr. J. Noble, Kilmarnock. Yorks. and A.V. classes, Mr. J. Pinnock, Glasgow. Borders, Messrs. Arnott, Kirkcaldy, and Hyslop, Stirling. Mules, British, and Foreign, Messrs. Watson and Arrighi, Edinburgh.

The Rt. Hon. the Lord Provost, Thomas Dunlop, Esq., accompanied by Bailie Graham, formally opened the exhibition, and made reference to the hobby of bird-keeping and the pleasures derived from following such a pleasant hobby, after which he thoroughly enjoyed a look round the various sections, scrutinising the various breeds and having their good and bad qualities told him, to his apparent delight.

THE SCOTCH FANCIES AND BELGIANS.

Scots Fancies opened the ball, and although not quite so numerous as we have seen here in past days, yet quality in many cases was quite on a par with former times and left little to be desired.

YELL. CK. (9): 1, Fray, good size and subs., thick through, fine shoulders and reach, neat snaky head, fine style and pose, well staged; 2, Morrison, well up for size, nice build, neat and typical through, good top end, not quite the side of leader; 3, Muir, stylish, good type and build, not the condition; 4, no name, fair type, stylish; 5, no name; 6, Baird; 7, McRobert. YELL. PIED CK. (8): 1, David, good size, nice length side, fine shoulder and reach, snaky head, thick through, A1 colour; 2, Stewart, not quite the size, only fault though, A1 type, style and action, grand cond.; 3, Muir, nice size, stylish, free worker, fine droop, well staged; 4, Blue; 5, Grey; 6, Robertson; 7, Menzies. YELL. FOUL CK. (6): 1, Morrison, grand exhibit, rare side and shoulder, capital reach and droop, fine head, hugs perch well, perfectly staged; 2, no name, fine size and length of side, not quite the style and action, not such hard condition; 3, no name, 4, Orr; 5, Miller; 6, Anderson. YELL GRN. CK. (5): 1, Main, fair size, good side, reach and drive, nice snaky head, could do with more substance; 2, no name, grand style and action, free worker, good stamp, presses close, only requires a shade more subs.; 3, Orr; 4, Phillips; 5, Knox. BUFF CK. (9): 1, cup, Gray, good size and qual., fine side, good shoulder, grand reach and droop, neat head, well under the perch, just rather feathery at front for our taste; 2, Morrison, good size, nice length of side, good drive and shoulder, barely the reach and droop of leader; 3, David, grand top end, fine drive, lovely feather; 4, no name, nice quality, fine size, very nervy, well staged; 5, Robertson; 6, Stewart, junr.; 7, Thomson. BUFF PIED CK. (10): 1, David, stylish, sweet top end, good side, prominent drive, free to work, in capital order; 2, Gray, former fine exhibit, quite up in size, good reach and drive, not quite the shoulder of 1 later; 4, typical, nice cond.; 5, Jackson, well up in size, good length of side, nice depth through, fails reach, but good behind, very nervy; 6, no name; 7, Muir. BUFF FOUL CK. (8): 1, Main, good size and shoulder, fine length of side and drive, could do with shade more reach and thicker through; 2, Orr, not quite the size, but excel in reach and droop, well under the perch, run leader hard; 3, Campbell, stylish, lovely feather, nice side, lacks subs. and depth through, well placed; 4, Baird; 5, Blue; 6, McLaughlin; 7, Smillie. BUFF GRN. CK. (6): 1, Main, stylish, good type and build, laid down in capital style; 2, Morrison, fine qual., good side and drive, not just so massive or so shapely at top end; 3, Menzies; 4, Muirhead; 5, Sharp; 6, no name. YELL. HEN (8): 1, Stewart, clinking exhibit, in fine pink, grand model, one to be proud of; 2, Stewart, junr., fine specimen, failing in drive only, runs tight up; 3, Gray, fails a trifle in reach and not so well staged; 4, David, good exhibit, well staged, must have pressed for another point; 5, Thomson; 6, Morrison, 7, Muir. YELL. PIED (8): 1, Robertson, not a large one, but all there for style, neat, proportionately built, fine free worker, top order; 2, Stewart, trifle smaller, typical, well staged; 3, Strathearn, small, but typical through; 4, Jackson, fine style and action, fails steadiness; 5, no name; 6, Harvey; 7, Muirhead. YELL. FOUL (2): 1, Morrison, fine top end, nice side and drive, lovely feather; 2, McMillan. YELL. GRN. (6): 1, Muirhead, typical, stylish, in fine form, just a shade more subs. required; 2, Wilson, similar in size and build, falls only in shoulder; 3, Smith; 4, Hamilton; 5, 6, no names. CLR. BUFF (9): 1, Stewart, plenty of size and subs., something to work on, faultless cond.; 2, Stewart, junr., good size and subs., well laid down; 3, Morrison, well up for size, nice reach and droop, good snaky head, runs well under perch, not quite so thick through; 4, Robertson, fine style and build; 5, Muirhead; 6, Jackson; 7, Thomson. BUFF PIED (9): 1, Thomson, good size, fine side and top end, hugs the perch well, staged in fine style; 2, Gray, nice size and style, free to work, fails in depth through; 3, Wilson, good size and qual., well staged; 4, Jackson; 5, Stirling; 6, 7, no name. BUFF FOUL (7): 1, Muir, in capital order, well up in size, fine shoulder, good reach and droop, neat snaky head, carried away well below perch; 2, Stewart, junr., fine side and shoulder, not quite the reach; 3, Blue, good for style and action, not quite the subs. of those in front; 4, Philips; 5, no name; 6, Hendry; 7, Hamilton. BUFF GRN. (7): 1, Jackson, capital feather, fine top end and drive, could do with a pinch more subs.; 2, Menzies, stylish and well staged, loses in length of side and reach; 3, Muir, just lacks style of those in front; 4, Hamilton; 5, no name; 6, McLaughlin; 7, Stewart, junr. PAIRS (6): 1, Muir, grand matched pair, should leave some of the right material behind them; 2, Morrison, fine pair, close up on leaders, well matched, liked them much; 3, Stewart, trifle smaller, but carefully chosen and should do well; 4, Stewart, junr.; 5, 6, no names. BELG. CK. (4): 1, McLaughlin, good buff, closely followed by 2, 3, White, nice exhibits, in perfect feather; 4, Stirling. HEN (2): 1, 2, White, small, but stylish, grand col. and qual., well shown. SELF., CKS. (10): 1, Hendry; 2, no name; 3, McRobert; 4, Philips; 5, Miller; 6, Knox; 7, Sharp. HENS (5): 1, Sharp; 2, Miller; 3, Hamilton; 4, Sharp; 5, Rigby.

THE NORWICH CANARIES.

The Norwich Plainheads contained some of the cream of the Fancy, the classes being strongly filled with exhibits from far and near, some notable exhibitors putting forward strong teams, full of quality. Good material in this section was in great demand, and many specimens went to new homes at their full catalogue price. In the selling classes keen interest was displayed in the auctioneering of the birds, the winner in the 15s. cock class running up as high as £2 10s. One unfortunate feature was the number of entries with no name attached, but this was due to the fact that the catalogues had to be printed before the printers left off for the holiday, and entries received after the scheduled closing time were not included.

CL. or TKD. YELL. CK. (11): 1, 3, Colley, fine subs., nice type and qual., typical, well braced and staged; 3rd, nice level col., A1 qual., neat shapely front, fine style; 2, Stewart, hotter col., lovely feather, good subs. and build, neat body, good carr., not just so full head, excels otherwise, close run, we fancy; 4, Cairns, fine subs., good type and qual., even shade silky feather, not quite so hard up in cond.; 5, Carkson; 6, Crawshaw; 7, Hutchison. BUFF (9): 1, Robertson, good size, subs. and qual., steady and stylish, could be shade fuller in head; 2, Colley, lovely col., rare qual. feather, good front and top end, well braced, in the pink; 3, McAllister, good size, typical, nice full front, short full neck, neat carr., inclined to be nervous; 4, Gray; 5, Edwards; 6, Dawson; 7, Crawshaw. VAR. or GREEN YELL. (9): 1, Crawshaw, lightly mkd., topper for subs. grand type and qual., shapely and neat through, well staged; 2, Naismith, heavy mkd., pleasing type and qual., neat, cobby, behind in feather cond.; 3, Gray, nice size, good subs, neat carr. and style; 4, Hunter, stylish and neat; 5, no name; 6, Wood; 7, Findlay. BUFF (10): 1, 2, 3, Crawshaw, "Scotland's Pride" and two of his sons, a grand trio, in the pink, the old bird had to play third part, col., type and qual. in full evidence, little between them, staging faultless; 4, Wood, well up for size, subs., not quite the col.; 5, Stewart; 6, Jeffrey; 7, Johnstone. CL. or TKD. YELL. HEN (19): 1, 2, Devoy, leader full subs., fine type and qual., neat, cobby, well braced; 2nd, smaller, lovely qual., hotter col., neat, well staged; 3, Hirst, fine size and subs., just a bit unsteady; 4, Harper, grand size and subs., nice type, fine style, shade high on leg; 5, Holliday; 6, Gardiner; 7, Crawshaw. BUFF (13): 1, McLean, beauty, well-known face, looking better than when we saw her last, grand stamp; 2, Simpson, larger, but longer behind, not the cobby, neat build of leader, good col. and qual., well staged; 3, Kean, nice size, shapely, more compactly built, we preferred for 2nd; 4, Clarkson, good size and subs., fine qual., neat carr., well filled head, neck, deserves position; 5, Young; 6, Stewart; 7, Crawshaw. VAR. or GRN. YELL. (8): 1, Jeffrey, wing mark dark cap, lovely type, A1 feather, fine front, well rounded, deep, stylish, neat staged to win; 2, Marshall, light mkd., grand type and qual., lovely deep even col., shapely, neat, well tagged; 3, McLean, neat, full head, neck, shapely body, neat wings, not quite the depth of col.; 4, Devoy, oddly marked, lovely col. and qual., cobby, well built, nothing out of place if a peg had been gained here; 5, no name; 6, Cairns; 7, Edwards. BUFF (7): 1, Stewart, grand stamp, neat, full, and well put together; 2, Marshall, typical, finely staged, nice col. and qual., well braced, good order; 3, Mitchell, typical broken green, fine carr., well staged; 4, Sinclair, lightly mkd., fine subs., neat build; 5, Kean; 6, no name. NON FED CK. (10): 1, Simpson, fine size yell., all there for col., type and qual., fine cobby build, neat, well staged; 2, no name, lovely type at yell., fine col., neat full head and neck, fails only depth of front; 3, Stewart, grand buff, fine size and subs., neat and well built, shapely; 4, Pearson, almost even mkd., dark cap yell., fine size, nice col. and qual., well staged; 5, Crawshaw; 6, Devoy; 7, Smith. HEN (11): 1, Gardiner, grizzled wing buff, plenty subs., neat, full build, typical, shapely, A1 order; 2, Thomson, buff, stylish and typical, nice qual., not quite the front of leader, but close up otherwise; 3, Park, buff, good size and col., nice head and neck; 4, Russell; 5, Naismith 6, Kerr; 7, Devoy. CL. or TKD. YELL. CK., 1916 (22): 1, Houston, good size, grand col., lovely qual. feather, neat full head and neck, could be trifle better across back; 2, Harper, close up on leader, lacks only in perfection of wing carr.; 3, Braid, good stamp, real neat, cobby build, fine full head, neck, well braced, we liked; 4, Kerr, fine size, type and qual., neat, thick set, cobby, claimed at £7 7s.; 5, J. Braid; 6, Hughes; 7, Lawson. BUFF (15): 1, Gray, short, thick set, neat and cobby, good top end, shapely and clean cut, nice cond.; 2, Cairns, grizzle cap, even col., nice qual., neat carr., rather longer behind; 3, Braid, good stamp, fine weight, short, neat, cobby, clean cut, nicely folded wings and tail, fails only in depth of col.; 4, Gibson, good size, col. and feather, longer behind; 5, 7, Young; 6, Hirst. CL. or TKD. YELL. HEN (13): 1, J. Braid, short, cobby, full type, shapely, neat, still adding to her list of honours; 2, no name, hotter in col., A1 qual., fine head, thick set neck, not quite so perfect in wing carr.; 3, Hutchison, good size and col., nice type, inclined to be crouchy and unsteady; 4, Crawshaw, good size, nice tone col., neat wing carr.; 5, Colley; 6, Hirst; 7, Devoy. BUFF (13): 1, Cairns, nice model, neat, chubby build, broad, deep, neatly built, in the pink; 2, Lawson, fine for size and shape, grand carr. and qual., could be trifle fuller in head; 3, Hughes, shade finer in build, short, neat, cobby, well braced; 4, Crawshaw, nice size, sweet col.; 5, McLellan; 6, Allison; 7, Gardiner. VAR. or GRN. CK. (22): 1, Colley, neat and cobby built, very shapely, well coupled, good carr. and style, in the pink; 2, Kerr, fine size, col. and feather, not quite the front, beautifully staged; 3, Blair, quite up in size, bolder in front, fine top end, neatly braced and clean cut away, pressed hard for a step up; 4, Wood, not quite so large, but short, neat and cobby, nicely staged, steady; 5, Cairns; 6, Young; 7, Mitchell. HEN (17): 1, no name, nice size, good col., fine qual., feather, neat style, in capital order; 2, Stewart, grand type and qual., neat, shapely, short thick neck; fine full head, short compact wings and tail, good stamp, well staged; 3, Lawson, good broken green, fine size, type and feather, clean cut away, very useful; 4, Braid, nice qual., fine shape, neat through, well braced, just fails in col.; 5, Connelly; 6, Young; 7, Cairns. NOV. CK. (12): 1, Fyfe, all there for size, col. and qual., could hold its own in many open classes; 2, Hardie, fine buff, quite up in size, nice level col., fine texture feather, plenty body subs., could do with pinch more head; 3, Hawkins, cap mkd. buff, good size and body subs., not just so well staged; 4, Proctor, heavily mkd., fine body subs., nice col.; 5, 7, Burt; 6, McLellan. HEN (30): 1, Hardie, cap, wing and tail mkd., fine col. and feather, nice size and subs., neatly braced, nicely bonched; 2, 5, Fyfe, leader not quite so massive, but shorter, neater and more cobby, behind in col. and style; 3, Hawkins, plenty size and subs., fails in condition and staging; 4, Proctor, good size, hot, level col., fine feather; 6, Russell; 7, McLellan. SELF. CK. (9): Some cheap birds here: 1, J. Proctor; 2, no name; 3, Lawson and Sons; 4, Fyfe; 5, Mason; 6, Leach; 7, Houston. HEN (8): 1, Proctor; 2, Kean; 3, Brackenridge; 4, Mason; 5, Lawson and Son; 6, 7, no names.

THE CRESTS AND CREST-BREDS.

Crests were a grand lot, and well up to anything seen here in previous years. The winning Crest of Mr. Dobson was claimed at the catalogue price of £12 10s., while we heard of tempting offers being made for some of the Crestbreds. Unfortunately, through delay on the rail, many specimens did not arrive till after the tickets had been placed. Mr. Radley was one of the victims, after having sent a fine team which would undoubtedly have altered matters in this section. The judge, Mr. Noble, must be complimented on the masterly way in which he placed his awards. CREST CK. (9): 1, Dobson, grand exhibit, quickly claimed, var. D.C., fine body and wing carr., A1 feather, lovely headpiece, grand radiation and droop, well filled in centre, fine frontal, thickly clothed with good veiny feather, well staged; 2, 5, Hamilton, leader similarly mkd., well up in size, good qual. and carr., nice top piece, good length feather, not quite so well radiated, and loses slightly in cond.; 3, Page, var., neat top, not quite the spread, not just so hard in cond.; 4, 7, Govan, wing mark D.C., in fine feather, good spread of top piece, lost soiled by gutter at one side; 6, Whitton. HEN (5): 1, Sharp, good var. D.C., fine size, well clothed in good quality, close feather, neatly laid top, finely radiated, nicely drooped, capital cond.; 2, McLay, good qual. var. D.C., nice size and cond., good headgear for quantity and quality, barely so well groomed; 3, Page; 4, Hamilton; 5, Paul. C.B. CK. (13): 1, Hamilton, fine broken green, topping body subs., good dome-shaped skull, good lash and back skull, fine entrance, in rare order; 2, Forsyth, variegated, great body subs., and clean cut, nice cond.; 2, Cairns, grizzle cap, fine skull, well clothed with grand feather, neatly staged; 3, Brown, var., grand subs., capital qual., close up on 2nd; 4, Dobson, plenty subs., grand qual. and quantity feather, in hard cond., runs close up on leaders; 5, McLay; 6, Govan; 7, Boyd. HEN (13): 1, Hamilton, fine heavily var., top qual., nicely padded, dome shaped skull, grand lash, broad entrance, dense back skull, A1 cond.; 2, McLay, fine var., fit condition, close up; 3, Sharp, light var., good qual., fine lofty skull, well clothed, little behind the best; 4, Brown, good useful bird, fine type, feather, rather plainer in appearance; 5, Edwards; 6, Dobson; 7, Govan. CREST CK., 1914 (8): 1, no name, even mkd. B.C., fine headpiece, nice radiation and droop, good spread, well centred, neatly filled; 2, Edwards, cl. body D.C., lovely qual. feather, good headgear, scarcely so well groomed, but press on leader; 3, Sharp, fine green, capital feather and body subs., nice length crest, loses in radiation; 4, Whitton; 5, Tweedie; 6, McClement; 7, no name. HEN (19): 1, Hume, good broken green, good subs., top qual. feather, grand top piece, capital radiation and spread, well laid; 2, Page, even wing D.C., staged in good condition, neat shapely Crest, slightly open in centre; 3, Dobson, good var., nice size and feather, not quite so profuse in headgear; 4, Whitton, good qual. green, close up on 3rd; 5, Boyd; 6, Prentice; 7, Low. C.B. CK. (15): 1, Prentice, grand green, in lovely order, great skull, fine dome shape, well lashed, neat entrance and back, will make a stunner with luck, wins well; 2, Whitton, heavily var., good qual., nice body subs., behind in head; 3, Sharp, broken green in lovely order, feather of fine qual., nice skull and head feather, close up on 2nd; 4, Brown, heavily var., good subs. and qual.; 5, Hamilton; 6, Paul; 7, McLay. HEN (8): 1, Tweedie, broken green, fine size, lovely feather, had been washing when we came across it; 2, Edwards, nice col., well staged, fine skull and lash, might be shade better at entrance; 3, Sharp, var., dark cap, nice feather and subs., good skull and lash, well put down; 4, Paul, broken green, lovely quality feather; 5, McLay; 6, Hamilton; 7, McClement. SELF., CREST or C.B., £2 10s. (7): 1, Edwards, 2, we could not find. C.I (8): 1, Forsyth; 2, Brown; 3, 4, Lawson and Sons; 5, Jeffrey; 6, no name.

THE BORDER FANCIES.

Border Fancies were not so strong as we have seen here, but many that had done battle throughout the season were once more assembled. We were surprised to find a few licked and lightly marked birds in the money, while the classification distinctly mentioned "clear," and there was a class for "fouls, one or two marks."

CL. YELL. CK. (11): 1, no name, little beauty, fine type, style, neat carr., A1 cond., well staged; 2, novice medal, Hume, fine type, neat style, good head, neck, shapely, clean cut, barely so well filled over back, good order; 3, Cook and Adams, good for col. and qual., neat build, nice wing carr.; 4, Edwards, good qual., neat and well braced, fine head and neck, neat front; 5, Bryce; 6, Westwood; 7, Seller. BUFF (16): 1, B.F.C.C. medal, Clark, little beauty, capital feather, neat shapely build, well rounded, clean and neatly braced, in full bloom; 2, no name, grand qual., sweet type, nice build, not just perfect in wing carr.; 3, Bennet, typical build, clean cut, shapely, well staged; 4, Wilson, little beauty, grand type and qual., neat through, very similar to winner, and might have gone up a bit; 5, Hughes; 6, Lunn; 7, Seller. CL. YELL. HEN (8): 1, Bennet, little beauty, staged in the pink, neat type, level col., jaunty cond., neat wings, tail; 2, Cook and Adams, nice qual., good col., neat wings, not so tight in cond.; 3, Hume, surely in the wrong class, grizzle cap, lovely col. and qual.; 4, Clark, deep even col., top qual., fine head and neck, typical, neat through, as good as any in class, should have been 2nd; 5, Cumming; 6, no name; 7, Hutchison. BUFF (12): 1, Wilson, lovely eye tkd. exhibit in the wrong class, capital type, A1 qual., neat, shapely, well staged; 2, Seller, fine type and qual., neat, stylish, barely so perfect in feather, close up; 3, Bennet, sweetly built, taking little exhibit, neat over, in full bloom; 4, Hughes, nice type and qual., neat carr., well staged; 5, no name; 6, Cook and Adams; 7, Bennet. EVEN MARK (4): 1, 3, 4, Wilson, leader nice little specimen, sweet head and neck, nice front and back, shapely, stylish, well braced; 2, McMinn, well known, in nice feather, neat, shapely, clean cut, close up on leader. UNEVEN or VAR. YELL. CK. (3): 1, Wilson, typical, lovely col., grand qual., neat, stylish, well braced, in the pink; 2, Mackay, nicely built, fine type, good feather, not so deep in col., well staged; 3, McDougall. BUFF (6): 1, Bennet, good uneven, fine type, neat shape, top qual. feather, perfect carr., nice taper, stylish, in top form; 2, no name, shapely var., good feather, neatly braced, crouchy and unsteady; 3, Wilson, uneven, fine type and qual., neatly built; 4, no name; 5, McDougall. Hen (11): 1, Clark, uneven buff, in full bloom, full of qual., neat round head, sweet neck, shapely over front and back, well braced, clean cut; 2nd, cinn. mark, fine qual. feather, nice col. and cond., good top end, but not so shapely; 3, Young, good 5-pt., good wing marks, bit too heavy mkd. at eyes, good feather, type and col.; 4, no name, var., cinn. mark, nice type, sweet qual., neat carr., clean build, might have been further up; 5, Hume; 6, Wilson 7, Bennet. FOUL, 1 or 2 MARKS (5): 1, Bennet, grand qual. buff, mkd. both sides of neck, A1 type, neat, proper stamp, clean cut, perfect carr., good through, in lovely order; 2, no name, wing mkd. buff, very shapely, neat carr., stylish, rather flat on top of head; 3, McNicol. CINN. CK. (5): 1, Wilson, well-known Jonque, fine col. and qual., now looking as if a bit over-shown and perhaps a bit lucky to win here; 2, 3, Johnstone, 2nd good buff, nice order, fine feather, well pencilled, nearly built, well braced, staged well, 3rd Jonque, fine col., A1 qual., neat, tight cond., we liked; 4, Bryce, nice ground col. and pencilling; 5, Dick; 6, no name; 7, Whitelaw. HEN (10): 1, Lunn, fine type, sound col., neat pencilling, well staged; 2, Clark, real good buff, in fine trim, frequent winner, first time beaten this season, often described; 3, Bryce, nice buff, fine qual., neatly built, typical, well staged; 4, Dick, good yell., in nice fettle, sound col. and type, neatly pencilled, could have gone up a step with credit. GREEN CK. (9): 1, no name, nicely pencilled, typical Jonque, very dark in ground col., finely moulded, neat carr. and style, well braced, in the pink; 2, Dick, buff, fine tone of col., well pencilled, steady and neat; 3, Wilson, grand col. Jonque, well pencilled, ground col. fine grassy green, nice top end, neat shapely front and body, good wing carr. and style; 4, no name, good qual. buff, nice type, fails wing carr.; 5, 6, Johnstone; 7, Whitelaw. BEN (6): 1, 2, Johnstone, good Jonque, dark in ground col., beautiful distinct pencilling, neat type fine qual., shapely, well braced, top cond., 2nd good buff, neat and good all over, we liked; 3, no name; 4, Robertson; 5, no name; 6, Wilson. SELF., CK. (7): 1, 5, Cumming; 2 no name; 3, Lawson and Sons; 4, Bennet; 6, 7, no names. HEN (6): 1, Bennet; 2, Seller; 3, Robertson; 4, no name; 5, 6, Cumming.

THE YORKSHIRE CANARIES.

The Yorkshire section is still forging ahead, and while the classes are as a rule not very heavy, yet there is an undeniable improvement in the quality. Mr. Heggie put forward a rare team and succeeded in capturing every 1st prize in the section, which means that pluck and energy are required to alter matters. The S.Y.C.C. are doing much to foster and encourage the cult of the variety, and it is to be hoped that their efforts may be the means of stimulating its members to greater efforts, so that the honours may have a wider circulation.

CLR. OR TKD. YELL. CK. (9): 1, 2, Heggie, grand pair, in the pink, lovely qual., capital shape, very stylish, neat, well staged, little to decide between them; 3, Park, good length, nice shape, col. and qual., neat carr., well drawn, little behind either; 4, Smeson, nice type and qual., shapely, stylish, fails at front; 6, Aitkenhead; 7, Cochrane. BUFF (9): 1, 2, 4, Heggie, full of quality, great length, nice type and col., sweet and clean cut, in full bloom, 2nd nice qual., fine type, shapely, well braced, not quite so clean cut; 3, Hirst, in the pink fine col. and type, neat and shapely, steady, fine poser, must have pressed hard; 5, Cochrane; 6, 7, no names. CLR. OR TKD. YELL. HEN (8): 1, 2, 5, Heggie, leader fine exhibit, lovely order, well drawn and neat, clinking qual. feather, shapely neat, scarcely so hot col., but runs well up on leader; 3, Park, fine quality, very shapely, neat, fine style, good poser, clean cut, well staged, fails length only; 4, Macready, rare length, col. and quality, neat and well braced, clean cut and typical; 6, Junor; 7, Eccleston. BUFF (6): 1, 3, Heggie, real beauty, capital type and qual., grand length, beautiful shape and pose, wins well, 3rd good length, hot col., nice qual.; 2, Cochrane, fine type, good qual. feather,

(Continued on next page.)

SHOWS.

(Continued from page 44.)

stylish, well braced, in good order; 4, Macready; 5, Junor; 6, McLellan. VAR. CK. (10): 1, 3, Heggie, leader grand buff, fine length, capital shape, neat, smooth as wax, well staged, steady, 3rd good buff, nice col. and qual., shapely, well braced, just inclined to lift at front; 2, no name, yell., full of Yorks. qualities, rare pos., carr. and style, close run for top honours; 4, Cochrane, fine col., style, and qual., good feather; 5, Whitelaw; 6, Eccleston; 7, Boulett. HEN (5): 1, 3, Heggie, leader capital yell., grand length, very shapely and typical, neat and perfect in carr. and style, faultless order, 3rd fine lengthy buff; 2, no name, smaller built yell., fine level col., neat, clean cut, well braced, we liked; 4, Hirst; 5, Whitelaw. YELL. CK., 1916 (10): 1, 3, Heggie, leader a topper, one of the first water; 3rd neck mkd., grand length, sound col., nice qual. and type, not quite so close in feather; 2, Simeson, grizz. cap.; lovely quality, sweet type, nicely drawn, well braced, not just so hot, in capital order; 4, Cochrane, lengthy, typical and sound in col., fails steadiness; 5, Hirst; 6, Eccleston; 7, Park. BUFF (10): 1, 3, Heggie, leader grand length, sweet type and qual., neat, shapely, well braced, in winning order, 3rd lengthy, nice qual. feather, loses in pose; 2, Macready, real good, close up on leader, except col.; 4, Cochrane, fine col., sweet type and quality, fails in length only, might have gone up a peg; 5, McLellan; 6, Hirst; 7, Junor. HEN (9): 1, 3, 5, Heggie, real good yell. leads, in fine style, good col. and qual., neat, clean cut, well braced, 3rd grizz. wing yell., good length, type and quality, neat and swanky, fails in col. only; 2, no name, capital buff, nice qual., fine length, very shapely, neat, well staged; 4, 7, Park, 4 the grizz cap yell., cleanly built, neat stylish pose, fine carr., well staged; 6, Peters. A.O.V. (3): 1, 2, 3, Adam, all Lizards, we could not follow the judge in the placing, 1st cl. cap Silver, nice type, fails in col. and spanguing, 2nd clear cap Silver, we made an easy winner, nice type and qual., neat, distinct spangling, beautifully rowed, staged in A1 bloom, 3rd broken cap Gold, fine depth of col., neatly spangled, in fine order, our choice for 2nd.

THE MULE AND HYBRID SECTION.

The Mule and Hybrid section is usually a very interesting part of an exhibition, and we venture to say that the collection on view here has not been eclipsed at any of the association's previous events, and it reflected great credit on the fanciers who interest themselves in the cultivation and production of such varied and interesting specimens.

LIGHT MULE (6): 1, Ramsden's spl, Heggie, almost cl. Greenf., in lovely order, well-known face, needs no further comment, often described; 2, McQuiston, clinking jonque even-mark Goldf., great col. and cond., perfect order, well-known; 3, no name, grizz. wing Goldf., lovely feather and cond.; 4, Crone. DARK GOLDF.-CAN. (10): 1, McQuiston, grand jonque, plenty size and subs., great quality and cond., fine blend of col., perfectly staged, steady; 2, Heggie, another good one, fine subs. and col., well up on leader; 3, Crone, not quite so massive, but great col., perfect cond., steady; 4, Gentleman; 5, Nicol; 6, Jeffrey; 7, Arnott. DARK LINNET-CAN. (7): 1, McQuiston, well-known Jonque, great size, capital col., perfect feather, faultless cond., steady; 2, Steel, well up for size and cond., but behind in depth of col.; 3, Heggie, similar to 2nd, follows hard up; 4, Crone; 5, Clare; 6, Nicol; 7, Milne. GREENF.-CAN. (12): 1, McQuiston, well-known jonque, clinker for size, col. and condition, takes a bit of stopping; 2, no name, good jonque, fine col., perfect feather, not so massive; 3, Nicolson, similar for size, perfect feather and steady, not quite the depth col.; 4, Heggie, smaller jonque, fine col., perfect feather, just trifle unsteady; 5, McGilvray; 6, Fyfe; 7, Crone. A.O. CAN. MULE (except Can.-Bulff.) (5): 1, McQuiston, still to the fore with a capital Twite cross, fine size, col. and pencilling, perfectly staged, steady; 2, 3, Crone, jonque Redpoll and jonque Siskin, very interesting exhibits, nice size and col., A1 cond., a credit; 4, Heggie, jonque Siskin, in fine feather, not quite so massive. DARK BULLF. HYB. (including Can.-Bullf.) (7): 1, 2, 3, 4, Crone, magnificent team, headed by his old warrior, Can.-Bullf., in nice col. and cond., but bit lucky to beat 3rd, grand Canary-Bullf., great size, col. and condition, we fancied for easy 1st, will prove a dangerous competitor; 2, topping Redpoll-Bullf., fine size, grand cond., lovely blend of col., perfect feather, very steady; 5, Webster; 6, Macready; 7, Heggie. BETWEEN TWO BRITISH (6): 1, Crone, clinking Chaffinch-Bramble, fine size, grand col., neat, distinct markings, steady, in perfect bloom; 2, Heggie, interesting little cross Redpoll-Goldf., nice size, fine col. and cond., steady, in capital feather; 3, Webster, good Greenf.-Goldf., nice; 4, McQuiston, fine Siskin-Goldf., in lovely order; 5, no name. HEN (6): 1, McQuiston, handsome jonque Greenf., great col. and cond., fine subs., could be shade steadier; 2, Webster, lightly mkd. Goldf., fine size, nice feather and cond., steady, creditably staged; 3, Strachan, dark jonque Goldf., fine size, col. and markings; 4, Dawson; 5, Heggie. SELL. (6): 1, McGillvray; 2, Heggie; 3, Strachan; 4, Fyfe; 5, Smith.

THE BRITISH AND FOREIGN BIRDS.

As usual the competition amongst the Britishers was strong, both in numbers and quality, and it took something really good to capture the plums here even in the most common varieties. GOLDF. (18): 1, McLellan, grand little exhibit, nice col., pure markings, grand blaze, nice moons, pure yellow wing bars, neat buttons, steady, A1 cond; 2, Campbell, good size, fine col., well mkd., in perfect feather, not quite the blaze of leader; 3, Irvine, hard up in subs. and cond., not quite so distinct in markings., steady; 4, Cumming, nice size, col. and cond., fails blaze; 5, Connelly; 6, Stubbs Bros.; 7, Heggie. BULLF. (18): 1, Thomson, not a monster, but for col. and markings a picture, grand feather, A1 condition, very steady; 2, no name, capital cond., grand col., qual., runs close, hard to part; 3, no name, well up for size and cond., not quite the depth of col., still a good one, well staged; 4, Smith, well laid down, behind, not quite so steady; 5, Edwards; 6, Irvine; 7, Brown. LINNET, H.M. (11): 1, 3, McQuiston, leader grand exhibit, in perfect order, fine size, nice nutty col., well pencilled, steady, 3rd nice size and col., neat markings, fails a wee bit in breast col., well staged; 4, Mason, fine Finch for col., good type, well pencilled, inclined to be wee bit shifty when handled; 5 no name; 6, Gentleman; 7, Campbell. F.M. (17): 1, no name, in lovely order, clinking col., sweetly pencilled, neat, steady, perfect feather, one of the best; 2, Campbell, slightly smaller, well staged, nice ground col. and markings, steady; 3, no name, trifle smaller, but fer col. and pencilling not easily beaten, perfect feather; 4, Kerr good ground col. and pencilling, rather unsteady; 5, Crone; 6, Hill; 7, Swan. SISKIN (11): 1, Nicolson, fine jonque, perfect feather, nice level col., good cap, distinct markings, well laid down; 2, Strachan, fine feather, nicely mkd., steady, not quite the depth of col.; 3, Fyfe, good size, col. and cond., rather unsteady; 4, Erskine, in nice order, steady, creditably staged; 5, Connelly; 6, Cummings; 7, Bell. MEALY REDPOLL OR TWITE (10): 1 Fairhurst, good ground col., well pencilled, well staged, in good feather, steady, we have seen larger; 2, Gentleman, Mealy, great size, nice feather and cond., well pencilled; 3, no name, Twite, very similar to leader, little between them, in good order; 4, Craig, nice Twite; 5, Connacher; 6, Webster; 7, Campbell. LESSER REDPOLL (19): 1, McQuiston, regular little beauty, fine col. and tanning, steady, perfect cond., well staged; 2, Campbell, well-known figure, all there for size, col., and markings, close up on leader; 3, 4, Webster, former slightly smaller, but good, neat, 4th good size and qual., neat marks, presses close; 5, Taylor; 6, Mitchell; 7, Brown. GREENF. (25): 1, no name, capital jonque, topper for size and col., steady, well staged, in the pink; 2, no name, good jonque, close up for size and cond., not quite the depth of col.; 3, McLinton, good nat. col., capital order, nice size, fine qual., steady; 4, Gentleman, smaller, but all there for col. and cond., well staged, steady; 5, Webster; 6, 7, no names. CHAFFINCH (10): 1, no name, clinker for size and col., pure and distinct markings, very steady, faultless condition; 2, no name, all there, tight race, in the pink; 3, Eckersley, good, fails cond. and staging only; 4, no name; 5, Brown; 7, Cameron. BRAMBLE (7): 1, no name, an old warrior, nice feather, but not up in col. and bit too fat on chest; 2, no name, capital size, great col. and spangling, faultless condition, steady, we thought an easy winner; 3, Cummings; 4, McLean; 5, Hyslop; 6, Steel. YELLOWHAMMER (7): 1, Arnott, fine size and col., nice cond., rich yellow head and distinct lines, no better seen for some time, well staged; 2, Brown, good size and cond., not quite so clear in head lines; 3, Kerr; 4, 5, 6, Strachan; 7, no name. BUNTING (4): 1, 2, Craig, fine Corn leading, sound col. and spangling, fine size and cond., nicely staged; 2, Ortolan Bunting, nice size and col., perfect feather, steady; 3, McQuiston, Corn, shade smaller than leader, but hot specimen for col. and spangle, fine cond.; 4, McNeillie and Topping. SMALL BRIT. (3): 1, Taylor, well-known Wagtail, perfect beauty, faultless in every detail; 2, 3, Webster, Bearded Tits, in fine feather, well staged. LARGE (3): 1, 3, Smith, capital Waxwing, in lovely feather, nice size, rare col., perfect waxes, 3rd grand Blackbird, sleek black coat, in faultless order, rich orange beak, perky and alert, though steady, well staged; 2, Alexander, good Hawfinch, fine, rich col., beautifully blended, distinct markings. BULLF. HEN (9): 1, McQuiston, good size, col. and markings, well defined dense black cap, neat fitting wing bars, perfect in feather and staging; 2, Mills, nice size, fine depth col., clean distinct markings, deformed toe on one foot, otherwise all there; 3, Crone, fine size, lovely tone of col., perfect feather, might have gone up a peg; 4, no name, good Finch, nice size and cond., just behind in col. SMALL SEED-EATING HEN (13): 1, Webster, fine Corn, in perfect feather, steady, well shown, we should make in w.c., being larger than a Bramblefinch; 2, Campbell, topping Bramble, in perfect feather, steady, we liked; 3, Peters, fine Chaffinch, nice size, sound col., steady, perfect feather; 4, Showler, Greenf., nice size, col. and cond., faulty at front; 5, Mason; 6, Craig; 7, McQuiston. SELL., BRIT. (13): 1, Hyslop; 2, Strachan; 3, Webster; 4, Richmond.

The foreign bird section was, as usual, only patronised by the few leading exhibitors who endeavour to keep the ball a-rolling, without much apparent encouragement, at least as far as competition is concerned. Those who follow in this branch of the Fancy would do well in their own interest if they patronised the classification extended to them and gave show organisers more heart to keep on in the good old way. GOLDF. OR BULLF. (3): 1, Arnott, Rose-wing Bullfinch, very interesting exhibit, staged in capital order; 2, no name, grand Goldfinch, fine size and col., pure markings, great face, nice moons and buttons, well tanned, fine wing bars, perfect feather, faultlessly staged; 3, Campbell, Goldf., close up on 2nd. PARRAKEETS, ETC. (1): 1, Macready. SMALL SEEDEATERS (5): 1, 2, Arnott, Fire Finches and Combasous, little beauties, staged in tip-top order; 3, 4, 5, Park, Cordon Bleus, Waxbills, and Cutthroats, all in perfect order. A.O. SEED-EATER (4): 1, 2, 3, Arnott, Giant Whydah, 2nd Queen Whydah, and Red-headed Bunting, all staged in the usual style; 4, Erskine. A.O.S. (7): All to Arnott, capital team, in the pink, some well-known faces in the lot, and keeping very fit, Yellow-wing Sugar-bird, Gold-fronted Honeysucker, Scarlet Tanager, Chinese Starling, Zosterops, Blue Tanager, and Honeysucker.

BORDER FANCY CLUB.

Second annual show, Dec. 30-Jan. 1, in St. Cuthbert's Halls. The hall is of nice size and has plenty of light from the sides, and the birds were nicely staged. Entries were 30 up over last year; quality was excellent, and contained the cream of the fancy, about the best we have seen for a long time. Patterson cup was won by Mr. H. Brown for most points, also gold medal, open novice, and other medals, having in all for one bird six specials—not bad for a novice. The cup winner is a buff with a grizzled cheek. We must congratulate the management, as everything was worked out to perfection and was a model for some shows. Everyone, from the president downwards, worked with a will. Mr. Jas. Lumsden, pres., Mr. Sam Englas, vice and show manager (a past master at this), committee, Messrs. Aitchison, Bell, Gilchrist, Dewar, Nelson, Stewart, Tod, and H. Watson. Judge, Messrs. McCreadie, Duncan, and Forrest, one and all gave general satisfaction. A bit of smart work with regard to the catalogues was done by the Perth Printing Co.; marked catalogues were for sale, after having come about three miles, within two hours of the completion of the judging.

CL. YELL. CK. (23): 1, Craig, nice size, rare quality of feather; 2, Patterson, nice length of side, rare wings and tail; 1, two spls, 4, Aitchison, rare type and qual., beautiful head and neck, 4th nice size and quality, grand tail, 5, Cook and Adam, grand size and style; 6, Chisholm; 7, G. Bennett; 8, Hughes. HEN (27): 1, 6, Craig, 1st grand size, rare type and qual. of feather, a little flat in head; 2, Sprott, nice size, bolder in head, a little back in qual.; 3, spl, Smart, grand size, rare head and neck, well filled in front; 4, spl, Patterson, well up in size and qual.; 5, Murray, nice size and style; 7, spl, Stewart; 8, spl, G. Brown; 9, spl, Aitchison. BUFF (26): 1, Bennett, grand length, nice bold head, well piped tail; 2, spl, Stewart, much of the same, fails, if anything, in closeness of feather; 3, McRae, nice size, stylish carr., close fitting wings and tail; 4, Crabb and Finlayson, grand size and stamp; 5, spl, Bell, nice size, good head and front; 6, spl, Craig; 7, spl, Bennett; 8, spl, Patterson. HEN (27): 1, 3, spl, H. Bennett, grand size, very shapely, 3rd much the same style., etc., a little loose at flanks; 2, Weir, nice size, well rounded back, short tail and flights; 4, G. Brown, nice size and well tapered body; 5, spl, Murray, well up in size and cond.; 6, spl, Gilchrist; 7, Smart; 8, G. Bennett; 9, spl, Hood. EVEN MKD. (14): 1, spl, 3, spl, Wilson, 1st grand sized buff, rather pale in col., 5th well up in size, eyes and wing mkd.; 2, spl, Patterson, we preferred, even mkd. yell., rare qual., jaunty carr.; 3, spl, Dempster, buff, even; 4, Hutchison, buff, eyes and wings mkd., rare qual., could have gone up; 6, Craig; 7, Docherty; 8, Jamieson. UNEVEN OR VAR. YELL. CK. (19): 1, Nicholson, eyes and wings mkd., a little model, faultless; 2, Patterson, same markings, rare qual., grand tail carr.; 3, spl, Crabb and Finlayson, grand size, rare head and neck, rather open in tail; 4, spl, Rintoul, nice size, yell., eyes and one wing mkd., rare qual. of feather; 5, Sprott, well up in size, rare wings and front; 6, Anderson; 7, spl, Brown; 8, spl, Bell; 7, spl, Smart. HEN (18): 1, Adrian, eye and wing mkd., nice type, rare subs.; 2, spl, Crabb and Finlayson, both eyes and one wing mkd., rare thickness, well rounded back; 3, spl, Rintoul, nice sized var., rather down in cond. and wild; 4, spl, Patterson, wings and shoulder mkd., rare qual., could have gone up one; 5, G. Brown, nice size, might also have gone up; 6, Wilson; 7, Patterson; 8, Sprott. BUFF (21): 1, Rintoul, large sized buff var., we thought of the big side; 2, Patterson, var., grand size, better type, rare subs.; 3, Wilson, eyes and wing mkd., nice size, grand wing and tail carr.; 4, Nelson, both eyes and tick wing, grand size, well piped tail; 5, spl, Nicholson, both eyes and tick wing, grand size, well piped tail; 5, spl, Nicholson, both eyes and one wing mkd., rare style and action; 6, Voy; 7, Alexander; 8, Craig. HEN (17): 1, 2 spls, Crabb and Finlayson, var., grand size, rare qual. of feather, grand tail; 2, Raeside, crown and both eyes mkd., nice size, well filled in neck and front, rare head; 3, Holmes, var., rather long and slim, rare silky feather; 4, Weir, better stamp, nice qual.; 5, spl, Craig, var., nice size, rare qual., grand wings and tail; 6, Aitchison; 7, Espie; 8, Patterson. HEAVILY VAR. (14): 1, spl, Rintoul, grand sized yell. var., teeming with qual.; 2, Hook, grand sized buff foul green, nicely mkd., presses; 3, sp, Patterson, bull var., rare size, well piped tail; 4, Showler, nice size, type and qual.; 5, spl, Darragh, well up in size and condition; 6, Murray; 7, Craig; 8, spl, Patterson. TICKED (17): 1, 6 spls, Brown, buff, slightly grizzled cheek, a perfect model; 2, Stewart, grand sized yell., grizz. cheek, in rare order; 3, spl, G. Bennet, grand size, slightly grizz. in head, carries wings and tail well; 4, Stewart, slightly tkd. on eye, rare qual., close in feather; 5, spl, 6, Patterson, buff, griz. cheek; 7, H. Bennett; 8, Hood. GREEN YELL., SELF OR FOUL (16): 1, Johnstone, grand size, very rich col. and markings; 2, spl, Whitelaw, slightly larger, rare qual., nicely mkd.; 3, Hannah, nice size, rather pale in col. and broken markings; 4, spl., 9, spl, Middleton, nice size, rather wild and crouchy; 5, Lawson and Son; 6, spl, Lmasden, could have gone up easily; 8. BUFF (19): 1, 2 spls, Middleton, grand size, nicely mkd., rather light under; 2, Johnstone, grand size and type, rather pale in col.; 3, spl, Whitelaw, nice size and qual., could have gone up one; 4, Lambie, nice size, well mkd.; 5, spl, Hamilton, grand size and style; 6, Linton; 7, Patterson; 8, Espie. HEN (16): 1, 3 spls, B.F.C. medal, Johnstone, a perfect model in size, col., and markings; 2, Lawson and Son, grand size, rare rich col., grand markings; 3, Montgomery, grand size, not so rich in col., but nicely marked; 4, spl, Greenwell, well up in size, col., and markings; 5, spl, Middleton, nice size and markings; 6, Heslop Bros.; 7, Linton; 8, G. Brown. BUFF (14): 1, Johnstone, grand size, rare col., jaunty action; 2, Lumsden, grand size, rich col., grand markings; 3, spl, Lambie, grand size and markings, fails if anything in tone; 4, Greenwell, rather soft when reporting; 5, D. Hamilton, nice size and col.; 6, McColl; 7, spl, Montgomery; 8, spl, Whitelaw. CINN. (13): 1, Erskine, grand size, nice col., well mkd.; 2, spl, Hamilton, larger, rare markings, could have gone up; 3, spl, Hamilton, grand size and col., rather coarse in feather; 4, Johnstone, grand size and col., good head; 5, Buglass, well up in size, col., and markings; 6, Lambie and Middleton; 8, Whitelaw. BUFF (19): 1, spl, Johnstone, nice model, rare col. and markings; 2, Harper, nice size, rich and silky in feather, well mkd.; 3, Linden, nice size, close in feather, nice tail; 4, Gillies, nice size, colour; 5, spl, Patterson; 6, Lucas; 7, spl, Linden; 8, Clark; 9, spl, Nicholson. HEN (13): 1, Linden, grand size, stamp, and qual., rare markings; 2, spl, Lambie, same stamp and qual., little to choose; 3, Nicholson, nice size, rare bold head and front, rich col.; 4, spl, Buglass, grand size and col., and rich markings; 5, Gillies; 6, spl, Whitelaw; 7, Lunn; 8, Patterson. BUFF (16): 1, 2 spls., McColl, grand size, rich col. and markings, rare head and neck; 2, Hamilton, well up in size, etc., little to choose; 3, spl, W. Hamilton, nice size, rich tone of col., nicely mkd.; 4, spl, Middleton, grand size, col. and markings; 5, Darragh, nice size, col. and cond.; 6, Clark; 7, spl, Nicholson; 8, Linden; 9, spl, Weir. NOV. CK. (26): 1, spl, H. Watson, grand sized buff cl., rare type and qual., nice short wings and tail; 2, spl, Lucas, very sweet buff Cinn., rare col. and markings; 3, McKenven, yell. green, grand size and markings, rather deep in tone; 4, spl, Clemens, very taking yell. variegated, rare tone throughout; 5, spl, 7, spl, Hood; 5th very sweet cl. yell., rich in col.; 6, spl, Munro; 8, spl, McGinty. HEN (21): 1, Lucas, very taking yell. Cinn., grand size, rich col., good head and neck; 2, Wilson, cl., yell., grand size, rich and close in feather; 3, spl, Forman, cl. buff, nice size, close fitting wings and tail; 4, Hood, yell., both eyes mkd., nice style and shape, could have gone up; 5, Anderson, nice sized buff, with foul back; 6, Watson; 7, spl, Munro; 8, Cant; 9, spl, Heslop Bros. SELL., GREEN. OR CINN. (7): 1, Lawson and Son; 2, Linton; 3, Buglass; 4, Linton; 5, Lunn; 6, Nelson; 7, Thomson. CK. (19): 1, H. Bennett; 2, 5, G. Bennett; 3, Patterson; 4, Jamieson; 6, Allison; 7, Williams; 8, Donaldson. HEN (8): 1, H. Bennett; 2, Gilchrist; 3, Patterson; 4, Dimpster; 5, Lawson and Son; 6, Cunningham; 7, Hughes; 8, G. Brown.

CLAYCROSS.

First open show of the Claycross C.B.S., Jan. 13. The large Assembly Room, Angel Hotel, High-st., a room of good size, free from draughts, and fair light. The entry, considering the times and the restricted railway facilities, was a capital one, and upwards of 200 exhibits were staged perfectly. The sec., Mr. F. Harrison, is a worthy official, always on the go, and courteous to the extreme. He was well supported by Messrs. A. Wilson, W. Birchmshaw, W. Evans, and J. Lanckham; all worked with tact and energy.

Colonel Jackson, Claycross Hall, who should have officiated at the opening ceremony, was unable, through unforeseen circumstances, to oblige, but later in the day, he and some of his family patronised the venture with their presence.

Special for best in show went to Mr. H. J. Chick, with his wonderful cl. yell. Greenie-Can., admired by all. Judging was completed by 4 p.m., and the show was well patronised; the management throughout was excellent. Mr. J. C. Barnes (Sheffield) judged, and his awards were well received.

YELL. NOR. (6): 1, he, Vardy, tkd. eye, lovely shape, feather, and col., well up in substance, A1 carr.; 2, Turner, cl., grand shape and qual., good col., very close up; 3, Thomas, tkd. eye, superb feather and col., true type, clean cut away; vhc, Evans; c, Swedley. BUFF (5): 1, 2, Vardy, gems, cl. and mkd., former thickest through rather, in the pink, put down in fine style; 3, Smedley, shapely cl.; vhc, Thomas; hc, Sharman. GREEN, ETC. (3): 1, 2, Vardy, var. yell., and buff green, both magnificent feather and shape, A1 col. and cond.; 3, Evans. YELL. HEN (3): 1, Thomas, noted cl., magnificent right through, takes some "whacking"; 2, Vardy, very cobby cl., not quite the size, but very charming; 3, Turner. BUFF (2): 1, Vardy, cl., smooth as wax, cobby and stylish, nice subs.; 2, Turner. UNFLIG. (4): 1, 2, Vardy, cl. and tkd. head, both superb feather and col., fine subst. and shape, clean cut away, very promising; 3, Turner. BUFF (3): 1, Smedley, shapely cl., well fed and well clothed, good size and carr.; 2, Vardy, check mkd, A1 col. and qual.; 3, Thomas. HEN (5): 1, vhc, Vardy, sweet shape, lovely col. and qual., jaunty carr., nice size; 2, 3, Thomas, both good shape, superb feather, should make up well; hc, Evans. PAIRS (2): 1, Vardy, very massive, short and thick-set cl. buff ck., and a superior yell. green hen, very likely pair, well matched; 2, Bircumshaw, large var. yell ck., capital col. and qual., with a cl. buff hen of true character, again rattling pair. YELL. YORKS. (6): 1, Dykes, mkd. wings and eyes, not a feather wrong, red bot, straight and lengthy, clever legs, full of style; 2, he, Lanckham, wing tkd., very shooty, nicely feathered, well on leg, not far away, in the pink; 3, Green, cl., lovely col. and feather; vhc, Dr. Craig, good one, feeling the cold. BUFF (8): 1, Dykes, mkd. wings and eyes, slashing feather and col., very lengthy, straight as a rush, grand legs; 2, Dr. Craig, lovely cl., wedge shaped, smooth as wax, perfect back, flights and tail, close up; 3, vhc, Lanckham, cl., good pos., nice feather, nice back and wing carr.; vhc, Thomas; c, Elkins. GREEN, ETC. (3): 1, Green, buff var., very straight and showy, tight as box, stands well; 2, Elkins, yell. green, A1 col. and qual., slim and lengthy, close up; 3, Barton. YELL. HEN (5): 1, Dykes, cl., wonderful length, straight, tight as box, superb col., a study; 2, Dr. Craig, cinn. mkd. wings, rich col. and qual., grand outline, good length and well on leg; 3, Beardall and Walker, smart cl., A1 col and qual.; vhc, Lanckham; hc, Barton. BUFF (2): 1, Green, mkd. wings and eyes, nice feather, good length, sweet head, expression; 2, Dykes, mkd. wings, good pos. and length. UNFLIG. YELL. (5): 1, Thomas, thigh tick, tight as a Java, A1 col. and feather, true type, gem; 2, Green, smart cl., capital feather and col., nice pos. and length, close up; 3, he, Lanckham, cl., superb feather; vhc, Elkins. BUFF (6): 1, c, Lanckham, cl., wonderful length, straight as a pencil, tight as wax, promising; 2, Thomas, cl., straight, well on leg, A1 col. and qual., beaten a little in length; 3, Dykes, tkd. wing, smooth as wax, well up; vhc, Green; hc, Beadell and Walker. HEN (6): 1, Dykes, lovely cl. yell., slim and erect, very lengthy, full of style, charmer; 2, Beardale and Walker, mkd. buff, well feathered, stands delightfully, nice length, should make up all right; 3, Thomas, mkd. yell., good col. and feather, nice stand; vhc, Green; he, c, Lanckham. A.O.V. (1): 1, Lanckham, very neat 4 pointed yell., rare qual. and col. PAIRS (5): 1, 2, Lanckham, yell. cock and buff hen, and buff cock and yellow hen, well matched and typical pairs, should produce capital progeny; 3, Green, buff cock and yell. hen, really nice pair, bit wild; vhc, Barton; hc, Elkins. NOR. NOV. YELL. (4): 1, Hawkins, cl., good size, shape and feather, nice col. and carr.; 2, Lycett, cl., shapely, A1 col. and qual., hardly the subs.; 3, Carrington; vhc, Dean. BUFF (5): 1, Hawkins, mkd. head, massive, good shape, full of col., A1 qual.; 2, Lycett, mkd. wing, superior feather and col., shapely, neat carr.; 3, Wilson; vhc, he, Carrington. HEN (6): 1, 2, Hawkins, cl. yell. and cl. buff, both nice shape, col. and feather, well up in size, A1 carr.; 3, Wilson, eye tkd. buff, good feather and col., shapely; vhc, Bircumshaw; he, Carrington; c, Dean. UNFLIG. (5): 1, Turner, buff mkd., capital shape, rare qual. and col., nice size and carr.; 2, 3, Copeland, yell. mkd. and buff mkd., very promising, well shown, in the pink; vhc, Dean; hc, Copeland. HEN (4): 1, 3, Hawkins, yell. mkd. and buff mkd., full of col. and qual., nice shape and size, good carr.; 2, Dean, yell. mkd., shapely, A1 feather and col.; vhc, Lycett. NOV. YORKS. YELL. (1): 1, Sawer Bros., lengthy and straight, capital feather and col., well on leg. BUFF (1): 1, Webster, smooth, good type and length, nervy, shows well. HEN (3): 1, Wilson, cl. yell., stands well, nice length, good feather and col.; 2, Cope, cl. yell., smooth, nice type and qual., beaten in length; 3, Webster. UNFLIG. CK. (6): 1, 3, he, Wilson, cl. yell. and tkd. buff, both capital feather and col., stands well, lengthy, very promising; 2, Sawer Bros., cl. buff, smooth as wax, capital pos., grand wings and tail; vhc, c, Cope. HEN (3): 1, 3, Cope, both cl. yell., lovely col. and qual., capital pos., winner has it in length; 2, Sawer Bros., smart tkd. buff, A1 qual. and col., pressed. GOLDF., ETC. (12): Good class: 1, Leadbeater, grand Goldf., rich col., fine shape, lovely buttons, magnificent blaze, a gem; 2, Chick, Bullie, rare size, excellent col., grand cap; 3, Lilley Bros., Goldie, very shapely, larger than winner, not the richness of col., on body or blaze, yet good one; vhc, Gomersall; hc, c, Alexander. GREENF., ETC. (7): 1, 2, Parlett, Linnet and Greenf., former good size, nice col., shapely and well pencilled, latter good col. and shape, fine subs.; 3, he, Leadbeater, Linnet, lovely col. and feather, neatly mkd., beaten in size; vhc, Lilley Bros.; c, Davies. SISKIN, ETC. (6): 1, he, Parlett, magnificent Twite, rich col., rare shape and size, beautifully mkd., in tip-top form; 2, Evans, Mealy Redpoll, well up in size, shapely, good col. and marks; 3, Lilley Bros., Siskin, capital col., lovely trim, nice cap, good size; vhc, Davies; c, Lindley. A.O.V. (10): 1, 2, 3, Chick, a unique team, Hawfinch, Yellow Bunting, and Corn Bunting, a trio well known and hard to beat, credit to owner; vhc, Parlett, hc, Smith; c, Lilley Bros. HEN (4): 1, 2, 3, Chick again with "right 'uns," Hawfinch, Corn Bunting, and Yellow Bunting, all in the pink, put down in style; vhc, Evans. SOFTBILL (2): 1, Chick, gem of a Wheatear, not a feather wrong. FOR. (1): 1, Gomersal, Cardinal, in nice order. MULE (7): 1, 2, he, spl, best in show, Chick, the noted cl. yell. Greenf.-Can. leading, followed by a grand tkd. but (same persuasion), a brace of "knocks-out"; 3, vhc, Parlett, dark yell. Greenfinch, the old warrior, wears well; c, Smith. SELL. (1): 1, Parlett. MEMBER. YELL. (3): 1, Goddard; 2, Smithan; 3, Evans. BUFF (6): 1, Evans; 2, 3, Goddard; vhc, Lunn; hc, Turner; c, Smitham. HEN (7): 1, Smitham; 2, c, Lunn; 3, Turner; vhc, Evans; hc, Goddard. UNFLIG. (4): 1, 3, Goddard; 2, Smitham; vhc, Storer. HEN (1): 1, Turner. PAIRS (2): 1, Smitham, 2, Turner. YELL. YORKS. (2): 1, Goddard; 2, Wilson. BUFF (1): 1, Goddard. HEN (1): 1, Goddard. UNFLIG. (4): 1, 2, vhc, Goddard; 3, Wilson. BRIT. (5): 1, 3, vhc, Evans; 2, Storer; hc, Storer. MULE (2): 1, 2, Evans.

HEALTH & STRENGTH

Deals with all kinds of athletics, including Foot ball Wrestling, Boxing, Weight Lifting, Fencing Running, Ju-Jitsu, Gymnastics of all kinds. Swimming, &c., &c. Gives free advice on all questions of Health, Diet, &c. to all readers EVERY THURSDAY, 1d. Sold Everywhere. Get a copy to-day, or send for Free Specimen to "Health and Strength," Windsor House, Kingsway, London.

Queries Answered

For Rules see January 13 issue.

CANARY QUERIES

Answered by CLAUDE ST. JOHN

EFFECTS OF STEEL.

Novice, Sicaford.—The effect of tincture of steel on birds is that of a rather strong iron tonic. It tones up the system, especially the digestive organs, increases the appetite, assists materially to tighten the plumage, and to stop the dropping of feathers when birds are perpetually moulting. On account of its tendency to stop moulting it is not to be recommended during the early stages of a normal moult, but after the birds have ceased dropping feathers and are getting fine in feather again, four or five drops, not more, added to the water two or three times a week helps considerably to tighten the plumage, especially when the birds show a tendency to remain slack. It is best to use it only in the small quantities named, as it gives a very hard taste to the water, which causes many birds to utterly reject it in any but these minute quantities, and to add a little too much is to defeat one's object, as the birds drink so much the less.

THE NORWICH TOUCH.

W. Coulson.—No. I would not advise you to mate the young cock, which is a second cross from the Norwich, with an exceptionally small Border hen just because it happens to be a little on the large side. Seeing you have taken an outcross and there is no question of any inbreeding among the parents, you could not do better than mate this cock back to its own mother, particularly if she has good typical Border qualities, and is of fair average or moderate size. This inbreeding would have quite sufficient effect in tending to reduce the size of the young. Otherwise, supposing this hen is unsuitable in other respects, a medium-sized hen of good type will give you better all-round results than you would get from introducing an exceptionally small hen.

PLUCKING ITS FEATHERS.

T. A. A.—In the first place, you should well examine the cage to see if it is infested with red mites, and the bird, under the wings, round base of neck and root of tail, to see if any grey lice are present. In either case you must exterminate these pests as a first step. You will find full details for doing this in many rather recent replies. Next see that the bird is not exposed to direct cold draughts, nor to sudden extremes of temperature, and do not hang it near or over a burning light in the evening. Give a staple diet of three parts canary and one part summer rape. In addition, give separately every third day a piece of bread the size of a hazel nut soaked in cold milk, drained, slightly dusted with flour of sulphur, and then sprinkled with soft sugar. On intervening days give first a piece of banana, or boiled or raw carrot, and a pinch of maw seed, and next a half teaspoonful of a mixture if equal parts hemp, niger, white millet, teazle, linseed and broken groats. Every second day for a week add to the drinking water ten drops of lemon juice and as much Epsom salts as will cover a sixpence, then miss a week and give it again for another week. After this you may give 20 drops of Chemical Food daily for a week to complete the treatment.

SUBSTITUTE FOR EGG FOOD.

E. J. A.—There are several quite good substitutes on the market, but I cannot, of course, name them here for obvious reasons. You should keep an eye on our advert. columns under the heading Foods, and also read up a little of the correspondence and articles which have appeared and note when and in what proportion of cases these advertised foods have been used successfully, and then judge for yourself how to choose. A very good and easily made substitute, but which does not eliminate the egg entirely, consists of a mixture of 1½ lb. of maizena wafer biscuits crushed, or ground in a seed mill, and ½ lb. of desiccated egg yolk added and thoroughly blended with it. Keep in air-tight tins, and when required for use take the quantity needed for immediate use and slightly damp it to bring it to a crumbly state with a few drops of water. Apart from this I would advise you to get a copy of the 1916 "Cage Birds Annual," in which you will find the question of substitutes dealt with fully, and also a copy of the forthcoming 1917 "Annual," where the subject will be again dealt with from a present-day point of view.

PROTRACTED MOULTING.

John Ashbrook. A regular diet of canary and hemp is by no means a suitable one for a Canary. Give a staple of a simple mixture composed only of three parts canary to one part summer rape. In addition to this give for the next month every third day a piece of bread the size of a hazel nut, soaked in cold milk, drained, two drops of cod-liver oil emulsion on it, and sprinkled with soft sugar. On the intervening days give first a morsel of banana, or boiled carrot, and a pinch of maw seed, and next half a teaspoonful of a mixture of equal parts hemp, niger, white millet, teazle, haseed and broken groats. Stop giving saffron in the water, and give instead six drops of tincture of gentian and four of tincture of steel every second day for a fortnight. If the feathers have not ceased dropping by that time stop the drugs in the water for a week and then give again in every alternate week until the moulting is quite stopped. See that the bird is kept in a fairly equable temperature, not necessarily overheated, and see that it is not exposed to direct cold draughts or sudden extremes of temperature.

YELLOW OR BUFF, ETC.

E. Warner. (1) The bird that is a pale lemon colour is not necessarily either yellow or buff. To distinguish a yellow from a buff you must examine the smell body feathers, especially those of the saddle, breast and neck. In a yellow you will find that the colour, whatever the tone may be, is solid and runs right to the tip of the web of the feather, whereas in a buff the extreme tips of the webs are white, the colour of the body of the feather stopping a little short of the tip of the feather. These whitish tips give the bird the appearance of having its plumage frosted or powdered over with a white meal. Thus a yellow is a solid yellow tone, deep, warm, or pale, as the case may be, whilst a buff, which may have the same depth of colour, shows rather a ground colour of yellow with a whitish bloom on the surface. (2) As regards suitable mates for your birds, seeing you are quite a beginner, you would be well advised not to get too many irons in the fire the first season, and I would therefore recommend you to leave the Muling alone this season at least. If you are anxious to try for pure Yorkshires, then get a pure Yorkshire hen for the cock, and of the opposite colour. Thus, if you find that the cock is a yellow, get a clear buff to mate with him, and vice versa, and the hen should come from a green marked strain, not from cinnamon-marked birds. If it is also bred from two rears, it will be so much the better, as the cock possesses some marking that will be rather hard to get rid of in the young. The hen should also compensate as far as possible any typical faults of the cock. You should also get a clear pure Roller cock to mate with the Roller hen, a yellow or buff, as may be required, to give the opposite colour to the hen, and you might mate the cross-bred hen with a second pure Roller cock to breed good quality songsters. If you are not particularly keen on keeping the Yorkshires pure you might with advantage mate the Yorkshire with the cross-bred hen, to increase the size and improve appearance of the cross-bred songsters, training the young cocks under the pure Roller cock. The two strains, pure Rollers and either pure Yorkshires, or the cross-breds for songsters, would be quite sufficient for you to devote attention to in the coming season. (3) Yes, the original Roller hen will be quite suitable for mating in the coming season to a pure Roller cock to breed pure Rollers. (4) It would be better for you to use the young cross-breds as indicated above, and leave Muling alone for the present.

SOME IMPROVEMENT.

E. R. N.—You ought to have repeated full particulars, or at least given a clear reference to my last reply, as I cannot decide which reply was for you, nor remember the details of the previous query. Still, as the bird has made some progress, go on with the treatment previously recommended, and see that the exciting causes of the condition, which were probably indicated in the former reply, are eliminated as far as possible. Keep the bird in a fairly warm and equable temperature. Meantime write again in the course of a week or so, and give the necessary particulars, when I will advise you further.

VARIOUS TOPICS.

G. H. M.—(1) When running one cock with two hens the proper time to remove him from the first hen is when you are returning the eggs on the evening of the third day for the hen to commence sitting. If not then removed he should certainly be taken away as soon as the clutch is complete and the hen has settled down to sit. But the time first-named is better. You should also take him away from the second hen at the same stage, and as it will probably be too early for him to be returned to the first hen, you should then cage him alone until hen No. 1 is ready for him for the second brood. Then you repeat the same tactics when the hens are going to nest with the second clutches. (2) The open ring is simply a kind of private identification marking of the breeder to trace the parentage of the bird by entering the number on the ring in a stud book for reference at any future time. It has no other value than to enable the breeder to identify the bird and trace its pedigree in his books. The closed ring is one that can be put on only when the bird is a few days old, and can never be removed without injury to the bird or spoiling the ring. It is therefore a permanent mark of identity which is recognised by specialist clubs to enable the birds to compete for certain club prizes, limited to members, etc. It is a safeguard from some forms of fraudulent competition, and has the same use as a mark of identification as the open ring, plus its permanency and the advantages of club recognition. (3) The cages you describe appear to be the modern type of double breeding cage. If you use well-slaked lime for the preparation, and allow the cages to stand a few days after drying before placing the birds in them, there can be no objection to you doing them over again with limewash. There would be practically no risk of the birds' eyes being injured on this account. But why not do them with whiting with a pinch of size added to make it adhere better? This is free from even the suspicion of injuring the eyes of which you have heard, retains its whiteness longer than limewash, and it costs not more than three or four coppers to do several cages.

WILL NOT BATHE.

Miss Yates.—You might try offering a bath in a shallow earthen saucer of a dark colour, such as a flower-pot saucer, standing it on the floor of the cage for an hour three times a week, and drop a morsel of some green salad in it or a few grains of hemp, to help to entice him to go into it, when he may gradually take to it and enjoy using it whenever offered. This would help to keep him clean when he was once made clean again, but would not remove the unsightly grime of the smoky atmosphere. The only thing that could do this now is to hand-wash the bird, which is a perfectly safe operation, but needs a little skilful handling. If you have never seen it done I would advise you to get a fancier friend to wash it for you as an object lesson, which you might repeat if necessary in future. This would be quite your best way out. Beyond this only a complete moult will restore its former spotless condition.

BRITISH BIRDS, MULES AND HYBRIDS

Answered by H. NORMAN

BREEDING HYBRIDS IN A ROOM.

T.B.M., Leeds. When one goes in for Hybrid breeding it is not desirable to have true pairs of birds in the same aviary, because the hen birds will be sure to want their proper mates as partners, and the young would simply be true bred Britishers. When reading the detail of the collection you have, it seemed to me that you hardly realised the above. Now, to breed Hybrids you will have to keep out one bird of most of the pairs you have, so I would advise you to put in the following: Two of the tamest of the hen Linnets, one hen Bullfinch, and three hen Canaries. With these put in the cock Goldfinch and the cock Greenfinch, and procure another Goldfinch to add to the number. You could also let the cock Redpoll go in as well. I would advise you not to trouble about any more, for if you overcrowd you are less likely to be successful. Get a couple of good faggots of birch branches and put these in the most secluded corners of the room. Hang up plenty of nesting boxes, pans and small cages, or even flower-pots, partly filled with moss, and supply an abundance of nesting material during the summer months.

BREEDING IN CAGES OR AVIARY.

New Starter. You ask if you shall try your breeding operations in the aviary or have the birds in cages. Comparing the two ways, cage breeders, as a rule, are more successful. In cage breeding one has more command over the birds, which is a big item in many ways, but of course it means more work, but on the other hand individual attention frequently ensures success. Why not turn four hens into the aviary and have a couple of pairs of Canaries, or two hens and a cock bird in cages? If you do not care about breeding Canaries you could run a Goldfinch with the two hens, and these might assist you in rearing anything choice you get in the aviary. I would advise the following for the aviary: two hen Greenfinches, one hen Bullfinch, and one hen Linnet, and with these two healthy cock Goldfinches. Get the hens as tame as you can; for this purpose you had better keep them in cages for a few weeks, and hang them near you. Then about March put them in the flight and let them have it to themselves for several days before introducing the Goldies. You should fit the interior up with natural branches, furze and heather. Put these in clumps in the corners, or suspend them near the roof, and get some old Finch nests and place in among it, with plenty of moss and cow-hair. I would advise you to get our book on the "Secrets of Hybrid-breeding." It will interest you and give you many useful tips.

BIRD FOR SONG.

J. L. Preston.—You will find Canary Mules make excellent songsters, and some of them are quite hand-some birds. If you have one or two good hen Canaries you should procure for them a cock Goldfinch or Linnet. You had better have a cock bird for each hen, and introduce them to each other during the next two months, and then at the end of March or beginning of April put them together in the same way as you did your Canaries. The cock bird should be shut off from the hen in the evening when you are expecting her to lay, as some of them are not to be trusted with the eggs. He should also be shut off when she is sitting. Rear and treat in much the same manner as you did your Canaries, but be gentle with them, as the young Mules are likely to leave the nest rather early if they are frightened, and the longer they can be kept in it the better they thrive.

VARIOUS QUESTIONS.

B. Malkinson. You have omitted to send your address with queries; will you please send it to us on a post card? You had better put in your aviary both the cock Goldfinch and the Linnet, with the Greenfinch hens; if the Linnet refuses to pair, probably the Goldie will do so with the two of them, which would be even better, as the Linnet-Greenfinch Hybrids are not thought much of. The Greenfinch cock will be all right to pair with the hen Canaries; run them together for an hour or so occasionally, as Greenies are sometimes a bit spiteful. I expect your cock Canary has developed soft moult; if he is still resting feathers you had better cage him up and keep him indoors, giving him a little soft food occasionally, some mixed seed and a small spoonful of chemical food in the drinking water; boil the water first or it will not mix. Hen Canaries are generally ready to nest in March or April, but so much depends upon climatic conditions; those kept in a warm room are ready before others kept outside.

PAIRING LINNET WITH CANARIES.

O. C. T.—Let your Linnet fly with the Canaries, as they appear to agree together, and when the hens show signs of nesting—which will probably be at the end of March, shut them off in the end compartments of your cage. You will probably notice that the cock Linnet will show a preference for one of the hens; this is the one you must run him with when she is ready. After she has laid, and is sitting, you can try him with the other one, but as a rule a Linnet will not pair with more than one hen. As cock Linnets are not expensive birds, I would advise you to get another, you would then stand a much better chance of being successful with both hens.

HEN GOLDFINCH MULES.

Brythorn.—You cannot decide the sex of your Mules by the yellow or buff theory. A cock can be either, and so can a hen. If your bulls are cock-birds they should be breaking into song by now, if they are healthy and well fed. (2) You could try the hens as foster-mothers by pairing them with a cock Canary, removing the eggs, and replacing them with others, but you should not do it unless you are certain that your Canaries are bad feeders. All hen Mules cannot be relied upon to act as one would wish.

TRYING FOR RARE CROSSES.

Goldfinch-Chaffinch.—It is impossible to say if a certain bird will go to nest. Captive birds are constantly behaving in an unexpected manner, and all you can do is to give her every attention and feed well, especially upon natural food, including insects, ants' eggs (live on s, if possible), and such food. Get the booklet on the Chaffinch, price 2½d. post free; this will assist you in feeding. (2) You would stand a better chance of success with a hen Greenfinch for your cock Chaffinch, but there is no reason why you should not try the Bullie if you have one. As to the fertility of the eggs, it is impossible to say, because the large majority of eggs from pairs put up for hybrid breeding are infertile; if this were not the case, Hybrid breeding would be simple. If you breed Goldfinch-Bullfinch Hybrids last year I would certainly advise you to keep the parents together another year, such birds are valuable, especially if large and of good colour.

FOREIGN BIRDS.

Answered by WESLEY T. PAGE, F.Z.S.

PULLING OUT ITS TAIL FEATHERS.

M. Dunstable. The bird's dietary is satisfactory, but the seed mixture would be better a little more varied. Try it with the following: One pint each canary, sunflower, oats, and monkey nuts; half-pint each hemp, safflower and dari, the whole to be well mixed. If it will eat this mixture the cure will be more hopeful. Of course, if it refuses to eat any of the above seeds, then these must be left out when making up a fresh lot. Give it a cooling laxative in the drinking water -one teaspoonful of Dinneford's Magnesia is about the best—every fourth day, and continue this so long as the veidings are not watery loose. Unfortunately, many of the most intelligent talkers develop the annoying vice—for it is a vice in many cases—of feather pulling, and too often they cannot be cured of the habit. It is mostly when they are unoccupied or left alone for a time that they indulge in the vice. Keeping them interested and occupied, and in a room that is used the whole day, so that there is plenty to attract and entertain them, often does much to mitigate the evil. Do not omit to keep "Parrot grit," and cuttlebone continually in the cage, also chunk of wood for it to exercise its mandibles upon. To guard against parasites, spray him once a week with a tepid dilute solution of quassia, oftener as the weather gets warmer. Report progress about six weeks hence.

TO GO WITH BUDGERIGARS.

F. Woolf. I am assuming that your cage or aviary is kept in a room, also that you want variety rather than breeding, as I am afraid your small aviary would only accommodate two pairs with any chance of breeding luck. If you merely want a pleasing selection of birds to pet, admire and get entertainment from, then you could put in 12 birds of Budgerigar size, or 1s to 1s of the size of a small Canary, providing the cage is cleaned daily. Scarcely any birds are inexpensive nowadays. If you want to try for breeding, then put in a pair of Madagascar Lovebirds to run with your Budgerigars. My chief difficulty in giving you a series is that in such a small aviary Budgerigars are rather dangerous to Finch-like birds. Here are two selections merely for ornament and interest: (1) Green and Yellow Budgerigars, Madagascar Lovebirds. Cocks: Red-crested and Green Cardinals, Grenadier and Rufous-necked Weavers. (2) Yellow Budgerigars, White and Grey Java Sparrows, Red-crested Cardinal, Grenadier, Crimson-crowned, Half-masked, Orange, Red-billed, and Napoleon Weavers, Magpie Mannikins, and Red-headed Finches. Of course, where birds are kept merely as pets and in small quarters, it is not necessary to have pairs. All cocks often make a more amicable party. As regards price and procuring them, you will gain both by a study of our advert. columns, and you must seize the opportunity for acquirement as they are offered.

ZEBRA FINCHES AND BUDGERIGARS.

Esperance.—In my previous replies I had made it quite clear that there was a risk in keeping Zebra Finches and Budgerigars together, but that I did not think it was a heavy one in your case if the quantities named were not exceeded. While replies are of general interest, it must be borne in mind that these replies are governed by each individual query. The Zebra Finches ought to breed in a Crystal Palace type cage (about 30 inches), and you can easily guard against draught by having a sheet of glass in a light wood frame made to hang over front of cage that faces window. Then your birds should be quite safe there. If you decide to keep them with the Budgies, then you must not put them out till April or May, and they would probably then go to nest at once. Neither you, I, nor anyone can warrant any pair, even old birds, of Budgies to go to nest at once. Speaking generally, they ought soon to do so, but your own experience has taught you the exceptions to this rule. Personally, I should keep the young hen and be content to wait till she went to nest, and my desire would be for her not to go to nest before the middle of the season, as this would be of benefit to her and also the future progeny. If you keep her, put her in the aviary, as already dealt with in former replies. No birds that have been housed in your kitchen must go out before April. A small travelling cage, with the wire pulled out, makes a good nest receptacle for Zebra Finches, as also does a coconut husk. It will be sufficient to clean them out after brood has flown, and also each spring and fall. Avadavats and Zebra Finches will agree together.

COCKATOO WITH SLIMY MOUTH.

Daisy Carter.—Your Roscate Cockatoo should not have "slops," and if it is still eating seed freely I should stop the slops at once; but it must have enough to eat and, if need be, the "slops" can be left for gradual lessening, but the bird is better without them, though it is not safe to make sudden dietary changes. In addition to seed, your bird can have ripe fruit (e.g., sweet apple and banana), biscuit, stale crusts, nuts, and a little plain cake daily. A piece of raw carrot occasionally. Cuttlebone and "Parrot grit" should be continually in the cage, also a chunk of wood for it to exercise its mandibles upon. Give the bird a little honey and borax daily, either direct to the mouth from the end of a small stick or brush, or thinly spread on bread, biscuit, cake, or anything similar the bird will eat. Put one teaspoonful of fluid magnesia into its drinking water every fourth day, and on the intervening days well colour the drinking water with chemical food. It would certainly tend to the bird's general well-being if it could be allowed to take a little exercise outside its cage daily. It will need treating as above for some little time. Report progress about a month hence.

POST MORTEMS.

Mr. G. Yates, M.R.C.V.S., [illegible] age Road, Harrow, Middlesex, will examine and report upon dead cage birds for a fee of 1s. 6d. each bird; for reply direct, 2s. 6d.; analysis, 21s. The Post Office regulation is that bodies of birds must be sent at the letter rate of postage, and must be packed in hermetically-sealed receptacles which must themselves be enclosed in strong wooden, leather, or metal cases. If this regulation be infringed the packets may be destroyed by the authorities. **Any bodies sent to the office of this paper will be thrown away, and** if a fee is enclosed the loss will be the sender's.

Jungle.—Canary died of acute enteritis or inflammation of the bowels, probably caused by the recent spell of cold weather. It was in excellent condition and otherwise quite healthy.

GENERAL.

Answered by THE EDITOR

THE TICKED BIRD QUESTION.

F. Jones, and some others.—While our columns are open to any letter which will further the discussion, we have no room for letters which contain only personalities, and which therefore cannot help in the desired direction.

THE MAGAZINE "BIRD NOTES."

C. W.—"Bird Notes," 1/6 monthly, is published by the Avian Press, Ashbourne, Derbyshire.

WILD BIRDS AND BIRD PROTECTION.

A. Worthington.—Fully to answer your questions would necessitate occupying more space than we can possibly spare. Further, a short reply to similar questions was given under General Queries in our issue of Dec. 30, which kindly see. Shortly, we would say that in our opinion the catching of a few hundreds, or maybe a few thousands, of birds of the kind mentioned by you makes no difference at all to the bird population of our country. They are already so numerous that they must perish by hundreds of thousands every year, or they would soon exist in myriads. Nature is responsible for this, and the puny efforts of man in catching a few for keeping in cages makes no appreciable difference. The only possible exception is in the case of the Goldfinch, for this bird would never increase to the extent of becoming a nuisance in our country. It is already protected all the year round in nearly every county in England, and yet does not increase in numbers.

(Advertisements continued from page 39.)

CANARIES—all Breeds

Mules and Hybrids, British and Foreign Birds, also talking Parrots; best prices given. State what you have for sale to—

WALSH, Bird Specialist, Blackburn.

BE PATRIOTIC!

A POSTCARD only.—You cannot hold your own in life's battle if weak, worn, or easily jaded. Periodical attacks of moodiness, languor, despondency, depression, and groundless fears mean nerve troubles, and lead to brain fag, impaired memory, and unfits one for study, business, or pleasure. The chosen ones in every walk of life are the alert, the bright, the intelligent, Nature's natural gift, but marred for lack of a little knowledge. A postcard to the Useful Knowledge Publishers, P.O. Box 94, Bradford, will put you in possession of a 48-page book, neatly bound, of valuable information, and will be sent post paid, free of any charge whatsoever, if you mention "Cage Birds." A little knowledge saves much medicine. (778)

SACRIFICE good double barrel gun, no further use; accept £4; letters answered: Officer, Police Station, Steens Bridge, Leominster. (781)

HEALTHY cock Goldfinch, perfect condition, 4/9; .22 repeating rifle, 29/6; Edward II. silver penny, 1309, 8/6: Hubbard, North Kilworth, Rugby.

GENT.'S bicycle, full size, new outer covers, new inner tubes, never been used, 30/-; bargain: Duckworth, 18, Marlborough-st., Burnley. (777)

FOR sale, as a going concern, "Dunn's" Bird dealer's business, stock and fittings, cheap; good return; owner going abroad.—Apply, Dunn, 25, St. Andrew-st., Aberdeen. (780)

"BIRD Stuffing and Mounting," illustrated, 1/2; "Animal, Fish and Reptile Stuffing," 1/2; "Egg Collector's Guide and Calendar," 1/2; 2 drills and blowpipe, 1/2: J. Davis, Naturalist, Dartford. (776)

SECRETS
of Famous Canary Breeders
YOURS for only 1/- down

Judging the position of a bird by the clock.

HOW well-known Canary Fanciers bred their prize-winning birds—birds literally worth their weight in gold—how they trained them—the foods used. All this priceless information and much more is clearly given by the Breeders themselves in this splendid Canary Book. Every page—every line—is full of the *practical experience* of practical men—experts in their line. Fanciers who have specialised in Lizards give valuable information. Breeders of famous prize-winning crested varieties contribute to its 380 pages. Every feature of Canary Breeding and Exhibiting is clearly and fully dealt with—you have only to glance at the comprehensive index to turn up the information you desire.

The book contains 133 illustrations, a few of which are here reproduced. Thus, "Our Canaries" not only *tells* you but *shows* you. If you are a novice, or breed only for pleasure, you will be delighted with the increased enjoyment which the book will enable you to derive from your hobby. If you are an "old hand," or breed for profit, it will help you to *increase* profits.

"Our Canaries" will be sent you for Free Examination—Approval for a deposit of only 1/-. If, after examination, you return the book, your deposit will at once be refunded. If, however, you decide to keep the book, you can pay the balance by easy monthly instalments. Thus you have everything to gain and nothing to lose by sending for a copy. Do so TO-DAY

YORKSHIRES OF THE YEAR.

The two fine Unflighted Yorkshire Canaries here shown are the property of Novice Canary Breeders. Each won 1st Prize in its class at Birmingham Show. The one on the left, owned by Mr. W. O. Pritchard, Wolverhampton, stood 1st in the class for Unflighted Yellows, and the other is the winner in the Buff Class for Mr. W. C. Clarke, Smethwick.

F. CARL, Publisher, 154, Fleet Street, London, E.C.

Advertisement Charges.

One Halfpenny for each word up to 43, 1d. per word afterwards. Name and address to be reckoned. Minimum, 12 words 6d.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together, and are charged at two words a penny up to 48 words; after that 1d. per word. No single advertisement, even if accompanied by others, will be charged at less than the minimum price, viz., Sixpence.

Headlines or Footlines, 9d. 1/-, 1/6, 2/-, 2/6, according to size.

The rate for displayed advertisements is 7/6 per inch. Rates for a series on application.

ADVERTISEMENTS UNACCOMPANIED BY CORRECT REMITTANCE WILL NOT BE INSERTED.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL.

The Proprietor reserves the right to refuse any advertisement, or to cancel any advertisement ordered for a series, at any time, without assigning any reason for so doing.

Advertisements must in all cases bear the bonafide name and address of the advertiser, and no advertisement will be inserted if addressed to a receiving place, or similar place of call.

Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

ALWAYS USE "CAGE BIRDS"

DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor of the *bona-ides* of either buyers or sellers In all transactions the adoption of our Deposit system should be insisted upon

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from both parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has not been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty-eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit will be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion. The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient plus the extra postage incurred has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

NOTICE TO BIRD PURCHASERS.

It is advisable that all newly-purchased birds, especially foreign birds, be kept isolated from established stock for a week or ten days, until by their condition they establish the fact that they are thoroughly healthy.

KNOWLEDGE IS POWER.

You can get it in 6d. Vols.

READERS of "Cage Birds" can to-day secure at pre-war prices volumes of the well-known **"Everybody's" Series.** Each volume is, on its particular subject, the handiest and best book obtainable. Although small enough to fit one's pocket, each book is packed with a vast amount of valuable information. Consider the wonderful price—only **6d.** each (8d. post free), strongly bound in cloth; in attractive leather binding, **1s.** each (1/2d. post free). The number of these books is very limited, and owing to the enormous increase in the cost of printing and paper, it will be impossible to reprint them at present prices. There are sure to be some of these books that YOU need—some that will give you just the information you have been seeking on some knotty point. Send in your order **NOW.** It is only necessary to state the *Number* of each book as given opposite the name in the list shown here.

1. Everybody's Guide to Poultry-keeping.
2. Everybody's Guide to Carpentry and the Doing-up of the House.
3. Everybody's Home Dressmaker. (7d. only.)

Champion YORKSHIRES & NORWICH

Bulldog Strain.

NOW IS THE TIME TO PROCURE YOUR BREEDING STOCK, to ensure getting the best birds, and to get them settled in their new home before pairing up. I have an enormous stock of all varieties on hand, and, having almost finished my export trade for this season, I can now concentrate my attention to the requirements of the home trade. My long experience as a breeder and exhibitor, and the large stock of birds I have to select from place me in a position to send you just such a bird or birds as you require. As regards the quality of my stock, it is surely sufficient to refer you to the reports of all the leading shows, from which you will find that both my **Yorkshires** and **Norwich** are not only maintaining but adding to, their great reputation. In addition to this, I have sold several birds that have won leading honours at all the principal shows. Kindly write, stating wants. I am now offering a limited number of grand stock and exhibition birds, either Yorkshires or Norwich, which I can guarantee as bred from my own **Bulldog Strain**, at 20/-, 25/-, 30/-, 40/-, 50/- each, cocks or hens. Also a few grand matched pairs at 40/-, 45/-, 50/-, 60/- per pair upwards. These are splendid value, and have only to be seen to be appreciated.

I have also a grand selection of stock birds from other well-known strains, as follows:—
YORKSHIRE COCKS, grand lengthy birds, in full song, 15/-, 17/6, 20/-, 25/-, 30/- each, upwards.
YORKSHIRE HENS, smart, racy, typical hens, 7/6, 10/-, 12/6, 15/-, 20/- each, upwards.
MATCHED PAIRS, 20/-, 25/-, 30/-, 40/-, 50/-, 60/- per pair upwards.
NORWICH PLAINHEADS. Grand, thickset, cobby birds at same prices as Yorkshires.
BORDER FANCIES, Real good birds, both for stock and exhibition. **Cocks**, 12/6, 15/, 20/-, 25/-, 30/- each. **Hens**, 6/-, 7/6, 8/6, 10/- each. **Matched Pairs**, 17/6, 20/-, 25/-, 30/-, 40/- per pair.
CRESTS AND CREST-BREDS.—A few real good pairs at 30/-, 40/-, 50/-, 60/- per pair. Odd birds, Cocks or Hens, at proportionate prices.

ROLLERS. ROLLERS. ROLLERS.

I have a magnificent collection of pure British Rollers from the best and purest strains, at following prices:—
HIGHLY TRAINED COCKS, 20/-, 25/-, 30/-, 40/- each.
PURE-BRED HENS, 6/-, 7/6, 8/6, 10/- each.
MATCHED FAIRS, 25/-, 30/-, 35/-, 40/-, 50/- per pair.
Travelling Cages, 4d. extra in all cases.
One word more—**Please remember, I invite you** to come at any time and make your own selection, but if you cannot come, **Don't Forget** that I send every bird on 7 days' approval, at my sole risk. I personally select every bird that is sent away. I have over 4,000 (four thousand) birds in my rooms at the present time to select from, and I guarantee to give absolute satisfaction to every customer or return cash in full. Terms: Cash or deposit with Editor.

Send for 1917 Price List.

JOE THOMAS,

Breeder, Exhibitor & Exporter, AMBLER THORN, HALIFAX, YORKS

(789)

3 POINTS OF MINE:

QUALITY—
VALUE—
QUANTITY to Select from

Make Your Breeding Pay in 1917.

This you can do if you only pair up right; or if you want to purchase pairs, leave it to me; for it is no trouble to me to produce documentary proof that the foundation of many past and present exhibition studs have been laid by birds purchased from me. Great value for money is my forte. I herewith give a few prices of exceptionally good

Norwich Plainheads & Yorkshires.

You may have all the so-called strains and bogus pedigrees in the world, but you cannot purchase better blood than I now hold, and I am certain you cannot procure the same value. Cocks, 15/-, 20/-, 30/-, 40/-, 50/-. Hens 10/6, 15/-, 20/-, 30/-. Pairs, 25/-, 30/-, 40/-, 60/-. These prices are for show birds and stock birds to breed winners. These are the best value in Great Britain to-day. For **OTHERS**, really good, containing many of the best combined strains in Great Britain, at lower prices, see my advert. on next page. Cages, 4d. and 6d.; approval with pleasure. Above prices relate to Norwich and Yorkshires.—**W. RUDD, Specialist, NORWICH.**

J. C. BARNES

Well known strain; 25 years' study. One of the finest private collections of Norwich in England; type, quality, colour, and substance combined; to those who can visit me do so and see for yourself; 200 birds to select from, all judiciously bred; grand pairs, 30/- up; odd cocks, 20/- upwards; special pairs, £3 to £5; guaranteed correctly matched and robust; state requirements, stamp; approval; satisfaction ensured; all fanciers welcome and cordially invited: 113, Northfield-rd., Walkley, Sheffield.

12/6 Per Pair 12/6

Will give 12/6 per pair for good surplus stocks of YORKSHIRES, NORWICH or ROLLERS.

12/6 to 15/- per pair for CRESTS, and will deposit cash with Editor.

I am also open to consider offers of good class birds at higher prices.

I also require **BORDERS, MULES,** etc. **Will pay top prices and deposit cash.**

H. GLEDHILL,
Fleet Lane, Queensbury, Bradford

AIDS TO SUCCESS.

Our Books and a Common-sense Application of the Advice therein MUST bring you Profit as well as Pleasure

All the experience of years of careful study by experts is at the disposal of readers.

YORKSHIRE CANARIES, 2/2.—By H. W. Battye (Past President of the Yorkshire Union). Absolutely the very best Handbook dealing with the Yorkshire and its sub-varieties. Contains complete instructions upon Pairing, Breeding, Moulting, and successful Exhibiting, also how to treat in both health and disease.

NORWICH CANARIES, 1/1.—By C. A. House. Tells the fancier all that he needs to know to enable him to become successful as a breeder and exhibitor of the Norwich Plainhead. The chapters on "Forming a Stud," and "How to Produce the Ideal" are worth the cost of the whole book.

THE SECRETS OF HYBRID BREEDING REVEALED AND EXPLAINED.—By many notable Mule and Hybrid Breeders. Among the contributors are such well-known breeders as Messrs. R. Colton, W. H. Vale, C. Honiton, C. J. Ward, J. Beswick, G. Lander, T. H. Kinch, T. Smith, etc. This Handbook, which contains 212 pages, 7 inches by 5, is brimful of the most practical information on the highly interesting object of Hybrid Breeding. Price 1/-, post free 1/2.

AVIARIES, BIRD-ROOMS, AND CAGES, 2/3 (cloth gilt).—By H. Norman. Contains ten lovely full-page photographic plates. A practical guide which deals thoroughly with the proper Building, Fitting, and Management of Aviaries and Bird-rooms, and the making of Cages.

SEEDS, FOODS, AND WILD PLANTS FOR CAGE BIRDS, 1/2. — By various leading authors. Full information on the seeds suitable for all cage birds, their food values, uses, etc., with descriptions and illustrations of the wild plants indispensable to the successful keeping of British and other birds.

BRITISH BIRD MANUAL, 2/3 (cloth bound).—By H. Norman; or may be had in two parts. Part 1: "Hardbills," and Part 2 "Softbills." Either Part, price 1/1, post free. Each part contains a beautiful and life-like coloured plate and numerous illustrations of birds and cages. Up-to-date information on the keeping of British Birds.

HOUSE'S CANARY MANUAL, 1/2.—By C. A. House. A thorough, practical guide to the general management and breeding of Canaries, dealing fully with the breeding, etc., of every member of the Canary family, including the Roller (or Singing) Canary. An illustration of each bird, by the master Canary artist, Mr. H. Norman; exhaustive chapters on aviaries and cages, breeding procedure, moulting, exhibiting, diseases, and seeds a compendium of knowledge.

FOREIGN BIRDS FOR BEGINNERS, 1/1½.—By W. T. Page, F.Z.S., etc., Foreign Bird Expert to "Cage Birds." A highly instructive Manual. It contains a magnificent coloured plate and a number of black and white illustrations. Indispensable to all keepers of Foreign Birds.

CANARY BREEDING FOR BEGINNERS, 7d.—By Claude St. John. A Practical, up-to-date guide to Canary breeding, designed specially for the use of the beginner. Deals very fully with the choice, sexing, and mating of the birds, feeding for condition, the cages and their fittings, the bird-room, egg-food, nest-building, rearing and moulting the young, colour-feeding, training for show, and all the difficulties likely to confront the breeder.

(Advertisements continued on page 63.)

Club Reports.

CLAPHAM C.B,A.

Annual general meeting, Jan. 23. Sec. reported that after the year's working we should begin the New Year with a deficit of about £8 as a result of our enterprising policy of holding the only open show in London this season. Officers were appointed and remain the same as last year. Sec. was accorded a hearty vote of thanks for his work during the past year, and he suitably responded. Pair show fixed for Feb. 23.—A.R. Coe.

CUMBERLAND AND WESTMORLAND Y.C.C.

Annual meeting, Maryport Coffee Tavern Jan. 17. Mr. R. W. Pearson (in the unavoidable absence of the chairman, Mr. Nixon) was voted to the chair. Sec. and Treas. gave their annual reports, which showed a balance in hand of £3 8s. 9d. All officers were re-elected. Decided to give the usual medals for most points at each show. The club offers an invitation to all exhibitors in the two counties. Subscriptions for this year will be gladly received, and all information given by the hon. sec., J. S. Head, 12, Mill Street, Maryport.

AUDLEY ROLLER C.C.

Annual meeting, Jan. 6, Mr. J. Tomlinson (Newcastle) in the chair. The absence of Mr. George Cross, hon. sec., was regretted, he being confined at home through injuries. He wrote expressing his desire to resign the secretaryship which he had held since the formation of the club. The resignation was accepted with regret. A vote of thanks was passed and an honorarium granted for his splendid services. Mr. A. Dean, 19, Alsager Road, was elected hon. sec. All other officers were re-elected. Four new members were made, bringing the total membership to 40. The balance-sheet showed a credit balance of £6 18s. 3d. Decided to purchase a challenge cup for the annual contest. Birds were at the meeting and song tours explained by Mr. Tomlinson. Great interest was evinced in the various renderings of the B.C. tour. One bird sang this tour in three differently pitched keys, one being described as good, another faulty as the bell portion was forced and pointed, whilst the third was loud, sharp, and objectionable. Another bird sang a flat rendering of the B.C. tour. Next meeting, Feb. 3, at 6. Hollow glucke or glucke roll birds will be present, and Mr. Tomlinson has promised to be present to point out that these birds have in addition to the sharp bell tour a highly pitched objectionable bell roll. The article written by Mr. Tomlinson on the Roller Canary, and published in CAGE BIRDS during 1913 and 1914 will be read at this and subsequent meetings, and questions arising therefrom will be answered by Mr. Tomlinson.—A. Dean, Hon. Sec.

LONDON AND COUNTIES A.C.B.

Annual general meeting, Jan. 20, Victoria Hotel, Charterhouse Street, E.C. Mr. W. Dyer presided over a good attendance. Balance-sheet for 1916 was handed round and passed as correct, showing cash in hand £5 14s. 6d., and assets £2 18s. 0d. Officers for 1917: President, H. Bell; Vice-Pres., T. Pinn; Committee, Messrs. W. Shakespeare, J. Herring, A. J. Durham, J. Greenland, E. Ayris, and W. Dyer; Auditors, G. Etherington and W. Hurst; Trustee, W. Colliers; Treas. and Sec., W. Gilbert. Shows for 1917: Pair show, Feb. 17, judge, J. Robson; British, March 17, judge, W. Shakespeare; Young Birds, July 21, judge, H. Norman; Autumn show, Nov. 3, judges, Mr. Sanders (Yorks.) and Mr. J. Hodder (remainder). There will be a good selection of lectures, debates, and competitions for members. Those wishing to join this most progressive and central society kindly communicate with the sec., W. Gilbert, 42, Cowcross Street, E.C.

NAT. GREEN-MARKED Y.C.C.

The above are taken from catalogues and subject to correction if wrong.—J. Chambers, Hon. Sec.

MIDLAND ROLLER C.C.

Annual meeting, Jan. 25, Seven Stars, Wolverhampton, Mr. J. H. Willows chair, before a good attendance. Auditors' report being accepted, the officers and committee were re-elected for 1917, with the exception of Mr. J. Lawson. The following were elected as members: Messrs. Orrillard, Aspinall, Shepley, Gutierrez, Wilkinson, Parkes, Spruce, Hammerton, Hewitt, Buffin, Dincent, Smith, Seaman, Baggsley, Culshaw, Attewell, Smith, Wakefield, Robins, and Poulter—a splendid record for the coming year. Members serving with his Majesty's forces will retain their membership without subscription during the war. Decided to purchase a cup for the novice section; cup to be on view next meeting. Several members promised to bring birds for February meeting, and the different glucke tours will be explained by Mr. Rhodes. To any Roller fanciers wishing to join, as the society has no radius, I shall be pleased to send particulars. Entrance fee 1s.; annual subscription 2s. 6d.—Hon. Sec., J. W. Thomson, 9, Gorsebrook Road, Wolverhampton.

NORTHERN YORKSHIRE C.C.

Annual general meeting, Jan. 24, with a good muster, Mr. Crawhall presiding. Balance sheet for 1916 was presented, and showed a balance of £7 18s. 3d., 7s. above the previous year, which was thought to be very satisfactory considering the unsettled state of the country. Officers elected: Pres., Mr. T. C. Crawhall; vice-pres., Messrs. G. S. Ellwood, Dr. Duncan O'Neal, J. Shepherd, T. B. Tomlinson, J. Curry, R. Tindale, G. W. Cuthbertson, Towers; chair, Mr. Wigglesworth; vice, Mr. Studholme; committee, Messrs. Collins, Buck, Frost, Coomber, Leach, Tindale, Willis, Hands, Robson, R. Studholme, Crossling, Johnson, Hutler, Stewart, Tweedie, Deighton; auditor, Mr. N. R. Coomber. Owing to our late sec. being called up, Mr. W. Mather was appointed sec. until his return. It was the unanimous feeling of the members present to make a small present to our worthy president and our late sec. for their good work to the club, and it is intended to have a supper at the presentation. Date will be announced later. Specials for the year were won by the following: N.Y.C.C. cup, Stewart; Ramsden's cup, Reed; Crawhall cup, Coombe, 2nd Tindale, 3rd Collins; winners of silver spoons, Crawhall, Stewart, Havis, Tindale, Hands, Studholme and Son, Shields, Collins, Frost, Reed. We would like to see all Yorkshire fanciers in district join us; a hearty welcome will be given to anyone wishing to join.—W. Mather, Sec., 122, Woodbine Street, Gateshead.

PONTYPOOL C.B.S.

Meeting, Jan. 27, headquarters, Mr. D. R. Smith chair. Mr. A. E. Moule kindly travelled from Abertillery to give an exhibition of washing, using his "Climax Drying Cage." There was a good muster of members, 24 being present. He used the customary three basins and a badger hair shaving brush for washing, and some old linen for wrappers. He first filled his tank to heat his dryer, and then tempered his water in the basins to blood heat. He then thoroughly dried his hands, explaining that the hand must be dry in catching the bird, otherwise feathers might stick to the hand and get pulled out, which may seriously affect the chances of the bird at show. Taking cage in hand and turning from the light, he deftly caught the bird, which he transferred to his left hand. He then immersed the bird in the first water, and, taking up the brush well soaped he gently stroked the bird in the lay of the feathers, explaining this should always be observed. The wings and tail were then well brushed. The neck and face he said required particular attention. The bird was then well rinsed in the second basin with the aid of flannel, and the last traces of soap were removed in basin No. 3. Superfluous moisture was gently removed with a piece of old linen. The bird was then wrapped in a piece of old sheeting, the head being partly exposed, and placed in chamber No. 1 of the dryer. Six more birds were washed, and during the lecture Mr. Moule showed how to remedy various faults in birds, such as browy birds, raising or drooping wings or tail. After five minutes the birds were transferred to chamber No. 2, and in a surprisingly short time they were preening their feathers and looking as well as ever and much cleaner. Many questions were asked and answered, and a very enjoyable evening was spent. Mr. C. Pearce moved a hearty vote of thanks to Mr. Moule for his able and instructive demonstration. He admired the confident manner in which the birds were dealt with, and felt the society were deeply indebted to Mr. Moule for so generously allowing his Climax Dryer to be on exhibition at our open show, where it was much admired. Mr. D. R. Smith ably seconded. It is the intention of the society to try to arrange a series of lectures for the benefit of young fanciers. New members are heartily invited and welcomed. Next lecture: "Making of seed hoppers, etc., from waste tins." Practical demonstration.—W. R. Lewis, Sec.

CLUB AND SOCIETY NOTICES

ONE NOTICE of any forthcoming Society meeting inserted free. It must reach us not later than Tuesday morning's post. Specially printed Club Notice Postcards may be had free on application to our Manager. Secretaries should always use them

NOTE.—Only the details asked for on our cards can be published. Such phrases as "a large attendance desired," etc., must not be included. Classification for forthcoming shows, appeals for new members, and any other matter in the nature of an advertisement will only be inserted if paid for at advertisement rates.

W. STANLEY (Patriotic) F.F., &c.

Meeting, Jan. 21, W. J. Platten, chair. We have adopted last year's schedule, with 70 classes, 6d. entrance. Will all attend next meeting, when tickets will be ready, and try and sell as many as possible to make it as big a success as last year. It is up to us to let the public see that we can help those who cannot help themselves, by giving a good entry and selling as many tickets as possible.—Robt. Hutchinson, Sec.

SUNDERLAND C.B.A.

Meeting, Jan. 27, Station Street Cafe. Mr. Farrar presided over a good attendance. Decided that entrance fee for pair show, Feb. 10, be 6d. per cage; prizes on sliding scale; birds staged 6.30. A special of 2s. 6d. will be given for best pair, also 2s. 6d. best pair by a new member or member not having won a first at members' show; also 2s. 6d. best pair other than winners of previous specials. A class will be given for each variety with four or more entries, and remainder to be divided into two classes, one for box cages and one for wire cages. Mr. Farrar judge. Decided to hold one nest feather show this year, July 14. Four new members were accepted.—F. Riseborough.

WALTON AND EVERTON C.B.S

Annual general meeting, Kilshaw Street, Mission-room, Jan. 10. Balance sheet for 1916 was passed, showing a balance of £3 17s. 3d. A special vote of thanks was passed to Mr. Robinson for services rendered as sec. for 1916. Officers elected for 1917: Pres., F. E. Smith, K.C., M.P.; vice-pres., Rev. A. S. Pink, J. W. Metcalfe, and C. Robinson; chair., T. Rowlands; vice-chairman, G. Holmes; treas., Mr. Costello; auditors, Messrs. Bunner and Jordon; committee, Messrs. T. Evans, R. Bratherton, J. Brindle, Mr. Kewn-Heyes, Pendleton and Douglas; sec., J. Lloyd. Three new members were elected, and it was decided to run a show, Feb. 3, full classification. Judge, T. Rowlands, at Headquarters; a large number of specials being offered.—J. Lloyd, Sec.

LEICESTER (Hand-in-Hand) C.B.S.

Meeting, Jan. 16, White Swan Hotel, Leicester, Mr. Gibbins presiding. Mr. Merrick was elected a member. Final arrangements were made for the forthcoming charity show, which bids to be a great success. A very interesting presentation of a solid gold albert from the members of the society (as a token of their recognition) was made to our late sec., Mr. A. Freestone, who for many years admirably and greatly increased the strength of the club. Mr. Freeston replied in his usual manner, and expressed his appreciation of such a beautiful gift. Messrs. Pearson and Sturgess (auditors) submitted balance sheet for the year, which showed a handsome sum of £18 18s. 11d. cash in hand, an increase on last year's balance, also a membership of 53.

Table show, Mr. C. Walton judge, over 100 birds being staged. Yell. Ck. and Buff Hen: 1, 2, 3, vhc, Day and Sturgess; hc, Gilbert; c, Cayless. Buff Ck. and Yell. Hen: 1, Gilbert; 2, 3, Day and Sturgess; vhc, Gilbert; hc, Cayless; c, Pearson. Nov. Yell. Ck. and Buff hen: 1, Moore; 2, Layton; 3, Lindley; vhc, Goreham; hc, Hughes; c, Knight. Buff Ck. and Yell. Hen: 1, 2, 3, Layton; vhc, Lindley; hc, Moore; c, Knight. Greenf.: 1, J. Read; 2, 3, Brooks.—Day and Roberts, Joint Secs.

Singing Contests.

Announcements of forthcoming contests in the nature of advertisements must be paid for at advertisement rates, two words a penny.

SHEFFIELD.

Linnet contest, Sportsman Hotel, Paternoster Row, Jan. 28. 24 birds sang: 1, 3, Parlett; 2, Wainwright. Linnet show in the evening: 1, Parlett; 2, Jess; 3, Caflingan.—E. Phillipson, Sec.

PONTEFRACT.

Linnet contest, Woodman Inn, Horsefair. Open sing, Jan. 28; 46 birds entered for four prizes, and some good singing was heard: 1, Watkiss; 2, Plows; 3, Foster; 4, Scott. Club sing Feb. 3.—S. Pugh, Sec.

BARNSLEY.

Dove Inn, Doncaster Road, Linnet Club, Jan. 21, 20 birds faced the timer for four prizes. Shepherd timer, Bamforth chalker: 1, Norburn, 3min. 42sec.; 2, France, 3.31; 3, Hardman, 3.26; 4, Wright, 3.23. Jan. 28, same timer and chalker, 20 entered, with some very good singing: 1, Norborn, 3min. 46sec.; 2, Hardman, 3.25; 3, Jones, 3.15; 4, Brushy, 3.10; 5, France, 3.9.—J. Hardman, Sec.

KIPPAX.

Linnet Club, Commercial Hotel. Members' sing, Jan. 27. 29 birds entered and some good singing was heard. One of our new members got 3rd prize, and this will give our new members more encouragement: 1, Cooper; 2, Collinson; 3, Norton. Messrs. H. Collinson, T. Pickersgill were tappers, and R. Plows and J. Wallis timekeepers. Members' sing every Saturday at 3.—R. Plows, Sec.

LEEDS.

Twitterings.

Mr. F. J. Bees writes that he has removed from Speedwell Road to 5, Holly Lodge Road, St. George's, Bristol.

Kindly state through the columns of your valuable paper that I am secretary of the Leeds C.B.S., writes Mr. W. A. Wilson, 61a, Bayswater Place, Roundhay Road, Leeds, and that all communications regarding same should be forwarded to my address.

The many friends of Mr. John Rukin, the well-known exhibitor of Lizard Canaries, and hon. sec. of the Lancs. and Lizard F.A., will be sorry to hear that he has been confined to his bed for some weeks, and all will join us in expressing a hope for his speedy restoration to health.

Our Painting Competition.

The entries for our annual painting competition are quite as numerous as ever, and the merit of the majority of the pictures is of the usual high degree. The result of the judging will be announced in our next issue.

The Marked or Ticked Norwich Canary.

Through a faulty mounting of the block, the picture of Messrs. Stubbs' Norwich Canary as it appeared in part of our issue of last week showed a marking on the neck which is not possessed by the bird in question. As soon as the defect was noticed the machines were stopped and the fault remedied, and in the greater part of the issue the bird appears as drawn.

New Society at Birkenhead.

Fanciers wishing to join the Birkenhead Breeders Canary Fanciers' Association please forward their names to me, writes Mr. H. Wakem, 16, Clifton Road, Birkenhead. Subscription to be 4s. per annum. Champions and novices to be well catered for. Members who promised to join please send a post card with their full name and address; then I will write and let them know how things are progressing.

REVIEW OF SCHEDULE.

Greenock, Gourock, and Port Glasgow O.S.—Gamble Institute, Gourock, Feb. 2-3. Judges, H. Jamieson, J. F. Park. 31 classes: Scotch Fancy 2, Yorks 2, Bord. 5, Crests 2, Nor. 4, Com. Can. 1, Sell. 1, Gift 1, Mules 2, Brit. 10, For. 1. Prizes: 5/-, 2/6, 1/6. Fee 1/-. Ent. close Jan. 31 to M. E. Campbell, 11, Kempock Street, Gourock.

I am sorry to say, writes Mr. J. Rukin, that one of our most promising and successful Lizard members, Pte. Edgar Lord, East Lancs. Regt., has been for some time wounded and a prisoner in Germany. He has, however, recovered from his wound, but would give something to be among the birds again in his own country.

Satisfied Customers.

The well-known bird specialist, Mr. W. Rudd, of Norwich, sends for our inspection a large parcel of recent testimonials. They are so numerous that it is not practicable for us to read them all, but we have sampled the package, and are pleased to find that all are in the same vein of satisfaction. It is obvious that the answer to the question, "Is the City of Norwich Dead?" which has recently been asked in our columns, is in the negative. Mr. Rudd's business, at any rate, is far from being moribund. The home trade in Canaries does not seem even to be "temporarily dead," as has been suggested.

How the "Fancy" Does Its Bit: Fine Result at Mountain Ash.

A cheque for £22 4s. 10d. was handed over to the "'Express' Starving Prisoners of War Fund," being the profits of our late show, writes Mr. Thos. Holman, hon. sec., Mountain Ash F. and F.S. We are a young society, only formed up last September, but are making very good progress. It is our intention to hold a series of monthly members' shows, the first of which will be held on Feb. 3.

Swansea's Fine Contribution to the Red Cross.

Enclosed find balance sheet of the Swansea and District C.B.A. for 1916, writes Mr. J. H. Ford, sec., which shows a balance in hand of £13 6s. 2d., out of which the annual show profits of £11 2s. have been handed over to the local Red Cross Society. I should be extremely obliged if you would through the columns of CAGE BIRDS thank all who supported us and so enabled such a substantial amount to be realised.

A Lord Mayor Thanks Ardwick Fanciers.

The following letter has been received from the Right Hon. the Lord Mayor of Manchester, writes Mr. A. E. Thorpe, hon. sec., Ardwick and Manchester C.B.S.:—

"Dear Sir,—In enclosing the official acknowledgment of the kind donation of £5 to the Blinded Soldiers' and Sailors' Fund, being the profits of the annual open show of your Association held in St. Thomas's School, Ardwick, on Nov. 11 last, I desire to express very sincere thanks for the kind thought shown to our brave blinded citizen soldiers who have done so much for us in this great war. The assistance sent is very welcome.

Yours faithfully,
THOS. SMETHURST,
Lord Mayor."

"CAGE BIRDS" ROLL OF HONOUR.

We regret to hear from Mr. W. Nelson, hon. sec. of Castleford Linnet Club, that his second son has died fighting in France.

JOHN STANSFIELD.

I am sorry to say, writes Mr. John Rukin, that Mr. N. Stansfield, the well-known Lancashire exhibitor, has received news from the War Office that his only son John, aged 23, was killed in action in the Persian Gulf on Jan. 15. All friend Noah's friends, and they are many, will join in an expression of condolence in his severe blow, and hope himself and daughter will have strength given them to bear it.

Robins Down a Coal Mine.

On Sunday, Jan. 14, after a stormy week-end, writes Mr. W. H. Christer, a pair of Robins found their way down a colliery shaft here at Chopwell. They were flying about the shaft bottom all the week end, and on the Monday, although all day long coal was being drawn. Later in the afternoon one of them found his way into the engine house, and there he was fed by the engine man. At night, he was caught, and brought to bank, where he was given his liberty. The other one disappeared. During some hard weather in 1916 a pair of Blue Tits and a Sparrow were found dead in the cabin close to the shaft bottom.

Joint Show at East Ham.

The inter-club show of East Ham, Leyton, and Poplar Societies, writes Mr. F. Onslow, 21, Selwyn Road, Plaistow, E., will take place 10th Feb., at East Ham Central Liberal and Radical Club, at 10, High Street South, East Ham (opposite Town Hall). This has been arranged to be held at East Ham owing to the inability of securing a hall at Leyton, and the Committee are very keen of seeing it a success. Any member of the three Societies who has not received a schedule can have one on application to me. I trust that all our friends who exhibited last year will accord us the support they gave us last year, seeing that we have gone to much trouble to run this show this year so as to keep the fancy alive.

Bird Movements in Winter.

From a most interesting article, entitled "Bird Omens," in the London "Times," we extract the following for the benefit of our readers.

THE rule of winter migration is that the birds arrive while hard weather prevails, with worse to follow. For they do not lightly leave their more familiar haunts in the north and east to face the perils of overseas travel and the doubtful welcome of our shores that are fringed with shot-guns for their coming.

Not every cold wind that blows gives the birds their marching orders. They wait until the growing menace at home awakens their instinct at all costs to fly, and then they fly—whither?

It used to be supposed that the flocks of migrant birds placed themselves under the guidance of some experienced leader, an old bird who "knew the way." But, apart from the fact that the existence of any "way" at all presupposed in the bird that knew it some power of recognising "invisible fly-lines" across ancient continents that are now the bed of the ocean, people should have known that it was not so, seeing that the first flocks of some birds are exclusively composed of the young of the first broods of the year, which depart before their parents with the later broods are ready.

Another fallacy which long impeded real knowledge of migration was the dictum of ornithological authorities of the last generation that migrating birds always flew against the wind, the reason given being that a wind from behind would inconveniently ruffle up their feathers.

A moment's consideration of the fact that the speed of the birds' flight must cause them to travel faster than the wind should have corrected this idea, but it was supported by the agreement of many observers that migrating birds which just manage to reach our eastern coasts, and are therefore easily noted in their exhausted state, undoubtedly do usually arrive against the wind. This, of course, is explained by the common prevalence of contrary winds near land.

Coming back to the first principles of bird migration, we find that the phenomena which puzzled our ancestors so much that they invested the whole subject with semi-religious mysticism are quite easily explained. The instinct of the birds to fly from their northern and eastern haunts is aroused by the continuance of cold winds from the Arctic Circle; so they fly, and the winds blowing from north and east inevitably carry them to the south and west.

They are always naturally reluctant, however, to commit themselves to the passage of seas so wide that even their long-range vision aloft cannot descry the further shores, so, still using the wind as far as possible, they work along the coasts until their converging companies unite into vast flocks off some projecting headland. Thence often the opposite land can be viewed, because headland naturally reaches towards its brother headland of the same submerged and broken mountain chain; or, even if no further land be visible, the unity of instinct and contagion of desire impel the bewildered host to launch their flight into the unknown.

Thus the familiar phenomena that migrating birds come from various directions to the points where the seas are narrowest for crossing, and that isolated outposts of the land, like Heligoland, become the centres of many converging lines of bird traffic, are simply explained.

Equipped with knowledge of the facts, we are thus better qualified than the soothsayers of old to interpret the omens of unusual flights of birds; and, subject, of course, to atmospheric vagaries, we can say that Woodcocks in a swarm at Broadstairs mean that prolonged cold has gripped in ice the marshy woodlands which they haunted in Scandinavia, and that, as they have travelled faster than the cold north-east wind that helped them, there is more of that wind, with its freezing effect on Britain, to follow. In fact, a not unreasonable deduction from the presence of weary Woodcocks on the Kentish coast is that the ice simultaneously appearing on the upper reaches of the Thames would spread until the river should be frozen over.

Unfortunately, the only practical conclusion which is drawn as a rule from the unexpected arrival of unusual birds in winter anywhere in England is that there is something new to kill. In the case of Woodcock and Wild Geese no one could reasonably complain of this. Game and wild-fowl are in season, and addition of any kind to the national food supply just now lends a patriotic halo to the gunner; but Waxwings and other rare birds, which are neither game nor wild-fowl, but are driven to seek safety in Britain by stress of weather, should not be welcomed with a shot-gun, as they nearly always are.

The writer has seen a happy change gradually taking place in the national attitude towards birds from the time when even the ladies of a country household would excitedly exclaim: "There's a strange bird in the garden. Where's your gun?" But public opinion is not sufficiently alert even now to the fact that the collector who kills birds or who buys killed birds simply because they are rarely seen in this country does this country a wrong for which his own selfish pride of possession is not adequate compensation.

The Chough in Ireland.

A Notable Increase in Number

AT the annual general meeting of the Irish Society for the protection of birds the hon. sec., Mr. G. C. May, stated among other things that Sir Maurice Fitzgerald, the late Knight of Kerry, by making a sanctuary of the Island of Valencia, brought about the increase which in recent years had been observed in the number of Choughs nesting in the County Kerry. They were glad to think that the work so well begun by the late Knight of Kerry would be carried on by his successor. Sir John O'Connell spent a few days last autumn in Valencia, and was favourably impressed by the number of Choughs inhabiting the island in excess of those in former years. At Portmagee a good deal of Choughs were also seen. The Choughs at Achill did not appear to be suffering any diminution in their numbers, and Ravens and Peregrines along the sea cliffs were in fair numbers.

The Chairman, the Rt. Hon. Justice Ross, said there were good, bad, and indifferent birds, as there were good, bad, and indifferent men, but they knew of a great many birds that used to be shot at which were really of enormous use to the farmer, while others were of no use whatever. The object of the Society was to distinguish between the good and the bad bird, and, apart from the utilitarian point of the subject, there was a great interest in the study of birds, and in keeping species alive. The Chough in the South of Ireland had been disappearing, and he thought it was mainly due to the efforts of Mr. May that that bird was now alive and increasing. The war, to which the secretary had referred, could not go on for ever, and he was sure the meetings of the Society would have a good effect when the war was over. The greatest thing they could admire was the operations of nature, and, although the struggles of man were very interesting, yet, after all, the most humanising effect was to watch on sea, air, and shore the birds themselves.

A Gruesome Suggestion.

In an article in "Country Life" on "Swallows at the Front," the writer says: "The idea that gun-fire would chase away the birds has been quite exploded, and the pathetic story of the Swallows and Martins wheeling around the ruins of their last year's home, tweeting miserably, and then departing from the battle area of ruined towns and villages is quite untrue. Personally, I think the Swallows and Martins prefer the ruins. The vast quantity of insects which the life on the battlefield encourages, provides them with plenty of food, and accounts for the fact that Swallows and Martins are far more plentiful than they were during pre-war days."

Black Canaries from New Zealand.

Although the outbreak of the war was responsible for the abandonment in 1914 of the intention of the lady Canary breeder of New Zealand, Mrs. Martin, to send for the interest of English Canary breeders some specimens of Black Canaries which she had succeeded in breeding, yet Mrs. Martin has always kept the idea in her mind. We are now able to say that a number of these interesting birds have safely arrived in England, only two of the consignment dying on their long journey. Besides the Blacks, Mrs. Martin has sent some beautiful examples of White Canaries, a variety which she has been perfecting for several years, and which she has always claimed she was the first to breed. We are making arrangements for a descriptive article referring to these and to the Black Canaries, which are the latest development in the art of Canary breeding.

"Please thank all who answered my advert. for Goldfinches. In all I had nearly 20 replies up to Sunday morning post."—W. LIDGETT (Newark).

"I had a shoal of letters and postal orders in response to my last week's advert. under British. I had a large stock of birds in, and I needed them, to supply the demand. Several of the leading English British bird exhibitors wrote for Goldfinches and Linnets and all have now been supplied."—SERGT. THOMAS (Dublin).

Breeding Yorkshire Canaries for Exhibition.

By J. A. GREENSLADE (Bristol).

(Continued from page 25.)

A practical article by a successful breeder, showing how to select stock in breeding in order to avoid faults, and to perpetuate and improve desirable qualities.

WE need not be afraid of keeping a bit of feather, providing it is of good quality, and by that I mean fine textured, soft and silky, and carried fairly well without any cross grain, because we cannot get good shape without feather, only on a good shaped bird it is close and tightly carried. The cause of many thin necks, thin and pointed chests, and short waists, is through insufficient quantity of feather, or else the feather lies along the bird in ridges or flags, instead of radiating round the bird's body.

We must not part with a good shaped hen for poor colour, just because she is white, because the odds are that she would be pink eyed, and of cinnamon blood, and would be a great help in supplying quality, and even if the colour of the yellows from her was not good it is possible that she would breed some hot or salmon colour buffs.

The Points of a Good Buff Cock Bird.

Coming now to buff cocks, we should look for more size in them than we did in yellows, both in length of body and substance, also a full head and cheek, with a well rounded skull; even if it is a bit big and over bold, it is much better than a small and mean one for stock purposes.

We also want a long and well filled in back, with long and well carried wings, and a good waist, but regarding legs and position we can afford to allow a bit, as the counterbalancing properties are to be obtained from yellow hens fairly often.

In the selection of the yellow hens, we should follow much the same lines as in the buff hens, excepting that we should not expect so much body substance, but much more leg and style, and nerve. In fact, we want as much in the way of breed as we can get, without sacrificing size too much, and should always be favourable towards a bit of high shoulder.

Regarding the feather of yellow hens, we want it as short and as fine as we can get it, and we should not part with pale coloured hens that look brassy and mealed all down the back, because they operate pretty much as the white buff hens referred to.

Bearing in mind all the foregoing points, we must also keep a fair amount of markings or variegation running through our pairs, or we shall come down in the body colour, but using marked birds just because they are marked does not signify much, as plenty of marked birds are no factors toward colour producing at all, and some are the reverse.

The reason that some of these marked birds do not help to transmit colour is that they are bred via cinnamon blood, generally from cinnamon hens, and have very little genuine green blood in them. The kind of marked bird we want is one in which when he is well coloured the markings will show almost black, and on a ground colour of deep red.

For transmitting colour (and we want to do it through the cocks side by the way) I would much prefer using a hot coloured clear than a marked bird that had a pale ground colour. When coming down in colour I advise mating the two best marked and best coloured birds we have together to get some good variegated hot coloured birds to infuse into the rest of the stock.

When Double-Buffing is Useful.

I advise the novice to stick to the orthodox methods, and mate yellow to buff, or buff to yellow, for all practical purposes, but in some instances some of the unusual matings are justified, and of some use.

For instance, I am rather partial to putting up a pair of buffs, as I like the buff hens from that source to mate with a hot coloured clear, and find that the good colour is transmitted much more readily via a double buffed hen than from many others, but the cocks bred this way I find are not much help, and I do not advise breeding many.

I have seen advocated the mating of two yellows to help colour, but from my own experience I am not struck with it very much and should not waste good birds to try it, as, unlike the buffing, it has not many issues behind it, whereas with the buffs it is sometimes useful to obtain a larger amount of feather and is also useful for procuring fuller heads and necks, but I advise the use of the hens only for this purpose also.

Regarding the age of the pairs, I am a great believer, where possible, in having the ages different, and I like mating old cocks to young hens, and young cocks to hens over the year; old hens I am not keen on, and rarely keep them after their second season of breeding, as by that time you have had the best from them. Of course there are exceptions, but the ages must be regulated so as to have young blood with the old. My reasons for not caring to mate unflighted birds are that I think the size suffers, you get a preponderance of hens, and the progeny is not so robust.

To In-breed or not to In-breed.

Regarding the thorny subject of inbreeding, which some swear by, many swear at, and most have seemed to have "dabbled in," I advise the novice to leave it alone until he has a complete knowledge of what he is about and what his stock is likely to throw as it is. I do not pose as an authority, but my own little experience of mating sons to mothers, and vice versa, did not do me any good, and brothers and sisters I have not had any wish to try.

The sort of inbreeding I do believe in, and believe in strongly too, is when you get an exceptional bird to transmit his blood through as much of your stock as possible by the mating of cousins, and uncles to nieces, nephews to aunts, etc., as I believe by this process that the good properties of the bird you are using are brought to the surface by its meeting its own affinity, with a sufficient amount of other good blood to strengthen it, without being contrary to it, in the remoter progeny.

If we keep these essential points of what is first required and what is well to avoid in our mind, and have the courage to carry it out (very often sentiment can be our undoing) the balancing idea becomes an easy matter, and is much more likely to serve us, now we have not such extremes to contend with, especially if we keep in our mind what the complete whole is.

Pedigree and Prepotence.

To the fancier who knows his stock, pedigree is of paramount importance. The old adage that "like breed like," does not always come off, as most likely "like" breeds something like his father, more than himself.

By pedigree I mean to imply previous generations of really good and consistently produced good points, and as much latent good qualities as possible. It is not enough to know what the parents were like, and who they were, but that they had the required surface value, and so had their parents before them.

I would sooner have a fair specimen from good stock than a good one from an indifferent source that came as if by chance, as they do sometimes. When they do come it is rare they have sufficient fixture of their good features to allow them to hand them down to their offspring.

To sum up, we must keep size, type, position and nervy carriage, colour, and quality of feather before us in all our matings, and where we have not the material to produce the lot of them, to form the complete whole, to specialise for the other points separately, or as many of them as possible to get together, until we can breed our "topper."

But it is as well to bear in mind that with the best of material our calculations are likely to be upset by "Dame Nature" who plays strange vagaries even with long and well established strains, but also balances things sometimes by giving us the "lucky hit" when we least expect it, or deserve it.

In conclusion may I state that if any novice has learnt anything by reading this somewhat rambling article I shall feel amply rewarded, and trust it may be beneficial to some, and possibly amusing to others, never mind which. The main thing is to keep things going at present, as best we may, until the boys come home, and to see they have some good birds to come home to, as they will want them.

Mr. Lidgett, the writer of the article on Cockatiels which appears on this page, is here seen with Mrs. Lidgett, his wife, and two of the cups which are among the many special prizes he has won with his birds.

MY COCKATIELS.

By W. LIDGETT, Hon. Sec., Newark C.B.S.

An interesting account of an attempt at breeding a popular and pretty bird, which is fairly cheap to buy and easy to keep, and which makes a charming pet bird.

"I LOVE my birds." This remark I made to my wife the other day, when a consignment of seed arrived and the bill was rather large. "Yes," said she, "there are, perhaps, many more like you who love their birds, but who have had to part with them since the price of seed and other foods has gone up." Of course, when one door closes another usually opens, and if things are dearer now than before the war, the price one gets when selling surplus stock is also more. But now to the subject of this article.

When I first made my acquaintance with this hardy and interesting species of Australian Parrot I thought they seemed rather morose and sulky. I bought my first bird, which was a hen, from a fancier who was leaving the district and wished to dispose of some of his stock, and at the time of purchase I never thought of attempting to breed the species, but kept the bird in a large flight cage which I use in the summer for my young Canaries.

As the breeding season came round for Canaries I began to wonder where I should turn the hen Cockatiel, as the flight would soon be wanted. For want of a better place I made a cage with a loose wire front out of a Quaker oat box, with a couple of fairly thick perches. The Cockatiel soon took to its new home, and at the end of July, 1910, she became lumpy, and seemed to go off her feed a little. On fetching her out of the cage to look at her more closely I thought she seemed rather heavy looking around the vent, and next morning I found an egg lying in the cage bottom. She only laid this one egg that season, and she soon picked up and looked as well as ever.

Standing on Her Dignity.

While visiting Nottingham at the end of that year I went to look round the bird market, and, seeing a male Cockatiel for sale, purchased it, but when I first introduced the cock into the cage the hen Cockatiel did not take at all kindly to him. Whether she was jealous of his share of her rather limited quarters, or it was because of not having been with another of her kind since importation, I do not know, but for several weeks they would not eat at the same time, nor would they stay or roost on the same perch for hardly a moment.

Time is a great healer, and it was in this case. About June of next year the pair seemed on more amicable terms, and their thoughts turned to love.

Now another difficulty presented itself. I knew the space they were allotted was very insufficient for breeding purposes, and my aviary was too fully utilised with other birds to permit my making adequate space for them to breed with any success.

Here I made an appeal for a spare corner of my father-in-law's much larger aviaries. He had at this time four very spacious aviaries, and he was always ever ready to give me a helping hand over any difficulty. He wired a corner of his Budgerigar place off, leaving a space four feet wide, seven feet long, and ten feet high. He also made me a couple of nesting boxes from a pattern I showed him, and then I was again fixed up. I took my pair down to his place, which was only about four minutes' walk from my own home, and he promised to look to them if at any time I was unable to get down at night.

The Dawn of Hope.

It was well into August of that year before the pair settled down in their fresh quarters and attempted to reproduce their kind. Here I missed a great deal of their interesting career by their being away from my own home, for, though, after having fed my own birds, I used to run down to feed the Cockatiels, yet, as I was able to give a good supply of seed, they only needed the husks blowing off and fresh water daily, and their space, being plenty, only needed cleaning out about once a fortnight.

One evening I missed the hen, and while quietly looking at the box which I knew they had selected as their nesting site, the cock bird kept walking about the top, as though on guard over his mate inside. I patiently waited during the period of incubation, but the hopes I had raised were never realised, as after a time the hen deserted the eggs, and on examination later (there were two of them) they proved to be clear. The birds went to nest again almost immediately, but although the hen this time sat her full time the eggs were again unfertile.

As the winter came on I decided to fetch the birds to my own place again to save going to feed them, although my father-in-law assured me they could stay there, and he would look after them for me. Kind though he was to make this offer, I wanted the birds with me, for what is the use of keeping your pets unless you can have the pleasure of seeing them at all times? So home again they came.

Further Attempts Frustrated.

This is my only attempt to breed with this species, for during the winter months the hen died, and although I kept the cock bird until the summer of the present year I never again got him another mate, and he remained a widower till May of last year, and then he also joined the great majority.

If at any time I again decide to breed with these birds I shall have a place made at home, as, although they had every attention during their stay away from home, much of the pleasure during their nesting period was lost, with them being away from me, and it is the pleasure we get from the presence of our birds that makes up for many other disappointments.

HEALTH & STRENGTH
Deals with all kinds of athletics including Football Wrestling, Boxing, Weight Lifting, Fencing Running, Ju-Jitsu, Gymnastics of all kinds Swimming, &c., &c. Gives free advice on all questions of Health, Diet, &c. to all readers EVERY THURSDAY, 1d. Sold Everywhere. Get a copy to-day, or send for Free Specimen to "Health and Strength," Windsor House, Kingsway, London.

Correspondence.

The Everlasting Novice Question.

Sir,—I quite agree with the remarks in the letter of "Unflighted," published in your issue of Jan. 6. We do need some sort of club formed so that the exhibiting and successes of our present day novice may be recorded. I refer, of course, to open competition. A Society knows its own novices according to its rules. Therefore why not a club where all novice exhibitors should be known, and as soon as they have accomplished the limit number of wins the same be notified through the medium of your valuable paper? I trust this matter will be taken up by all societies, and that good will come of it. I myself will take on any duty attached to it, but for the present will remain

Interested.

The Age of Caged Birds.

Record Breakers, Kindly Note.

Sir,—From time to time we get reports of birds living to an unusually long age when caged. These reports are, of course, very interesting, but it would be far more useful if the owners of the birds would give the full treatment their pets have received. These particulars require to be as minute as possible, giving the seeds and greenfood they have been fed on, the position where they have been kept, etc., and if mixed seed has been used, the proportions of each variety should be stated. With these particulars to assist us we may in time get sufficient information to enable us to prolong the lives of the majority of our birds in captivity.

H. Norman.

The Disqualified Hawfinch at Bristol.

Possibly New Feathers at Northampton.

Sir,—I do not wish to dispute Mr. Andrews when he says he did not trim his Hawfinch. I have never said he did. When I judged the bird at Bristol I discovered that feathers were missing. It was not for me to say how they came to be missing, or why. They were missing, and I did what I thought my duty in disqualifying the exhibit. Bristol was between three and four weeks before Northampton, and the missing feathers could have grown again. Therefore, what comes of Mr. Robson's assertion, "absolutely ridiculous"? Had Mr. Robson seen the bird at Bristol he would have agreed with me as to its condition.

C. A. House.

A Tame House Sparrow.

Sir,—Seeing the House Sparrow is mentioned in an article in this week's Cage Birds, I thought it might interest you to know I have had one four years. My son picked it up one night nearly frozen to death, and with an injured wing. He brought it home, and we put it in a cage my husband had made for a Thrush. It got quite tame, and before he joined up at the commencement of the war used to go to bed with him and cuddle under his arm, and it would lie on its back in his hand. It has never regained the use of its wing, but can hop up on to a chair. I breed Canaries, and when I let them out he sits with them on the tops of the cages. When I want him to go in I put his cage on the floor and clap my hands, and in he goes. I feed him on the same seed as the Canaries, with a very little wheat, but no green stuff, for he won't eat it. A big bath is always in his cage, and he is in the best of health; he sleeps at night on the top of his swing.

Blanche Bedford.

Aid for a Disabled Soldier.

A Cheap Pair of Good Norwich Desired.

Sir,—Would you kindly allow me a small space in your valuable paper to appeal for support to a disabled fancier, H. Workman, of Pontnewynydd, a member of the now defunct Abersychan Society, who was called to the colours when war broke out.

He has now returned broken, and discharged permanently disabled. He has been made an honorary member of the Pontypool C.B.S., and the members of the Society have collected among themselves to try to obtain a decent pair of Norwich to start him in the fancy again. Now is there any Norwich fancier willing to offer a real good pair of birds at a reasonable price, so as to give him a start and a hobby to occupy his time? Any offer can be made to me, or further information readily given privately.

W. D. Lewis,
Sec., Pontypool C.B.S.
Holyoake Terrace, Abersychan.

A Netting Query.

How are Square Meshes Made?

Sir,—Will any reader of Cage Birds kindly tell me how to make a net on the square (not diamond). I want it for making the big mesh to put on each side of a flue net.

B. Humphries.

What is a Sib-Bred?

Sir,—I have read that Sib-bred birds are birds bred in and in (i.e., paired to near relations, brother to sister, mother to son, etc.), for many generations, that such birds are much sought after for Mule breeding, and that if overdone sib-breeding results in degeneration. Is this the whole truth? How far is Cinnamon blood an element in sib-breeding? Also, how many generations has sib-breeding to go on before Mules light enough for show purposes can reasonably be expected? I am assuming that in the above description light Mule breeding is meant.

Enquirer.

Mistakes in Judging.

Should a Judge Alter His Slip?

Sir,—In reply to Mr. J. A. Greenslade's lengthy and exhaustive letter, I would say that I have never questioned that the mistake of the judge was genuine, hence my refraining from personalities and details in my former letter. The opinion that the procedure taken by the judge was out of order I have always held.

My sole object in writing to Cage Birds was to have my opinion confirmed or otherwise for my own gratification, as to whether a judge having finished and handed in his slips his slips should be unalterable, and my letter had nothing whatever to do with the holding of the cup. Whatever Mr. Greenslade thinks as to the course I adopted, I may tell him that when in need of expert opinion I usually go to an expert to get it when possible, and I consider Cage Birds quite the proper channel.

If I read your remarks aright, Sir, you uphold my view, and, this being so, I am quite satisfied and content to let the matter drop, and rest at that, as far as I am concerned.

H. S. Walter.

The Federation of Roller Clubs.

Trouble About a Rule.

Sir,—With your permission I should like to answer Mr. Tomlinson's reference to the Federation of Roller Societies, which appeared in the article, "New Bell Glucke." I am now an entirely unattached fancier, having tendered my resignation as a member of the Leeds Club. Consequently if anything which I write—and I will endeavour to be scrupulously fair, should give offence in certain sections of the fancy, they must remember that I am the author, not the Club.

The intrigue which has tried to wreck the formation of a Federation, and is still going on, is the cause of my action. The time for trifling has long gone by, and it will not require two jumps to get over the fence.

The new rule absolutely bars any Federated members from showing or judging at other than Federated shows after this present show season. I proposed this rule at the delegates' meeting on the instruction of the Leeds Club, and it was carried. The proposition of this rule was brought about through the Wolverhampton Club show date being fixed at about the same time as Leeds, which was considered in our city an act of discourtesy. Later the same thing happened between Wigan and Birmingham, although in the latter case I believe these shows have generally clashed.

Wolverhampton, London, Bacup, and Birmingham are the four clubs at present standing out. If they are out when the next show season opens, and their dates clash with clubs in the Federation, the ruling body say that members shall only bench birds at the Federated shows. A well-to-do club like the Midland, if clashing with a young federated club, would in the absence of such rule no doubt wreck the show of the latter. The first thing, therefore, the Federation will do is to attend closely to its preserves. And why not? Is there anything unfair in that? The intriguer who sent the "wireless" to Wolverhampton must have thought so.

Mr. Tomlinson also asks the federated members, as fair-minded men, to allow more latitude with regard to this rule, an extension of time. All clubs were asked to federate about March, 1916. The outstanding clubs have, therefore, had nine months to consider the matter, and as the rule is not actually in operation until next November, I would like to know how much time these clubs actually require.

I am an uncompromising opponent of any thing of this nature, my contention being that any alteration would simply reduce the business of federation to a farce. It might be argued, I know, that if a club had not federated before November, its members could not show in the young bird classes. My answer is simple. Do as we of the Federation did this year, and ring with two rings. What is sauce for the goose should surely be sauce for the gander. I think all members of the new organisation, except a very few prejudiced minds, will agree, and can safely be trusted, after reading these remarks, to look after their own interests.

Some of these gentlemen who have been shouting loyalty to the B.R.C.C. from the housetops would oblige many of us by stating in cold print the last duly elected ruling committee of this club. From what I can gather, provincial members do not appear to have passed a vote on this since the war started. Anyway, it would be interesting to know the constitution of the committee, say, including and since the year 1913. Then we shall know where we are, and the public shall judge. Now, you who like to strike without being seen, sign your names to anything you may write in reply to this.

A. Montague.

The Exclusion Rule Explained.

Sir,—I shall be pleased if you will allow me space to explain the rule mentioned by Mr. Tomlinson in one of his late articles. The rule as passed at the meeting of delegates was carried by the majority of ten votes to three and reads as follows: "That no member of a Federated Club shall show at other than Federated Club shows, and no judge connected with a Federation Club shall judge at other than Federation Club contests." It must be quite understood that this rule does not apply to the coming British Roller C.C. Show or shows to follow before the season closes, but comes into operation at the beginning of next show season. I ask you to publish this particularly because I have been written so many times asking for an explanation why it has not appeared in the press. I believe it was in your hands the second week in November but unfortunately I signed my initials instead of my name, thereby not complying with your rules, so I suppose it was sent to the waste paper basket.

Thanking you on behalf of the National Federation of British Roller Canary Clubs.

H. Best, Sec.

A Complaint of Lack of Interest.

Sir,—I am writing in the hope that you will find space for this letter to try to correct a wrong impression that has got abroad in respect of the objects of the new Federation of Roller Canary Clubs. I have been written to this week from five different quarters with respect to the attitude of the Federation to Bell-Glucke. I ask fanciers not to try to lay a ghost till the ghost appears; if it does appear, and if the majority decide against it or any other tour, we shall expect all to abide by the decision of the majority. A feeling has got abroad that we intend to knock some of the Gluckes off the sheet at once. Nothing could be further from the truth, as at neither of the two meetings of the Club's delegates has Bell-Glucke or any other tour been discussed, at least, not in my hearing. Now, Mr. Editor, I can't help thinking that fanciers do not take as much interest as they should in articles inserted for their benefit in your valuable paper. In your issue of Dec. 9 appears a copy of the rules of the Federation as agreed to by the delegates, but if you could again find space to insert them as sent in full for the benefit of the fancy in general I am sure you will be doing a good turn. I have been asked repeatedly what will be the entrance fee to become a member of the Federation. There is no entrance fee; every fancier becomes a member by being a member of his own club, which is in membership of the Federation, and he will have as equal a say in its management as any other member. Rings are now on order, with the letter N7, in packets of ten for a shilling, and will be supplied from here. Any question appertaining to the Federation I shall be very pleased to answer.

H. Best.

5, Alma Place, Beckett Street, Leeds.

[We think we should not be acting in the interest of readers in general if we were to occupy space in reprinting, for the problematical benefit of a few, particulars which have so recently been published. To any who are interested, and who have been so careless as not to read the rules mentioned, a copy of the issue of Dec. 9 will be forwarded post free for 3d.—Editor, Cage Birds.]

What is a Ticked Bird?

A New Classification Suggested.

Sir,—As an amateur I have closely followed this vexed question, and believe that thousands, like myself, can only feel surprise that experts are now so deeply engaged in absolute disagreement. Would it not be better to expunge the word "ticked" and adopt the four following classes, viz.:—(a) Clear or invisibly marked. (b) Technically marked only. (c) More clear than marked. (d) More marked than clear?

Under this classification everyone would know precisely how to class his exhibit. Supposing we put Messrs. Stubbs' much discussed bird to the test under the foregoing classification, is there any difficulty in the matter? I think not. The bird is not technically marked, and could only be shown under Class (c), More clear than marked." It would appear that by adopting the classification referred to we should avoid certain forms of reference nearly always to be found in show schedules, such as "This class to mean, etc., etc." Should such references be needed? In the classification I have suggested, commencing with green blood, we obtain Class (d), then follows Class (c), which leads to Class (b), and upwards to Class (a). It is something to work for, and a technically marked bird is certainly deserving of a class entirely its own. Personally I should prefer a four-pointed bird under Yorkshires to any other. To me it reigns supreme.

Percy Lane.

The Usefulness of Disqualifications.

Sir,—I think Mr. Midgley's letter puts the hat on this job. Do not the rulings of the Yorkshire Union and Yorkshire specialist clubs justify Mr. House's action in wrong classing Messrs. Stubbs Bros.' bird? These rules have been compiled not by one or two, but by vote of very many of the most ardent and highly intelligent fanciers, as far as bird breeding and exhibiting are concerned, in the world. If a Yorkshire grizzled is a ticked bird, and according to the above ruling it is, why, it must follow that a Norwich is the same, or there will be a muddle.

Friend Bastock says Mr. Blakston never posed as an authority; perhaps not. But he was one without a pose. In his quiet way he could discuss the merits of a bird, and especially a Norwich, with any man it has ever been my privilege to meet, and that before he sent out his circular or wrote his book. Just like a sociable, wise man, he wrote to the fancy stating his intentions, asking for any suggestion, and enquiring if they thought his efforts would be appreciated. He thus secured the assurance of its success before his book was printed. It is not, as you, Mr. Bastock, would imply, that he got the material he wanted from others; no, sir, he had it, and it matters not what anyone may say, I know he was a very great authority, and one who did much for the fancy.

Just let our mind go back thirty-four or thirty-five years ago, when the Norwich breeders tried to introduce a different type of bird. Blakston wrote in the papers urging them to keep to the true type, and it was a check on them. There is a member in our Guisboro Priory C.B.S. who at that time put four birds up under Mr. Blakston at one of the Northern shows, and Mr. Blakston, in his report, after he had judged them and put three in the money, said that this exhibitor's birds were the true Norwich type. The result was he had letters from all parts of the country asking if he had any to sell, showing, to my mind, the confidence the fancy had in Blakston's judgment. He certainly was one of those men who, being dead, yet speaketh.

As for Mr. House's action, personally I admire a man who dares to take his stand for what he considers right, though he knows very many will be against him. If what he has done is the means of rousing the Norwich breeders, as friend Cole suggests, to be more definite or come to a proper understanding as to what is a tick and a mark, it will be worth all the trouble. There are too many judges who pander to public opinion. I said to a judge at one of our shows some time ago, "Don't you think that bird is doctored?" and he said, "Oh, yes; that is why I have passed him. You see, it only makes a bother if you disqualify a bird, and that exhibitor and, perhaps, some of his friends won't show under you again. Besides, show committees don't like it, so it is far the best just to pass them." But I think a check now and then does good and helps to bring many things before the fancy that otherwise would get overlooked. Messrs. Stubbs ask if the Norwich Club accepts Blakston. No, they don't. If they had, it would have saved the situation. So we shall not be going backward or into the dark ages, but forward, if we take a little advice from one of the old ones, even Blakston.

J. C. Cook.

(Correspondence continued on next page.)

CORRESPONDENCE.

(Continued from page 58.)

A Permanent Tribunal Suggested.

SIR,—I have taken a keen interest in the letters that have appeared in your columns under the above heading. Some of them are very interesting, other are far too personal. Personalities or waglers will not solve the question, and I find very few suggestions as to how to do so.

The bird that is causing all the excitement being a Norwich, I would suggest that the N.P.C. take the matter up, appoint two of its members as delegates, invite the other specialist clubs to appoint the same number, arrange a meeting at a convenient place, fairly central, giving all an equal chance to attend, and have the matter thoroughly thrashed out. The decision at which they arrivo should bo made a rule of the clubs represented.

I think that if a board on the above principle could be made a permanent one, and all difficult matters as they arise submitted to them, it would be one of the best things ever undertaken for the benefit of the fancy.

Of course I know that whatever is done there would still be a small percentage of exhibitors who would not be satisfied, and who would still continue to growl unless our judges saw the same way as they did. These people are not sportsmen, they cannot take a defeat and come up smiling at the next show.

This appears to me to be a growing evil, and no good to the fancy. During the show season there have been a number of letters from exhibitors complaining of the awards of judges. They overlook the fact that the judges are appointed by the votes of members of the show committees, who must have full confidence in them, otherwise they would not appoint them, also that schedules of nearly all if not all shows contain the rule that the award of the judge is final.

I hope to see a better spirit prevailing next season, and that somo good may arise from the above suggestion. J. SPINK.

More About Blakston.

SIR,—Before proceeding further with this question, wo should like to point out that we are not questioning Mr. House's ability as a judge of birds themselves, neither is it through any ill-feeling or anything of that sort that wo brought this matter forward. Now we notice Mr. House describes the markings on the bird as faint small ticks or fleckings. This is not correct. The markings all over the bird's shoulder are of a pretty prominent character, and can bo seen easily by anyono standing ten yards away from the bird. The markings also extend in many instances down into the shafts of the feathers. Mr. House next says to bring another bird into the subject is not fair. Well, it must be remembered that Mr. House quoted Blakston and the Yorkshire Union in support of his action in wrong classing the bird, hut had they been judged according to these standards neither bird should have been allowed to stand. We quite agree that the markings on the birds are not exactly alike. The marking of the bird that stood first is more solid, but not so large; but it should be noted that neither bird is marked on eyes, wings, or tail. Now as regards the wordings of the schedules we consider the bird should have been allowed to stand at Port Talbot more so than at the other shows. The wording of the schedule was "uneven or variegated," and as we consider our bird to be a lightly variegated bird, we contend that he was in the right class. The wordings at the other shows were "marked or variegated."

Mr. House next says that neither of the judges has ventured an opinion of the bird. It should be remembered that actions speak louder than words, and letting the bird stand is their answer. Mr. Martin says that either of the four judges we named would be generous enough to allow the bird to stand in the ticked class unless barred by schedule. We are very much obliged to them. Perhaps they would allow it to stand in the Linnet class.

By the way, if Mr. House will look up Wallace's book on Canaries, and read pages 311 and 312, he will find that Blakston was not much of an authority. With your permission, Mr. Editor, we should like to give a quotation which will be found in Wallace's:

"Some 26 years ago (1867), I, with Messrs. John Rutten, Thos. Clark, C. J. Ayres, Geo. Shield, Edwin Mills, W. Rogers, Snaiton Hull, and a few others, got up an open all England show in Sunderland, and I was much astonished to find that Mr. Richard Mackley and Mr. G. Collinson came all the way from Norwich with their show specimens; Mr. W. Walton from Winchester, Hants; and Mr. Howath Aston (with his man Jones), from Manchester. I made all the preliminary arrangements for this show up to the time of opening, but being held at Christmas time I could not see my way clear to continue as acting secretary, and I tried to get Mr. Mills to take my place. He objected, but said, "I can find you a man that will do the work admirably, but he knows nothing about birds; nevertheless he will do anything in his power to carry out your wishes." This man was the late William Anthony Blakston, and he proved a very useful adjunct, and this was the means by which he was brought into the 'fancy.' He was an astute and intelligent man, and one that could readily pick the brains of most men, but as a practical breeder his experience was very limited; his knowledge was gained from other men, such as Rutten, Clarke, Williamson, and others. I do not say this in disparagement of Mr. Blakston, whom I have always considered a shrewd, clever, ingenious, and a fluent writer, and as such I have always admired him, but I believe that many people who did not know him intimately run away with the idea that he gained his knowledge from practical breeding and observation, which was not the case. He could truly have said with Woffon—'I am but a gatherer and dispenser of other men's stuff.'"

This is found in Wallace's book, published 1893, and after Blakston's death, and it should break down Mr. House's theory that Blakston was an authority, and justifies our action in not accepting him as such. We prefer practical experience rather than the knowledge Blakston had. Please accept our thanks, also your artist for the drawing of the marked buff in your paper, CAGE BIRDS. This is a paper wo cannot do without.

STUBBS BROS.

Cheltenham.

The Past is Dead—R.I.P.

SIR,—I have to apologise to your readers and to Mr. House for not having read Blakston. I once glanced partially through the pages, and the drawings were so badly drawn, so different and so far behind our drawings of the present day, that I dropped the book as I should drop a hot einder. Just as the artists of that time were behind the artists of to-day, so, I believe, that Blakston is behind our great authorities of modern times, of which Mr. House is one.

It is to be remembered that when Blakston wrote his book there were few men with any experience in birds who could wield a pen; but, thanks to our free education, there are hundreds to-day that would make as good a job of it as Blakston did. Does anyone think that our present day judges have anything to learn from Blakston? Does Mr. House in his inmost heart, acknowledge that Blakston can teach him anything? I am sure he doesn't, if we could read his mind.

These days are days of progress, and Blakston is a back number; and for what little knowledge I have picked up about birds I have to thank my observations and gleanings from the best of our present day writers. I don't want to go back. I want to go forward, and my sense of reasoning tells me that a bird that is marked from the neck to the root of tail is a marked bird. It is of no use referring to the Yorkshire clubs. For one reason, their classification is different. They have a marked club, with classes for "technically marked" birds according to rules laid down, probably taken from Blakston. Why should not we be allowed to steer our own ship? Are not fanciers of to-day educated enough to frame their own laws without being referred to books 50 years old?

Then there is the society who were responsible for the classification. Did Mr. House ascertain their wishes regarding the disqualification? It is just possible that the society were in favour of a broader interpretation than Mr. House took.

From what Mr. Bastock says it would seem that even Blakston had to write his book by picking other people's brains. Surely we are enlightened enough to form an opinion on so rudimentary a subject without going back to him.

T. JOHNSON.

Time it was Settled.

SIR,—I have followed the controversy in your most valuable paper for weeks re Messrs. Stubbs' disqualification at Port Talbot Show by Mr. C. A. House. The first thing we ought to do is to read the wording of the schedulo before running into the fancy paper and trying to pull any judge down One judge does one thing and another quite the opposite, so it is time that our specialist club settled the matter; then we should all know what to do, and it would save a lot of trouble. I was looking forward to Friday's CAGE BIRDS to see if the drawing of the bird was there, and great credit must be given to Mr. Norman for giving us such a good sketch. In my opinion it is nothing more nor less than a ticked bird, and I consider Mr. House quite justified in wrong classing it.

F. COLLINS.

(Some interesting letters unavoidably held over.)

ROUND THE SHOWS.

PAISLEY.

63rd annual exhibition, Jan. 2, in the Minor Clark Town Hall. Entries did not come up as well as expected, but the exhibition was very well patronised and friend Laidler was good enough to inform us he would come out on the right side. The hall is lofty, well ventilated and comfortable, and makes quite a suitable rendezvous for an exhibition of the kind, free from any draught. The judges, assisted by a competent and reliable committee, got through their work in fine style

SCOTS FANCIES, CL. OR FOUL YELL. CK. (5): 1, Hendry, fine size, reach and droop, neat snaky head, thick through, good pose; 2, Baird, hard up, fine style, nice pos., shapely, stylish, not just so massive, well staged; 3, Muir, up in size, type, style, fine shoulder; 4, 5, Rollo. BUFF (8): 1, David, fine size, rare type, nice shoulder and reach, good drive, nice length and side, thick through, staged to win; 2, Gillies, nice size and cond., deep through, nice drive, rather inclined to crouch; 3, Baird, runs very close up; 4, no name; 5, McDowall; 6, Hamilton. PIED OR GREEN. YELL. CK. (5): 1, David, nice pied, in grand order, fine top end, good reach and drive, fine style and side, creditably staged; 2, Stewart, pied, very similar in build, neat through, but on finer lines; 3, Livingstone, good green; 4, Muir; 5, Rollo. BUFF (6): 1, 2 spls., David, good green, fine type, stylish, rare shoulder, grand reach and droop, in the pink; 2, 2 spls., Malcolm, green, hard up for size and style, not quite the reach or so thick through; 3, 2 spls., Muir; 4, McLaughlan; 5, McDonald; 6, Gillies. CLR. OR FOUL YELL. HEN (10): 1, spl, Stewart, capital order, fine top end, nice length and side, thick through, stylish, free worker; 2, David, grand qual., close feather, fine style, free action, good top end, neat snaky head, well under perch, presses hard; 3, Baird, smaller, but neat, good type, stylish, fine order, beaten in subs.; 4, Livingstone; 5, McKinven; 6, Kennedy; 7, Muir. BUFF (10): 1, spl, Stewart, plenty size, fine body subs., good shoulder, reach and droop, nice length side, free action, easy win; 2, Baird, good size, fine length side, stylish and typical, nice pose; 3, Malcolm, nice type and build, bit small for a buff; 4, Muir, quite up on 3rd, we fancied better, must have pressed hard; 5—McArthur; 6, Livingstone; 7, Rollo. YELL. PIED OR GRN. HEN (6): 1, 2 spls., Kennedy, not a monster, but all there for type, style and free action; 2, spl, Lyon, tight feather, nice shoulder and top end, stylish and free worker, good side and drive; 3, Stewart, good pied; 4, Kennedy; 5, Lyon. CREST OR C.B. CK. (7): 1, 3, 4, 7, McFadyen, even mark D.C., fine size, capital feather, neat top piece, fine radiation and droop, well centred, good frontal, well staged, 3rd cl. body, grizz. crest, plenty body subs.; 2, Brown, var. C.B., grand size and subs., fine skull and lash, broad entrance, thickly clothed, A1 feather, in capital order; 5, Brown; 6, Gemmell. HEN (5): 1, Skouce, fine green, in lovely order, rare qual., neat top, fine radiation, droop, well staged; 2, Brown, good C.B., plenty body subs., good feather; 3, 4, McFadyen; 5, Burnett. CL. OR TKD. YELL. NOR. CK. (6): 1, Stewart, fine type, shapely, neat carr., sweet head and neck, steady, well staged; 2, Kerr, fine size, hot level col., grand qual., typical, neat through, not quite so full in head, close run, little to separate; 3, Scobbie, fine size, good type and qual., too fat on front; 4, Martin; 5, no name; 6, McLellan. VAR. GREEN (4): 1, Martin, grand size, capital col. and qual., full head, neck, sweet front, bit too long behind, only fault; 2, Stewart, lightly mkd. buff, fine size, nice build, well braced, neat, in fine order; 3, Sinclair; 4, Potts. In nice order, might have got up a peg. CL. OR TKD. BUFF HEN (5): 1, spl, Simpson, fine tkd, plenty size, fine subs. and type, nice qual., thick-set, well braced, grand cond.; 2, Stewart, good all round, not quite so hot as leader, 2, 3, Martin, small but neat; 4, Kidd; 5, Skouce. UNFLIG. BUFF CK. (6): 1, spl, Simpson, fine qual., tkd., neat and full top end, clean fronted, well braced, nice level col., well staged and steady; 2, Aitken, well up for size, typical, well braced; 3, 4, Martin; 5, Potts; 6, Mason. HEN, YELL. (7): 1, 2 spls, Simpson, lightly mkd., fine size, grand type, sweet qual., inclined to cross at times; 2, Martin, well up for size, sweet level col., good front, neatly braced, better cut away behind, falls in feather, cond.; 3, Connelly, fine broken grn., cobby and typical, hot col. and stylish build, well staged; 4, Stewart; 5, Gemmell; 6, Kidd; 7, Kerr. BUFF (8): 1, Stewart, good var., full head, thick-set neck and broad deep front, cobby and well braced, in fine order; 2, Aitken, similar marking, nice qual., not the subs.; 3, 7, Martin, 3rd trifle smaller in build, but typical, neat, must have pressed; 4, Sinclair, close up for size, good feather, steady and well shown; 5, McLellan; 6, Mason. YORKS. (4): 1, 2, spl, McLellan, nice tkd. buff, good length and type, nice qual., shapely, 2nd cl. yell., fine col. and quality, neat carr. and style. BORD., CLR. OR TKD. YELL. CK. (7): 1, Niven, nice type and qual., good col. and carr.; 2, Brooks, deep level col., fine qual. feather, neat carr., better in head and neck, we preferred; 3, Ronaldson, very typical, neat carr. and style, finely tapered, well braced, just behind in col. only; 4, Auld, grizz. cap, little beauty, we thought had hard lines; 5, 6, no names; 7, Mossie. BUFF (7): 1, spl, Niven, nice weight, good col. and qual., good top end, neat, well drawn, inclined to be trifle hollow across back; 2, Wilson, fine cond., neat, typical, fine carr. and style, must have been a close run; 3, Mossie, grand qual. feather, shapely, clean got up, shade strong in head points; 4, McMinn. CL. OR TKD. BUFF HEN (4): 1, spl, Wilson, all there for type and qual., shapely build, well braced, in the pink; 2, Auld, good qual., neat wing carr., not quite so hard in cond.; 3, Mossie; 4, Potts. VAR. YELL. (6): 1, Wilson, good even mark, capital col., A1 qual., typical and good through, in the pink; 2, McMinn, almost even, fine qual. feather, neat head and neck, not just so typical or clean cut; 3, Paton; 4, Galbraith; 5, Cunningham; 6, Glass. BUFF (9): 1, Wilson, good uneven, grand type and qual., neat carr., shapely and stylish in build, staged in lovely order; 2, Smillie, grand qual., even mark, good markings, nice style, well braced; 3, Niven, almost even mkd., nice qual.; 4, spl, Paton, nice qual., cinn. mark shapely and well braced; 5, McMinn. GREEN (7): 1, Wilson, fine buff nice groune col., distinct pencilling, sweet type and qual., well staged, steady, good trim; 2, Reid, typical yell., nice level col., shapely, well braced; 3, Paton, buff, nice type and build; 4, Glass. CINN. (7): 1, Wilson, well known yellow ck., in full breeding form and looking quite the lenoth of a Yorkie, good col. and pencilling, in fine feather, well staged; 2, 4, Glass, 2nd fine type and qual., neat shape, well braced, just falls in head and slightly at throat; 3, Niven nice size, col., and wing carr., well staged. LIGHT MULE OR HYB. (4): 1, spl, McQuiston, capital jonque Greenf., well known winner, in lovely order, plenty size and subs., lovely col., A1 qual.; 2, 4, Campbell, former even mkd. goldf., in lovely order, 4th fine Siskin cross, in capital feather. DARK CAN. MCLE (5): 1, McQuiston, grand jonque Goldf., in lovely feather, grand col. and qual., capital size and markings, well known; 2, Gentleman, same cross, not far behind for size, in fine feather, well staged, beaten in col.; 3, Gribben, grand jonque Linnet, fine size, capital col. and bloom, nothing amiss had it separated the first two; 4, Campbell, 5, Tomlinson. GOLDF. (15): 1, Campbell, real good Finch, distinct col. and markings, grand face, bright wing-bars and moons, neat buttons, steady, well staged, 2, Connelly, nice col., pure markings, steady, well staged, falls slightly in squareness of blaze, 3, Gentleman, scarcely so large as 2nd, bit more square in blaze, little between; 4, Wallace; 5, McLelland; 6, McDonald. BULLF. (5): 1, 4, Matheson, capital col. and markings, grand jet black cap, neat wing-bars, steady and well shown, 4th shade smaller, but good col. and cond.; 2, McCloy, in nice order; 3, McQuiston, grand Finch, in the pink, little to find fault with, our choice when taking notes. GREENF. (14): 1, McQuiston, nice jonque, good size, fine feather and cond., still we thought trifle lucky to beat 2, Campbell, real good jonque, fine size, col. and cond., perfectly staged, our choice; 3, Gentleman, not quite so massive, but for col and cond. equal to best in class, well staged; 4, Wilson. LINNET, H.M. (7): 1, Davidson, fine size, sound body col., distinct pencillings, steady, in fine order; 2, McQuiston, shade smaller, grand col. and markings, rather unsteady; 3, McGavin, lovely order, steady, well pencilled, runs very close up, our choice for 2nd; 4, Gentleman. LINNET (11): 1, Wilson, topper for size, col. and markings, steady, shown to perfection; 2, Campbell, steady, good col. and markings, not quite so massive; 3, Thomson, good size and ground col., fails slightly in pencilling at front; 4, Swan. SISKIN (6): 1, 2 spls, Connelly, good jonque, capital cond., fine size, nice markings, wins spl. best British; 2, McGavin, fine size, grand cond., steady, well shown, fails in col. and profusion of markings; 3, Gribben, very similar in size, col. and markings close up; 4, McKirdy. MEALY POLL OR TWITE (5): 1, spl, Gribben, smallish Twite, in capital feather, grand col. well pencilled and steady, staged in the pink; 2, McQuiston, fine Mealy, in good feather, nice col. and markings, well staged; 3, Wilson, Twite, very similar to leader; 4, Gentleman. LESSER REDPOLL (5): 1, McQuiston, little beauty, nice poll and bib, good feather and pencilling, steady, well shown; 2, Campbell, in full bloom, runs close up; 3, Gribben, shade smaller, well mkd., steady lacks the col. of leader; 4, Gentleman. FOR. (6): 1, Lee, grand King Parrot, in lovely feather and cond.; 2, Fraser, fine pair Pennants, in perfect order; 3, 4, McKirby, Quail and Red-crested Cardinal; 5, Clark; 6, Langford.

PENYGRAIG.

First Open Show of the Penygraig C.B.S., Butchers' Arms Hotel, Jan. 25. The Club room, a spacious apartment, well lighted and free from draughts, and kept comfortably heated, makes an ideal place for a cage bird exhibition. The exhibits were arranged on tiers at a convenient height, giving everyone an opportunity of examining the birds without any trouble. Entries totalled 300, which was highly satisfactory for a first venture. A more enthusiastic band of fanciers could not be found, and although at the eleventh hour faced with serious difficulty, they were nothing daunted, and one and all worked with a will to make the show a success. The arrangements were in the capable hands of the show manager, Mr. W. Hollinshead, who left no stone unturned to add to the comfort of the exhibits. He was ably assisted by a hardworking band of stewards, Messrs. R. Parry, W. Edwards, J. Hurle, J. Beazer, G. Turner, T. James, W. Morris, J. Lawrence, A. Legg, T. Watkins, and E. Whiteman. The vice-pres., Mr. D. Williams also gave very valuable assistance, and is indeed a great asset to the society. The duties of secretary were ably carried out by Mr. T. L. Evans, who had everything in apple-pie order, His assist. sec., Mr. G. Padfield, also deserves a word of praise for the valuable help he gave. All the birds that arrived after delivery time on the night before show, a very considerable number, were carried from the station by the committee, and immediately attended to.

The exhibits were really excellent all round, the winning unflighted Nor., being a bird of wonderful subs. and qual. Yorks were very fine, some really grand exhibits being staged by Messrs. East, Tucker, Bevan, Watkins, and Hollinshead, and Edwards. In the novice section Mr. H. Fry staged a couple of grand yells., and easily accounted for both classes. In Borders Mr. D. Jenkins had a field day, winning five of the champion classes somewhat easily. The green classes were real eye openers, 14 cocks, and not a bad one amongst them, giving the judge an anxious time in separating them. Mr. Nelmes eventually won with a very typical yell. green, and yell cinn. closely followed by a charming buff green, exhibited by Mr. Middleton, who also staged the winner in the hen class, another real gem. British, especially Goldfinches and Bullfinches, were very good, Mr. Gilbert's Goldie and Mrs. Dalton's Bullie being much admired, as also was the latter's Lesser 'Poll and Siskin. Special for best British was won by Mr. Burrows with a charming Waxwing of wonderful size and colour in perfect feather. Mr. Chick's noted cl. Jonque Greenf.-Can. easily accounted for the Mule class and also carried off the Special for best exhibit in show. Mr. S. J. Nicholas judged.

NOR. CL., ETC. CK. (9): 1, Morris, cl. Yell., good col., neat head, shapely body, fine wings, tail, lovely quality and cond.; 2, Mrs. Bridgwater, cl. buff, grand size and shape, good bold front, splendid wings and tail, fine qual., cond., and col.; 3, Jones, cl. yell., nice col and qual., grand head, nicely moukled throughout, good wings and tail; 4, Tedstone, cl. yell., nice col. and qual., very shapely, hardly so bold head as leader's; vhc, Jenkins, Hitchings; hc, Watkins, Llewellyn; c, Thomas. BUFF HEN (7): 1, G. T. Jones, tkd., nice col. and qual., good round head, deep chest, cobby shape, well braced wings and tail, good subs and cond.; 2, Jenkins, cl., neat head and neck, splendidly moukled, good wings and tail, grand qual. and cond.; 3, Hitchings, cl., another good one, splendid col. and qual., neat head, grand shape, good wings and tail; 4, no name, Cl., nice col and qual., very shapely, hardly subs. of leader; vhc, Llewellyn; hc, Hollinshead and Edwards; c, Morris.

(9): 1, spl, best Brit., Burrows, one of the largest Waxwings seen out for many years, grand shape, lovely col., splendid wings, grand qual. and cond.; 2, 3, Chick, Hawfinch and Yellowhammer, both noted birds often described, faultless cond.; 4, Robinson, charming Waxwing, perfect feather and cond., loses only in size to leader; vhc, Sheppard; hc, Rudge; c, Hiden. MULE (7): 1, spl, best in show, 3, Chick, the celebrated cl. jonque Greenf.-Can. often described, a real gem, latter grand cl. buff Greenf.-Can. in fine fettle; 2, 4, Mrs. Dalton, Dk. Greenf., wonderful subs., lovely col. and qual.; 4, Dk. Linnet, grand shape, tip-top col. and qual.; vhc, Breslauer; hc, c, Gilbert. HYB. (2): 1, 2, Mrs. Burgess, neat brace of Goldf.-Bullies in good order. SELL. (7): 1, Jones; 2, vhc, c, 3, Edwards; 4, Padfield; hc, Griffiths.

SUTTON-IN-ASHFIELD.

The Sutton-in-Ashfield and Huthwaite Amalgamated C.B. Soc. held its first open show, Jan. 20, in the large assembly room attached to the Railway Inn (the old Sutton headquarters). The entry was good, and quality throughout superb. Norwich were a grand lot, many "eye-openers" being put down. Yorkshires took the eye very much, and well-known exhibitors were to the fore with magnificent specimens. There were on view also some real champion Crests and Crestbreds. British and Mules were charming, battles being fought over again by some well-known warriors. Amongst the novices were many specimens quite capable of holding their own in the "upper circle." Sp. best bird by champion member went to W. Vardy with a grand unflig. yell. Nor. Best novice member, a very fine buff grizzled Crest, Norwood.

President Clayton is at the present time "doing his bit" for his country. Officers and committee are well known and practical fanciers, and secretaries Parkin and Conmah are energetic and courteous workers, and deserve all praise for good work executed. Stewards who lent valuable assistance were Messrs. S. Woolley, J. Rodgers and G. Sheperd (the latter acting as an assistant Sec. in fine style). Mr. W. Vardy, senr., also gave very useful help. Staging was neat and well thought out, and judging was over in good time, the management throughout being A1. Mr. J. C. Barnes (Sheffield) judged, and gave full satisfaction.

CHAMP. YELL. NOR. (8): 1, c, Vardy, senr., check mkd., fine subs. and shape, lovely col. and feather, grand carr., gem; 2, vhc, Houghton, mkd. wing and eye, A1 qual. and col., shapely, capital action, hardly so large; 3, Vardy, junr., nice shaped cl., good in feather and col.; hc, Thomas. BUFF (7): 1, hc, Vardy, junr., cl., beautiful feather, a col., short and thick, plenty of size; 2, vhc, Vardy, senr., mkd. wing and head, magnificent feather and col., neat head and neck; 3, Houghton, cl., splendid feather and col., true type, tight as wax. GREEN (3): 1, 2, Vardy, senr., yell. var., wonderful subs., qual. and col., good shape; 2nd, buff green, cobby, superb qual., grand shape and carr.; 3, Houghton. YELL. HEN (3): 1, Thomas, noted cl., looking as well as ever, a goal "big 'un"; 2, Vardy, senr., cl., cobby, feathered to perfection, rattling col., beaten only in size; 3, Vardy, junr. BUFF (3): 1, Houghton, cl. of marvellous size, charming shape, lovely feather, not hot, but a gem; 2, Vardy, senr., cl., A1 qual., better col., not the size, grand shape; 3, Smith. UNFLIG. YELL. (3): 1, sp, 2, Vardy, senr., cl., wonderful subs., grand shape, slashing feather and col., clean cut; 2nd, cl., shapely, capital qual., nice tone of col.; 3, Houghton. BUFF (9): 1, Houghton, var., topper for col. and qual., grand shape, well up in subs., A1 carr.; vhc, Vardy, senr., tkd. head, rich col., silky, plenty of size; 3, hc, Thomas, tkd. head, ablaze in col., superior feather, nice shape, beaten in subs.; c, Smith. HEN (10): 1, Houghton, cl. buff, the best we have seen this season, magnificent all through, one with a future; 2, hc, Vardy, senr., very shapely cl. yell., grand shape, feather and col., in the pink; 3, Thomas, buff, tkd. head, good in qual., nice col., A1 shape. YELL. YORKS (9): 1, Dykes, mkd. wings and eyes, smooth as wax, hot as fire, straight as a rush; 2, Green, cl., superb feather and col., grand pos. and length, well on leg, close up; 3, vhc, Sheppard, cl., straight, A1 qual., good back and wing carr.; hc, Lanckham; c, Thomas. BUFF (8): 1, Dykes, var., wonderful length, tight as a Java, staged to the moment; 2, Thomas, cl., straight and well clothed, capital col., clover legs, gem; 3, Sheppard, tkd. neck, A1 qual. and col., nice pos.; vhc, Lanckham; hc, Green; c, Miller. HEN (8): 1, Dykes, cl. yell., marvellous length, lovely col., grand pos., well on leg, real charmer; 2, Thomas, cl. yell., straight, A1 qual. and col., fair of style, beaten a little in length; 3, Green, buff mkd. wings, capital feather, nice length, good back and wing carr.; vhc, Lanckham; hc, Thomas; c, Beardall and Walker. UNFLIG. (9): 1, vhc, Thomas, cl. yell., lovely symmetry, feathered to perfection, A1 col.; 2, Dykes, cl. yell., shooty, grand feather, hardly so lengthy, still a beauty; 3, Lanckham, cl. buff, wonderful length, capital pos., superb feather, well on leg; hc, Green; c, Beardall and Walker. CREST (2): 1, 2, Norwood, buff var. D.C., winner shade largest and little more dense in "toppin," beauties. C.B. (2): 1, 2, Norwood, buff mkd. head and buff var., rare size, grand skulls, former has it in width and length of head feather. GOLDF., ETC. 12): 1, Leadbeater, well known, often described as a gem, and rightly so; 2, Henshaw, Bullf., rare size, best of shape, nice breast, capital cap, in the pink; 2, Simms, Goldf., good size and shape, neat bars and buttons, beaten a little in blaze; vhc, Chick; hc, Evans; c, Davis and Harper. LINNET (10): 1, c, Parlett, well up in size, nice qual., good col., neatly pencilled; 2, 3, Leadbeater, beauties, graud col., lovely qual., well mkd., little separates them, pressed hard for premier honours; vhc, Simms; hc, Daws and Harper. GREENF. (3): 1, Parlett, fine size, shape and col., begins to show the "old man," still a good one; 2, Henshaw, shapely, good subs., not quite the col., yet close up; 3, Mossendew. SISKIN (10): 1, 2, vhc, Simms, magnificent Twite and charming Redpoll, both put down in style, credit to owner; 3, Evans, nice Mealy, good in shape, size and qual., nice markings; hc, Parlett. A.O.V. (9): 1, 2, 3, Chick, real "knock outs," Hawfinch, Yellow Bunting and Corn Bunting. MULE (3): 1, 2, Chick, the wonderful cl. yell. Greenf.-Can. leading; 2nd, tkd. buff (same mixture), will want some whacking; 3, Mallatratt, G-pointed buff Goldf.-Can., quite good enough to win at most shows. DARK (2): 1, 2, Parlett, well known yel. Greenf.-Can. and a real good Goldf.-Can, both in fine fettle. NOV. YELL. NOR. (8): 1, Hawkins, lovely cl., fine shape and size, A1 qual. and col.; 2, c, Parkin, very massive var., grand feather, good body and wing carr., not the head; 3, Taylor, shapely cl., A1 col. and qual., smaller, yet neat; vhc, Bradley; hc, Evans. BUFF (7): 1, Hawkins, mkd., rare shape and subs., capital feather and col., good carr.; 2, c, Woolley, mkd., shapely, A1 col. and qual., beaten in subs.; 3, vhc, Parkin, nice cl., good type, col. and carr.; hc, Evans. HEN (7): 1, Taylor, cl. yell., rich col, silky texture shapely A1 carr.; 2, c, Hawkins, cl. buff, tight as wax, capital shape and col.; 3, Woolley, cl. yell., good col.; vhc, hc, Parkin. UNFLIG. (9): 1, Bradley, shapely cl. buff, A1 qual. and col., well up in size; 2, c, Parkin, neat cl. yell., well feathered and nicely fed, not the biggest, still pleasing; 3, vhc, Hawkins, var. yell., nice shape, col. and qual., moves well; hc, Woolley. YELL. YORKS (7): 1, vhc, Wilson, straight, tight, lengthy and stylish; 2, 3, Sawer Bros., mkd. wing and var., very typical, former has it in length. BUFF (1): 1, Wilson, tkd. head, nice feather and col., good type and length. HEN (4): 1, 2, 3, Wilson, cl. yell., cl. buff and ditto, very charming, all in highest possible trim; vhc, Cope. UNFLIG. (9): 1, hc, c, Wilson, cl. yell., shooty and lengthy, A1 qual. and col.; 2, 3, Sawer Bros., cl. buff, capital feather, stands well, good length and style; 3rd, var. yell., nice col. and qual., good type, well on leg; vhc, Cope. CREST (8): 1, sp, 2, Norwood, buff, cl. body grizzled Crest, rare subs., crest large and dense, delightful droop and centre; 2nd, buff green pied tail, plenty of size, crest round as a rim, nice droop, not so thickly packed, yet a beauty; 3, c, Searson, buff green, heaps of rich feather, grand body subs., crest of capital formation, neat droop and centre; vhc, Fox; hc, Levers. C.B. (8): 1, 2, Norwood, buff var., immense subs., wealth of feather, grand skulls, fine lashing, little in them; 3, c, Fox, cl. buff, well up in size, heaps of feather, not quite the rise or width of skull: vhc, Levers; hc, Searson.

Members' Shows.

NOTE.—Secretaries will greatly facilitate the work of ourselves and our printers if they will kindly endeavour to send their reports as nearly as possible as they see these accounts printed, and if they will also write the names of exhibitors as distinctly as possible.

BOWLING B.F.A.

Last show of the year, Jan. 13, Barley Mow Hotel. 59 birds were judged to the satisfaction of all by Mr. S. Wilcock (Eccleshill). Champ. Class I (4): 1, 2, Casey; 3, Padgett; 4, Hudson. Class 2 (4): 1, Hudson; 2, Padgett; 3, 4, Blenzard. Class 3 (2): 1, Hudson; 2, Pownall Bros. Class 4 (3): 1, Casey; 2, Padgett; 3, Hudson. Class 5 (3): 1, 3, Padgett; 2, Casey. Class 6 (3): 1, Padgett; 2, Bleazard; 3, Casey. Class 7 (2): 1, Hudson; 2, Pownall Bros. Class 8 (11): 1, 3, Pownall Bros.; 2, 4, Hudson. Novice. Class 9 (8): 1, 2, 4, Robinson; 3, Nicholl. Class 10 (3): 1, Robinson; 2, Nicholl; 3, J. W. Wood. Class 11 (2): 1, Robinson; 2, Nicholl. Class 12 (8): 1, Robinson; 2, Nicholl; 3, 4, Robinson. Class 13 (2): 1, Nicholl; 2, Robinson. Class 14 (3): 1, 3, Robinson; 2, Nicholl. Class 16 (1): 1, Robinson. The following are winners of medals and specials for 1916:—Champ.: 1, L. C. Casey, 111 points; 2, C. Padgett, 93; 3, Pownall Bros., 85 4, J. E. Hudson, 76. Pownall Bros. win cinnamon special. Novice: 1, T. Robinson, 123 points; 2, J. Nicholl, 116; 3, Wood and Mirfield, 51; 4, J. C. Hodgson, 37. T. Robinson wins the Cowell cup for the first year with 154 points, also spl. most points in cl. or tkd. classes, and spl. most entries throughout the year. J. Nicholl wins spl. most points in green-marked classes.—J. Nicholl, Sec.

LARKHALL C.B.A.

First of a series of table shows, Y.M. Halls, Jan. 27, was very successful, with an entry of 75. Borders were judged by Mr. McLuse, Hamilton. Some good birds on view, and he had quite a task to select the winners. Birds were out in as good style as if staged for the National. Points spl. was won by Allan Thomson. F.-M. Linnet, Greenf., and Bullf. hens were judged by Mr. Crawford (Cambuslang). The Greenf. class had not the quality of birds as in former years, although the winner was a fine specimen, but what it lost was made up in Linnets. I have not seen a better class this season. Some of the early season winners were sitting cardless. W. P. Campbell won points spl. in British. Points: Thomson 31, Campbell 21, Clark 17, Ferguson 16, Gilchrist 12, Kennedy 12, Norwich, etc., on 3rd. Yorkshire, etc., on 17th. Pairs on 3rd March.—Allan Thomson, Secretary.

WINCHBURGH C.B.C.

Annual show, Dec. 0. Although the entry was not so good as last year, the fanciers of the district seem to be going in for a better class of birds. The committee were fortunate in being presented with a beautiful rose-bowl for competition for most points by Mrs. Hood, Rowanbank, Kirkliston. Mr. Hood, after a keen contest, won the bowl for the first year. Mr. J. McLay judged Scotch Fancies and Borders; Mr. John Moreland, Norwich and British; and gave entire satisfaction.

Scotch Fancy Yell. Cock: 1, Russell; 2, Aitken. Buff: 1, spl, Aitken; 2, 3, Russell. Hen: 1, 3, Russell; 2, Somerville. Old Cock: 1, spl, 3, Russell; 2, Aitken. Hen: 1, Duncan; 2, Aitken; 3, Russell. Crest Hen: 1, spl, Bishop. C.B. Cock: 1, Sharp. Hen: 1, Bishop. Old Crest Cock: 1, 2, 3, spl, Bishop. Hen: 1, 2, 3, Bishop. C.B.: 1, 3, Bishop; 2, Sharp. P.H. Cock, C.F.: 1, Robb. N.F.: 1, 2, 3, spl, Russell. Hen: 1, 2, Russell; 3, Robertson. Old P.H., C.F.: 1, Robb; 2, 3, Sharp. N.F.: 1, 3, spl, Robb; 2, Legbie. Sell., P.H.: 1, 2, spl, Robb; 3, Southern. Bord.—Cl. Yell. Cock: 1, 2, spl, Hood; 3, Bishop. Hen: 1, 2, Hood; 3, Boag. Buff Cock: 1, Boag; 2, 3, Hood. Hen: 1, Williams; 2, 3, Hood. Yellow Varieg.: 1, Boag; 2, Bishop; 3, Aitken. Buff: 1, 3, spl, Hood; 2, Williams. Even Mark: 1, Hood; 2, Aitken; 3, Russell. Green: 1, Boag; 2, Anderson; 3, Aitken. Clun.: 1, 2, Boag; 3, Aitken. Old Bord. Cock: 1, 2, 3, spl, Hood. Hen: 1, 2, 3, Hood. Sell., Bord.: 1, Bishop; 2, Turnbull; 3, Boag. Mule: 1, Watt; 2, 3, Robertson. Siskin, Etc.: 1, 3, Southern; 2, Sharp. Linnet: 1, Aitken; 2, 3, Southern. Greenf.: 1, Southern; 2, 3, Sharp. Hardbill: 1, 2, 3, Southern. Chaffinch: 1, 2, 3, Southern. Goldf.: 1, Southern; 2, Aitken; 3, Watt. Goldf., For.: 1, Beglie. Hen Brit.: 1, 2, Aitken; 3, Turnbull. BARROW C.B.A.

Annual members' show, Jan. 27, 27 members staging about 280 birds of quality far exceeding expectations. The judges, Messrs. Willings and Mulliner gave complete satisfaction. We missed the famous exhibits of Scotch Fancies of our old member, Mr. Willison (Bob), who has supported us on many occasions. His place was taken by Mr. W. Willison, who supported the classes with two good birds worthy of merit at any open show. Messrs. Henderson and Crosby won champ. Yorks. spl.; Morgan spl. novice; MacFarlane spl. best bird in show with a variegated Norwich cock; Bullas spl. best novice Nor.; spl. best Nov. Bord., Lancaster and Tranter. The stewards, Messrs. Marrello, Edmondson, Seward, Neal, and Brown, ably assisted and kept the judges going. Tom Croft, sec., assisted by Mr. Hale, treas., and Mr. Douglas, of Morcambe, got everything in order by opening time of the show, and everything went off with satisfaction.

Class 1, Yorks: 1, Henderson and Crosby; 2, hc, Douglas; 3, Todd; vhc, Boundy. Class 2: 1, 4, Henderson and Crosby; 2, R. Douglas; 3, Johnson; vhc, Todd. Class 3: 1, 4, Henderson and Crosby; 2, Boundy; 3, Seward; vhc, Todd. Class 4: 1, 2, Henderson and Crosby; 3, Boundy. Class 5: 1, hc, Johnson; 2, Henderson and Crosby; 3, Boundy; 4, Wald; c, Seward. Class 6: 1, vhc, Henderson and Crosby; 2, Seward; 3, Johnson; 4, Kent. Class 7: 1, Morgan; 2, Henderson and Crosby; 3, Johnson; 4, Mills. Norwich—Class 9: 1, Wagstaff; 2, McFarlane; 3, Neal; 4, vhc, Hodgson; hc, Johnson. Class 10: 1, 3, D. McFarlane; 2, Bullas. Class 11: 1, Wagstaff; 2, c, Bullas; 3, Johnson; 4, Seward; hc, vhc, Neal. Class 12: 1, McFarlane; 2, 3, Johnson; 4, Neal; vhc, hc, Hodgson Bros. Class 13: 1, 4, McFarlane; 2, Wagstaff; 3, hc, Johnson; vhc, Seward; c, Kent. Class 14: 1, 4, Johnson; 2, Neal; 3, Seward; vhc, Bullas; hc, Hodgson Bros. Class 15: 1, 2, Wagstaff; 3, hc, McFarlane; 4, Johnson; vhc, Neal; c, Hodgson Bros. Class 16 (3): 1, 2, Wagstaff; 3, McFarlane. Class 17 (3): 1, McFarlane; 2, Wagstaff; 3, Bullas. Class 18 (5): 1, 3, McFarlane; 2, 4, Kent; vhc, Brown. Class 19: 1, Willison. Class 20 (Scotch Fancy): 1, Willison. Class 21, Bord., Yell. Ck., Cl. or Tkd.: 1, Newby; 2, Shackley; 3, 4, Willison; vhc, Smith; hc, Edmondson. Class 22: 1, Newby; 2, hc, Shackley; 3, Willison; vhc, hc, Lancaster and Tranter; 4, J. Mills. Class 23: 1, vhc, Lancaster and Tranter; 2, 4, Edmondson; 3, Willison; hc, Shackley; c, Hodgson Bros. Class 24: 1, Edmondson; 2, Lancaster and Tranter; 3, Shackley; 4, Croft and Houlgrave; vhc, Newby. Class 25: 1, Edmondson; 2, Hale and Saul; 3, Shackley; 4, Smith; vhc, Lancaster and Tranter. Class 26: 1, c, Lancaster and Tranter; 2, Edmondson; 3, Shackley; 4, Willison; vhc, Smith; hc, Croft and Houlgrave. Class 27: 1, 2, Shackley; 3, Croft and Houlgrave. Class 28: 1, McFarlane; 2, Smith; 3, Lancaster and Tranter; 4, Edmondson; vhc, J. Mills. Class 29: 1, 3, Willison; 2, Shackley. Class 30: 1, 3, Willison; 2, Croft and Houlgrave; vhc, Edmondson. Class 31: 1, Willison; 2, Newby; 3, 4, vhc, Edmondson. Class 32: 1, Willison; 2, Shackley; 3, Smith. Class 33: 1, 4, Smith; 2, 3, Shackley. Class 34: 1, 2, 3, 4, Smith. Class 35: 1, Curphy; 2, Neal; 3, Marrello and Son; 4, Johnson; vhc, Miss Winder; hc, Smith; c, Mackie. Class 36: 1, Marello and Son; 2, Curphy; 3, McFarlane; 4, hc, Johnson; vhc, Edmondson; c, Curphy. Class 37: 1, Johnson; 2, Marrello and Son; 3, Mackie; 4, Hale and Saul; vhc, hc, Curphy; c, Brown. Class 38: 1, Johnson; 2, Marrello and Son; 3, Edmondson; 4, Hale and Saul; vhc, Neal. Class 39: 1, 4, Miss Winder; 2, Hale and Saul; vhc, Brown; 3, hc, c, J. F. Curphy. Class 40: 1, Shackley; 2, 4, Miss Winder; 3, Mackie; vhc, Johnson; hc, J. B. Seward; c, Curphy. Class 41: 1, Shackley; 2, Marrello and Son; 3, J. B. Seward; 4, Mackie; vhc, Hale and Saul; hc, Brown. Class 42: 1, Johnson; 2, 4, Mackie; 3, J. B. Seward; vhc, Marrello and Son; c, Neal. Class 43: 1, Johnson; 2, Miss Winder; 3, Brown; 4, J. F. Curphy. Class 44: 1, McFarlane; 2, 3, Marrello and Son. Class 45: 1, Mackie; 2, Johnson; 3, Brown. Class 46: 1, 2, Wagstaff. Sell.: 1, Wagstaff; 2, 4, Newby; 3, Willison; vhc, Johnson; hc, c, Morgan.—T. A. Croft, Hon. Sec.

(Members' Shows continued on next page.)

MEMBERS' SHOWS

(Continued from page 60.)

GARSTON B.B.A.

First show of the season, headquarters, Jan. 17, a night show of British, 20 excellent birds being staged. Mr. A. E. Wilkins judged and gave satisfaction. During judging the business of the society was carried ont, after which Mr. W. Bryant gave a few words on how to catch Goldfinches, and those who had the pleasure of hearing him were keenly interested. It is to be regretted that fanciers who live in close proximity to the club room do not make the meetings more successful by their presence instead of leaving the business of the society to be carried on by those ever-presents from a distance. Mule (5): 1, 2, vhc, hc, Lloyd; 3, Thistlewaite. Goldf. (5): 1, 2, 3, Bryant; vhc, Lonsdale; hc, Thistlewaite. Hen (3): 1, Lloyd; 2, Lonsdale; 0, Rothwell; vhc, Lonsdale. Green. (2): 1, Rothwell; 2, Thistlewaite. Bullf. (3): 1, Bryant; 2, 3, Lonsdale. Bramble, Etc. (5): 1, 2, Lloyd; 3, hc, Rothwell; vhc, Lonsdale. Redpoll (2): 1, Lloyd; 2, Thistlewaite. Hen (3): 1, Lloyd; 2, Lonsdale; 3, Rothwell. All points to count toward season spls. Eight new members were elected: Messrs. T. Jones, M. Gittens, B. Wilson, G. Alexander, W. Tipping, A. Phillips, G. Thistlewaite, and F. E. Minoprio.—R. T. Lonsdale, Hon. Sec.

GUISELEY, YEADON C.B.S.

Last show of the season, Dec. 26, Liberal Club, Guiseley, 99 birds staged; Mr. W. Stables judged and gave entire satisfaction.

Class 1: 1, Myers and Thornton; 2, 3, Dibb; vhc, Long and Fawcett; hc, c, Brown. Class 2: 1, Dibb; 2, Wheatley and Son; 3, Scott; vhc, Long and Fawcett; hc, c, Brown. Class 3: 1, Myers and Thornton; 2, Scott; 3, Hardaker; vhc, Dibb; hc, Fenwick; c, Webster. Class 4: 1, Myers and Thornton; 2, Long and Fawcett; 3, Dibb; vhc, hc, Brown. Class 5: 1, 3, Myers and Thornton; 2, c, Wheatley and Son; vhc, hc, Brown. Class 6: 1, vhc, Myers and Thornton; 2, Dibb; 3, Brown; hc, c, Scott. Class 7: 1, Brown; 2, Long and Fawcett; 3, Myers and Thornton; vhc, c, Wheatley and Son; hc, Dibb. Class 8: 1, 3, Myers and Thornton; 2, vhc, Brown; hc, Dibb, c, Scott. Class 9: 1, 2, Brown; 3, Scott. Class 10: 1, 2, hc, c, Long and Fawcett; 2, Hardaker, vhc, Scott. Class 11: 1, c, Long and Fawcett; 2, hc, Scott; 3, Bunting and Son; vhc, Bateson. Class 12: 1, 3, Wheatley and Son; 2, hc, Long and Fawcett; c, Bunting and Son; vhc, Hardaker. Champions: Points: Myers and Thornton, winners of the Belgian cup, 95; Brown, 71; Long and Fawcett, 71; Dibb, 61; Hardaker, 27; Andrews, 19. Novices: Wheatley and Son win novice medal with 53 points, Scott, 52; Webster, 17; Fenwick, 12; Bateson, 10; Bunting and Son, 10; Cawood, 2.—M. Scott, Sec.—(Please see notice at head of members' shows.—Ed.).

AUDLEY ROLLER C.C.

Third annual contest Jan. 6, Infants' School, Church Street. Entries totalled 63. The first prize for Class 1 was a cup given by the club, and medal by Mr. J. T. Dudley, and the 1st prize in Class 2 was 10s. in cash. Mr. T. Aldridge won Mr. H. M. Wood's medal for best bird shown by an Audley member. Mr. J. Tomlinson (Newcastle, Staffs) judged and mentioned that the old birds were an excellent class generally. Various local gentlemen contributed to the special prize fund.

YOUNG BIRDS, 1916 RING: 1, spl, cup, T. Aldridge, HR 4, HB 3, B 4, S 3, F2, WR 2, WG 2, BT 2, BR 2, GE 4, total 28; 2, spl, Dudley, HR 5, HB 4, B 2, S 3, F 2, WR 2, WG 2, BT 1, BR 2, GE 4, total 27; 3, T. Aldridge, HR 2, HB 2, B 5, S 2, F 3, WR 2, WG 3, BT 2, BR 2, GE 3, total 26; 4, Audley, HR 4, HB 3, B4, S 3, F 3, WR 2, WG 2, GE 4, total 25; vhc, spl, Scott, HR 5, HB 3, B 3, S 2, F 2, WR 3, BT 1, BR 2, GE 4, total 25; hc, spl, West, HR 3, HB 2, B 4, S 2,, G 2, F 3, WR 3, WG 3, GE 3, total 25; ex. hc, spl, R. Aldridge, HR 5, HB 3, B 3, S 3, F 2, WR 2, BT 2, BR 2, GE 4, 1 off, total 25; c, Williams 23, Bibbey 23, Beech 23, Scott 23, G. Aldridge 24. OLD BIRDS: 1, Bibbey, HR 5, HB 3, B 4, S 4, F 2, WR 2, WG 4, BR 2, GE 4, total 30; 2, Dudley, HR 4, BB 2, B 5, S 4, F 2, WR 3, WG 2, BT 2, BR 2, BG 2, GE 3, 1 off, total 30; 3, Downes, HR 6, HB 4, B 5, F 2, WR 2, WG 2, BR 2, BG 2, GE 4, total 29; 4, Watson, HR 5, HB 2, B 3, S 4, F 3, WR 3, WG 2, BG 2, GE 4, total 28; vhc, spl, T. Aldridge, HR 6, HB 3, B 4, S 3, F 2, WR 2, WG 2, BT 2, BR 2, BG 1, GE 3, 2 off, total 28; hc, spl, Johnson, HR 5, HB 2, S 4, F 3, WR 3, WG 3, BT 1, BG 2, GE 4, total 27; c, spl, Watson, HR 4, HB 4; B 3, S 2, F 2, WR 3, BT 1, BR 2, BG 2, GE 4, total 27; ex. c, spl, Bibbey, HR 5, HB 3, S 4, F 3, WR 3, WG 3, BT 1, BR 2, GE 3, total 27; c, Williams 26, Beech 26, Scott 26, Booth (two birds) 26.—A. Dean, Show Sec.

BOLTON ROLLER C.S.

Annual contest under the Provincial Roller C.C. patronage, held at the Joiner's Arms Hotel, Deansgate, Bolton. An entry of 258 birds, a record for this fixture, was received. In the champion young bird class Mr. J. T. Johnson gave a cup as spl., and in the novices there was also a cup given from the prize funds. Two medals were given by the P.R.C.C. for best bird in Class 1, and in Class 2. Other specials were given by Messrs. R. Bumby, R. M. Nuttall, D. Smith, and J. Gostling. Extra prizes of 10s., 6s., 4s., 2s. were given, besides numerous other cash specials. Mr. J. T. Johnson, Bacup, won members' cup for most points.

Mr. Ormston, hon. sec., and a staff of well-chosen enthusiastic helpers got the birds ready for the judges, and a good number of spectators attended on both days, everything going off in grand style. A word of praise is due to the Secretary's wife, who did a great deal of clerical work connected with the show, also to Mr. R. M. Nuttall, who interested himself in the judges' welfare. The judges were: Mr. J. Kilshaw (Bolton), Mr. G. Warcing (Tottington), Mr. J. Lyons (Blackburn).

NOVICE ANY AGE (Judge, G. Warcing): 1, spl, Smith, HR 5, HB 3, B 5, S 2, F 3, WG 3, BR 1, BT 1, GE 4, total 27 points; 2, spl, Crank, HR 5, HB 3, B 4, S 2, F 3, WG 3, BR 1, BT 1, GE 4, total 26; 3, spl, Barnes, HR 5, HB 2, B 5, S 3, F 2, WG 2 BR 1, BT 1, GE 4, total 25; 4, spl, Gradwell, HR 4, HB 3, B3, S 4, F 4, WG 2, BT 1, GE 4, total 25; vhc, Mantle, Fitzgerald, 24 each; hc, Ball, 24; c, Evans, 24. OPEN CHAMP. (Judge, G. Warcing): 1, spl, Lomax, HR 6, B 3, HB 2, S 3, WG 2, F 2, BR 1, BT 2, GE 4, total 25; 2, spl, Best, HR 5, B 3, HB 2, S 2, WG 3, F 2, BR 2, BT 2, GE 4, 25; 3, spl, Beetson, HR 5, B 3, HB 2, S 3, F3, WG 2, BR 1, BT 2, GE 3, 24; 4, spl, Mrs. Johnson, HR 4, B 4, HB 1, S 3, WG 3, F 3, BR 2, BT 1, GE 3, 24; vhc, Hickton & Ollier 23, Baggaley 22; hc, Wardle-worth 22; c, Ormston 22. HALIFAX C.B.S.

3rd annual members' show, Jan. 20, King Cross Band-room; 97 birds staged. Mr. P. Mason, Shipley, judged, and his awards were highly satisfactory. Mr. C. Pickup, Great Horton, was the appointed judge, but owing to illness, the society had to fall back on Mr. Mason, the reserve judge appointed. The stewards, Messrs. W. Briggs and J. Taylor, very ably carried out their duties. Mr. A. Sutcliffe, sec., was very well assisted by Mr. E. Stobart. This being the last show of the season, the competitions for the year now close. Winners are:—Open section, 1, cup, A. Sutcliffe, 79 points; 2, J. T. Sharpe, 75; 3, E. Stobart, 74; 4, S. S. Rigg, 69; 5, J. E. Priestley, 61; Novice section, 1, cup, W. Mitchell, 101 points, 2, J. Gelder, 96; 3, C. Wilson, 93; 4, C. Senior, 79; 5, H. Stocks, 45. A good lot of specials were competed for at this show, but are unavoidably held over until the next meeting, Feb. 1.

Open, Cl. or Tkd. Yell. Yorks.: 1, Sutcliffe; 2, Sharpe; 3, Stobart; 4, Priestley; vhc, Rigg. Buff: 1, Sharpe; 2, Rigg; 3, Sutcliffe; 4, Priestley; vhc, Stobart. Yell. Hen: 1, Rigg; 2, Sharpe; 3, Priestley; 4, Stobart; vhc, Walsh. Buff: 1, Sharpe; 2, Stobart; 3, Priestley; 4, Rigg; vhc, Sutcliffe. OPENSHAW, GORTON C.B.S,

Annual show, Dec. 26, club-room, Alhambra Theatre, Higher Openshaw, with 133 entries. The birds made a grand display and the judge, Mr. A. G. Davies (Manchester) gave complete satisfaction. The gate was not a large one, but under the conditions was as much as could be expected. The trophy for four nominated birds at all shows was won again by Mr. Peters, and this splendid prize becomes the property of the winner outright. Annually, Mr. Richards has run a close second. Mr. Richards won amateur medal, four highest birds all shows; Mr. Peters a close second. Mr. Beddall won novice medal, Mr. Dixon close up. Mr. Green won spls. most points all shows and most points unflig.; Mr. Newton most points British and most points last three cards on all shows. Special prizes this show: Best bird and best colour-fed, Green; best Brit., Fletcher; Bord., Newton; most points unflig., Green; amateur, Newton; novice, Beddall; most entries, least points, amat., Etchells; novice, Alderson; most points in sections, Gilbert, Green, Beddall, Dixon and Newton.

Please see notice at head of members' shows.—ED.

BARNSTAPLE C.B.S.

Second members' show for the season, Society's Exhibition Hall, High Street. Entries numbered 100. The secretarial work was ably carried out by Mr. E. Collins, who was also responsible for the management of the show. The quality was exceptionally good, and in every class could be found birds that would do credit in first-class company. Norwich as usual were very strong, with quality much advanced. Mr. T. Richards staged a grand team, and is to be congratulated on his success. His yellow cock, winner of special best Norwich, is a real gem, teeming with colour and a wonderful size. The trophy offered by the committee for most points in Canary section was also won by Mr. Richards, and this now becomes his own property, by having won same twice in succession. In Yorkshires quality was again to the front, and many open winners were staged. Mr. G. M. Pitt staged the cream of this section, and his yellow cock, winner of special best Yorks., is a bird full of merit. The cock which headed the buff class is a perfect specimen and must have pressed the yellow very hard for the special—truly two very fine birds from one room. In British, Mules, Hybrids and Foreign, Mr. E. Collins swept the decks, and right, too, for he staged a team that would have given a good account even at the Palace. His now well-known Goldfinch is beyond description, and was the admiration of all. This bird won the special for best British, and fully deserved the position. The Mule and Hybrid class contained birds of exceptional merit, the leader being a very fine buff 4 pointed Goldie-Canary, also the property of Mr. Collins; so were the winning Bullfinch, Whitethroat, and the charming Pintail Whydah, all 1st in their respective classes, and they were all staged to perfection. Mr. Collins was warmly congratulated by all upon winning for the first time the Dart challenge trophy for most points, with six nominated birds, also the section trophy for most points in British and Foreign. The judges were Mr. G. Lossemore, Norwich, and Mr. C. F. Dart remaining classes, and their awards gave every satisfaction.

Queries Answered

(1)—*All questions must be clearly written in ink (or typewritten) on one side of paper, and conclude with either the correct name or a pseudonym.*

(2)—*The proper name and address in full of querist must always be written on a separate sheet of paper, and enclosed with the query.*

(3)—*Queries intended for different specialists must be written on separate sheets of paper.*

(4)—*Queries must not include or be included in orders for books, instructions re advertisements, or any other matter for publication.*

(5)—*The department to which the queries refer must be stated on the left-hand corner of the query.*

(6)—*Queries received during any week, up to the* **first post on Saturday morning,** *will be answered in the issue bearing date of Saturday in the* **following week.**

(7)—*If an answer by post is desired from our specialists, a postal order for sixpence must accompany any query relating to sickness of birds, or a shilling in ordinary enquiries, with a stamped and addressed envelope in either case. Dead birds must not be sent to the office (see Post-mortems).*

(8)—*All who desire letters of complaint written to advertisers must state grounds for doing so clearly and fully, and enclose a fee of sixpence.*

(9)—*All queries must be addressed to the Editor, "Cage Birds," 154, Fleet Street, London, E.C. Postcards are not admissible.*

CANARY QUERIES

Answered by CLAUDE ST. JOHN

A SECOND MOULT.

Tim.—(1) No, I should not imagine that your working by gaslight in the room for a short time has anything at all to do with the birds dropping into a second moult. It is far more likely that the climatic conditions during the past few weeks are at the bottom of the mischief, especially if the room is very susceptible to outside changes. In addition to this, your dietary is not quite calculated to keep them in the best condition. Give a staple diet of three parts canarly to one part summer rape in the hoppers every day. In addition give separately every third day half a teaspoonful per bird of a mixture of two parts each, by measure, of hemp and the waste from thrashings, one part each niger, teazle, and broken groats, and add a sprinkling of dandelion and mustard seed to the bulk. On the intervening days give a morsel of bread and milk, sprinkled with soft sugar, and next a morsel of banana sweet apple or boiled carrot. In the drinking water add 20 drops of the following mixture two days in every three until the feathers cease dropping. Mixture: Dissolve half a drachm of ammoniated citrate of iron and quinine in an ounce of sherry, add 30 drops of syrup of buckthorn and it is ready for use. Continue this treatment for a month, if necessary, and if the birds are not then quite all right, write again and repeat particulars. You would do well to examine your fresh brand of seed to see if it is quite sweet and good. See that it is quite free from any musty flavour. (2) Broken groats, which are termed "grits" in some places, are just the ordinary groats chopped or broken up. Any corn chandler, or dealer in seeds and poultry food would know what they are, and be able to supply you.

TRAINING ROLLERS.

F. C.—(1) I'm afraid it is too late now to begin to train a Roller cock bred last season. It has doubtless formed an idea of its own by this time as to the correct thing in song and, like all bad habits, it would be more likely to corrupt others than to learn what is good according to human ideas. If you could let it hear a good singing bird, preferably keeping it in a closed box meanwhile, it might make a good improvement, but this would not be very likely if it was kept in an open cage during the tuition. I certainly should not think it worth while buying a machine to try to train it, and I do not know a good one either which costs only a few shillings. (2) You can buy Reed Warblers for imitating the trills and many notes of birds by blowing them in water, but they are more in the nature of toys than any useful help in training birds to sing. It would require a clever person, much practice, and more patience to put them to any real utility in this way. You can get them from some of our large Canary dealers for a few pence. (3) There is no book I know treating of Roller tours in musical notation.

CONSTIPATION.

Novice, Leeds.—This is what is probably troubling your bird. As a staple diet give a simple mixture of three parts canary to one part summer rape, and in addition give a pinch of mixed seed twice a week. For the next week or so, give a morsel of bread and milk sprinkled with soft sugar every second day, and on the alternate days a morsel of banana would be better than apple for it. In the water add six drops of syrup of rhubarb and as much Epsom salts as will cover a sixpence for three consecutive days, and afterwards six drops of tincture of gentian and four of dilute sulphuric acid every second day for a week.

ROLLER QUERIES.

Gerald Wright.—(1) The example of the one cock that is in full song will doubtless be all that is required at this season to incite the others to come out more fully very soon. You will do no harm, however, by giving the bird a morsel of bread and milk sprinkled with soft sugar every second day for a week, and on alternate days a pinch of a mixture of equal parts hemp, millet, white millet, teazle and gold of pleasure, and on these days also add to the drinking water two drops of lemon juice and six of glycerine if you can get it, if not, use two drops of pure honey as a substitute. (2) A bit of muslin or thin calico or anything of that description, will make a quite suitable cover for your purpose of covering the cage fronts at night. (3) The price of a good hen for breeding to suit you naturally depends upon the vendor's ideas, but you should get a serviceable one for somewhere about 5s. You should not delay getting it now, as almost every week will reduce the chances of getting a good one at a reasonable price. (4) The box type of breeding cage is quite the best. The price would be somewhere about 3s. 6d. for single and 6s. for double, fitted for breeding, I believe. On this point you may consult our advt. columns under

(Continued on next page.)

(Continued from page 61.)

the heading Appliances, or get a price list from one or two of our large dealers. (5) It would take up too much space to go into the details of pairing and feeding the young, so I would advise you to get our manager to send you a copy of "Canary Breeding for Beginners," post free, for 7d., which will give you all details how to proceed all through the season. (6) It would not be wise to move the birds to the other room now. Wait until a spell of mild weather occurs about March before making the change, otherwise there will be a risk of throwing the birds into moult. The end of March or beginning of April will be quite soon enough to mate. (7) The book advised in No. 5 will tell you all you want to know about sexing your birds.

ALWAYS MOPY.

Majour.—Possibly the bird is in an overfed condition. Try the following treatment, and if not quite successful write again in the course of a month or so, and repeat particulars. Keep it in a fairly warm place, where the temperature is fairly equable. Give a fair-sized teaspoonful of seed daily, and limit the staple supply to that quantity for a time. If it all disappears too quickly, stick a morsel of banana, carrot, or sweet apple in the wires in the morning, and withhold the seed ration until midday. Once a week in addition to the above supply, give just a pinch of mixed seed, and on another day a morsel of bread and milk, not larger than a hazel nut. In the drinking water every second day for a week add six drops of syrup of rhubarb and as much Epsom salts as will cover a sixpence, and in the next week give instead four drops each of tincture of gentian, tincture of calumba and aromatic sulphuric acid every second day. In the third and fourth weeks repeat the dosage of the first two weeks in the same order.

AGE FOR PAIRING.

Greenun.—Canaries hatched in June, 1916, will breed quite successfully in the coming season, but it would be injurious not to mate them before the middle or towards the end of April, or in the case of the larger breeds the beginning of May. It would also be wise not to take more than two broods from birds of the larger breeds that were hatched from June onwards the previous year. There is no definite age limit for pairing Canaries bred the previous season. The great majority are mated when the proper mating season arrives, about the beginning of April, and the eldest would then be something like ten or eleven months old. At this age the smaller breeds are quite sufficiently developed for taking up the cares of rearing young, and there can be but small objection to pairing up the larger breeds in a general way. But really late hatched specimens of the latter breeds may with advantage be kept unmated in the first season where one has a sufficient amount of stock to go on with from earlier broods.

COLOUR AND DIET.

Breeder.—(1) I should rather suspect that the dark streaks on the mandible were an indication of a descent from green marked birds, and in any case it is not likely, from your description, to be either directly descended or very closely related to cinnamon coloured parents. Catch the birds and closely examine its eyes, and if you find no trace of the cinnamon pink eye treat it as a green type for stock purposes, and I do not think you will go wrong. (2) I am no advocate of mixing cod liver oil with the soft food for rearing young, but if you wish to give it a trial you would doubtless be on the safe side if you well mixed not more than five or six drops with the soft food for a brood of four or five young daily, or, say, three drops with the morning and ditto the afternoon supply of food, which, allowing for wastage and what the parents consume, would mean about one drop each per day for the young. It would be better to make a cake and add the oil, preferably in the emulsionised form, to the dough in the mixing, so that it would be cooked with the cake. You would do well to get a copy of our forthcoming "Cage Birds Annual" and see what is said on this matter of economising in the food supply.

NON-FEEDING HENS, ETC.

Somerset.—(1) I see no reason whatever to believe that the non-feeding trait in the hen's character last season would be in the least degree transmitted to the young. It requires more than a casual failing of this description to make it so ingrained as to be transmitted to the progeny as an hereditary fault. If the young hens are in good robust health, and come into breeding condition at the proper time I see no reason why you should not mate them and treat them just the same as normal specimens, as, indeed, they may be. You might, as a judicious precaution for future progeny of these hens, see that the cocks they are mated with come as far as possible from good feeding hens. (2) Except that I should omit the ground linseed altogether, or at least reduce it by one-half, there is no reason why it should not make a very efficient substitute for egg food for rearing young. On the whole, I think you would find it worth while to make the following slight alterations: Ground linseed 1 oz., oatmeal 2 oz., and finely ground maize meal 2 oz. Omit the maw seed from the stock mixture and add a sprinkling when necessary to the food when mixed for use. Scald sufficient for immediate use with a few drops of boiling water, allow to stand until cool, then stir to a crumbly state. The stock mixture would keep good for months in an air-tight tin in a cool, dry place. See latter part of reply to "Breeder" in this issue.

GROWTH ON BEAK.

Pom.—The growth probably originated from some disturbance in the system, though it may not be of any serious importance. Add to the diet a wee morsel of bread and milk with two drops of cod liver oil emulsion on it and sprinkled with soft sugar, three times a week for a month, and add to the drinking water 20 drops of Chemical Food on three other days in each week. Also moisten the growth twice a week with a tiny morsel of Jeyes' Veterinary Ointment, but do not daub the feathers unnecessarily. If you cannot conveniently get this ointment a little boracic ointment for anointing, and dusting the spot afterwards with boric acid powder, will make a good substitute. It will probably not make any detriment to the bird as a breeding unit. With regard to its seed diet, you might improve it by giving a pinch of summer rape every second day, and instead of the hemp alone you should give half a teaspoonful of the seed mixture containing hemp, which you may see frequently advised in these replies.

MAKING A START.

Orpington Novice.—(1) Yes, you could certainly breed songsters successfully in an unheated room upstairs, and provided it is free from damp, cutting draughts, and is not subject to any exceptionally striking fluctuations of temperature, such a room would be a very suitable one for the purpose. (2) The number to start with depends more upon your own time and energies than anything else, within, of course, the limits of the accommodation at your command. But as your employment must limit your spare time somewhat, it would be wiser not to go too far at the beginning. Three pairs, or two trios, i.e., four hens and two cocks, running each cock with two hens, would give you a nice amount of experience for the first season. You should begin with single breeding cages, one for each hen, a spare one for each cock, or any other contingency, and two fair-sized flight or stock cages. A nursery cage for each hen's cage would also be a convenience, and at least two or three should be available in case they should be wanted during the season. If the cages are all of the same size and type for each separate purpose, it will be a great advantage in the future working of your hobby. If you begin with, say, three pairs, you may, after they are mated at the proper time, leave them together all through the season, if the cocks are trustworthy and do not interfere too much with the nesting arrangements of the hens, otherwise it may be necessary to remove them whilst the hens are sitting and rearing the young. On the other hand, if you go in for trios and run one cock with two hens, you will mate the cock with one hen first when she is ready to begin nesting, and when she begins to sit you will remove him and mate him with the second. Then when No. 2 begins to sit you will again remove him, and this time cage him separately until the first hen is ready to start nesting again, when you will repeat the same method. Thus you will see the necessity of having a separate cage for each cock. (3) The kind to start with is another point that depends more upon your own taste and inclinations than anything else. But as you mention only breeding songsters, I surmise that song would be the greatest object with you. In that case you could not do better than begin with Rollers, and if you get a strain of good free singers you will be sure of a ready market for the young at the end of the season. It would also help you to gain some experience to start with fancy breeds another season if you wished to do so. (4) Your absence from home during the greater part of the day would make no great obstacle to the feeding of the birds, except that when young are in the nests, especially during hot summer weather, it is of great assistance in keeping the hens keen on feeding to give fresh soft food at least twice a day, in the morning and in the early afternoon, but this you could perhaps arrange to be done by someone at home during the middle of the day, and even if you could not you should succeed all right by giving fresh soft food just before leaving, and again as soon as you returned, as there would still be plenty of daylight for the hens to attend to the young after you returned. For fuller details of general management, you should get a copy of "Canary Breeding for Beginners," which our Manager would send you for 7d., post free.

ROLLERS YAWNING.

R. McW.—Judging from the somewhat sombre aspect of the cages, I am inclined to think the symptoms you describe are nothing more serious than ennui, which will pass off as the weather gets brighter and the breeding season approaches. The best remedy would be to move the cages to a brighter place similarly free from draughts, and not too high up near the ceiling if you can manage it. It will also help to pull them together if you give a morsel of bread and milk with two drops of cod liver oil emulsion on it and sprinkled with soft sugar, every second day for a fortnight, and on the alternate days, instead of the apple, give a morsel of banana or boiled carrot. Add to the drinking water six drops of syrup of rhubarb and as much Epsom salts as will cover a sixpence, for three consecutive days, and afterwards six drops of gentian and four of tincture of steel every second day for a week.

SUPPOSED WORMS.

J. Fox.—Are you quite satisfied that the objects are really worms, and not an abnormal condition of the droppings? I know no worm that quite answers to the description you give, and the fact that they are all dead when expelled is rather dubious. Anyway, you may try the following treatment, and if this does not have the desired effect write again and give more particulars, and mention the colour of the objects. Remove the seed at night and first thing next morning give a morsel of bread and milk dusted with as much freshly ground areca nut as will cover a threepenny-piece, and then sprinkled with soft sugar. Give seed again at breakfast time, and in the afternoon add 12 drops of syrup of buckthorn to the water. Next morning give fresh water, and for two days add to it six drops of tincture of gentian and four of dilute sulphuric acid. Then miss an interval of four days and repeat the treatment again in the same way, and repeat it a third time after a similar interval. Shall be glad to hear result in a fortnight or so, and will then advise further if necessary.

A LETHARGIC SUBJECT.

E. V.—Keep the hen under rather comfortable circumstances as you are now doing, without overheating her. In addition to the usual diet, give a morsel of bread and milk sprinkled with soft sugar every second day, and on the alternate days give a morsel of banana and a pinch of maw seed. In the water for three consecutive days, give six drops of syrup of rhubarb and a crystal of sulphate of soda the size of a small pea, and after this instead of plain water give the following mixture every second day for a fortnight if necessary. In each two tablespoonfuls of water dissolve a crystal of sulphate of soda the size of a small pea, ditto of sulphate of iron, half as big, and add six drops of dilute sulphuric acid.

SUITABLE PERCHING.

Cud, Fleetwood.—Any kind of soft clean wood is suitable for making perches. Soft white pine is as good as anything. Cut this into strips half an inch square or for the larger breeds half an inch by five-eighths of an inch, trim off the edges to bring them to something resembling a crude round shape, then flatten the one surface that is to form the top surface of the perch to an oval shape, and when cut into the requisite lengths to fit the cages you will have very useful perches for any purpose.

SWOLLEN JOINT.

W. T. H., Dowlais.—You ought to have given more particulars and said whether the swelling appeared as the result of an accident or how, and described its appearance and size. As it is you do not give the least clue to form any opinion by, nor even say which joint it is that is affected. In these circumstances I can only advise you to keep the cage in a quiet and comfortable place and avoid fluttering or disturbing the bird as much as possible. Let it remain as quiet as possible for the time being in order to give the limb all the rest it can have, and lightly paint it three times with the tip of a feather dipped in tincture of iodine allowing an interval of four clear days to elapse between each application. If this is not successful in sufficiently reducing the swelling write again and give the fullest particulars you can, both about the position, appearance, and size, and if you have any idea of the probable cause of its first appearance.

SAMPLE OF SEED.

Durhamite.—Sorry to disappoint you, but the seed sent is thoroughly musty and ill-flavoured, and quite unfit for feeding any class of Canaries, much less prize birds. To use for such a purpose it would be dear at a gift.

BRITISH BIRDS, MULES AND HYBRIDS

Answered by H. NORMAN.

SKETCH OF AVIARY.

Beattie.—I have carefully examined your sketch and would suggest two alterations. The first is to have the door at the opposite end to the one shown in the sketch. Birds invariably fly to the light when they are frightened or when anyone enters an aviary, and this would mean that some of them would be sure to flash up to the end where you have placed it, and possibly you would soon lose some. By having it in the boarded end you escape this danger. Have a window or spy-hole near it so that you can see when it is safe to go in. In your sketch you show the roof flush with the sides of the building; this is a mistake, it should hang over all round a good six inches; a little more in front would help to keep the interior dry. You could put in your pairs of Chaffinches and Greenfinches, and one pair of the Linnets, and you could add to these a pair of each of Goldfinches, Bullfinches, and the Canaries. You can turn in the British birds during March, when the weather is favourable. Do not take them direct from a hot room, but gradually get them used to the change. The Canaries must wait until same time in April. Have plenty of nest-boxes, pans, and small cages, and surround some of these with furze, heather, or twiggy branches, so as to give a little privacy. For nesting material give plenty of moss, cow-hair, wool, feathers, short lengths of grass, or fine roots; old Finch nests are admirable if you can manage to get some.

THRUSHES AND BLACKBIRDS.

Thos. Hook.—If one of your Thrushes has the true wild note the hand-reared bird should copy him, unless you have other birds that he can hear. It is always a difficult matter to get hand-reared birds to sing correctly; they seem always ready to mimic others and sing just what you do not want them to. Your best plan is to put them both in the same room away from others, and partly cover up the young bird, so that he does not sing so much, but is obliged to listen to the old one, this should improve him. A young cock Blackbird should be black, excepting for a little rusty colour on the wings, and sometimes on the flanks. I am inclined to think your bird is a hen. I would advise you to carefully remove a few of the brown feathers and keep it until they grow again; if they come quite black there will be no doubt about its being a cock bird; if they reappear brown, you had better let it go before breeding time.

MULE BREEDING.

W. T. H.—You can pair your Goldfinch up with the Norwich hen Canary; there is no need to have so-called muling hens. Any healthy hen that will nest and rear will do to breed Mules for singing purposes. Singing hens are not to be discarded because of that accomplishment; they leave it off when they are busy with a family.

WHAT BIRD?

Cuckoo.—I am inclined to think the strange bird you saw was a Heron. These birds are long in the neck and fly with a slow movement of the wings, which are curved. They travel long distances from their home, not being particular about returning to the heronry for a day or two, especially if they get to a place where food is plentiful. The seed you send a sample of is charlock; it can be given to the Linnets and Greenfinches in small quantities.

FIFTEEN-YEAR-OLD LINNET.

Cymro, Wolverhampton.—I must congratulate you upon keeping your Linnet so many years in health and song. Do you give him any green food; you do not mention it in your letter? If not, give a little chickweed, as soon as the weather breaks, so that it has no frost on it. Get half an oz. of gentian and tincture of rhubarb, and put 20 drops in the drinker for two days, then miss a couple of days and repeat. After this add a few drops of fresh lemon juice to the water, and just smear any bare places with vaseline or fresh lard. I am glad to hear the Greenfinch has benefited by the treatment suggested.

TREATMENT OF MULE.

Gerald Wright.—You are probably feeding your Mule in a different manner to what he was used to. You had better see the former owner and ask him how he treated him. If you do not care to do this make up the following mixture: 3 parts Canary, 2 parts teazle, ½ part each of rape and linseed. Give this as a staple food. Offer a little hemp twice a week and sunflower on days you are not giving hemp. Give green food or sweet apple daily. Put in his drinking water 20 drops of gentian and tincture of rhubarb, give him this for four days; afterwards a small teaspoonful of chemical food; boil the water first. Discontinue the bath until he is better.

FOREIGN BIRDS.

Answered by WESLEY T. PAGE, F.Z.S.

GREY PARROT WITH GROWTH UNDER WING.

Morgan (Penzance).—I gather from your remarks that the bird will permit you to handle it. This simplifies treatment. The growth should be pricked (lanced) and all pus exuded by gentle pressure, and then well cleansed with tepid water, dried, and anointed with a little zinc ointment. The swelling may come again, perhaps several times, but it must be similarly treated on each occasion, and should ultimately disappear. Simultaneously with the above, put one teaspoonful of fluid magnesia in the drinking-water every fourth day, and on the intermediate days well colour the drinking water with chemical food. If the bird should be at all thin give a piece of bread, biscuit, or plain cake thinly spread with cod-liver oil emulsion once or twice a day. The bird should be kept in an even temperature out of the reach of draught, yet in some well-ventilated position. Shall be pleased to hear how the bird progresses.

COCK ZEBRA FINCH WHEEZING.

C. H. Knight.—Keep this bird in as warm quarters as possible, in a room where the night temperature does not fall too low, and, of course, it must not go out of doors again till warm spring weather has set in. Get a mixture of glycerine, ipecacuanha wine, and oxymel of squills in equal parts, and put ten drops of this in the drinking water daily, till the wheezing ceases. Once a week, in lieu of the mixture, put a teaspoonful of fluid magnesia in the drinking water, and continue this latter for some time; when you cease giving the cod mixture, lightly colour the drinking water with chemical food for several weeks to tone it up again. It can receive the usual diet. Please note our rules re queries, especially No. 2. You must supply address, not necessarily for publication, another time, or we cannot reply.

PLUCKING ITS BREAST FEATHERS.

R. B.—I do not keep queries by me, and cannot call to mind the details of your former reply; but I gather from your letter that the moult is not yet really complete. With some birds feather plucking is a vice, and once a bird becomes confirmed therein, there is really no permanent cure; the bird will have periodical relapses, even though it may cease the annoying habit for a time. Continue the treatment advised in our former reply, giving special attention to the diet, supply nothing which has been noted in this column from time to time as unwholesome—tea, coffee, or milk slops, table scraps, or animal food of any kind, must not be given; its seed mixture should contain very little hemp; sunflower and safflower are just as nourishing and safer. Pay strict attention to its bowels; these must not be watery loose, yet must move quite freely, and to secure this put one teaspoonful of fluid magnesia in the drinking water as often as may be required. Keep cuttle-bone and parrot grit continually in the cage, also a chunk of wood, for it to exercise its mandibles upon. The bird is less likely to amuse itself in plucking out its plumage if it is kept in the midst of the home-life with plenty going on around it to interest and amuse. Ennui plays the major part in the origin of feather-plucking.

BREEDING BLUE BUDGERIGARS.

T. L.—This exquisite variety is not at all freely produced, and even when there was a supply of pairs of Blues, not many were bred. However, it is possible to produce them, as two breeders bred some half-dozen specimens, three or four of which reached maturity. Of course, if you can procure a hen, half blue and half green, i.e., bred from cross-mated Blue and Green parents, there is a possibility of your getting one or two Blues this season. An authentic Blue and Green hen would be worth £2 or more. If you cannot do this, then mate your Blue cock up with a Green hen, choosing one in which there is plenty of blue among the greens of its plumage, and then again mate the progeny, pairing up those with most blue in their plumage. While they should have plenty of light and air, and the aviary should not be erected in a sunless corner, yet it had better be one that has the roof of the whole flight covered in, as best results are obtained when they are protected from direct sunlight. The respective parents of the Blues referred to above, were of Blue, Green and Yellow blood, and, of course, were carefully selected birds, and were the result of several seasons' selective breeding.

REGURGITATING ITS FOOD.

B. F.—(1) When Parrots are kept together in pairs they regurgitate their food and feed each other. A solitary Parrot will also often act similarly whenever anyone it is attached to is near; and again, many will do this, and re-swallow the food naturally—in some instances it may arise from indigestion. If you will repeat query and give me fuller details, and also state how you keep and feed it, I may be able to express a definite opinion as to the cause in the case of your bird. (2) I do not think the pulling out or shedding, whichever it is, of the fluffy small feathers, is of much moment, though of course it may be the precursor, of feather-pulling, but when you have given me the information asked for, I shall be in a better position to help you. In the meantime, put one teaspoonful of fluid magnesia in the drinking water, and repeat the dose after an interval of three days. Do not give table scraps: tea, coffee, or milk slops, or any kind of animal food. Roughly the dietary may be said to consist of seed mixture, ripe fruit, and such extras as biscuits, dry crusts of household bread, plain cake, nuts and greenfood. Cuttlebone and parrot grit must continually be in the cage, also a chunk of wood for it to exercise its mandibles upon.

POST MORTEMS.

Mr. G. Yalce, M.R.C.V.S., 1, College Road, Harrow, Middlesex, will examine and report upon dead cage birds for a fee of 1s. 6d. each bird; for reply direct, 2s. 6d.; analysis, 21s. The Post Office regulation is that bodies of birds must be sent at the letter rate of postage, and must be packed in hermetically-sealed receptacles which must themselves be enclosed in strong wooden, leather, or metal cases. If this regulation be infringed the packets may be destroyed by the authorities. **Any bodies sent to the office of this paper will be thrown away, and** if a fee is enclosed the loss will be the sender's

I. W. M. S.—Canary died in a fit. There was a large clot of blood in the cranial cavity. Excessive cold is the cause.

GENERAL.

Answered by THE EDITOR.

HOUSING & FEEDING DOVES & PIGEONS.

Ruth.—The management of Pigeons and Doves is somewhat outside the purview of our paper, and we should advise you to write to the Editor of "Pigeons," Rlle, Bradford. If your Doves are of some foreign species, and you will send particulars as to the kinds you keep, our foreign bird expert will be very pleased to advise you. As to your bird which has "no claws on one foot," you can do nothing with this. If the claws are simply broken they will doubtless grow again, but nothing you can do will help matters.

RECORDS FOR TEACHING BIRD SONG.

Novice.—We know of no record made for the purpose of teaching a Roller Canary. A "bird-organ" is sometimes used for the purpose, but such a machine is expensive, and we doubt if one could be obtained at all in these times.

AN OLD BIRD BOOK.

C. S. Manners.—We thank you very much for your kindness in offering to lend us the old book, and shall be very pleased indeed to see this with a view to making extracts. We assure you we will take great care of it, and return as soon as we have finished with it.

WANTED CANARIES

all breeds, also Mules and Hybrids, British and Foreign Birds, also Talking Parrots. Kindly say what you have and state price to
WALSH, Bird Specialist, BLACKBURN.

WANTED

5,000 Norwich and Yorkshires; hens, will give 3/6 each; common hens 2/- each; hen Goldfinch Mules 1/6 each, cock Goldfinches 24/- dozen, hen Goldfinches 12/- dozen; will give 14/- pair for high-class Norwich or Yorkshire colour-fed Canaries; 7/6 each for cock Goldfinch Mules, for spot cash, or will deposit with "Cage Birds"; highest references obtainable: Enoch Power, Bird Specialist, 89, Sclater-st., Shoreditch, London, E.

10,000 CANARIES

wanted for export; Norwich, Yorkshires, Crests, Crestbreds, best price given. The largest dealers and most successful exhibitors, and the most fair dealers in Great Britain; our annual export trade is 20,000 Canaries every year; you can have your cash for birds just as you like, cheque, postal orders, or Treasury notes.
HOWARD, 77 PITT-ST., NORWICH

NOTICE! WANTED

(787)

A POSTCARD only.—You cannot hold your own in life's battle if weak, worn, or easily jaded. Periodical attacks of moodiness, langnor, despondency, depression, and groundless fears mean nerve troubles, and lead to brain fag, impaired memory, and unfits one for study, business, or pleasure. The chosen ones in every walk of life are the alert, the bright, the intelligent, Nature's natural gift, but marred for lack of a little knowledge. A postcard to the Useful Knowledge Publishers, P.O. Box 94, Bradford, will put you in possession of a 48-page book, neatly bound, of valuable information, and will be sent post paid, free of any charge whatsoever, if you mention "Cage Birds." A little knowledge saves much medicine. (778)

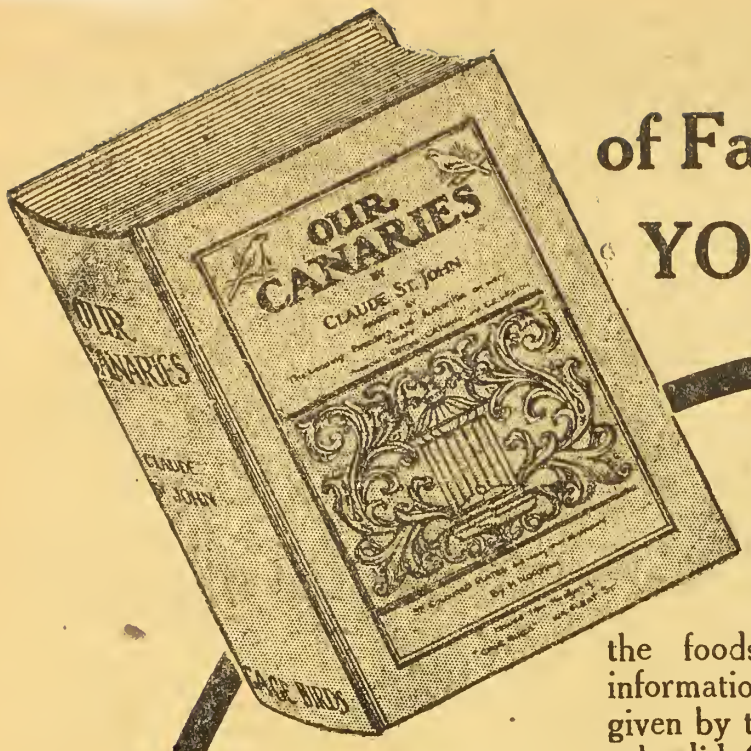
SECRETS
of Famous Canary Breeders
YOURS for only 1/- down



Judging the position of a bird by the clock.

380 Pages.
133 Illustrations.
32 Coloured Plates.

HOW well-known Canary Fanciers bred their prize-winning birds—birds literally worth their weight in gold—how they trained them—the foods used. All this priceless information and much more is clearly given by the Breeders themselves in this splendid Canary Book. Every page—every line—is full of the *practical experience* of practical men—experts in their line. Fanciers who have specialised in Lizards give valuable information. Breeders of famous prize-winning crested varieties contribute to its 380 pages. Every feature of Canary Breeding and Exhibiting is clearly and fully dealt with—you have only to glance at the comprehensive index to turn up the information you desire.

The book contains 133 illustrations, a few of which are here reproduced. Thus, "Our Canaries" not only *tells* you but *shows* you. If you are a novice, or breed only for pleasure, you will be delighted with the increased enjoyment which the book will enable you to derive from your hobby. If you are an "old hand," or breed for profit, it will help you to *increase* profits.

"Our Canaries" will be sent you for Free Examination—Approval for a deposit of only 1/-. If, after examination, you return the book, your deposit will at once be refunded. If, however, you decide to keep the book, you can pay the balance by easy monthly instalments. Thus you have everything to gain and nothing to lose by sending for a copy. Do so TO-DAY

BRITAIN'S BIGGEST FINCH; THE HAWFINCH.

The fine Hawfinch here shown is the property of Mr. F. C. Hiden, Evesham. Among its prizes won on the show bench are 1st Pontypool, 2nd Birmingham, and 3rd Llanelly. The bird was hand-reared from a nest in July last year, and its successes in its first season on the bench are a just reward to its owner for the care taken in rearing it.

F. CARL, Publisher, 154, Fleet Street, London, E.C.

Advertisement Charges.

One Halfpenny for each word up to 48, 1d. per word afterwards. Name and address to be reckoned. Minimum, 12 words 6d.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together, and are charged at two words a penny up to 48 words; after that 1d. per word. No single advertisement, even if accompanied by others, will be charged at less than the minimum price, viz., Sixpence.

Headlines or Footlines, 9d. 1/-, 1/6, 2/-, 2/6, according to size.

The rate for displayed advertisements is 7/6 per inch. Rates for a series on application.

ADVERTISEMENTS UNACCOMPANIED BY CORRECT REMITTANCE WILL NOT BE INSERTED.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL,

The Proprietor reserves the right to refuse any advertisement, or to cancel any advertisement ordered for a series, at any time, without assigning any reason for so doing.

Advertisements must in all cases bear the bona-fide name and address of the advertiser, and no advertisement will be inserted if addressed to a receiving office, or similar place of call.

Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

ALWAYS USE "CAGE BIRDS"

DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor of the *bona-fides* of either buyers or sellers in all transactions the adoption of our Deposit System should be insisted upon

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from both parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has not been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty-eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit will be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion. The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient plus the extra postage incurred has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

NOTICE TO BIRD PURCHASERS.

It is advisable that all newly-purchased birds, especially foreign birds, be kept isolated from established stock for a week or ten days, until by their condition they establish the fact that they are thoroughly healthy.

APPLIANCES.

SOFTBILL keepers, take expert advice before proceeding to buy and keep the larger species of Insectivorous birds. You will then have no trouble in keeping your pets in the best of health. This advice is offered in "Nutshell No. 26," by H. J. Fulljames. It is a wonderful little work, dealing with most varieties in a highly interesting and instructive manner. Foods and their preparation, and the various styles of cages also receive full attention. Can you breed Mealworms? This booklet tells you how. Post free, 2½d. from CAGE BIRDS, 154, Fleet-st., London, E.C. Look at our list of agents; call on the nearest and get it for 2d.

KNOWLEDGE IS POWER.

You can get it in 6d. Vols.

READERS of "Cage Birds" can to-day secure at pre-war prices volumes of the well-known **"Everybody's" Series.** Each volume is, on its particular subject, the handiest and best book obtainable. Although small enough to fit one's pocket, each book is packed with a vast amount of valuable information. Consider the wonderful price—only **6d.** each (8d. post free), strongly bound in cloth; in attractive leather binding, **1s.** each (1/2d. post free). The number of these books is very limited, and owing to the enormous increase in the cost of printing and paper, it will be impossible to reprint them at present prices. There are sure to be some of these books that YOU need—some that will give you just the information you have been seeking on some knotty point. Send in your order **NOW.** It is only necessary to state the *Number* of each book as given opposite the name in the list shown here.

NOTE TO READERS.

When replying to Advertisements readers will oblige by mentioning paper.

Champion YORKSHIRES & NORWICH

Bulldog Strain.

NOW IS THE TIME TO PROCURE YOUR BREEDING STOCK, to ensure getting the best birds, and to get them settled in their new home before pairing up. I have an enormous stock of all varieties on hand, and, having almost finished my export trade for this season, I can now concentrate my attention to the requirements of the home trade. My long experience as a breeder and exhibitor, and the large stock of birds I have to select from place me in a position to send you just such a bird or birds as you require. As regards the quality of my stock, it is surely sufficient to refer you to the reports of all the leading shows, from which you will find that both my **Yorkshires** and **Norwich** are not only maintaining but adding to, their great reputation. In addition to this, I have sold several birds that have won leading honours at all the principal shows. Kindly write, stating wants. I am now offering a limited number of grand stock and exhibition birds, either Yorkshires or Norwich, which I can guarantee as bred from my own **Bulldog Strain,** at 20/-, 25/-, 30/-, 40/-, 50/- each, cocks or hens. Also a few grand matched pairs at 40/-, 45/-, 50/-, 60/- per pair upwards. These are splendid value, and have only to be seen to be appreciated.

I have also a grand selection of stock birds from other well-known strains, as follows:—

YORKSHIRE COCKS, grand lengthy birds, in full song, 15/-, 17/6, 20/-, 25/-, 30/- each, upwards.
YORKSHIRE HENS, smart, racy, typical hens, 7/6, 10/-, 12/6, 15/-, 20/- each, upwards.
MATCHED PAIRS, 20/-, 25/-, 30/-, 40/-, 50/-, 60/- per pair upwards.
NORWICH PLAINHEADS. Grand, thickset, cobby birds at same prices as Yorkshires.
BORDER FANCIES, Real good birds, both for stock and exhibition. **Cocks,** 12/6, 15/, 20/-, 25/-, 30/- each. **Hens,** 6/-, 7/6, 8/6, 10/- each. **Matched Pairs,** 17/6, 20/-, 25/-, 30/-, 40/- per pair.
CRESTS AND CREST-BREDS.—A few real good pairs at 30/-, 40/-, 50/-, 60/- per pair. Odd birds, Cocks or Hens, at proportionate prices.

ROLLERS. ROLLERS. ROLLERS.

I have a magnificent collection of pure British Rollers from the best and purest strains, at following prices:—

HIGHLY TRAINED COCKS, 20/-, 25/-, 30/-, 40/- each.
PURE-BRED HENS, 6/-, 7/6, 8/6, 10/- each.
MATCHED PAIRS, 25/-, 30/-, 35/-, 40/-, 50/- per pair.
Travelling Cages, 4d. extra in all cases.

One word more—**Please remember, I invite you** to come at any time and make your own selection, but if you cannot come, **Don't Forget** that I send every bird on 7 days' approval, at my sole risk. I personally select every bird that is sent away. I have over 4,000 (four thousand) birds in my rooms at the present time to select from, and I guarantee to give absolute satisfaction to every customer or return cash in full. Terms: Cash or deposit with Editor.

Send for 1917 Price List.

(801)

To Realize

all the following statements, the wonderful stock I hold must be seen. I am fully alive to that fact. The only alternative is to have on approval, and make a comparison with that you can obtain elsewhere. I can

SAVE YOU MONEY

if you will only allow mo the opportunity.

3 POINTS OF MINE:

QUALITY.
VALUE.
QUANTITY to Select from.

MAKE YOUR BREEDING PAY IN 1917.

This you can do if you only pair up right; or if you want to purchase pairs, leave it to me; for it is no trouble to me to produce documentary proof that the foundation of many past and present exhibition studs have been laid by birds purchased from me. Great value for money is my forte. I herewith give a few prices of exceptionally good

Norwich Plainheads & Yorkshires.

You may have all the so-called strains and bogus pedigrees in the world, but you cannot purchase better blood than I now hold, and I am certain you cannot procure the same value. Cocks, 15/-, 20/-, 30/-, 40/-, 50/-. Hens 10/6, 15/-, 20/-, 30/-. Pairs, 25/-, 30/-, 40/-, 60/-. These prices are for show birds and stock birds to breed winners. These are the best value in Great Britain to-day. For **OTHERS**, really good, containing many of the best combined strains in Great Britain, at lower prices. Cages, **4d.** and **6d.**; approval with pleasure. Above prices relate to Norwich and Yorkshires only.

IF you want Cinnamons, Lizards, Scotch Fancies, three-quarter bred ditto, high-shouldered Belgians, Border Fancies, classical Mules, Muling Hens, Feeding Hens, Goldfinches, Bullfinches, etc. Send for my **Free Illustrated 1917 List.**

W. RUDD, Specialist, NORWICH.

HIGH-CLASS stock, typical unflighted, slightly marked buff head, bred from winning strain, cold-room, in first-class condition, 7/6 each; approval; stamp reply; Paterson, "Kelvinside," Harrow-rd., Upper Warlingham, Surrey. (800)

STRACHAN, Draper, Woodside, Aberdeen, begs to thank numerous applicants; sorry could not reply to all; have left 1 pair each 20/-, 25/-, 30/-, 40/-; breeding cage included; the above are all class Norwich; cash approval. (804)

LARGE pair Norwich, no better strain, handsome pair, fed for show, 50/-; another pair, unflighted yell. cock, 1915 buff hen, 20/-; several smaller pairs 18/-; feeding hens, 4/- each, on deposit; Blythe, Park-avenue, Mansfield, Woodhouse, Notts. (800)

HANFORD'S February bargain list now ready; contains special bargains of Norwich and Yorkshire, cocks, hens, or breeding pairs; write for copy before deciding to purchase elsewhere and mention requirements: R. Hanford, Derby. (722)

G. SNEAD'S

Yorkshires speak volumes of praise as to their high standard and fine quality, by winning the greatest trophy of the season, the Sheffield rose bowl, won by 1916 bird, bred by exhibitor, in fact all his winners are bred by him and from birds with grand pedigrees, the same blood as his noted Palace and National strain; having selected my breeding stock, I have some grand birds for sale related to the above from £1 a pair upwards, odd birds proportionately; seven days' approval, cash, or deposit: Address, 133, Arncliffe-terr., Horton range-rd., Bradford. (790)

Various Canaries.

SUTCLIFFE & SON FOR VALUE

If you want to breed winners, buy direct from the breeder, same strain as our National winners; state wants; approval; stamp for reply: 1, Back Kitson-st., Windhill; and 21, Valley-rd., Shipley, Yorks.

13/6 PAIR

Will give 13/6 pair for good Norwich and Yorkshire Canaries; also 19/6 pair for good Borders; 7/- each for cock Mules; 1/6 hens, cash or deposit with Editor: G. Bruce, 25, New Meeting-st., Birmingham. (775)

HOWARD'S CANARIES

Pairs or single birds, Norwich, Yorkshires, Crests, crestbreds, from 20 to 50 pair; there are bouncing advertisers in Norwich, who never show a bird and never had show bird, but have two or three old men sloping about Norwich buying up rubbish and advertising them as winning strain; the same happen in Yorkshire. This is misleading the young fanciers; put your money in "Cage Birds" hands; if not worth the money, return birds, have your money; I have 300 letters from fanciers saying the value is double to what they get from other advertisers.

HOWARD, 77, PITT STREET, NORWICH.

IMPORTANT

FOR HOME TRADE.

To Breeders Wishing to Dispose of their Stock of

CANARIES

for SPOT CASH.

we are prepared to pay the very highest cash prices for large or small quantities of Canaries, including Norwich, Yorkshires, Borders, Rollers, etc.; also Mules. Will pay 10/6 to 15/- pairi for Norwich, Yorkshires, and Rollers, 8/6 to 10/6 per pair Borders, 7/6 cock Goldfinch Mules, 1/6 hen Mules. Do not dispose of your surplus stock until you have received our offers. All our birds are for retail trade—not for export—therefore we can pay the very highest prices in the trade. All Canaries we purchase are retained in this country. Do not be misled with idle boast and exaggerated statements. Send your offers to a reliable firm, where you will receive a genuine offer and your cash.

G. B. CHAPMAN,

24, 25, and 26, High Street, BIRMINGHAM.

Telegrams: Parrakeet. 'Phone: Central 630. Bankers: Barclay's and Parr's.

MULES—HYBRIDS.

WANTED TO PURCHASE!
WANTED TO PURCHASE!
WANTED TO PURCHASE!

YORKSHIRE AND NORWICH CANARIES

FOR EXPORTATION ONLY
FOR PROMPT CASH PAYMENTS.

In Quantities of 5 Pairs to 1,000 Pairs.

To save time, I beg most respectfully to state that my limit for the remainder of the season

is 12/6 pair.

It is absolutely essential that pairs should be sent. Cheque is sent the day following arrival, for every bird has to be examined and reported on by a well-known Canary Judge and Breeder. Don't send hens for cocks, that is now useless.

JOHN HAMLYN, 221, St. George's Street, LONDON, E.

THREE leading Grecnie Bullies, winning to-day, bred by me; 5 cock Hybrids, reared 1916, selected Hybrid pairs from 5/-; exchange feeders: Baker, Austin-st., Stamford. (803)

AIDS TO SUCCESS.

Our Books and a Common-sense Application of the Advice therein MUST bring you Profit as well as Pleasure

All the experience of years of careful study by experts is at the disposal of readers.

YORKSHIRE CANARIES, 2/2.—By H. W. Battye (Past President of the Yorkshire Union). Absolutely the very best Handbook dealing with the Yorkshire and its sub-varieties. Contains complete instructions upon Pairing, Breeding, Moulting, and successful Exhibiting, also how to treat in both health and disease.

NORWICH CANARIES, 1/1.—By C. A. House. Tells the fancier all that he needs to know to enable him to become successful as a breeder and exhibitor of the Norwich Plainhead. The chapters on "Forming a Stud," and "How to Produce the Ideal" are worth the cost of the whole book.

THE SECRETS OF HYBRID BREEDING REVEALED AND EXPLAINED.—By many notable Mule and Hybrid Breeders. Among the contributors are such well-known breeders as Messrs. R. Colton, W. H. Vale, C. Houlton, C. J. Ward, J. Beswick, G. Lander, T. H. Kinch, T. Smith, etc. This Handbook, which contains 212 pages, 7 inches by 5, is brimful of the most practical information on the highly interesting object of Hybrid Breeding. Price 1/-, post free 1/2.

AVIARIES, BIRD-ROOMS, AND CAGES, 2/3 (cloth gilt).—By H. Norman. Contains ten lovely full-page photographic plates. A practical guide which deals thoroughly with the proper Building, Fitting, and Management of Aviaries and Bird-rooms, and the making of Cages.

SEEDS, FOODS, AND WILD PLANTS FOR CAGE BIRDS, 1/2. — By various leading authors. Full information on the seeds suitable for all cage birds, their food values, uses, etc., with descriptions and illustrations of the wild plants indispensable to the successful keeping of British and other birds.

BRITISH BIRD MANUAL, 2/3 (cloth bound).—By H. Norman; or may be had in two parts. Part 1: "Hardbills," and Part 2: "Softbills." Either Part, price 1/1, post free. Each part contains a beautiful and life-like coloured plate and numerous illustrations of birds and cages. Up to-date information on the keeping of British Birds.

HOUSE'S CANARY MANUAL, 1/2.—By C. A. House. A thorough, practical guide to the general management and breeding of Canaries, dealing fully with the breeding, etc., of every member of the Canary family, including the Roller (or Singing) Canary. An illustration of each bird, by the master Canary artist, Mr. H. Norman; exhaustive chapters on aviaries and cages, breeding procedure, moulting, exhibiting, diseases, and seeds—a compendium of knowledge.

FOREIGN BIRDS FOR BEGINNERS, 1/1½.—By W. T. Page, F.Z.S., etc., Foreign Bird Expert to "Cage Birds." A highly instructive Manual. It contains a magnificent coloured plate and a number of black and white illustrations. Indispensable to all keepers of Foreign Birds.

CANARY BREEDING FOR BEGINNERS, 7d.—By Claude St. John. A Practical, up-to-date guide to Canary breeding, designed specially for the use of the beginner. Deals very fully with the choice, sexing, and mating of the birds, feeding for condition, the cages and their fittings, the bird-room, egg-food, nest-building, rearing and moulting the young, colour-feeding, training for show, and all the difficulties likely to confront the breeder.

THE STOCK BOOK, 7d.—Of our invaluable "Breeding Room Register" a well-known fancier has said:—"It makes bird-breeding easy." No breeder of birds can possibly afford to be without it. It simplifies the operations in the bird-room and makes it possible for everyone, even the veriest novice, to breed his birds as they should be bred. Contains both Pedigree, Breeding, Young Bird, and Show Registers of simple and unique character. In addition to useful account pages.

FANCIERS' PRINTING.—Fanciers requiring business notepaper, postcards, trade envelopes, etc., should write us for a quotation. We are now in a position to supply these at specially low rates combined with first-class work. Artistic memos., with block of any desired bird, and fancier's name, address, and words of description as desired. 250 5/-, 500 7/6, carriage paid.

CAGE-BIRD HYBRIDS.—Complete bound in cloth, 7/6 carriage paid. This great work is written by Charles Houlton, an authority with a reputation extending over 25 years as a leading exhibitor and a leading expert and judge. Magnificently illustrated by that great bird artist, H. Norman. There are no less than sixteen coloured and sixteen art plates in this work. Each plate is a perfect study of an individual Hybrid.

(Advertisements continued on page 79.)

Club Reports.

DURHAM CITY C.B.S.

At the last meeting the balance-sheet was read and adopted, and prize money paid to those present. Decided that all members pay 1s. each to the funds for the donations to the chairman, sec., and auditors. Decided to hold a social evening at next meeting, Mar. 24, and members are requested to bring some talent along to entertain us.—H. Briggs, Sec.

WIGAN ROLLER CLUB.

At the Legs of Man Hotel, Jan. 24, a very interesting lecture on the song of the Roller Canary was given by Mr. J. Kilshaw, of Bolton, for the purpose of educating the Roller fanciers of Wigan and district. A dozen birds were present and their song was described very ably by the lecturer. Tours and rolls that were good were pointed out, also their bad and faulty tours. A number of questions were answered as to breeding for song, also the training of the young cocks as they came on song. A lively discussion ensued on the improvement of the song, and the advisability of using a tutor or mechanical music. A hearty vote of thanks was given to Mr. Kilshaw for his lecture, which had been interesting and instructive to the old members, as well as the novice. Another of these lectures will be given on Feb. 10 by Mr. Will. Massey, of Bolton. A number of birds will be present and a hearty invitation is extended to all Roller fanciers.—P. Greenall, Sec.

WELSH N. COUNTIES F. & F.A.

Annual general meeting, Cafe Royal, Colwyn Bay, Jan. 6th, Mr. James Arundale in the chair. Present: Mrs. Brigg, Miss Dakin, Miss Bainbridge, Messrs. T. Barlow, H. M. Brigg, J. Cheshire, G. F. Downing, G. Hughes, J. B. Parry, B. Watts, and G. E. Cragg, Hon. Sec. Apologies for non-attendance were received from Mrs. Hughes, Messrs. A. Carter, R. Mostyn, and B. Sowter. Sec. read statement of accounts for year ending Dec. 31, together with the profit and loss account, which had been duly audited and found correct. Sec. read the 9th annual report, which covered the year's workings. Statement of accounts and report were adopted. The general opinion was that, considering circumstances, the year's workings were quite satisfactory, the debit balance having been reduced from £12 17s. to £5 12s. 2d., whilst the credit balance of the profit and loss account showed an increase from £49 18s. 7d. to £59 5s. 1d., this amount representing the value of the Association's timber, benching, challenge cups, and other assets, less £5 12s. 2d. due to bank. In view of the fact that no change in the list of officers was contemplated or desired, it was decided that members' cards and year-books be re-used and adopted, subject to any slight clerical alterations necessary. Decided that subs. for current year ought to be paid, and Rule 9 enforced. Sec. was instructed to prepare delegates' collecting books ready for next meeting, April 25. Mr. B. Watts was elected a member of the committee, and the following new members elected: Miss Dakin, Miss Bainbridge, Mrs. Le Bert, and Miss King.—Geo. E. Cragg.

QUEEN'S PARK (Glasgow) C.B.S.

Annual general meeting, Y.M.C.A. Rooms, Jan. 31, Mr. R. B. Cairns presiding over a large turn-out. Financial statement for 1916 was submitted and considered very satisfactory. There is £4 to the good and this being carried forward makes a total balance of £13 to begin 1917. Balance-sheet for annual club show was also read and showed a record entry of birds (520), and after clearing all expenses there was a balance of £12, which was given in prize money, as well as medals and specials. The membership of the club now stands at 70, with four hon. members, this being an increase of 20 over 1915. Election of office-bearers: Mr. R. B. Cairns, chair; Vice-Pres., Messrs. A. M'Lellan and W. G. Hamilton; Sec. and Treas., A. Foreman; Committee, Messrs. Ross, Knox, Livingston, Kerr, M'Lusky, McClymont, Hardie, Briggs, Connelly, Campbell, Jeffrey, and Brenner; Show Manager, Mr. W. Connelly; Auditors, Messrs. Stewart and Nalsmith. Decided to hold a pair show Feb. 17, birds staged 4.30, judging at 5. Norwich 2 classes, Nov. Nor. 1, Bord. 1, Yorks 1, Crests and C.-B. 1. All classes yell. cock and buff hen, or buff cock and yell. hen, and no double yellows or double buffing. After a lengthy discussion the British classes were extended as follows: Goldf.-Can., Linnet-Can., Greenf.-Can., Bullf. hen with British or Canary cock; A.V. Hybrid, and A.O.V. not classed. Twelve classes in all. Entry 3d. Decided to hold a special meeting for alteration of rules, at headquarters, Feb. 14, 8, when a full attendance is requested so that they may be thoroughly gone over. A vote of thanks to chair brought the meeting to a close.—A. Foreman, Sec., 289, Cathcart Road, Glasgow.

NEWCASTLE C.B.S.

Annual meeting, Feb. 1, Shield's Cafe, Bigg Market; Mr. W. Espie, chair, before a fair number. Mr. A. Ender was elected a member. The sec. presented balance sheet for show, which showed that £28 17s. balance had been handed over to the Red Cross, and acknowledged, and all present thought the show had proved a success for a well-deserving cause. The balance sheet for club showed a balance of £10 4s. 1d. on the year 1916, and £7 12s. 4d. in the bank, so we are standing fairly well, and we hope to keep on improving, and by the help of our members and new ones we can do so. Officers for 1917 elected, pres., vice-presidents, also patrons, with the addition of Mrs. S. Young, stand as in 1916. Our chairman, Mr. Espie, was sorry to say he could not keep the position, owing to being unable to attend the meetings at all times, and best thanks were given him for his past services; all felt sorry to lose him as chairman, though he promised to attend as often as possible. We found a grand substitute in Mr. T. C. Crawhall, who consented to take the position, and with him as our leader we feel confident things will go all right; vice-chair, Mr. Geo. Dobson; auditors, Messrs. M. Corsas and A. Holden; committee, W. Espie, J. Maddison, R. Tindale, R. Havis, J. W. Coulthard, W. Mackenzie, H. Willsbury, C. G. Petterson, A. Montgomery, G. Greenwell, J. Johnston, J. B. Bell, W. Curry, T. Hall, H. Bird, S. Lindsay, T. Smith, T. Almond, and F. W. Rowan; sec. and treas., F. W. Laidlow. Rules, etc., to stand as in 1916. Show date fixed for Oct. 20th and 21st. At next meeting, March, we have decided to hold a discussion on the various markings of Canaries, seeing that it seems to be a difficult problem to the majority of readers of CAGE BIRDS. We give a hearty welcome to all to come and give us their views.—F. W. Laidlow, Sec.

SCOTTISH ROLLER C.C.

Annual General Meeting held in Saltcoats, Jan. 27, Mr. Jackson in the chair. Sec. read the annual report, which was very satisfactory. Officers for 1917 appointed: Pres., Mr. McLean; vice-pres., Mr. Stewart; sec., Mr. Jackson; committee, Messrs. McKechan, Lambie, Arnott, McDonald, Gourley, Bowman. The following were elected members: Mr. Gourley, Mr. McDonald, Mr. Findlay, Mr. W. Jackson. Roller fanciers in Scotland wishing to become members might communicate with the Sec.; entrance 3s. 6d.—J. Jackson, 22, Wellpark-rd., Saltcoats, Ayrshire.

FIFE C.B.L.

Meeting, Coaltown of Wemyss, Feb. 3, Mr. Smith, pres., in the chair. Mr. Grewar spoke of the societies in the League, each running a show and pooling the money at the end of the season, so that each society in the League would have an equal share of the profits. As no decision was arrived at delegates were instructed to take it back to their societies for discussion and report at next meeting in May. After the meeting Mr. Grewar gave a splendid exhibition of hand-washing, which was much enjoyed by all present. A hearty vote of thanks to Mr. Grewar and the chairman ended the meeting.—J. Sneddon, Sec.

BRISTOL EAST C.B.S.

Annual meeting, headquarters, Glass House Hotel, Lawrence Hill, Feb. 3rd. Sec. presented balance sheet, which amounted to £5 4s. 4d. Officers elected: Dr. Cairns, president; Mr. Rogers, vice-pres.; chair, G. Hiscox; vice-chair, S. Hale; auditors, Messrs. Osborne and Blandford. All members elected on committee; Wm. J. Norman, sec.; F. Becs, assist. sec.; G. Eastman, treas. A table show of matched pairs was held. Mr. C. Osborne judged. Yell. Ck., Buff Hen: 1, Norman; 2, Hale; 3, Hodge. Buff Cock, Yell. Hen: 1, Norman; 2, Hale; 3, Hodge. Brit.: 1, 2, Harding; 3, Blandford. Mr. A. E. Moule, Abertillery, was elected a member, last meeting.—Wm. J. Norman, sec.

NATIONAL BRITISH BIRD & M.C.

Committee meeting, Jan. 25th, 2, York Street, Piccadilly. Mr. J. Robsou, chair. Letter read from Mr. Anderson, Darvel, enquiring about the club's gold medal for producing the rarest hybrid of the year 1915. Various opinions were expressed, and it was decided to defer giving a decision until the matter had been more fully discussed at the next meeting. Mr. Anderson also offered to send one of his three alleged Song Thrush-Blackbird Hybrids, bred in 1915, for the Committee's inspection; the committee, however, declined the offer. Mr. Wren, Oxford, sent his alleged Goldfinch-Chaffinch hybrid for inspection. The bird was subjected to a minute examination by all present, after which it was carried, with one dissentient, that the committee failed to trace any sign of Goldfinch in the bird sent for their examination.—E. Stephens, Hon. Sec.

NEWCASTLE EAST END C.B.S.

Annual meeting, Blue Bell Inn, Shield Road, Byker, Jan. 31, Mr. J. G. Hutchinson chair. Balance-sheet for 1916 was presented, and showed a balance of £9 4s. 11d., and with cash in bank, £26 0s. 11d., the society is in a very satisfactory state. The officials were all re-elected with the following additions: Mr. J. Morrison was made a vice-pres., and the following members were put on the committee: Messrs. Cleminson, Coulthard, Henderson, and Kindness. Decided that when two members breed and exhibit together, and have only one bird room, double subscription is to be paid, and at shows their points will count as a single member. Table pair show at Feb. meeting. Classes: Norwich, Crests, Cinnamons, Yorks., Bord., Cinnamons, Bord. Greens, and A.V. class, including Hybrid and Muling pairs. I have been requested since our meeting to add a British class "Any Variety."—E. Coltman, Sec.

CROYDON F.F.A.

Annual meeting, Jan. 31st, Ruskin House, D. W. Oliver chair. Report and balance sheet read and adopted. The year has been the most successful in the history of the society. The balance in hand is £21 19s. 9d., after handing over £5, the proceeds of the Red Cross Sale, for gifts to wounded sailors and soldiers in the Croydon hospitals. The membership is 162 paid up, and six new members were elected. Decided to charge a nomination fee of 1s. to all future members elected. The annual subscription remains at 2s. 6d., as before. A new cup for cage birds has been procured during the year, and was won by Miss Wright, and the treasurer stated he had nearly sufficient in hand to get another cup for this year. Officers elected: Sir F. Edridge, pres.; D. W. Oliver, chair; F. W. Capell, vice-chair; J. A. Halhead, treas; and F. B. Roberts, hon. sec.; committee, same as last year, except Mr. Mudd elected in place of Mr. Everitt resigned. There was a large attendance, and the meeting, after a suggestion that £10 of the balance be put into War Loan, concluded by votes of thanks to the chairman, officers and committee.—J. A. Halhead, hon. treas.

SOUTH SHIELDS (Always Ready).

Annual general meeting, Jan. 24th, Hunt's Shop, Ocean Road. Mr. J. S. Dixon presided over a good attendance. A hearty welcome was given to Mr. W. Thompson, one of the oldest fanciers of the North, who has reached the great age of 76, and has been in the fancy for 60 years, and we hope that we will be spared for many years to come to carry on the good work which he has done in the past. Balance sheet was read by the secretary. Our society was formed on Jan. 26th, 1916, and we have a balance of £14 8s., which we shall pay out in prize money this year; we have now 70 members, which we think is a splendid record. Officers elected: Mr. C. A. Cochrane, M.P., President, who takes a great interest in our society; vice-presidents, Ald. J. Taylor, J. J. Anderson, C. S. Carnes, J. M. Hunt, Ald. D. Richardson, Councillor H. M. Sadler, Dr. E. Blair, J. S Oliver, Dr. Turner, Dr. Peacock, J. Clubbs, Councillor G. E. Evans, H. Robson, J. W. Curry, J. W. Wood, Councillor J. Gilroy, L. Thompson, O. P. Hutchinson, J. J. Todd, Councillor J. Burns; chair, R. Barnes; vice-chair, J. S. Dixon; committee, T. R. Baker, R. Armstrong, E. Coppoch, R. Ridley, W. Duke, W. Cleghorn, W. Nessworthy, R. Stephenson, and W. Thompson, R. Honeyman, pro tem. Treasurer, J. F. Curry; secretary, J. W. Watson. Agreed, that the vice-chair takes the chair after his first year in office. Vote of thanks was given to Mr. Dixon for splendid services rendered during the past year. New members: Messrs. A. Blair, J. Gordon, R. Honeyman, J. Irvine, J. Thompson, W. Thompson, W. Beaver, J. Chilton, E. Daighton, W. Espie, C. McKay, G. Rowson, W. H. Newton, J. Greaves. Pair Show and British Feb. 24th; Norwich Crests, Cinnamon, Yorks., Bord., A.O.V., Mule or Hyb., (Golds. or Bullf., Linnet, Greenf., Siskin, Redpoll or Twite, A.O.V., Softbill. Open Rules. 20 miles.—J. W. Watson.

STANLEY (Empire) F.F. & C.B.S.

Annual meeting, Dec. 26th, R. Peart chair. Decided to hold members' show Nov. 17th-18th. Secretaries note date. Officers elected: Chair, J. Middlemast; treas, J. Smith; sec., R. Hutchinson. Resolved to give our best support to R. Mitchell, who is running for Management Board, Feb. 3rd and 4th.—R. Hutchinson.

STANLEY (Victoria) F.F. & C.B.S.

Annual meeting, Jan. 21st, R. Peart chair; election of officers: Chair, J. Armitage; vice-chair, R. Peart; sec., and treas., R. Hutchinson. Decided to hold next members' show on old show date, Dec. 1st-2nd. Secs. please note date. Resolved that all members give their support to the sec., who is up for election for the Management Board on Feb. 3rd-4th.—R. Hutchinson.

WEST STANLEY (Patriotic).

Meeting, Feb. 4, J. Armitage chair. Decided to abandon the show fixed for Feb. 24, seeing that the Government demands the paying of the Entertainment Tax when the expenses were being paid out of the entrance fees. It is very hard when you try to help disabled soldiers and sailors and you have to pay part of your income to the Government for taxes.—R. Hutchinson, Sec.

OXFORD C.B.S.

Seventh annual general meeting, 58, George-street, Feb. 1. Mr. Gough chair. Balance-sheet discussed and passed, and officers elected:—Pres., Mr. W. F. Cross; vice-pres., Viscount Valentia, C.B., M.P., Miss Driver, Miss West, with power to add; bankers, The Old Bank, Barclay's; hon. solicitor, Mr. A. H. Franklin; hon. auctioneer, Mr. J. Hastings; hon. treas., Mr. J. A. Lees; hon. sec., A. Lewin; assist.-sec., A. F. Fifield; committee, Messrs. Gough (chair), Holiday, Pearce, Wren, Simmonds, Reverell, Grimes; hon. auditors, Messrs. W. B. George and F. Wildson. The society is in a sound condition, with a satisfactory balance of £10 in hand.—A. Lewin, Hon. Sec.

NORTH-WEST GLASGOW C.B.C.

Annual general meeting, Amalgamated Museum Hall, Jan. 23rd, Mr. P. Thorn presiding over a good attendance. The financial statement for 1916 (which shows a very satisfactory balance on the right side) was adopted. Prize money won at annual show was paid out to members present. Election of office bearers: President, Mr. P. Thorn; vice-pres., Mr. W. Loan and Mr. R. Brown; sec. and treas., Mr. P. Houston, 31, Willowbank Crescent, Glasgow; committee, Messrs. Paterson, Graham, Boullet, Pinnock, Pringle, Phillips, Davidson, Lindsay, W. Stewart, and J. Crawford; auditors, Messrs. Wallace and J. Stewart, Junr. Twelve new members were proposed. Vote of thanks to retiring office bearers and to the chair terminated a very pleasant meeting.—P. Houston, sec.

GLASGOW WEST END C.B.S.

Seventh annual general meeting, Jan. 30, in Co-op. Hall, St. George's Cross, Mr. P. Allan presiding over a good attendance. Balance-sheet for 1916 was gone over, passed as correct, and considered very satisfactory, leaving a good balance on hand, part of which is to be divided in prize money amongst the members. Office-bearers for 1917: Hon. Pres., Mr. W. Gibb Macnab; Pres., Mr. P. Allan; Vice-Pres., Messrs. J. Campbell and D. Lunn; Sec. and Treas. pro tem., Mr. P. Allan, 5, Temple Gardens, Annlesland, Glasgow; Committee, Messrs. A. Mitchell, A. Gillespie, G. Robertson, C. Sellar, J. Glass, H. Hyslop, and A. Proctor. Auditors, Messrs. A. Hendry and G. McGown. Decided to have the matched pairs show, Feb. 9 (2 judges). British and Foreign bird show, March 9 (one judge); F.F. show, July 7; and the annual members' show, Nov. 17. Judges were nominated for pairs and British and Foreign bird show; judges for F.F. show and annual show left over till another meeting. New member enrolled: Mr. T. D. Lees. Intending members please note that we cater for all varieties of cage birds. Annual sub., 4s., payable in twice. All other particulars on application to the Sec. and Treas., P. Allan, 5, Temple Gardens, Annlesland, Glasgow.

Singing Contests.

Announcements of forthcoming contests in the nature of advertisements must be paid for at advertisement rates, two words a penny.

LEEDS.

West Leeds Linnet and Canary Association.—Linnet singing Viaduct Inn. 1, Chadwick; 2, McNichol; 3, Jarrow. 16 birds hung. Canaries at night, Prince of Wales. 1, 3, Wood; 2, Kippling. Ten birds hung.—T. Cawood, Sec.

Linnet singing contest, Clarence Hotel, Skinner Lane, Feb. 4; 25 birds sang for four prizes. 1, 2, shared Wigfield and Binns; 3, Bamfield; 4, Wigfield. Judges, A. Butterfield, J. Clarke. Timekeeper, Rayner.—T. C. Summers, Hon. Sec.

Open Linnet contest held at the Glassmakers' Arms, Greyhound-place, York-rd. 28 birds: 1, Buckley; 2, Marshall; 3, Stockill; 4, Watson. Judges, Dearlove, Gomersal, Bousfield.—G. Marshall, Hon. Sec.

SHEFFIELD.

Linnet contest, Sportsman Hotel, Paternoster Row, Feb. 4. 30 birds sang and some extra good singing was heard: 1, Parlett; 2, Cutts; 3, Driver. We had a visitor from Castleford with four birds. Linnet show in the evening: 1, Parlett; 2, Spettswood; 3, Cutts.—E. Phillipson, Sec.

PONTEFRACT.

Weekly Linnet contest held Woodman Inn, Horse-fair. Club sing, Feb. 3, 28 birds: 1, B. Nelson; 2, Blackshear; 3, W. Nelson. Open sing, Feb. 4. 42 birds entered for four good prizes and some good singing was heard: 1, Foster; 2, Watkiss; 3, Nelson; 4, Scott.—S. Pugh, Sec.

BARNSLEY.

Dove Inn Linnet Club, Doncaster Road, Feb. 4. Eighteen birds sang for four prizes, and some very good singing was heard, ten birds doing above 3min. France 3.52, Norburn 3.46, Wright 3.34, Jones 3.20. F. Shepherd timer, Bamforth chalker. Mr. J. Norburn will match his Linnet to sing any bird in England for £10 a side; time singing; meet halfway. (Advt.).—J. Hardman, Sec.

KIPPAX.

Kippax Linnet Club, Headquarters, Commercial Hotel, Members' sing, Feb. 3. 34 birds entered for three minutes' sing, and some good singing was done, especially at this time of the year: 1, Cooper; 2, Potter; 3, Norton. Tappen, T. Pickersgill, W. Perkin; timekeepers, O. Potter, J. Cooper. A new member joined and this makes a total of seven new members.—R. Plows, Sec.

CLUB AND SOCIETY NOTICES

ONE NOTICE of any forthcoming Society meeting inserted free. It must reach us not later than Tuesday morning's post. Specially printed Club Notice Postcards may be had free on application to our Manager. Secretaries should always use them.

NOTE.—Only the details asked for on our cards can be published. Such phrases as "a large attendance desired," etc., must not be included. Classification for forthcoming shows, appeals for new members, and any other matter in the nature of an advertisement will only be inserted if paid for at advertisement rates.

Alfreton C.B.S.—Feb. 10, Red Lion Hotel, 6. General business, also table show of stock pairs; J. Adnitt, judge. Birds staged 6.—G. Sawer.

Bolton Roller C.C.—Feb. 13, Joiners' Arms Hotel, Bolton, 7.30. Election of officers. Members are requested to bring all money and unsold tickets so books can be audited.—T. Ormston.

Bradford West C.B.A.—Feb. 10, Shoulder of Mutton, 7.30. Union rules, etc.—F. P. Terry.

City of Birmingham.—Feb. 7, Crown Hotel, Hill Street, 7.30. Election of officers for 1917, and balance-sheet.—A. C. Shirley.

Cheltenham C.B.S.—Feb. 10, Lamb Hotel. Members' pair show; birds staged by 4. Judge, Mr. J. H. Payne (Gloucester).—W. Pounsett.

City and Suburban A.C.B.—Feb. 12, Church Institute, 60, Paddington Street, Baker Street, W., 8. Lecture on "Line or In-breeding," by Mr. G. Gardner.—F. J. Martin.

Coventry Godiva C.B.S.—Feb. 10, headquarters, 8. Charity show and discussion on Pairing for Breeding, etc.—A. Wright.

City of Bradford O.S.—Feb. 10, Flying Dutchman, 7.30. Election of officers and revision of Yorkshire Union Rules.—J. Bolton.

Edinburgh C.B.S.—Feb. 17, Cairn's Memorial Hall, Gorgie Road, 2.30. Table show and election of judges for annual show.—J. C. Charlton.

East Ham, Poplar, and Leyton Combined.—Feb. 10, Liberal Club (opposite Town Hall). Second annual combined show, open at 4. Judge, H. Norman.—F. Onslow.

Farnworth C.B.S.—Feb. 14, Church House, Church Road, 7.30. Business important; election of officers, etc.—W. Dawson.

Glasgow (West End) C.B.C.—Feb. 9, Co-op. Hall, St. George's Cross, 8. Matched pairs: Canaries, Muling pairs, and Hybrid Pairs.—P. Allan.

Gt. Horton Good Intent O.S.—Feb. 10, Grange Congregational School, All Saints Road, 7.30. Yearly meeting for election of officers, balance-sheet, and year's specials.—A. Firth.

Halifax O.S.—Feb. 10, Victoria Con. Club, Gibbet Street. Whist drive and social; tickets, 9d. each. Whist 6.45. A hearty invitation to friends.—J. J. Dunn.

Huddersfield O.S.—Feb. 12, White Hart Hotel, 7.30. Yorkshire Union ballot paper, and other business.—A. Lawford.

Ilkeston C.B.S.—Feb. 10, Derby Arms, 7. Business important.—T. Smith.

Leyton C.B.A.—Jan. 12, Parish Hall, Church Road, Leyton, 8. Annual general meeting.—A. W. Farmer.

Lochgelly C.B.C.—Feb. 17, Drill Hall, Anteroom, 6. General meeting; election of officers for 1917.—W. Grewar.

Laisterdyke Bowling and Tong Combination.—Feb. 15, Barley Mow, 7.30. General meeting; election of officers, balance-sheet, another season's working, etc.—J. E. Hudson.

Larkhall C.B.A.—Feb. 17, Y.M.C.A. Halls. F.M. Table Show; judging at 6.—A. Thomson.

Manchester and N. Counties O.S.—Feb. 12, Deansgate Hotel, 8. Table show of Norwich, and general business.—F. Wilkinson.

Northern Crest Club.—Feb. 14, Sunderland, 7.30. Balance-sheet, election of officers.—G. Dobson.

Oldham C.B.S.—Feb. 13, Volunteer Inn, 7.45. Business very special.—G. Mills.

Openshaw, Gorton C.B.S.—Feb. 14, Room, back of stage, Alhambra Theatre, Higher Openshaw, 8.30. General business; subs. and ticket money joint show due; notice of motion trophy and medals, important.—A. W. Newton.

Queen's Park (Glasgow).—Feb. 14, Y.M.C.A. Rooms, 8. Alteration of rules.—A. Foreman.

Seaton Delaval C.B.S.—Feb. 10, New Victoria Inn, 6.30. Enrolment of new members and general business.—J. Archbold.

Stanley F.F. and C.B.S.—Feb. 3, Victoria Hall, 7. Election officers and important business.—R. Hutchinson.

Stanley Patriotic F.F. and C.B.S.—Feb. 4, South Moor Social Club, 7. Important business re entertainment tax.—R. Hutchinson.

Sunderland C.B.A.—Feb. 10, Station Street Cafe, 6.30. Pair show; classification for annual show to be discussed.—F. Riseborough.

Spen Valley C.B.S.—Feb. 12, Brotherhood Rooms, Cleckheaton, 7.30. Arrangements for shows, etc., 1917; chosing medals, discussion on club-rooms.—S. B. Grayshon.

Springburn, Possil Park C.B.C.—Feb. 14, Reid Hall, 8. Pair show.—A. Hamilton.

Swansea C.B.A.—Feb. 10, Elysium, 8. Washing exhibition, by Mr. W. J. Jenkins.—J. H. Ford.

Tong C.B.S.—Jan. 13, Hand and Shuttle Inn, 7.30. Yorks, Union Rules, and fixing prize distribution.—W. Walker.

Vale of Leven C.B.C.—Feb. 13, Village School, Alexandria, 8.—G. McColl.

Wallsend, Mid-Tyne Association.—Feb. 14, Station Hotel, 7. General meeting; question night discussed and table show for British, four classes.—Geo. Greenwell.

Wombwell B.F.A.—Feb. 17, Ship Inn, 7.30. Mr Waters will give a lecture on Breeding and Rearing; a hearty invitation to all fanciers.—F. Moore.

Wanstead F. and F.S.—Feb. 15, Church Hall, Cambridge Park, 8. Annual general; election of officers, balance-sheet, distribution of prizes.—H. J. Maynard.

Wigan Roller Club.—Feb. 10, Legs of Man Hotel, 6.30. Lecture on Roller Canary Song, by Mr. Massey, Bolton.—P. Greenall.

Walton, Everton C.B.S.—Feb. 14, headquarters, Mission Hall, Kilshaw Street, 8. Drawing up syllabus for 1917, etc.—J. Lloyd.

CAGE BIRDS, 153, FLEET STREET, LONDON.

Cage Birds

and Bird World.

A Guaranteed Circulation amongst 50,000 readers weekly

Offices: 154, Fleet Street, London, E.C.
Telegrams—"Aviculture, Fleet, London."
Tel. No. 6229 Holborn.

The Editor is always glad to receive and consider suitable contributions, whether articles, sketches, or photographs. Provided an addressed envelope, sufficiently stamped, accompanies same, every effort will be made to return unaccepted contributions promptly, but he does not in any case hold himself responsible for their safety.

All matter intended for publication must be written or typed on one side of paper only, and must reach us not later than the first post on Tuesday if insertion in the next issue is desired.

"CAGE BIRDS" will be sent post free weekly, on the day of publication, at the prepaid rate of 10s. per annum for the United Kingdom, and 13s. annually for foreign countries.

Twitterings.

A Hedge Sparrow with six primary feathers in each wing pure white has been shot in Glamorganshire.

Will Mr. W. Henshaw, of Ilkeston, kindly communicate with A. E. Wilkins, 18, Keith Avenue, Walton, Liverpool.

Will Societies please note to avoid clashing (writes Mr. F. W. Laidlow, Newcastle C.B.S.), that we have fixed our show dates for Oct. 19 and 20th.

Mr. F. C. Hiden, the owner of the fine Hawfinch which appears on our front page this week, tells us that the bird is a hand-reared one, having been taken from a nest in July, 1915. Mr. Hiden has been successful in rearing a full nest of last year's birds, and hopes next season to be able to show a fine team, as they are all very promising specimens.

Owing to my health not keeping at the best for some time past, writes Mr. A. K. Hunter, and also pressure of business, I have been compelled to resign my office of sec. and treas. of Queen's Park (Glasgow) and District C.B.S. At the annual general meeting of the club, Jan. 31, the members were successful in getting Mr. Andrew Forman, 389, Cathcart Road, to take up the joint positions. My best wishes go out to him, and any assistance from me is entirely at his disposal.

Ramsden's Pure Peppers.—Fanciers intending to colour feed this season should purchase at once, as they may not be able to secure supplies later on. Orders will be executed in rotation while the stock lasts. Prices as last season, no advantage being taken of the shortage or present market quotations:—¼ lb. 1s. 6d., 1 lb. 2s. 6d., 3 lbs. 6s. 6d., 5 lbs. 10s., 22 lbs. 37s. 6d., post or carriage paid.—J. W. Ramsden, 11, Josephine Avenue, Brixton, London, S.W.—(Advt.)

"British Birds" for February, 1s. monthly, Messrs. Witherby, High Holborn, contains interesting obituary notices of the great hunter, F. C. Selous, and the naturalist, T. H. Nelson, the author of "Birds of Yorkshire." Some very valuable notes by Mr. H. F. Witherby give the results of ringing Song Thrushes and Blackbirds, and a long list is given of birds of all kinds recovered under the marking scheme. One of these, a Greenfinch, marked as a nestling near Southampton in 1912, was found near the same spot in 1916. Among the usual "Notes" is a report of a Blackcap caught near Shrewsbury on Dec. 6 last.

The frontispiece of "Bird Notes" for January, the journal of the Foreign Bird Club, is a pretty drawing by Mrs. A. M. Cook, of a returned soldier among the foreign birds in an outdoor aviary. Mrs. Stanley Gardiner tells of the breeding of Sydney Waxbills, Major Parreau continues "Bakloh Aviary Notes," Mrs. C. A. Longdon gives her experiences of 1916 in breeding foreign birds, and Mr. Shore-Baily writes of some interesting cases of hybridising between foreign species. The hon. editor, Mr. Wesley T. Page, commences an article entitled, "Early Experiences," which should be very useful to beginners.

New Sec for Wakefield O.S.

We are asked to state that the new hon. sec. of Wakefield O.S. is Mr. T. H. Alexander 11, Regent Street, New Scarboro', Wakefield.

"No Name" at the Glasgow Show.

Mr. A. Forrest writes that among the many "no names" in the report of the City of Glasgow show, owing to the accepting of late entries which were not printed in the catalogue, no name in Border Green Ck. Class and 3 no name in Green Hens should be Forrest.

I have again taken over the secretaryship of Larkhall C.B.A., being assisted by Mr. Alex. Kerr (writes Mr. Allan Thomson). All communications should now be addressed to me at 1, Croft Place, Larkhall. Our late secretary, Mr. McGregor, has been called up, and expects to be in khaki before this note is in print. We as a club expressed our regret at parting with Mr. McGregor, who for years has been an active member, and lately an official of our association. We hope he may be spared to be back soon amongst us, and wish him the best of luck.

A Feathered Alien Interned.

A Seagull bearing a ring stamped "Zool Station, Heligoland, 181," has been captured at Norwich, and handed over to the naval authorities.

A Ringed Green Plover.

In a lot of Green Plover bought in the ordinary way of trade by Messrs. Sheehan and Co., poulterers, Dungarvan, was a bird bearing a ring marked "J.P.C., 1913, No. 12."

New Sec. for Bradford O.S.

I have taken over the secretarial duties of the City of Bradford O.S., in place of Mr. W. Helliwell, writes Mr. J. Bolton, 103, Maperton Road, Bradford, and all communications should be addressed to the above address.

Roller Canary Singing at Golborne.

We are endeavouring to establish a Cage Bird Society for Golborne, writes Mr. F. Ashcroft, and to promote this object a few friends have provided four prizes, and we have decided to have a Roller singing contest at the Victoria Hotel, Golborne, Feb. 10, when the prizes are to be competed for by local fanciers. There will be no entrance fee or charge of any kind either for birds or visitors.

OBITUARY.

MR. JOHN HAMLYN, SEN. (Shepton Mallet).

We are sorry to receive from Mr. John Hamlyn, the well-known naturalist, the news of the death of his father, the oldest draper in England. The deceased gentleman was born May 2, 1815, at Martock, Somerset, so was within three months of reaching the age of 102. He retired from his business in Taunton some forty years ago, and went to reside at Shepton Mallet, where he had served his apprenticeship. On attaining his 100th birthday he received a letter of congratulation from His Majesty King George. He had good health throughout his long life, and was in full possession of his faculties up to a week before his death. Notwithstanding his great age, he always made his own purchases, and was to be seen daily in his outdoor walks. His wife, Sarah Hamlyn, died in March, 1899, at the age of 66, and the genial John, of St. George Street, E., bird and wild beast dealer, Borough Councillor, and Guardian of Stepney, is his only surviving son.

I am sorry to say, writes Mr. Geo. Greenwell, sec. Wallsend C.B.S., that Mr. H. Fleck, the well-known Norwich and British exhibitor, has suffered a great loss in the death of his oldest daughter. All Harry's friends, and they are many, will join in an expression of condolence in his severe blow, and hope that he and family will have strength given them to bear it.

A Thought for the Birds.

Might I venture to suggest to your readers, writes Mr. E. G. Fairholme, Chief Sec., R.S.P.C.A., that, especially during this inclement weather, they should save the crumbs, etc., from their tables, and throw them out daily to feed the birds, many of which are hard put to it to find food at such a time. Any little scraps of fat from meat that are of no use for any other purpose are very helpful to them. I fully realise the need which is rightly being impressed on the Nation for economy in the consumption of food, but what I suggest would give a dinner to innumerable little birds and save them from starvation without in any way depleting the food necessary for the support of human beings.

A Roller Canary Society for Swinton and Pendlebury.

At a crowded meeting held Jan. 30, at Bridgewater Arms, Pendlebury, writes Mr. E. Hibbert, it was decided to form a Roller Society to be called Swinton and Pendlebury District Roller Society. Fifteen members joined, and a good number more have signified their intention to join at our next meeting, Feb. 28, at 7.30, at Headquarters, Bridgewater Arms, Worsley-st., Pendlebury. The following officials were elected: Pres., Mr. A. Donnelly; vice-pres., Messrs. W. Bumby, Green, and Wilson; sec. and treas., Mr. E. Hibbert; committee, Messrs. Ashworth, R. Bi[illegible]v. D. Jones, G. Bates, J. Hughes, and B. Evans. Meetings will be held on the last Wednesday in each month at 7.30. Entrance fee 1s., and annual subs. 3s. It was decided that we join the National Federation of British Roller Canary Clubs. Intending members will be welcomed at next meeting.

Birds and Wintry Weather

A dead Thrush picked up this week in the garden, says the "Manchester Dispatch," reveals the tragedy of the struggle for existence on the part of one of our grandest feathered songsters. Driven by the frozen state of the ground to come nearer the dwelling houses, no person seems to have taken pity on its plight, and so cold and starvation took toll, and we are a songster the less.

In the course of an article in the "Daily News," entitled "Frost-bound birds," Mr. W. Beach Thomas says: "The population of our natives, especially Tits, Wrens, Thrushes, and, above all, Blackbirds, has swelled and swelled for twenty years. In the interval we have endured some hard frosts, but never a long frost, and it is the length not the intensity that matters to birds.

You can infer the plight of the birds from their friendliness and love of habitations. The Greenfinches crowd even into the hencoops when the poultry are fed, and can be caught in any numbers if anyone should desire it in a wire run. If you dig in the garden Chaffinches come within a foot of your spade with courage as great as the Robins, who have a constant affection for an active spade.

The senses of the birds are strung to the highest pitch of perception where food is concerned. If you rattle the window as you throw out crumbs—the few not reserved for the hens—the ruffled Thrushes pop out from under the hedges before the manna begins to fall. If you hang up even a well scraped bone at the end of a meal's first course Tits will be clinging to it, though the string swings in the east wind like a turnspit, and peeling off the infinitesimal morsels of meat long before you have finished your meal. Wrens are running about like mice in outhouses or glasshouses sweeping the place clean of every morsel or every insect entombed in the cracks and at the edges of the panes.

Frost, with an east wind, always seems to increase the volume of birds among all inland places. The appearance is partly deceptive. There are no more Bullfinches in the land than before, but my orchard is thick with them for the first time, and they make awkward and vain attempts to play the part of the Tits with the mutton bone. Many people in the south have seen the Hawfinch for the first time since this frost set in. His size and mother-of-pearl beak and yellow streaks have been seen round many houses which before he had quite avoided, and observers to their astonishment find him a fairly common bird."

"Black" Canaries from New Zealand

By J. C. WILMOT, Bedford.

It is now several years ago since Mrs. Martin, of New Zealand, sent over to England her first lot of White Canaries. These were exhibited at various shows by Mr. Goodman, of Kempston, Bedford, winning a number of prizes, and were eventually picked up by a number of fanciers in different parts of the country. They naturally created a mild sensation, as a pure White Canary had never been exhibited before.

Recently, Mr. Goodman has received a second contingent from Mrs. Martin, consisting of 25 birds, sixteen of which are purely white, without a speck of colouring in them, and nine dark. The Whites are certainly a splendid lot of birds of the Yorkshire type and a great improvement upon the first lot sent, which were more of the Border Fancy type. Their constitution must be very robust for although upon arrival, after their journey of about nine weeks, they were a bit down in condition, Mr. Goodman soon pulled them round, got them well through the moult, and when I saw them a few days ago they were in prime condition, the cocks singing lustily.

The nine dark birds (to call their black is certainly a misnomer) are a very unique and healthy lot. Their general colour is, as Mrs. Martin acknowledged in her descriptive article which appeared in CAGE BIRDS some time ago, a bluish grey, with darker feathers on the back, wings and tail. Several of them are selfs, not having a single white feather on them; others have a few white feathers here and there. They are certainly very pretty and attractive birds, and it is to be hoped a forerunner of an entirely new variety. To me the most remarkable thing is that they were all bred from white birds, the mating in the first instance being a white cock, and a jonque cinnamon hen.

The establishment of this new variety is certainly a great credit to Mrs. Martin, and it is to be hoped that during the coming season, when the war is over, and our boys are back again, Mr. Goodman will see his way to exhibit them at some of the leading shows. By the way, Mr. Goodman tells me that he hopes by judicious crossing to improve them during the coming season; in the meantime, if any fancier would like to see them it will be necessary to make an appointment with Mr. Goodman, whose address is 24, Bedford Road, Kempston, Bedford, as he is a very busy man, and very frequently away from home. In conclusion, all true fanciers will wish success to this "New Zealand" variety. None of the birds are for sale at present.

Our Painting Competition.

AMONG all the competitions which we put before our readers from time to time, none is more popular than the yearly one of painting our front page.

With so many of our readers "doing their bit" at the front, it was to be expected that the number of entries would show a diminution, but the paintings of our frontispiece of Dec. 16 have come in in quite their usual number, and the merit all round is of such a high degree that the task of picking out the absolute best has been by no means an easy one.

Three judges had the matter under consideration, two of them having artistic leanings, and the third being a stickler for accuracy in the colouring of the birds. The latter had a rather tough time occasionally in pointing out that a delightfully pretty picture failed to render the natural colour of the birds, but in the end the agreement was unanimous that the picture which best combined artistic merit with accuracy was the one sent in by Miss Alce Hughes, Alvington Manor, Carisbrooke, Isle of Wight, and to this lady the prize of one guinea has been awarded. This picture was absolutely true to nature in its colouring, and displayed artistic merit of a very high order.

Among those which stood up to the end in the battle must be mentioned the efforts of J. W. Goldsmith, Maidenhead, which put up a very close fight indeed; Mrs. A. M. Cook, Kilburn, little if anything behind; J. Wills, Carnarvon; A. Middleton, Bucksburn, Aberdeen; H. Hatfield, York; Mrs. Warley, Bath; Mrs. McLellan, Pollokshaws, Glasgow; Miss Maude Wadsworth, York; A. E. Allsopp, Cardiff; and Miss Hilda Walker, Redcar.

A very notable feature is the fact that quite the majority of attempts came from lady readers, and that they acquitted themselves well will be obvious from the fact that the prize has gone to a lady, and that five of the ten next best pictures were also painted by members of the gentler sex.

Many young fanciers also tried their hand, and some of the attempts were of great merit, notably the one by A. E. Allsopp mentioned above. This young fancier, who is a son of our well-known contributor of the same name, is only 14 years of age, and his picture has got among the best upon its own merits, as the names were only examined after judging was completed.

A curious feature of the competition was that many seemed not to recognise the birds depicted in outline by our artist. One competitor made the Blue-Tits into Goldfinches, and painted the Robin entirely brown. The heading in this attempt was particularly well painted, and if the main picture had been nearly as good it would have had a decided chance.

Jas. Perry, aged 11, Luton, deserves mention, but in a very nicely painted picture he had converted the Robin into a Chaffinch.

W. Young, aged 14, who had "thirteen birds at home," painted [illegible] with indigo wings and chrome backs, and made the Jenny Wren in the top panel into a Robin, and the Goldfinch into a kind of Pied Flycatcher.

Nellie Lidgett, Newark, aged 11, sent in a very nice attempt indeed, and should persevere.

One competitor volunteered the information that "this picture contains one Norwich, one Robin, and three Cirl Buntings, and another made the Blue Tits into Lizard Canaries, the Robin into a Canary, and the Norwich into a London Fancy; while yet another, whose attempt was otherwise quite good, converted the Robin into a Hedge Sparrow, and said so in an inscription to the picture.

Still, taking the pictures all round they were a very fine lot, and we only wish that we were able to award prizes to quite a number of them.

Competitors desiring the return of their pictures, except the prize winner, may have them sent back if they will send sixpence to defray packing and postage, and those who wish for a detailed criticism of their pictures from a practical as well as an artistic point of view may have this sent by post for a fee of sixpence.

The Jackdaw and How to Keep It.

By "CRETA."

The following delightful article on one of the most entertaining and intelligent of all pet birds recently appeared in our contemporary "The Lady," and is reproduced by kind permission of the Editor of that Journal.

IN a small country village nestling in a valley in the Midlands, tho walls of the square old grey church tower which rose among the trees for many years provided home and shelter for successive generations of Jackdaws. And close by the church tower the children of the rectory—like all the other children in the village -loved with an exceeding love to get possession of one of the baby Jackdaws and rear it as a close and intimate friend and companion.

Perhaps the utmost limit of educated intelligence, conversational accomplishment, and capacity for personal attachment possible with any of the 'daw family was developed by the Jackdaws who lived with those rectory children as dear and valued pets in that lovely old garden!

By one of the unwritten but rigidly observed laws which govern village life just as influentially as they do that of larger social communities, though without the slightest legal basis, the 'daws who lived in that tower were the personal property of the village clerk.

For many years old Robert, and, later, his son Tom, climbed up into the bell chamber, where the birds nested, and along the beams to the rough bundles of sticks on the stone ledges in the corners, at imminent personal risk, each spring-time, and as soon as the nestlings were old enough to be "taken," carried them down the old tower and sold them at prices varying from threepence to eightpence—according to the pecuniary position of the purchaser—among the children and adults of the near neighbourhood.

As uming a Virtue.

One or more birds were always carefully left in each nest. Old Robert's friends and admirers said this was done from pure kindness of heart that the parent birds should not miss their children and fret for them, but more practical persons knew that his knowledge of natural history was such that he understood that if the entire broods were removed year after year the Jackdaws would soon desert the old tower for some more secure nesting place elsewhere, and a regular source of income be lost in consequence.

Old Robert has long lain under the grass by the square grey tower, also his son beside him, and no Jackdaws have nested now for many years, so it is probable that his successor was not either so humane or so wise.

The rectory occupants were always given the first option of acquiring "jacks," as a matter of etiquette, and among the entertaining, glossy black bipeds who brought interest and amusement to their youthful days two specially affectionate, intelligent pets will always be fondly remembered.

Directly they could fly they were allowed entire liberty, without the impediment of any clipped wing, but their attachment for their owner was such that they never willingly left her or showed the slightest inclination to rejoin their parents in the tower close by.

They could "talk" with singular clearness, learned many amusing little tricks, and seemed to develop almost human intelligence, the result, no doubt, of being through their early years such an important part of their young mistress's life and the recipients of unceasing petting and attention.

Their names were "Jet" and "Gloss," and they appeared to know them perfectly, also their owner's, whom they were in the habit of calling so distinctly she would often think it was some other member of the family who wanted her.

When she went for walks they usually accompanied her, if possible, often going as far as two or three miles, flying from tree to tree beside the roadway, or riding, if allowed, on her shoulder. Occasionally, if she went into a house and remained some time, they would become impatient and fly off home, but they more often waited outside until she reappeared and returned with her.

Not to be Outwitted.

If she wished to go out without them the only way to accomplish this was to give them some food, return to the house, and slip out of another door, but they watched her movements so vigilantly they would often discover her absence from the premises and follow her when she had got some distance, and the only way really to ensure their not doing so was to shut them up beforehand in the cage in which they roosted.

One memorable Sunday, after being repeatedly driven back, they succeeded in following her into church during morning service, and distracted the congregation from their devotions by loudly calling her name. After that incident it was decreed that the birds should be kept shut in their cage on Sundays until the afternoon service was safely over, an institution they bitterly resented, and their sagacity was such that they always showed a peculiar reluctance to "go to bed" on Saturday nights, and sometimes insisted on staying out altogether and sleeping in the trees.

Among the most striking tricks they learned, one of them would lie motionless on its back on its mistress's hand when told to be "dead," with its feet rigidly curled up and its head hanging down in such a way as quite to deceive a stranger, never making the slightest movement until bidden to "live" again.

Incorrigible Thieves.

The natural tendency for mischief which is characteristic of all the 'daw tribe was never eradicated by education or the strictest supervision. To the end of their lives they took a fiendish delight in flying into open windows whenever they had the opportunity, and stealing any trinkets left about on the dressing table or into the nursery to snatch up a tiny doll, or any other small toy, and fly off with it to a neighbouring tree and tear it to atoms out of reach before the owner's very eyes. This insatiable desire to thieve and destroy was a frequent source of vexation and small losses, and is a drawback which should be carefully considered before such birds are acquired as pets.

To make happy and affectionate pets young Jackdaws should be taken from the nest as soon as fully fledged. Some hay in the bottom of a hamper or wicker cage makes a good receptacle for them for the first few weeks, and they should be kept in a warm room or sheltered outhouse at night, with lid of hamper closed or cage covered.

Coming from a nest with other young, they will be susceptible to cold until acclimatised to their new home, and must be kept carefully from all draughts and damp, though Jackdaws are among the hardiest of birds, and not so delicate as the majority of fledglings.

How to Rear Jackdaws.

They require feeding every two hours. Three or four mouthfuls of chopped raw meat make a good meal for them, or worms may be substituted if obtainable, and a little stale bread soaked in water and squeezed dry can be mixed with either, for economy, if desired.

They will be very shy just at first, poor little fluffy, black mites, and the food will probably have to be forced down by gently opening the beak and placing it inside, or even pushing it right into the throat, but Jackdaws are naturally bold young birds, and after a very few meals they will usually open their mouths voluntarily and give their owner's approach at feeding time an enthusiastic welcome.

Care must be taken not to over-feed them, as they are greedy youngsters, and will often continue to open their mouths and beg for more after they have swallowed quite as much as they can digest at a time, though in a very few days they will be able to peck up the bits of food for themselves, and then matters may be left a little more to their own discretion.

Strict attention to cleanliness must be given to such birds, especially while young and helpless, and their bedding should be changed daily. Directly they are old and strong enough to roost, perches must be provided. It is injurious to the legs and feet for them to remain and sleep in a nest after they are old enough to leave it.

Many unfortunate Jackdaws spend their entire lives pent up in an insanitary wicker cage, which is a sad pity, as they are, of course, far happier and healthier if allowed more liberty, and, belonging to a strong, bold, plucky race, they can generally be trusted to take care of themselves and successfully drive away strange cats, even if their wing is clipped.

This may be necessary, for a time at any rate, until they have become attached to their new surroundings, but only the tips of feathers in one wing should be snipped off, so that the bird can still take short flights or get up into the shrubs out of reach of dogs or other dangers.

All through maturity the 'daw, living thus in partial liberty, will require feeding three times a day—morning, noon, and night—and for the rest can be left to provide for himself, helping thereby to clear the garden of worms and insects. A plate of table scraps, with fragments of meat and pudding and bones to pick, makes an excellent meal for an adult Jackdaw.

They require some shelter, such as an outhouse or open cage hung up in a dry place under the eaves, to roost in during the winter months, but otherwise can be left out of doors to take care of themselves all the year round.

Where there is no strip of garden or pleasant yard where a Jackdaw can live in the daytime, or spacious outdoor aviary to provide suitable accommodation for him, and the horrible wicker cage is an absolute necessity, no real pet-lover will ever attempt to keep one of these large, active birds at all.

THE STOCK BOOK

Simplifies the operations in the Bird-room and makes it possible for everyone, even the veriest novice, to breed his birds as they should be bred. It affords facilities for the recording of the complete pedigree of all your birds; of your experiences during the season; an account of every bird reared. Contains also Pedigree, Breeding, Young Bird and Show Registers of simple and unique character. Cash and Profit and Loss Accounts for the year. Gives valuable hints for times of emergency during the breeding season.

THE OLD AND THE NEW BELL GLUCKE.

By J. TOMLINSON (Newcastle, Staffs).

(Continued from page 8.)

Notes by a Roller Canary Judge upon a widely-discussed Tour.

THE Glucke in this tour is deep, and delivered rapidly, but in formation and time is identical with the well-rendered Glucke of the old B.G. The style or formation of the Bell differs in individual birds; it may be heard softly hovering above the G, or maybe only its metallic ring will be heard embodied in the G., and I have come to the conclusion that the tour in young birds is immature.

These birds are soft in tone, the report of 1st Wolverhampton, 1914, read: "Too soft in tone;" this I regard as an acquisition, for the voice will mature with age. I judged that same bird at Birmingham, at the 1915 contest, when both body and voice had matured, and it sang a well defined B.G., a good one, too.

Entertaining an Angel Unaware.

This low, soft-toned Bell is often missed, yet, as I said previously, it prevails in the North. I've heard it there, in birds whose owners were unaware of the fact. I've heard the metallic ring embodied in a W.R.; also the W.G. I've heard the soft hovering as of a tinkling bell, above a W.R. and a D.B.W.T. This was described to me as Koller.

I have myself owned a bird that before he commenced his song, would produce a soft tinkling sound, such as the shaking of a bunch of wee bells would make. Was that Koller-like? I have now left two cocks, bred from the "strain" of the new B.G. Their sire was son of the 1st Wolverhampton, 1914, 1st Birmingham, 1915. I found on its arrival that this bird sang this B.G.; its former owner did not know this. I mated this cock with a sister to the 1914 B.R. cup winner and her daughter, which I obtained direct.

The two cocks mentioned, and others from this mating were trained under a H.G. singer and the result was the deep-toned rapidly delivered G. of the B.G., embodied in which is a metallic ring, which I described as having found in a W.G. and W.R. Some of the cocks, although they had never heard a B.G. singer, at one time brought that soft hovering bell note over their G., to drop it, under the influence of the majority of their fellow pupils, and bring W.G. and H.G.

Versatile as is the Water in the tours, much more so is the Bell, and its metallic ring. The water can be found in W.R. D.B.W.T., W.G. also in a deep tour that has given rise to the term Watery Bass. We hear the Bell and its metallic ring or sound in the Hollow Bell, the Bell Roll, the Bell Tour, over the W.R. and D.B.W.T., of the old B.G. birds, now we are finding it embodied in our W.R. W.G., and in the quickly rendered G. of the new Bell Glucke.

As the watery rolling tour forms a W.R., as the watery intonation, with a deep, downward beat, a W.G., and as the Bell and the Glucke form a Bell G., so I am prepared to accept the statement that the Bell or its metallic ring in an H.R., W.R., or W.G., forms a separate tour in each. I am inclined to view them as sports from the B.G., as the majority are found in the B.G. singer, nevertheless they each form a separate and a distinct tour. Providing they are not termed Koller, name them Koller-like or anything else you please, they will sound equally as pleasing.

Readers would do well to read the disinterested writing of a German judge to the Roller fanciers of Germany, describing how he had heard and learnt to recognise the Koller. This article was translated into our fancy press by Mr. Tweed, and with apologies to the latter I will make a brief reference to this translation.

Learning from the Enemy.

"The Koller tours we hear to-day," he says, "are merely a mirage of that bewitching piece of music. They are only Koller-like—I will portray only what I have heard, a deep hollow tour sang from the breast with closed beak, which has something of the Glueke, Bass, and Schockel sounds about it." He describes the various throat sounds as Kururururubloooobe. This agreeable blend of song enables us to distinguish a third peculiar characteristic of the tour in its metallic sound. He speaks of the scarcity of even this mirage, and says that if any fancier has it, and will inform him he would be pleased to make the fact known.

He also goes on to describe the B.G. and says "it owes its purity to the metallic ring of the vowel E." Were an Englishman describing it, he would have referred to the l. or el. Just a simple illustration, but it shows the difficulties of translation, and the different usages and customs of different peoples. Other German writers describe the tour in various ways, one says "A characteristic sign of Koller is the wave-like hollow form, not springing or skipping. The consonants b or w come first; like lightning come the ground notes w or o, with an after tone ee. Comparing the deep wave like form, the hollow tonality, he prefers to say that "the Hollow Glucke, Hollow Water Glucke, Double Glucke, and Bell Glucke have rendered their share in the production of the Koller." Here we get rather a different version than in the first translation.

One of the prettiest and most catchy tours I have heard this year was in an old "Koller" cock of Mr. Jacquemin's at Wolverhampton, the bird sang a Water Roll, and immediately above it came the thrill that reminded one of a violin. How does this compare with either of the above translations, the first of which refers to Glucke, Bass, or Schockel sounds, and the latter says that the consonants b or w come first, and then like lightning the ground notes u or o, to end with ee.

I must thank Mr. Shepley for his kind remarks as to our judges, and with him opine that the soft hovering Bell with the G., is no more or less than a B.G., and no one will be more pleased than I to hear when we have reached that stage when we can say we have the real thing.

Mr. Shepley remarks on the excellence of the article translated by Mr. Gutierrez. I agree, and admit the difficulty of putting the bird's song to music. Under such a task is it any wonder that an error should have crept into the pitch given of the rendering of a good H.R. by the author. The average reader knows little of the time, the labour, the correspondence, and the trouble incurred by the translator in his praiseworthy efforts for the benefit of our hobby.

ALL JUDGES AND SHOWS SHOULD USE OUR

specially prepared and up-to-date

JUDGING BOOK.

The advantage this book has over others is that it has 3 columns for awards, and is therefore a great help to, and a double check for judges, while there is always a slip free to be sent to the printers of the catalogue.

Correspondence.

A Recipe Wanted.

Cake for Canary Rearing.

SIR,—Could any reader of CAGE BIRDS give me a receipt how to make a cake to rear young Canaries without the trouble of making egg food with eggs and biscuits, as I have not the time just now.

T. MCLEAN.

[Recipes have many times been given in our columns, but perhaps someone will oblige again.—Editor.]

An Ancient Method of Catching Larks.

SIR,—In a volume of old songs, dated 1749, I come across allusions to an old method of catching Larks by means of a looking glass. "Gaping (as Lark with looking glass) is by its likeness caught." Another reference to the same thing reads: "The nimble squirrels we cudgel we chase, and the little pretty Lark betray with a glass." Can any reader of CAGE BIRDS explain the method adopted by these old-time bird-catchers?

A.J.B.

Norwich.

How to Make a Square Mesh Net.

Working Instructions.

SIR,—Start with two stitches and add one stitch every row till you get the size wanted. Then cast off a stitch in every row till finished. This will make a square net and square mesh.

If an oblong net is required, start the same and keep on till you make the required width, and then on one row cast on an extra stitch at the end; next row take one off, so that there is always the same number of stitches on the stick till you get the required length, and then take off a stitch at end of each row till finished. The added stitch is always made at end of row.

T. HEBBLEWHITE.

The Reputed Goldfinch-Chaffinch Hybrid.

It's Rejection by the National British Bird and Mule Club Committee.

SIR,—I was not at all surprised to know that the committee of the N.M.B. and M.C. did not accept my Hybrid hen as genuine seeing that the gentleman that judged her at Clapham Show, or rather passed her, was chairman of that committee. When he once makes a mistake he sticks to it, and has never been known to give in. He does not seem to mind the injustice he is doing to other people.

It will make very little difference to me, for I know the bird is genuine, although a rather poor specimen of the cross perhaps. I wonder how many members besides Mr. Robson were at the meeting, and how many Hybrids they have bred between them, including the Chairman. I have bred six different crosses of Hybrids in the eight years I have gone in for it, also several kinds of Mules, including 14 Greenie Mules in one season, and ten Siberian Goldfinch Mules, and a Goldie-Bullie Hybrid from the same Siberian Goldfinch.

T. W. WREN.

A New British Bird Club.

Standard Cages for British Birds.

At a meeting held in Hamilton Town Hall, Jan. 27, the Lanarkshire British Bird, Mule, and Specialist Club open to Scotland, was formed, and office bearers were appointed as follows:—Pres., Mr. Geo. Martin; vice-pres., Alex. Davidson; sec. and treas., Wm. P. Campbell, Muir's Cottage, Larkhall; also representatives for the following districts: Motherwell, Alex and Andrew Henderson; Cumbusdang, Alex. Crawford and Alex. Davidson; Larkhall, Allan Thomson and Alex McAlean; Glasgow, M. B. Wallace and J. Crone; Musselburgh, C. and J. Sykes. Agreed that the membership fee be 2s. 6d. per year and that the committee and representatives meet at some future date to make the rules of the society. A discussion took place on the size of cages for different species of British birds, and this will be decided by committee and representatives of the different districts at a meeting at an early date. The aims and objects of the club will be found printed in book of rules which will be issued shortly and a copy of same will be given to each member. A hearty vote of thanks to chair ended the business.

WM. CAMPBELL, Hon. Sec.

A Fancier in Distress.

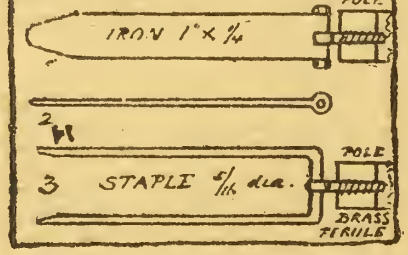
SIR,—Mr. McLaughlin, of 10a, Penville Road, Earlsfield, London, last year underwent a very serious internal operation in St. Peter's Hospital. He is now able to get out, but will not be able to work for some time, if at all. He wishes to get two or three pairs of Yorkshires, but has not the means to purchase them. I therefore desire to ask any fancier with surplus stock whether he would be disposed to give assistance either by giving a cock or hen; if so, they would be doing a very kindly act, and it would be acknowledged with grateful thanks. Mr. Robson has kindly consented to give a Yorkshire hen, and I personally will contribute 5s. towards a small fund with the object of purchasing say three pairs for a start. Mr. McLaughlin does not like asking you and the fancy for assistance, and this, therefore, is my excuse for asking the favour through the Press on his behalf.

W. LILLEY.

Poles and Irons for Bird Nets.

Their Construction Explained.

SIR,—Perhaps the accompanying sketches will give "Springburn" some idea of what is required in irons for nets. Sketch No. 1 shows a good type of iron. It is made from 1in. by ¼in., the top being turned after the manner of a hinge, or what is known to smiths as a "she" hinge, i.e., the centre part of the eye being cut out. The hole is large enough for a ¼in. bolt to go in easily. The bottom end is thinned down wedge shape, as shown in No. 2, which is the edge view of No. 1.



The pole is shown attached, and is connected to the iron by a good strong screw-eye such as used in picture frames, only stronger, and big enough for the bolt to pass through.

No. 3 is a more simple type, being made from 5/16in. round iron about 2in. wide; the ends are pointed, so as to drive easily into the ground.

Poles should be of riven ash, free from knots, and about 2in. diameter. The bottom ends should have a brass ferrule to prevent them splitting. The top end has a V piece sawn out for net line, which should fit tight in the V.

The length of the poles should be to suit the nets. Sometimes poles are cut in two and jointed with a brass pocket for convenience in packing and carrying. I trust the above will be clear to "Springburn," and wish him luck.

W. D. K.

The Disqualified Hawfinch at Bristol.

The Owner Again Denies Trimming.

SIR,—In reply to Mr. House's letter in last week's issue, I may say if he made himself and the matter a little clearer I should perhaps have been able to understand him. His statement to me seems "absolutely ridiculous." If he will look up the report of Bristol Show he will find the words. "In this class Mr. House left out a Hawfinch on the ground that it had had its bib trimmed." No mention here of feathers missing.

There were no feathers missing when the bird left here for Bristol, and none were missing at Bristol, or someone put them in when the bird was coming home. This show was held Dec. 2, and I think Mr. House knows it would be impossible for new feathers to grow and be perfect in 23 days. Mr. House put this bird first at Northampton on Oct. 25, and he disqualified him at Bristol five weeks later. Mr. Robson put him first at Northampton, and gave him special for best British bird in show three weeks after, and I think if Mr. House had taken a little more time over the class he would have seen the bird has disarranged the feathers around his bib, and that there were none missing or trimmed. It is no pleasure to write on this matter, but it wanted clearing up.

W. ANDREWS.

What is a Ticked Bird?

Another New Term Suggested.

SIR,—I hope you will allow me another few lines on this controversy of a ticked bird. After seeing the splendid illustration in Jan. 27 issue by Mr. Norman, I withdraw instantly any previous remarks I have made. The bird is a splendid type of a Norwich Canary, and I quite agree with Mr. House. The word (splashed) I spoke of I instantly cancel, and now, after seeing the bird properly depicted by Mr. Norman in our paper, my humble opinion and quick decision will, no doubt, be greatly criticised. The bird is purely and simply a "spreckled" one, for which there is no class stipulated at any show to my knowledge as yet. A bird with these markings is not qualified to compete in either ticked or marked section. Apart from the "spreckles" the bird is a splendid type of the Norwich. If I possessed the same I should feel very proud of such a bird, and make, I think, wonderful use of it, and its downfall on the bench would not trouble me one jot.

J. H. JOWETT.

The Wording of the Schedule.

Sir,—Judging by the sketch in this week's CAGE BIRDS, I consider that, according to the present day general ruling of ticks and marks, Messrs. Stubbs' bird should be shown in the marked class (even if some of the minor ticks have failed to show themselves in the process of printing.)

I do not know if the schedule of the Port Talbot show was drawn up differently to the usual. Perhaps the secretary will kindly oblige by sending to CAGE BIRDS the portion referring to the section in which this bird was shown, so that we can all read it. I do not think the same has been given during the controversy.

With respect to Mr. Kershaw's letter (Jan. 20th issue), suggesting to do away with ticked classes altogether, and show ticked birds with uneven marks, this would not be a bad idea from one point of view. It would dispense with the "doubtful" ticks, but I am afraid that at some shows where the judge might not have a fancy for marked or variegated birds, the latter would not stand much chance against a bird with only one "tick."

With respect to the new definition of a "tick," the following is my suggestion. That a ticked bird can have one solid dark mark, which must not be divided in the slightest way. Such mark not to be larger than a sixpence. By this definition a grizzle marked bird, however small the grizzle might be, could not be a ticked bird, because the mark would not be solid, and, further, all technical marks, for ticked birds, would be done away with.

When I first started in the Fancy, grizzle marks and technical marks were a great stumbling block to me; I was never sure of them, and I think they are "puzzlers" to many novices to-day. If a new definition is decided upon, the same should apply to every variety of Canary, and be universal throughout the United Kingdom.

Bromley, Kent. W. FOXEN.

SIR,—In my letter I sent a few days since, I asked if the Secretary of the Port Talbot show would favour us with a copy of the schedule, but I see in this week's issue of CAGE BIRDS that Messrs. Stubbs have given it, so there is no need now for the secretary to send same.

According to the wording of the schedule I still consider that the bird is a marked one, and was shown in the right class. I do not think the wording "Uneven or Variegated" is so clear for a schedule as "Marked or Variegated," because the word "uneven" can be taken two ways; some fanciers might think it means that the mark is to be unevenly balanced, and others that it refers to uneven technical marks.

I can see Mr. T. Johnson is of the same opinion as myself and no doubt many others, viz., Let us be up-to-date. I have a book myself which I bought only twelve years ago, and in it are several drawings of winners. In those days these birds were considered champions, but to-day if they were mine I should be pleased if I got songster price for them.

I find that in my previous letter I omitted from the last paragraph the following four words: "In which Ticks occur." The paragraph should read "If a new definition is decided upon, the same should apply to every variety of Canary in which Ticks occur," etc., etc. W. FOXEN.

Nothing New Under the Sun.

SIR,

"If there's a hole in a' your coat,
I rede you tent it;
A chiel's amang you takin' notes,
And faith, he'll prent it."

That is pure plagiarism, and will be familiar to Mr. House, for it is taken from the columns of "Fur and Feather" for Jan., 1897. But the significance of the quotation did not seem apparent to me until I happened upon a correspondence relating to the very same subject as the above; then it seemed to suggest many things. It means that when one says a thing in print he has to be careful, or it may be dragged from its musty shelf in the hereafter and pushed before his eyes, and the reminder may prove distasteful. It means that when one lives in a glasshouse—or, rather, it means that one shouldn't live in a glasshouse. It means that cage bird judges and journalists should live in bomb-proof shelters.

But what has all this to do with the above subject? I will tell you. At Manchester Show, Jan. 20, Mr. Sam Cook handed me a volume of "Fur and Feather" for 1897, just 20 years ago, at the same time telling me that I should find something in it that might interest me regarding Canaries and the fancy in general. So I did. I found many things of interest. Curious causes and remedies for soft moult; the correspondence which resulted in the formation of the N.P.C.; the photograph of the present editor of CAGE BIRDS; the signatures of many fanciers who were writing then and are writing to-day in CAGE BIRDS (a fact which surprised me), including Mr. Bastock, Barker, Clegg, Spillman, C. E. Silk, and C. A. House.

But the one thing which arrested my attention at the moment was the controversy under the heading, "Is an evenly-marked bird a variegated bird?" It appears that Mr. House had disqualified a bird at some show for being in the wrong class. The bird was an even-marked Norwich, and he held that the bird should have been shown in the class for "ticked and variegated," and, if it is any satisfaction for him to know it, I believe he was right. An even-marked bird is a variegated one. To quote Mr. House of 20 years ago: "Evenness of marking is the perfection of variegation." I do not think even Blakston could have put it better or plainer than that.

Now, the correspondence of 20 years ago is singularly similar to that of to-day. The arguments are fundamentally the same. In two cases at least the same signatures follow the letters. The writers may recall that controversy. Of course, Blakston figured largely in the correspondence, spiritually, of course, for he was dead then. The Yorkshire Union was also in it, under the signature of the then sec., H. W. Naylor.

In the issue of Jan. 7, 1897, Mr. House wrote defending his action, and he said: "I hold the opinion that a bird broken in colour is variegated." Please read that carefully, and notice the word broken. The class at Port Talbot read "marked or variegated," and "a bird broken in colour is variegated." Is Messrs. Stubbs' bird broken in colour? Further on Mr. House says: "I may be entirely wrong, but it is an opinion I have held for a great many years, and was held by so great an authority as Blakston." Even Blakston held that "a bird broken in colour was variegated." In the same letter Mr. House adds: "It would be well if we had some central authority to whom all such knotty points could be referred. This is not the first time unpleasantness has been caused by the different ideas of the meaning of the term variegated."

And that is 20 years ago. Well, it might have been yesterday, for we are still bemoaning the want of a central authority. Who said we weren't conservative?

It will have been noted that Mr. C. E. Silk has stated that he believes with Mr. House that Messrs. Stubbs' bird was in its wrong class. On Jan. 14, 1897, Mr. Silk says, "any two colours make variegation." The Port Talbot schedule said "marked or variegated." Is Mr. Silk right or wrong? Mr. H. W. Naylor, sec. of Yorks. Union, says on Jan. 29, 1897, quoting from Blakston, "It is, therefore, manifest that any pied Canary is variegated, and, therefore, what is known as a marked bird is as much a variegated as any other." In the same issue Mr. J. Nason, the well known Northampton fancier, says, "The word variegation I have understood to mean a mixture or distribution of any two natural colours over any part of a specimen."

But the most significant quotation I have to make is one from Mr. J. H. Scothern, the noted Crest-man, in Feb. 18, 1897, issue. He says: "It should be understood that the word mark, when used in reference to Canaries, is a technical term, and has not it's usual signification, but is merely used to locate variegation, the precise position of such location being the eyes, wings, and tail. The word mark, therefore, denotes located variegation."

What can we say after all these men, including Mr. House, and even Blakston, saying that any two colours mean variegation? We can only say that Mr. House was wrong in disqualifying Messrs. Stubbs' bird, and my sentence last week is worth recalling when I asked if Mr. House studied the wishes of the Port Talbot Society. Was the word "marked"

(Continued on next page.)

CORRESPONDENCE.

(Continued from page 74.)

used in a technical sense as laid down by Blakston? Or did they mean it to be used in the sense of any two colours making a marked bird?

Fifty years ago marks were the rage, and these laws were laid down to suit the exhibiting world of that time. But one never meets even marks anywhere now except in the Border Fancy. In my 15 years in the fancy I have not seen a really even marked Norwich that would pass muster, yet we have the same rules exercising the actions of judges. It is not right. It is no use appealing for the academic theorising of Blakston, with his technicalities. His book was written when markings were in fashion, when markings were judged rather than type. Fortunately, judges to-day pay more regard to type, and markings are only of secondary importance.

I am very grateful to our friend Sam Cook for the volume of "Fur and Feather." I am sure that nothing was further from his mind when he gave it to me than this controversy, but it has been the means of telling me that any two colours make variegation, and I know that Messrs. Stubbs' buff cock is a two-coloured bird.

T. Johnson.

A Practical Classification Outlined.

Sir,—I am unwilling to come into this controversy, and am only induced to do so by the hope that I may be able to help to put the whole matter on a sounder basis.

Logicians tell us that the sub-divisions of any subject to be real must be "mutually exclusive," i.e., it must be impossible for anyone (exhibitor or judge) to be in any doubt as to what sub-division (or class) any particular bird should be in, and in the first place Committees are sinners in this matter, and not unfrequently put out schedules which are not precise enough.

I note from the correspondence that there is a conflict of definition between the Yorkshire Union and the Southern Border Fancy Club. This should not be, and the definition of a tick should be exactly the same all over the Fancy and in every variety.

In a full classification I find ticks mentioned in Norwich, Yorkshires, Lancashires, Borders, and Hybrids, and with regard to Scotch Fancies I find a classification as follows:—Yellow cock, ditto ditto piebald, ditto ditto foul, ditto ditto green, etc. This is not precise enough, I should say.

Mr. Lugton speaks as if a foul bird meant a ticked bird, while a flaked bird meant a variegated bird. May I ask Mr. Lugton what a piebald bird is? Also what birds are eligible in the first of the above four classes?

The use of "foul" in this connection should, I think, be dropped. May I ask our Scotch Fancy friends to come into line with the others by dropping "foul" in this connection, and also by dropping "piebald," which I think must mean much the same as variegated.

Then again a good deal of confusion has arisen in the Fancy from the use of the word "mark" or "marked," and in future I think these words should be used in no other than their natural sense, and that when technical marks are meant they should be described as "Technical marks."

One correspondent blames another for using the word "Marks" to describe "patches of colour on the body, apart from the technical marking points." If these are not to be called marks, what are they to be called? I think the word was properly used in this case, and that as said above we should use the expressions "Marks" and "Technical Marks" to express different things.

I have said that the sub-divisions of our subject should be "mutually exclusive," and I suggest the following comprehensive scheme as comprising all the sub-divisions possible from clears at the one end to selfs (Greens or Cinnamons) at the other.

1. clear or invisible ticked.
2. visible ticked.

A tick being understood to be one solid Green (or Cinnamon) or grizzled green (or cinnamon) feathering, of not more surface in all than a sixpence, but the shape of the surface to be unimportant, or two such marks, near or apart, as long as together they are not of more surface than a sixpence.

3. Technically even marked, say four technically even marks (both eyes, both wings), or 6 technically even marks, both eyes, both wings, both sides of tail. Technical markings—wings for exactness, decreasing in value as the marking extends beyond the secondary flights.

4. Technically uneven marked, a bird may have two or three or five technical marks, on eyes, wings, or tail separately, or in addition to any other variegation on its body. A bird with 4 or 6 marks, if variegated on head or body, is also considered a technically uneven marked bird.

5. Slightly variegated, say not more than half Green (or Cinnamon).

6. Heavily variegated, say not more than half Green (or Cinnamon).

7. Foul Green (or Cinnamon), say Green (or Cinnamon), all but one or more light feathers in wings or tail.

8. Self Green (or Cinnamon).

It will be noted that I avoid the words "points" and "pointed" as describing technical marks: I consider them unnecessary. Strictly speaking the "Visible Ticked" should probably be followed by the "lightly variegated," but I have preferred to put down the sub-divisions in the above order.

A bird with a small grizzle cannot compete as a clear, so a bird with a large grizzle, say larger than a sixpence, should not compete as a ticked, but as a lightly variegated.

I do not suggest than any society can (in view of sub-divisions on other points, such for instance as "unflighted" and older birds) give classes for all these sub-divisions in any variety, but after having clearly defined the sub-divisions it is easy again to amalgamate two or more together.

I am much obliged to Mr. Midgley for giving us the Yorkshire standard as regards technically even marked and uneven marked birds, and it will be noticed that in my scheme I have adopted the substance of their wording. I should be glad if Mr. Midgley would give the Yorkshire Union's definition of a tick. He will excuse me saying that to my way of thinking his first letter (in your issue of 31st Jan.) is rather vague on this point.

I am surprised to find that the four or five specialist Norwich Societies have not defined a tick, and I think the secretaries of these societies should, with, say two or three committee men from each society, have a joint conference (say by correspondence) to settle "What is a Tick," also what is "Technically Marked."

I am not in favour of the suggested revival of the Cage Bird Union or something similar. I think that would lead to nothing, especially in these times, when it is so difficult to find a man with ability enough, and at the same time with leisure enough, to carry such an undertaking through successfully.

I do not put my scheme forward as complete or final, but rather as a basis for Specialist Societies to take up and make perfect. I am aware that some of my ideas may be considered almost revolutionary, and that some of my expressions may be called clumsy, but I may remark that brevity and simplicity are not advantageous if they override clearness and precision. Expressions which have been like household words in the fancy are no doubt difficult to eradicate.

As my idea is that my scheme should be treated on its merits my identity is immaterial. I therefore subscribe myself,

Old Hand.

Work for a Norwich Plainhead Council.

Sir,—If the Port Talbot decision of Mr. C. A. House is so very correct, it is difficult to follow why he has attempted to shift the onus of responsibility upon the shoulders of other judges, who, he says, "have chosen the line of least resistance." Why not name these judges, and furnish specific incidents where this line was chosen, or withdraw the suggestion, which, as it stands, is not only a breach of professional etiquette, but is as unfortunate as I believe it is unwarranted.

In the days of Blakston, and even to-day, so far as the Yorkshire and Border Fancy varieties are concerned, for the simple reason that such are still bred and catered for in those varieties, a definite ruling obtains, not only as to what is a "tick," but also an "unevenly" and "evenly" marked bird.

With the Norwich Plainhead variety we have no rule governing all three descriptions, and our classification, apparently by common consent, has degenerated into merely a reflection of what is now found in the bird-room, which, broadly, is a process of easy stages from the green to the clear, which produces the fouls, variegated, lightly marked, ticked, and the clears, and neither expects or encourages the true unevenly and evenly marked birds as of old.

This is to be deplored, I know, but, nevertheless, it is a fact, and although I am fully aware it was quite within the purview of Mr. House to apply the ruling of Blakston and the ruling of the Yorkshire Union, as he did, yet in applying those rulings he failed to grasp the fact that a Norwich Plainhead was concerned, and not a Yorkshire.

I heartily disagree with his decision, not from the point of view of a judge, but as a fancier, and I also heartily disagree with his suggestion that chaos will result if a universal rule is not applied to the "tick." If Mr. House has been for forty years in our fancy, and yet does not appreciate that the traditions, sentiments, and interests of the Border Fancy man are not those of the Yorkshire or Norwich men, and that the rulings of the one Fancy are not the concern of the other, then he has missed the soul and charm of each variety of fanciers.

We Plainhead men admire the cohesion and ways of the Yorkshire Fancy, and can enthuse with them upon general matters of policy; but even if we have no rules, for any judge to thrust the Yorkshire rules down the throat of the Plainhead Fancy may seem right in principle, but is utterly wrong in practice.

So far as the Plainhead Fancy is concerned, I believe I am right when I say a "ticked" bird is one with a single mark, not larger than a sixpence, appearing anywhere upon otherwise clear plumage. Whether boldly defined, or faintly grizzled is of no consequence. A "marked" bird is popularly accepted to be a bird a stage between the "ticked" and "variegated," or heavily marked, as witness the classification that sometimes reads "ticked or lightly marked," or more generally "marked or variegated." Here again, whether the mark should be confined to one patch, or may consist of several patches, is not challenged, for both types of markings have been accepted without let or hindrance. With these unwritten and unchallenged views in mind, I accepted the bird at Llanelly as a "marked" bird coming within the fence of the Norwich Plainhead Fancy.

To say I agree with a situation that is governed by common consent, rather than a hard and fast rule is wide of the mark, because I do not.

Why we Plainhead fanciers have not a council representative of the United Kingdom to steer our ship to greater interest and progress is not easily explained. Under its guidance we might develop purely Plainhead shows, increasing the classification to resuscitate not only the unevenly and "even marks" proper, but also the cinnamon marks. This is no new thing, for the Yorkshire Fancy often have a Yorkshire show, and an all-British show nearly materialised in Liverpool last season.

In a letter of this nature I cannot, of course, pursue this phase, but, finally, will say that if the decision at Port Talbot has precipitated the consummation of the wishes of many fanciers, has hastened the day when we of different interests and sentiments, though all fanciers, are gathered within our own fold, controlling and developing our own needs, then Mr. C. A. House shall go down to posterity as one greater than Blakston. Long ago he earned my full appreciation, and even the brothers Stubbs, whose bark is worse than their bite, would readily thank him for the decision if it has quickened the Plainhead Fancy into progress.

E. W. Allsopp.

The Judge Defends His Position.

Sir,—Mr. Lane's suggested classification has been tried and found wanting. When classes were first introduced for Crestbreds the terms lightly and heavily marked were used, but frequent disputes arose as to where the one ended and the other began. Thus it would be with "c" and "d" classification. There would be birds near the border line over which men could dispute. Myself I cannot see that any other form of classification is needed than that which is used at all shows held under the jurisdiction of the Yorkshire Union. The Yorkshire Union is not a specialist club, but a federation of C.B. societies, and all varieties come under its sway. By the Yorkshire Union classification, or any other of which I have knowledge, Messrs. Stubbs' bird which I "wrong classed" at Aberavon is a "ticked" bird.

I appreciate Mr. Cook's remarks. Those referring to Blakston I recommend to those who would have us believe Blakston was a mere theorist, Mr. Cook is quite right. Far too many of our judges take the line of least resistance. They like to avoid the brick-bats. Messrs. Stubbs told me at Aberavon that they would never show under me again. That does not trouble me. I have never believed in judges touting for entries, and have never indulged in that habit, as some do. I only want support from those who desire a fair and unbiassed decision on the merits of their exhibits, and who are willing to take a judge's decisions in a sporting and fancierlike spirit.

This latter point is rightly put forward by Mr. Spink, I agree with what he says about the growling. But why should there be this growling? One seldom hears of such a case as this in the North of England, because fanciers and judges know what constitute "ticks" and "marks," and when a mistake occurs it is the result of the fallibility to which all men are liable.

There is no hesitation about the opinion expressed by Mr. Collins. He is right in saying exhibitors should study the schedules.

Can I learn from Blakston Mr. Johnson asks, and then answers the question for me in his own way. I may say I have learnt much from Blakston. He was the first great judge I ever had the pleasure of meeting, and even now do I remember his kindly advice and criticism on that occasion, thirty-five years ago. I learnt much from Blakston personally, and I also have learnt much from his writings. Certain I am that had we a man of his learning writing for Cage Birds week by week, as Blakston used to write for the Live Stock Journal our fanciers of to-day would be more logical in their ideas. Further, if every fancier read, marked, learned, and inwardly digested Blakston's monumental work "Canaries," there would be more real and less superficial knowledge floating about. Whatever Mr. Johnson or others may say or think I am proud to say I have learnt from Blakston.

It will amuse Yorkshire fanciers to be told that their ideas are not up-to-date. The very fact that they have the advanced Specialist Clubs which Mr. Johnson mentions is proof they must be up-to-date. But the standards were not drawn up by the clubs themselves. They adopted those which had been drawn up by the Yorkshire Union on whose Council there have been from the beginning breeders of Norwich, Crests, Yorkshires, Cinnamons, and keepers of British and Foreign birds. It is no one man show, but a wide all-embracing authority.

Can Mr. Johnson be serious when he asks if I ascertained the wishes of the Aberavon society? I was the judge appointed by that society. When they elected me, I presume they considered I was capable of interpreting the schedule upon which they had sought the patronage of exhibitors. Whether they did or not, I was there to place my interpretation on the wording they had drawn up, and I did it. I had no doubt about the position. I had no doubt about my duty, and I did it.

Suppose for one moment I had gone to the stewards and asked them if Messrs. Stubbs' bird was ticked or marked. What would they have thought of me? They had engaged me to make such decisions. Again some of them may have been exhibitors, and their reply would have been influenced by that fact. Even were they not they would know to whom the bird belonged, which I did not, and that knowledge might have swayed their decision. No, when I am judging, I judge, I do not ask the stewards to do it for me. As a judge I am there to see that exhibitors receive a fair run for their money, and as long as I am entrusted with the confidence of the Fancy, so long will I endeavour to render that fair and unbiassed judgment which every judge should give.

We have been given a portrait of the bird, and, as one who is an expert in such matters, I would like to compliment artist, engraver, and printer upon the result of their labours. That result was far better than I expected.

As I read Messrs. Stubbs' letter I thought of those lines of Tennyson: "A lie that is a lie can be met with and fought outright, but a lie that is half a truth is a harder matter to fight." Messrs. Stubbs quote the wording of the class in which their bird was exhibited, they say nothing about the previous class. I will give it later on, and ask a plain question.

The quotation from Wallace's book is not new to me, I read it many years ago. I had the acquaintance of both Blakston and Wallace. I know only too well the feeling that Wallace entertained towards Blakston, I have had it from him personally and in letters. But it never influenced me. There was no comparison between the mental calibre of the two men. Wallace was the older fancier, but he had not Blakston's ability, and that was the cause of Wallace's jealousy. Messrs. Stubbs possibly have heard it said that some men can see further through a brick wall than others can through a sheet of tissue paper. Blakston was one of the former, and his rapid and brilliant success in the Fancy caused Wallace to be envious.

In 1867 it is quite possible that Wallace knew more than Blakston, but nine years later when Blakston wrote his great work it was the other way about. All this is very interesting, but it does not help us to settle the question as to whether my decision at Aberavon was right or wrong. Several gentlemen have kindly said my decision was right, and I would ask readers of Cage Birds to note that no member of the Aberavon committee has yet said I was wrong. Further, of all those who, according to Messrs. Stubbs, at that show, and Birmingham, said I was wrong, not one has come forward to say so in Cage Birds. Why are they silent?

Now for the question mentioned above. Readers have seen Mr. Norman's reproduction. Messrs. Stubbs have thanked him for it, so I gather they are satisfied as to its truthfulness. At Aberavon, class 55, read, "Clear or Ticked," class 56 "Uneven or Variegated." In which class should the bird have been? Messrs. Stubbs say 56, I say 55. Who is right?

C. A. House.

(Correspondence continued on next page.)

CORRESPONDENCE.

(Continued from page 75.)

An Early Robin's Nest in the New Forest.

One Species Nesting while Winter Kills Another.

Sir,—Whilst in the New Forest last week I was shown a Robin's nest containing two eggs, incubation was in progress. The nest was built inside of an old woodman's hut in a very wild part of the forest.

Close by I picked up the frozen body of a little Golden Crested Wren that had dropped from a hoary pine in its vain endeavour to find food. S. A. Reynolds.

Mistakes in Judging.

All's Well That Ends Well.

Sir,—If friend Walter had stated the exact case in the first place, a "lengthy and exhaustive letter" would not have been necessary; in fact, I should not have written at all.

Seeing he so readily vacates his former position, and drops the idea of re-judging classes and re-judging "ad lib," and now admits to merely a clerical error, I am quite prepared to end the matter as far as he is concerned.

I think it, however, quite a nice point whether the judge's book is not on a par in importance to the judge's slip, seeing that the book is the original, and the slip is a re-written copy of it, and re-written copies are a very prolific source of errors generally. Further, the tear-out slips, being so small and narrow, are very liable to be mislaid either by the judge or steward, or at the secretary's office, much more so than the book, which is generally in stiff covers. In fact, I should say it is a frequent occurrence for the judge's book to be requisitioned, and this is not an isolated case by many. The general consensus of opinion of the fanciers who exhibited at the show is, I feel thoroughly satisfied, that the judge did the reasonable and obvious thing, and, as you remark, the best bird appears to have won, and no harm has happened to anyone, so "vivo la fancy."

J. A. Greenslade.

Birds in Winter.

An Appreciation and a Suggestion.

Sir,—I was very interested in the article which appeared under the above heading in Cage Birds of Jan. 27th, written by a reader who lives in Canada, and of course it concerned birds of Canada in winter time. I think it would be interesting if readers of Cage Birds who live in different parts of Great Britain would send in a short account of their observations during the past month of the wild birds of their neighbourhood.

As I live in the country, and spend practically all my time outdoors, **being a farmer,** and interested in birds, I have a better opportunity of seeing and noting the different wild birds than those who live in the towns, so I thought the following stray notes might be of interest.

Last Sunday morning, while I was feeding and attending to my own birds, which I keep in an outside bird house, I noticed through the window the following birds visit my garden, all within the space of an hour:—Sparrows, Hedge-Sparrows, Chaffinches, Robin, Blackbird, Thrush, Tits (ox-eye, blue, and long-tailed), Bullfinches, Goldfinch, Greenfinch, Common Wren, and Pied-Wagtail, and about one of my meadows, which runs by the river, I could see flocks of Sea Gulls, Peewits, Golden Plovers, Starlings, Skylarks, Linnets, a covey of Partridges, and several Moorhens, and also a Kestrel, hovering, while several Rooks and Jackdaws, and some Wood Pigeons flew overhead, at least twenty-six different varieties of birds in less than an hour. I have also seen a Tree Creeper at a certain spot several times lately.

My general observations and conclusions concerning common wild birds of this district during the last few days are summed up briefly as follows:—Blackbirds and Thrushes, a large number about, and seem to be getting hard up for food. Sparrows, too many, and a great nuisance. Bullfinches, several about, and in lovely condition; weather does not seem to have affected them in the least. Goldfinches, very few indeed round here during the last two or three months; saw plenty in September; don't think they have been caught; I know they have not been caught in this neighbourhood. Redpolls and Linnets, not so many as previous year. Siskins, Bramble-finches, and Hawfinches, have not seen one. Chaffinches, very small flocks, getting hard up for food. Greenfinches, have not seen many. Starlings and Skylarks, very large flocks, but Peewits and Buntings very few. Wood Pigeons very large flocks reported round the woods about 3 miles away; have only seen a few on my fields.

West Suffolk. S.J.G.

Members' Shows.

NOTE.—Secretaries will greatly facilitate the work of ourselves and our printers if they will kindly endeavour to send their reports as nearly as possible as they see these accounts printed, and if they will also write the names of exhibitors as distinctly as possible.

CITY AND COUNTY OF PERTH.

Pairs show, Laidlaw's Rooms, Leonard St., Jan. 27. Mr. J. Dougall judged and gave entire satisfaction. Nor.: 1, sp, Carstairs; 2, Mrs. Banks; 3, 4, 6, Crawford; 5, Cuthbert. Scotch Fancy: 1, sp, Carstairs; 2, Smith. Bord.: 1, sp, 2, 3, Smith; 4, Carstairs; 5, Banks; 6, Cuthbert. Yorks.: 1, sp, Gunning; 2, 3, Johnston. Muling or Hybrid: 1, sp, Mrs. Banks; 2, 4, Cuthbert; 3, Miller; 5, Robertson; 6, Fraser. Brit.: 1, sp, 5, McPherson; 2, 3, Robertson; 4, Mrs. Banks; 6, Miller.—Wm. Gunning.

HULL C.B.S.

Meeting and show for Canary hens, Goldfinch and Linnet, headquarters, Oddfellows' Hall, Feb. 3. Mr. Geo. Harland judge. The strong feature was the large number of entries in Yorks. novice classes. Mr. Freeman won in the buff class, and Mr. Fellowes in the yellow class, both birds being splendid type; in fact, the quality in these classes was the best that had been out upon the bench for some time, and it looks as though we shall have some keen competition in these classes during the coming season. Great credit is due to the novice Yorks members for the way they come up with their entries. Next show and meeting, March 3, 2.30; Canary cocks and Brit. birds. Judges, Nor. and Brit., Mr. W. T. Pepper; Yorks, Mr. W. E. Sowden.—W. Furnandiz, Hon. Sec.

MIDDLESBRO' & TEES-SIDE.

Annual pair show, Jan. 27, Princess Alice Hotel. Classes were well filled and competition keen throughout. Messrs. Cook and Wilcox judged, and their awards were well received. Yorks Yell. Ck., Buff Hen: 1, 3, vhc, Atkins; 2, 4, Taylor. Buff Ck., Yell. Hen: 1, 3, Atkins; 2, Taylor. Nor. Yell. Ck., Buff Hen: 1 spl, 3, hc, J. Carr; 2, Amison; 4, c, Bibby; vhc, J. Firth. Buff Ck., Yell. LARKHALL C.B.A.

Second of a series of table shows, Feb. 6, T.M. Halls. 4 classes Norwich, 6 classes British. Entry was not so good as at previous show, Norwich being poorly represented, but the usual good quality of F.-M. British was present. Mr. Tom Kerr judged very satisfactorily. Points spl. Nor., Rundell; Brit., Thomson. Points: Thomson 19, Rundell 10, Clark 8, Perrie 7, Lockhart 7, McLean 5, Campbell 4. Meeting held after show, Mr. Kennedy presiding. Six new members were enrolled. Decided to have five classes at next show, Feb. 17: Yorks., Common, Siskin, Mealy Redpoll or Twite, A.O. Cock or Hen. Decided to have two judges at pairs show, March 3. —Allan Thomson, Sec.

WAKEFIELD O.S.

Annual members' show, headquarters, Dec. 26. Keen competition ensued for various specials. G. Holroyd won cup for most points with star birds, and other specials with 1, 2, 3 birds in Yorks classes. H. Hough runner-up. Most points throughout season and most points and specials with Norwich, Hough. 3rd and spl. most points Brit., Alexander; 4th and 2nd most points Yorks, Talbot; 5th, Cousins; 6th, Burnell. Class 1 (7): 1, vhc, c, Holroyd; 2, 3, Talbot; 4, hc, Cousins. Class 3 (6): 1, 3, Talbot; 2, vhc, Holroyd; 4, Rolling; hc, Cousins. Class 4 (6): 1, vhc, hc, Cousins; 2, Hayley; 3, 4, Holroyd. Class 5 (7): 1, 2, Holroyd; 3, 4, Hayley; vhc, Bedford; hc, Rolling; c, Midgley. Class 7 (7): 1, 3, 4, vhc, c, Hough; 2, Hayley; hc, Alexander. Class 9 (8): 1, vhc, hc, Hough; 2, 4, Alexander; 3, c, Hayley. Goldf. (3): 1, Midgley; 2, 3, Burnell. Linnet (6): 1, 2, Alexander; 3, 4, Burnell; vhc, Isherwood; hc, Midgley. A.O.V. (7): 1, 2, 3, vhc, c, Alexander; 4, hc, Burnell.—T. H. Alexander, Sec.

Please see note at head of members' shows.—Ed.

BLAENAVON C.B.S.

Match Pair Show, Jan. 14, Crown Hotel Rooms. Nor. Yell., Ck. and Buff Hen: 1, 2, 3, vhc, Broome; 4, Gilbert; hc, c, Pitt. Buff Ck., and Yell. Hen: 1, 2, 3, Broome; 4, Pitt; vhc, hc, Gilbert Yorks., Yell. Ck. and Buff Hen: 1, 2, 3, 4, Latham. Buff Ck. Yell. Hen: 1, 2, 3, Latham. Bord., Yell. Ck. and Buff Hen: 1, 2, Lapworth; 3, 4, hc, c, Broome; vhc, Thomas. Buff Ck. and Yell. Hen: 1, 2, 4, Broome; 3, Thomas; vhc, hc, Lapworth; c, Godfrey.

Members' Show, Feb. at the same rooms. Nor., Yell. Ck.: 1, 2, 3, 4, Broome. Buff: 1, 2, 3, Broome. Hens: 1, 2, 3, 4, vhc, Broome. Yorks., Yell. Ck.: 1, 2, 3, vhc, Latham; 4, hc, Daniels. Buff: 1, vhc, Daniels; 2, 3, 4, Latham. Hens: 1, 2, 3, 4, vhc, hc, Latham; c, Daniels. Bord., Yell. Ck.: 1, 3, 4, Broome; 2, Thomas; vhc, Lapworth; hc, Evans. Buff: 1, vhc, Broome; 2, 3, Lapworth; 4, Evans. Hens: 1, vhc, Lapworth; 2, hc, Thomas; 3, 4, c, Broome. Brit.: 1, 2, 3, Thomas and Durham. Chas. Broom judged and gave entire satisfaction.

Best match pair, most points in both shows, Latham; sp. winners, Nor., Broome; Yorks., Latham; Bord., Broome; winners of judging competition: 1, Broome; 2, Lapworth; 3, divided between J. Thomas and Latham. W. J. Lapworth will judge members' shows for next year. Next meeting Mar. 1, when we shall fix up classes, etc., for N.F. Show, and prizes won at these shows will be paid out.—Geo. Broome, Hon. Sec.

MANCHESTER AND N.C.O.S.

Annual members' show, Jan. 20, Bennett Street Schools, Oldham Street; just on 200 birds staged. There was a grand entry in Norwich, most of the champions being staged in their respective classes. Messrs. Sam Cook and W. N. Turner put down strong teams. The old buff again did the trick, and he looked much better after his few weeks' rest from travelling. Mr. Turner headed the yellow cock class with a rare big clear which, through having a late moult, has not been shown before, the same owner's Manchester winner being vhc. Mr. Cook's two clear buffs stood 1st and 2nd. Hens were moderate, most of the champions having started another moult. The unflighted classes were also not great. Mr. Turner was first with a variegated yell., possessing rare head, size, and shape, but his wings were not so good. Sam Cook came 2nd with a monster, one of those who jump from perch to cage-floor with a "wallop," but he was nearly half-natural colour on back. Mr. Cook headed the buffs and also the buff unflig. hens with birds possessing classical points.

Yorkshires were not strong in number, but some good stuff was there. Some of the leading exhibitors were not represented. Perhaps they had paired up. Mr. E. Dooley staged a beautiful clear buff cock possessing all the essentials of a true Yorkie, but is just a little too small for a champion. Another extra good one was a buff hen, a big one, full of quality and style, staged by the Sec. Novices' classes were strong both in Norwich and Yorkshires, and special for best novice exhibit went to a clear buff hen belonging to Mr. A. Eastwood. The runner-up was a clear buff Norwich hen of Mr. Warburton's, a bird which has done well in the shows. British made a fine show, some of the best in the country being put down. The first three Greenfinches were real good ones, any of the three being fit to win. The winning Twite is also a "knockout," and was run close by the 3rd Redpoll. Goldfinches were also good, the two first being hard to separate, but the first got home on expansion of blaze and buttons; Mr. T. Johnson (Southport) judged.

Yorks. Ck.: 1, 3, Dooley; 2, vhc, Burke; 4, Green. Hen: 1, Burke. Yell. Ck., 1916: 1, 2, Dooley; 3, Green. Buff: 1, Green; 2, Green; 3, Burke. Nov. Yorks. Yell. Ck.: 1, Lane; 2, Bottomley; 3, Wilson; vhc, Eastwood. Buff: 1, Radford; 2, vhc, Eastwood; 3, Bottomley; 4, Lane. Yell. Hen: 1, Wilson. Buff: 1, Eastwood; 2, Lane; 3, Wilson; 4, Bottomley. Yell. Ck., 1916: 1, Bottomley; 2, Lane; 3, Radford. Buff: 1, Bottomley; 2, 3, Wilson; 4, Eastwood; vhc, Radford. Yell. Hen 1916: 1, Lane; 2, Wilson; 3, Radford. Buff: 1, Lane. Yell. Foreign: 1, 2, 3, 4, vhc, Hubbard.

HIGHGATE, HAMPSTEAD C.B.S.

Tenth annual pair and British show, Jan. 27. Entries totalled 100. Mr. H. Norman judged and gave general satisfaction. Norwich, as usual, were very good, Mr. W. H. Wills' pair taking special best in show, with Mr. A. Knight a close second. Yorks made a fine show, the novice classes having nine entries, and the quality comparing well with the higher sections. The Hybrid classes attracted much attention, containing Canary-Bullfinch, Yellow-hammer-Canary, Hawfinch-Greenfinch, in addition to usual pairs for muling. British were splendid, though down in numbers. The winning Goldie was claimed at 30s. Its owner, Mr. H. Bell, and Mr. F. C. Knight captured all the British specials. Nor. Champ. Yell. Ck., B. Hen: 1, 3, W. H. Wills; 2, hc, F. C. Walmsley; vhc, c, H. Bailey. Buff Ck. Yell. Hen: 1, 2, W. H. Wills; 3, vhc, H. Bailey; hc, c, F. C. Walmsley. Amat. Yell. Ck., Buff Hen: 1, hc, Dr. Huggins; 2, A. Knight; 3, vhc, I. C. Knight. Buff Ck., Yell. Hen: 1, 3, A. Knight; 2, F. C. Knight Nov., Yell. Ck., Buff Hen: 1, Etherington; 2, vhc, Hardcastle; 3, Bell; hc, c, Shearer. Knight; 2, A. Knight. Buntings: 1, F. C. Knight. Hens: 1, 2, F. C. Knight; 3, A. Knight. Blackbird: 1, A. Knight.—F. C. Knight.

CITY AND SUBURBAN A.C.B.

Capital show of pairs of Canaries and British birds, Church Institute, Marylebone, Jan. 31; entries totalled 160, and among them were many well-known winners. The three popular varieties made the bulk of the exhibits, although the pairs matched for Mule or Hybrid breeding came up well. Spl. best champion pair was won by the Sec., Mr. F. J. Martin, with a well matched couple, a buff cock and yellow hen, this pair also securing spl. for best pair of Norwich. Mr. Sanders won the Yorks. spl. with smart typical exhibits. Best amateur went to Mr. Runchman's pair of Yorks. Mr. Marks secured the novice prize with typical Norwich, and the Border special went to Mr. Pegg for a charming pair, a yellow cock and buff hen. Mr. Martin once more filled the post of secretary and manager in very efficient style, and the thanks of the members are greatly due to him for the success of the exhibition. Mr. J. Robson judged.

Nor. Yell. Ck. and Buff Hen: 1, 2, Martin; 2, hc, Wills; vhc, Burt; c, Bailey. B.C. and Y. Hen: 1, Martin; 2, Burt; 3, vhc, Wills; hc, Bailey. Yorks, Y. Ck. and B. Hen: 1, vhc, hc, Sanders; 2, 3, Ayres; c, Rumble. B. Ck. and Y. Hen: 1, 2, vhc, hc, Sanders; 3, Ayres; c, Rumble. Bord. Y. Ck. and B. Hen: 1, 2, Pegg; 3, vhc, Last. B. Ck. and Y. Green.: 1, etc.: 1, Knight; 2, vhc, Humphries; 3, Knight. Yellow-hammer: 1, 3, Offord; 2, Knight. Hens: 1, 2, Knight. Sell.: 1, 3, Wingate; 2, Runchman. A.O.V.: 1, Burch; 2, Wingate.

MANCHESTER JOINT CLUB.

Members' show, Jan. 27, Lord Nelson Hotel, Salford. Societies represented were: Rochdale Good Intent, Openshaw, Gorton, and Stockport and Hazel Grove. Entries, 71, 70 and 24 respectively. Judge, Harrison, of Altrincham, gave every satisfaction. Each society raised a team of four birds, and Rochdale came out winners with full prize money and two spls.; Green, two spls. best bird and most entries; Hopwood, best novice. Best bird each section, Messrs. Collinge, Hordern, Howarth, Green, Sykes, Garbutt, Hopwood, Vaux, Newton, Woods. Amat. Lancs. Coppy Ck. (4): 1, Collinge; 2, Blincoe; 3, 4, Newall. L.P. Ck. Queries Answered

(1)—*All questions must be clearly written in ink (or typewritten) on one side of paper, and conclude with either the correct name or a pseudonym.*
(2)—*The proper name and address in full of querist must always be written on a separate sheet of paper, and enclosed with the query.*
(3)—*Queries intended for different specialists must be written on separate sheets of paper.*
(4)—*Queries must not include or be included in orders for books, instructions re advertisements, or any other matter for publication.*
(5)—*The department to which the queries refer must be stated on the left-hand corner of the query.*
(6)—*Queries received during any week, up to the first post on Saturday morning, will be answered in the issue bearing date of Saturday in the following week.*
(7)—*If an answer by post is desired from our specialists, a postal order for sixpence must accompany any query relating to sickness of birds, or a shilling in ordinary enquiries, with a stamped and addressed envelope in either case. Dead birds must not be sent to the office (see Post-mortems).*
(8)—*All who desire letters of complaint written to advertisers must state grounds for doing so clearly and fully, and enclose a fee of sixpence.*
(9)—*All queries must be addressed to the Editor, "Cage Birds," 154, Fleet Street, London, E.C. Postcards are not admissible.*

CANARY QUERIES

Answered by CLAUDE ST. JOHN

CAUSE OF FAILURE.

Will Pill.—You do not mention the size of your bird house, so I cannot tell whether there was any overcrowding to contribute towards your non-success in the second year. But whatever the size, if you mean that you started the season with five cocks and seven hens, one factor in your failure was having too great a proportion of cocks. Two strong, lusty cocks would have been quite sufficient to ensure the maximum of fertility, and three should have been the maximum number used in any case. The disproportion of clear eggs last season over the previous one may also have been partly, perhaps chiefly, due to the character of the past season, and another point is that if your bird house is of good size you might be more generous in the diet with advantage. In addition to the canary and summer rape staple give a large teaspoonful of the following mixture between every three birds three days in every four during very cold weather, which may mean almost continuously according to the outlook at time of writing, and on the fourth day give about the same quantity of bread and milk, or any other soft food you may use. For seed mixture mix together equal parts, by measure, of hemp, niger, white millet, and broken groats, half parts of black rape and teazle, and add to the bulk just a sprinkling of linseed and mustard. When the weather gets a little milder towards the beginning of the breeding season reduce the frequency of the mixed seed to twice a week, and give the soft food as often. During the nesting season you should see that there are plenty of nesting sites, preferably all of the same type, and give a greater variety of green food, and when young are in the nests give a supply of fresh soft food in moderate quantities each morning and afternoon. For further details about breeding in colonies you should get a copy of the forthcoming "Cage Birds Annual." I take it you supply gritty sand in a tin as you use sawdust on the floor. If not, you should do so.

BREEDING CAGE.

S. W. Mitchell.—The cage is very small for a double breeder, but if the wire partition is fitted so that it can be easily taken out I suspect it is what is often described in the trade as a double breeding cage with movable partition, to enable it to be turned into a flight cage at the end of the season by taking out the partition and allowing a group of three or four birds of the same sex have the whole space to fly in for the autumn and winter, so that all get more real exercise than if confined in the separate halves. For fair-sized birds, such as Norwich, it would be best to devote the whole cage to one pair, keeping the cock and hen separate in each end until it was time to mate them, then run them together, and if the cock should prove too worrying to the hen after she begins to sit, he can be again confined to the one end compartment, whilst the hen is sitting and rearing the young, and on the other hand if the pair agree well together the one end comes in very useful to separate the brood of young from the parents when the hen starts nesting again or if it should become necessary to remove them on account of the hen plucking them. In either case the parents would probably go on with the feeding of them through the wire partition, so that this compartment serves the same purpose as a nursery cage. Otherwise, I would rather advise you to run a hen, preferably of the smaller breeds Borders or Rollers, in each compartment, and run a cock with them alternately, using the one cock for both hens, and keeping him in a separate cage when not engaged in putting the hens to nest. In this case you would remove the cock from each hen as soon as she had completed her clutch of eggs and commenced to sit.

ATTACKS OF PROSTRATION.

Mrs. J. B.—As the bird is usually bright and active and shows no signs of cold or bronchial trouble I am strongly inclined to think that these attacks are simply the result of a kind of nervous hysteria, probably occasioned by the appearance of some object that is alarming to it, though it may appear simple and harmless enough to you. The appearance of a strange dog or cat, or sometimes very much less insignificant and innocent creature, some unusual article of dress, particularly headdress, or some unusual object in the street when the bird is near a window, from which it can see into the street, will often give rise to similar symptoms. Such birds need dealing with quietly and methodically to avoid any sudden alarms, and to win their confidence, or a catastrophe may occur with them at any moment. Birds in an overfed condition, or temporarily out of sorts are apt to develop the trouble, though in their case it will generally pass off with a return to a normal healthy state. You should act on these hints by seeing that there are no alarming objects allowed to remain about when the attacks occur. A little careful observation will soon reveal what they are if this is really the cause. In addition, if the bird is not in an overfed condition, give a morsel of bread and milk with two drops of cod liver oil emulsion on it and sprinkled with maw seed every second day for a fortnight or so, and on the alternate days during the first week add to the drinking water ten drops of lemon juice and as much Epsom salts as will cover a sixpence, After the first week give 20 drops of ebemical food in the water every second day for a fortnight. If the bird is evidently in a fat condition give the medicines in the water, but omit the bread and milk.

PULLING THEIR FEATHERS.

A. Frost.—I am inclined to think that there is nothing more seriously wrong than the birds being in a much too forward breeding condition. You omit to say how you feed them, or whether they are caged together or separately. You may keep the two hens together in a flight or a double breeding cage with the partition removed so that they may have the whole space for exercise, and cage the cock separately, preferably out of sight of the hens. Allow the cock's diet to remain unaltered, but limit the hens to a staple of three parts canary to one part summer rape, with just a pinch of mixed seed twice a week, and a morsel of bread and milk or other soft food once a week only. For three consecutive days add to the water of all three, ten drops of lemon juice and as much Epsom salts as will cover a sixpence, and after an interval of three or four days repeat the dosage again. Stick also a morsel of the rind of boiled pork or bacon at the end of the perches for them to nibble at for a week or so, then replace it with a piece of raw carrot. Offer the bath two or three times a week on the brightest and mildest days, but you need not worry if they ignore it for the present. Do not allow any nesting arrangements or material to remain about the hens' cage, and if any more stray eggs appear throw them out at once.

GROWTH ON ABDOMEN.

B. S.—Considering the locality of the substance, and the possibility of it being due to some internal displacement, it is quite too risky to advise any interference with it without first seeing it. It is just such a case as really needs a personal examination before one could tell whether any such interference should be attempted. Consequently, I will only advise you to try the effect of painting the substance with a small feather dipped in tincture of iodine four times, with an interval of three or four days between each application, and if this does not cause the substance to be absorbed, your best course would be to show the bird to a veterinary or your medical man and ask his advice about it. It is not unlikely that the case may be amenable to slight operative treatment, but to advise such measures blindly may easily lead to disaster.

MAKES SNEEZING NOISE.

Novice, Ciren.—The bird is probably afflicted with bronchial trouble, and possibly the real reason the treatment you have given it has failed is due to the fact that you have not taken the precaution to remove the exciting causes of the condition. See that the bird is not exposed to direct cold draughts, rapid extremes of heat and cold, irritating fumes, or impure air, such as will occur in the near vicinity of burning lights in the evenings, or when hanging high up near the ceiling. Keep it in a fairly comfortable temperature, though it need not be a very high one, and let it be as equable as you can manage it. Then give a morsel of bread and milk with two drops of cod liver oil emulsion on it, and sprinkled with soft sugar twice a week for a month. Also get a chemist to mix you the following mixture: One drachm each of tinct. of nux vomica, tinct. squillæ and sweet spirit of nitre, 30 grs. of chlor. ammon., and one ounce liq. ext. of liquorice. Give 20 drops of this mixture in the drinking water every second day for a fortnight. If the symptoms have not quite disappeared in that time discontinue the mixture for a week and then resume and give it again in the same way for another fortnight.

SEED SAMPLE.

H. R.—The sample consists almost entirely of kibbled wheat of very poor quality, probably screenings, with a small proportion of weed seeds, bindweed, knot grass, etc. I do not consider it of any practical use as a food for Canaries, unless it is to throw a little into flights or aviaries to help to occupy the birds in picking it over. I doubt if they would consume much of it as long as they had a staple of canary seed available.

DOES NOT SING.

J. D. F.—It would have been useful had you given some clue as to the probable age of the bird. However, try the following treatment, and if not better in the course of a month or so, write again and repeat particulars. First of all, see that it is kept in a bright and cosy place, not necessarily very warm, but free from direct cold draughts and sudden extremes of heat and cold, and that it is not exposed to the fumes of burning lights in the evenings. In addition to your present dietary give every third day half a teaspoonful of crushed sponge cake with four drops of sherry and two of cod liver oil emulsion well mixed in it and sprinkled with maw seed. In the drinking water during the first week add six drops of syrup of rhubarb and a crystal of sulphate of soda the size of a small pea two days in every three. After this give instead 20 drops of whisky, ten of lemon juice, and two of eucalyptus oil well shaken together in the water every second day for a fortnight. Stop giving suet, and occasionally stick a piece of raw carrot in the wires for him to peck at instead. In his case there is no need to worry about the moult, as it will probably take place in the early spring.

BREEDING ROLLERS.

C. H. M.—At the present time you would get just fair ordinary singing Rollers at the prices you name, but quite good enough for your purpose. Colour does not count much in this breed, and the birds you have will match nicely for breeding variegated young, with just a sprinkling of clears and a stray green. It is not possible to say whether you would get better results from the aviary than from separate cages, as this depends so much upon the birds, and also upon the breeder. The only certain thing is that the aviary would economise time and labour most. Possibly, the aviary might with advantage be subdivided into two sections, but that I could only be sure about by seeing a diagram of it. In this event three hens and one cock would suffice in each section, and in the whole aviary two cocks, or one strong healthy cock might succeed better, and five hens would be enough to stock it. The hens may with advantage be turned into the aviary now, but the cocks should be caged separately until time to mate next March, or beginning of April. No, you are quite incorrectly informed about the Rollers being indifferent breeders. On the contrary, they are among the easiest and best breeders.

STILL LOSING FEATHERS.

R. Aitken.—You ought to have given more details of your diet, as a diet consisting of "summer rape, canary and hemp, with soft food once a week," does not sound an altogether suitable one. See that the bird is protected from direct cold draughts or sudden extremes of heat and cold, and then treat as fellows. Give a staple diet of three parts canary to one part summer rape mixed together. In addition to this give separately every second day for the next two or three weeks half a teaspoonful of a mixture of equal parts hemp, niger, white millet, teazle and brokeu groats, and also a morsel of banana, and on the alternate days give a piece of bread the size of a hazel nut soaked in cold milk, drained, two drops of cod liver oil emulsion on it, and sprinkled with soft sugar. In the drinking water, every second day until the feathers cease dropping, give six drops of dilute sulphuric acid and four of tincture of steel. Offer the bath three times a week, on bright sunny days for preference, and always early in the day.

SEEMS OUT OF BREATH.

E. R. N.—Thanks for report. Continue the treatment previously advised with the following little alterations for a few weeks if necessary: Stop the bread and milk with cod liver oil aud twice a week give instead about the same quantity of plain bread and milk sprinkled with soft sugar, or the equivalent in crusbed sponge cake. Also stop the chemical food and give instead 20 drops of the following mixture, which any ebemist will make up for you. One drachm each of tincture of lobelia and sweet spirit of nitre, two drachms of tincture of squills, ten grains of iodide of potassium, and four drachms of liq. ext. of liquorice. Give this two days in every three for a week, and every second day for another fortnight afterwards. If you place this bird in the one end of a double breeder, with the partition between them, it will not in the least prove harmful to the bird in the other end, but I doubt if the change would be of any benefit to the ailing bird, which would doubtless be better in a moderate-sized cage, and kept in a cosy and bright corner of the room, until quite recovered.

ACCOMMODATION AND FOOD.

Novice, Tickle.—(1) I am not very clear what you mean by open wire division in a double breeding cage, but if you mean that the partition dividing the two compartments is all wire, or nearly so, and the cage itself of the usual box type, there is very little objection to your running a separate pair of birds in each compartment, and using nurseries for the young if necessary when they have to be separated from the parents. It depends very much upon the disposition of the birds themselves; some will agree very well under such conditions, others will fall to quarrelling through the wires, or devote too much attention to their neighbour's affairs than is good for their own. If the cocks were of that disposition you would probably find it a much better plan to keep a hen in each compartment and use one cock only to send them both to nest, mating him with each hen alternately, and removing him when each hen began to sit, then remove him to a separate cage by bimself and leave each hen to hatch out and rear the young by herself. (2) It is really months too soon to have hens sitting, but I trust you will have success with yours. It will be quite often enough to give fresh sand twice a week whilst sitting, or even once a week for hens that are nervous and show signs of disturbance when you clean out the cages. A morsel of egg and bread or biscuit food once a week will also be sufficient whilst bens are sitting. A pinch of hemp in the egg drawer two or three times a week would also be beneficial during incubation whilst this weather lasts. (3) Give a morsel of pure yolk of egg for one day only after the young are hatched. After that add a little bread crumb or biscuit, and gradually bring it up to the usual proportions of two parts bread or biscuit to one part egg. When the young are ten or twelve days old you may also use the white of the eggs finely chopped, to economise the eggs, if you wish.

GONE INTO MOULT.

Novice, Tufnell Park.—I take it you do not know whether the birds moulted at the proper season in the autumn, so you would be best advised not to adopt any immediate stringent measures to stop it. See that the birds are not kept where they are exposed to rapid extremes of heat and cold, such as being near a hot fire during the day, or cooking operations, which is extinguished at night, when the room becomes correspondingly cold. Also see that they are protected from cold direct draughts, and keep a light cover, such as a piece of muslin or thin calico, over the cage fronts until the feathers cease dropping. In addition to the staple diet of plain canary seed, give separately half a teaspoonful of summer rape and a morsel of banana or boiled carrot every second day, and on the alternate days give a similar quantity of a mixture of equal parts hemp, niger, white millet, teazle and broken groats, and a piece of bread the size of a hazel nut soaked in cold milk, drained, two drops of cod liver oil emulsion on it, and sprinkled with soft sugar. In the water add 20 drops of chemical food every third day for a fortnight. At the end of the first fortnight dissolve half a drachm of ammoniated citrate of iron and quinine in an ounce of sherry, add 30 drops of syrup of buckthorn, and give 20 drops of this mixture in the water two days to every three for a fortnight. By this time the moult should have ceased and the birds coming rapidly into condition again. They will probably be quite ready for mating when the proper season arrives, say, at the end of March or the beginning of April. Certainly there will be a good chance of breeding successfully with them this year.

A FEW MORE QUESTIONS.

Wm. Lowe.—Certainly, am always pleased to be of use. (1) It depends somewhat upon the circumstances under which the birds are kept, whether it is wise to put two hens to one cock. For instance if you put them into an ordinary sized breeding cage all together it would not be wise, as the probability is that they would simply make a hash of breeding in those circumstances through being too much crowded on each other's nesting arrangements. But, on the other hand, if you had a good sized aviary with, say, ten or twelve square feet of floor space, into which you could turn them, and where they would have plenty of elbow room, and you could fix up comfortably at least your nesting sites, they would doubtless succeed well. If you have only breeding cage accommodation you could still keep a hen separately in each of two single breeding cages, and mate the same cock with them alternately, putting him with the most forward hen first, and when she has laid her clutch removing him and mating him with the other. When the second hen has laid her clutch, remove the cock and cage him alone, leaving both hens to hatch and rear the young by themselves, which they will do quite well. (2) Answered in No. 1. Quarrelling is the real stumbling block of success with a group of birds confined in a small space for breeding. (3) If free from draughts and damp I see no reason why the room should not be quite suitable for breeding. If warm enough for humans it is certainly not too cold for Canaries. (4) You give no idea as to the health and condition of this bird. There is no reason why it should not recover its song, because it was used for breeding two seasons ago. If apparently in good health, give a morsel of bread and milk, sprinkled with soft sugar, every second day for a fortnight, and on the alternate days give a pinch of a mixture of two parts each hemp and niger, and a half part each of maw, gold of pleasure and sesame, and on these days add to the water as much chlorate of potash as will cover a sixpence, and ten drops of lemon-juice. It might help to bring it out if you could let it hear another free-singing bird for a week or two.

NIBBLING FEATHERS.

M. Dodman.—You should have said how you fed the bird. Try the following, and if not quite effectual write again in a fortnight and give full particulars of your feeding and general treatment. See cage floor is kept strewn with clean grit and sand. Give a staple diet of a mixture of three parts canary to one part summer rape. In addition, give separately every second day half a teaspoonful of a mixture of equal parts hemp, niger, white millet, teazle, linseed, and broken groats, and on the alternate days a morsel of bread and milk sprinkled with soft sugar. A small strip of the rind of boiled pork or bacon fixed on the end of a perch for him to nibble at for a few days would be beneficial. In the drinking water add six drops of syrup of rhubarb and a crystal of sulphate of soda the size of a small pea every second day for a week, and in the following week give six drops of tincture of gentian and four of dilute sulphuric acid every second day,

BRITISH BIRDS, MULES AND HYBRIDS

Answered by H. NORMAN.

CHAFFINCH MULES

Chaffinch-Canary.—A hen that will eat mealworms and ants' eggs is certainly valuable for rearing purposes, but do not overdo the mealworms, they are somewhat indigestible, and would probably cause the hen to be too forward, even if they did not harm her in any other way. (2) No, the Chaffinch-Bullfinch cross is still one we are looking for. (3) The cock Chaffinch is in breeding condition when he is well up in colour and in full song. The birds usually go to nest in April, having a second nest in June, but, of course, their first nest is regulated by the climatic conditions; like other birds, they require warmth and sunshine to get into breeding condition.

WILD SEED SAMPLE.

H. G.—Your sample is not at all a bad one, and very useful for Linnets to pick over; among it is charlock, hardheads, corn marigold, and a few others. Do not mix it with the stock food; give them a spoonful every other day, and let them take which they like. Your two birds have probably got insects; take one in the hand and examine it carefully. If it has any you must get rid of them, either by hand-washing or frequently dusting with insect powder. If it is not this, you are probably not supplying them with enough green food. If you cannot get any just now, soak some rape and teazle and put a few drops of lemon-juice in the drinking water.

SOFTBILLS WITH SORE FEET.

E. R. C.—Foot trouble in softbills is rather a common ailment, and no doubt arises from unnatural diet and the conditions under which they are kept. When one has, say, half a dozen Thrushes, all fed on the same food, one is surprised when perhaps a couple of them have sore feet. "What is one man's meat is another man's poison," and the same thing applies to birds; their digestive organs are not all alike, and consequently the same food does not suit all. It is the careful keeper's business to study his stock and feed them according to their requirement. At the first sign of trouble the birds should have an aperient, and a complete change of diet, with fruit, green food, etc. The perches of softbills should be made of soft pine or pear wood and so placed that the birds do not have a long drop from any of them to the floor of the cage, this latter item is frequently responsible for foot trouble. Cleanliness of cages and perches is

Nests of Birds, Poultry [illegible] should be regularly sprinkled with KEATING'S POWDER, especially when hens are sitting Don't forget to do this previous to the eggs hatching, to destroy the Mite. Kills all insects. Harmless to everything else

very important. I have never heard it suggested that it is contagious, and I fail to see how it can be.

FIRST ROUND.

J. L. Preston.—As a rule Canary hens are ready to go to nest before the Finches, and instead of keeping them back it is a good plan to run a cock Canary in with them, then take him right away as soon as she commences to sit. By doing this one not only gets an extra brood, but should the hen throw light Mules one has then a good start in working up a muling strain. Young hens bred this way can be used to Finches the following year, and a young cock can be paired back to its parent; this gives three-quarters of the light muling blood. You cannot utilise the cocks this year after the first nest unless you have hen Finches to breed with; of these the Bullfinch and the Greenfinch are the most reliable nesters. The Bullfinch cock is not generally of much use for breeding purposes, but if you have one and a steady hen Greenie you could let them go together.

LINNET MOPY.

G. B.—There are so many kinds of worms that infect birds that it is rather difficult to advise you with the best cure, but, anyway, try the following: Give him daily just a pinch of common salt on the tip of your finger, placing it on the front bar of the cage, or on the sand at the bottom. Watch him and see if he eats it; if not, mix 5 grains in an oz. of water, and give him to drink. Clean his cage out thoroughly daily, and watch the result, and continue the remedy as required. The salt also aids digestion and improves the general condition of a bird.

HYBRID BREEDING.

G. Robson.—The cock Greenfinch is not as a rule, a difficult bird to manage, but sometimes he takes a dislike to his intended partners, and then is either sulky or spiteful, but I think the cause is frequently the injudicious way in which the birds are put together. If you intend to try them put them in separate cages, and hang them near each other, so that they can strike up a friendship, then later on run them into the same cage while you are in the room, and after doing this a few times let them be for an hour or so. If they agree, they can be put together permanently.

BULLFINCH GOING BALD.

A Regular Reader.—Give your hen an aperient of glauber salts, as much as will cover a sixpence in 1oz. of water. Let her have this to drink for one day, then repeat three days later. Take a small quantity of rape and teazle, and pour some boiling water on it, and let it stand for a couple of hours on the hob; pour off the water and dry in a cloth

and give her a good spoonful to eat daily, and see that she eats it. Let her have a slice of apple every morning, and put a few drops of lemon juice in the drinking water. Just smear the bare places with a little vaseline, if quite smooth, but if rough and white put a little of the lemon juice on.

BREEDING CANARY-BULLFINCH HYBRIDS.

Miss J. H. Hodgson.—Yes, you can try with either of your cock Canaries. I would advise you to try her first with the yellow one, and see if she takes to him; if not, then try the buff. You must not put them together straight away, but let them get used to each other first, and then, when they are on good terms they can be allowed to fly in the same cage permanently. In April give a nest-box with some moss and cow hair, or an old Finch nest would be better if you could get one. (2) The cock Goldfinch and hen Canary cross is frequently bred, so there is no reason why your birds should not mate. When the hen lays it is best to remove the Goldie over night, or he might break the eggs. When she sits place him in a separate cage, until he is required for the second nest. Have you seen our book on "The Secrets of Hybrid-breeding"?

PARTNERS FOR HEN GOLDIES.

W. R.—It seems to me that you have just the birds required for your venture in Hybrid-breeding. Both crosses are good, particularly the Linnet and Goldie, and as all your birds are steady and used to cages, I certainly would not get other partners. Cage breeding as a rule is the most successful; try to get the hens to build and lay in the nest, but anyway keep the perches low and have a good covering of moss or some soft material over the cage floor when you expect them to lay, as they sometimes drop them from the perch. Your wild seeds are splendid samples, and you cannot do wrong in using them. If you give a spoonful of, say, the four combined every other day, it should be sufficient to bring them into condition. Do not hurry the cock birds, give them rather less, and remember Goldfinches are not early nesters, and

IN-BREEDING:

WHAT IT IS, AND WHAT IT DOES.

before yours are quite ready you will be able to add several kinds of wild food (including flowering heads of dandelion) to their bill of fare. I wish you luck.

ABOUT BLACKBIRDS.

Kelly.—I am rather surprised to hear that your Blackbirds usually fall in wing carriage, because wild birds as a rule are good in this point. Perhaps you are expecting a little too much perfection in the carriage of wings. When we say a bird has good wing carriage, it means that the wings are mostly in the correct position, and meet each other evenly; it does not mean that they are never out of place. I presume you have exhibited your birds; if so, how do they compare with the others for size, shape and density of black colour? You should have had a chat with the judge and found out from him something about them. After the young ones can feed themselves they should certainly be kept in separate cages. Your bird will probably be all right with another moult, and possibly improve in wing carriage as well as steadiness; sometimes one influences the other. A wild bird is very apt to cross his wings when excited. (2) Most exhibitors prefer a young cock caught during the winter for exhibition purposes the following season. Yours should be satisfactory by careful handling, and giving insects and titbits from the fingers. (3) My stock cages for freshly caught Finches are not quite so large as yours, they measure 14 x 10 x 7. I consider they do not knock themselves about quite so much as they do in larger ones. As they become tractable they can be run into a larger one; do it first at cleaning out time. (4) The only method is by repeatedly whistling or playing the same tune on a pipe or flute. This training should commence as soon as they leave the nest, although I have known cases of success that were started much later; they are good mimics.

FEEDING WADERS.

Chas. Greenwood.—These birds are eaters of insects, small shell fish, and the many little grubs and creepy things found in the sand and shingle, therefore you would have to treat them off in the same manner as we do Nightingales and Warblers, and get them on to insectile food as a staple diet. They have not in the past been much in request for cages and aviaries, and I fear any book dealing with the subject would not have much sale. (2) The aviary could be either inside or out, and should have a slab of slate or stone in one corner with about half an inch of water on it. If this is arranged to be running so much the better. (3) I am unable to give you information as regards the legality of trapping, but you could easily find out at your local police station. You could try the net trap, although I believe the majority of these birds are caught by the flight net—that is, one set to take them as they skim the surface of the sea near the shore. (4) You can safely use the sand you mention for your birds, providing there is no sewer refuse or anything of that kind running over it.

FOREIGN BIRDS.

Answered by WESLEY T. PAGE, F.Z.S.

BUDGERIGARS AND COCKATIELS.

H. T. Hobday.—(1) Keep a tin of white oats in the aviary, and count greenfood, cuttlebone, and grit as part of the daily menu. (2) The shallow water pan will answer all purposes. These birds mostly sip what water they require from the dew or rain-laden herbage; nevertheless, there must always be water for them to partake of at will. (3) There are a number of hoppers which hold several days' supply, the seed sliding down by its own weight keeping the lower trough full of seed so long as the supply lasts. (4) So far as adults are concerned, the sexes should be equal, or in nine cases out of ten trouble results. (5) Odd unmated birds would appear to be the cause of so many broken eggs; probably the Cockatiel not having a mate, and consequent housekeeping duties of his own, finds occupation in upsetting the nesting arrangements of the Budgies. (6) Amid present uncertainties, secure a hen Cockatiel as opportunity offers, and if it is from an outdoor aviary, put it in your aviary at once. There is always temporary disturbance, not serious as a rule, from the introduction of fresh pairs, but between now and April

FOREIGN BIRD QUERISTS

should consult Page's "Foreign Birds for Beginners" (1/1½); Arthur's "Budgerigars and Cockatiels" (6d.); Arthur's "Parrots for Pleasure and Profit" (7d.); "Aviaries, Bird-rooms, and Cages" (2/3); "Seeds Foods and Wild Plants" (1/2); Dr. Clarke's "Septic or Bird Fever" (7d.) "Colour-feeding" (3½d.); or the "Nutshell" booklets (2½d. each); No. 6 "Ailing Birds and How to Cure Them," No. 9 "The Disinfection of Coges, Bird-rooms, etc.," No. 14 "Gouldian Finches," No. 16 "Avadavats," No. 17 "The Grey Parrot," No. 18 "Budgerigars," No. 19 "The Pekin Robin," No. 20 "Waxbills." All thoroughly practical and instructive. Prices quoted are post free from "Cage Birds," 154, Fleet Street, London, E.C.

there should be no serious result from adding to your stock as opportunity offers. (7) By the aid of a long-handled rake and scraper the floor of shelter can always be cleaned without adversely affecting nesting birds, providing you are quiet and steady in your movements while doing it. (8) Unless very old, galvanized netting does not readily become rusty. Make good the breakage and give the whole of the wirework a coat of Brunswick black, repeating this whenever the rust shows through again. It can be done while the birds are there. Painting and distempering should be done at once, as at this season disturbance does not matter.

BREEDING BUDGERIGARS IN CAGE.

H. R. Skipper.—See also our reply to F. H. Hodgson in this issue. I do not think it is any use separating the sexes when the eggs are hatched; in fact, I rather doubt if any would be reared if you were to do so—though some hen Finches will rear a brood unaided, I am not referring to domesticated Canaries: There is no accounting for such mishaps as you mention; they occur at times in the aviary as well as with birds in a cage, and presumably they are the result of a domestic squabble. There are some pairs, though this is not usual, which will not feed their young if they are under too close observation, and as soon as they are dead eject them from the cage. It is also possible that the young birds died of cold during the night, and were then thrown out of the husk. There is only one course open to you; let them try another couple of broods, and if they continue their unnatural behaviour then you must get rid of them. They will probably do much better later in the season when you can supply liberally seeding and flowering grass; this is their natural food, and wild in Australia, their breeding habits are dependent upon the supply, i.e., they only breed when fresh grass in the ear is abundant.

GREEN AMAZON WITH COLD AND IN MOULT.

J. R. Rees.—If you had told me how you were keeping and feeding I could have given you a more helpful reply. I take it you have the Grey Parrot Nutshell. The diet given there will meet the requirements of this bird, plus a little boiled maize, if it has been accustomed to it. This latter is not a necessity. Every fourth day put one teaspoonful of fluid magnesia into its drinking water, and on the intermediate days half a teaspoonful of the following mixture, so long as the cold lasts. Mixture: Ipecacuanha wine, oxymel of squills and glycerine in equal parts. Also give daily a piece of bread, biscuit, or plain cake thinly spread with cod liver oil emulsion. When the cold disappears substitute chemical food for the mixture given above, and continue the fluid magnesia for some considerable time. Ripe fruit and nuts (shelled and unshelled) can be given freely. Grit (not sand), cuttlebone, and a chunk of wood (for it to exercise its mandibles upon), should be continually in the cage.

BREEDING BUDGERIGARS IN ALL-WIRE CAGE.

F. H. Hodgson.—There is no reason why your Budgies should not breed freely in your cage, though, being a gregarious species, they are usually most prolific when several pairs are kept together. Many years ago, in a Midland dealer's shop, I saw a pair in a 12in. square all-wire cage, with a brood of five in the coconut shell, and saw the family again in a larger cage after the young had left the nest. Single pairs often take longer to settle down to nesting; sometimes they make no attempt the first season, but once they have done so they should breed freely and regularly afterwards. The best inducement you can give them is to keep them supplied with a small patch of seeding grass daily as soon as this is obtainable, about the same size that is usually given to Larks; half-a-dozen such turves would last a long time if laid on a patch of loose soil and watered freely when not doing service in the cage. The cage should be kept where the birds will not be too freely disturbed, yet at the same time it must be where they will get light and air without draught. And if they are kept in a room where they can have an occasional fly round it will all be to the advantage of their health and make success more probable.

IDENTITY OF PARROT.

H. W. B.—I do not think the bird you describe is an Amazon, as only two or three species of Chrysotis have red or reddish beaks, and your description of the plumage does not fit in with either of these species. Your description is incomplete; you do not say whether its tail is long or short, and you give no idea as to its size. The Indian Ringneck, particularly the Alexandrine, comes nearest to your bird, and if it has a long tail then there can be little doubt that it is a female of that species. I regret having to give you an inconclusive answer, but if you can increase your details I can probably give you a definite answer in a later issue. The females of the various Indian Ringnecked Parrakeets have no ring round the neck; only the males possess this distinguishing feature.

Agents wanted everywhere; for terms write to the Publisher, "Cage Birds," 154, Fleet St., London, E.C.

POST MORTEMS.

Mr. G. Yates, M.R.C.V.S., 1, College Road, Harrow, Middlesex, will examine and report upon dead cage birds for a fee of 1s. 6d. each bird; for reply direct, 2s. 6d.; analysis, 21s. The Post Office regulation is that bodies of birds must be sent at the letter rate of postage, and must be packed in hermetically-sealed receptacles which must themselves be enclosed in strong wooden, leather, or metal cases. If this regulation be infringed the packets may be destroyed by the authorities. **Any bodies sent to the office of this paper will be thrown away, and if a fee is enclosed the loss will be the sender's.**

K. F.—Roller Canary died as the result of a fit. There was no evidence of disease other than this; the cold weather no doubt was the exciting cause.

(Advertisements continued from page 78.)

A POST CARD ONLY You cannot hold your own in life's battle if weak, worn, or easily jaded. Periodical attacks of moodiness, languor, despondency, depression, and groundless fears mean nerve troubles and lead to brain fag, impaired memory, and unfits one for study, business or pleasure. The chosen one in every walk of life are the alert, the bright, and the intelligent, nature's natural gift, but marred for lack of a little knowledge. A post card to the Useful Knowledge Publishers, P.O. Box 94, Bradford, will put you in possession of a 48-page book, neatly bound, of valuable information, and will be sent post paid free of any charge whatsoever if you will mention CAGE BIRDS. A little knowledge saves much medicine.

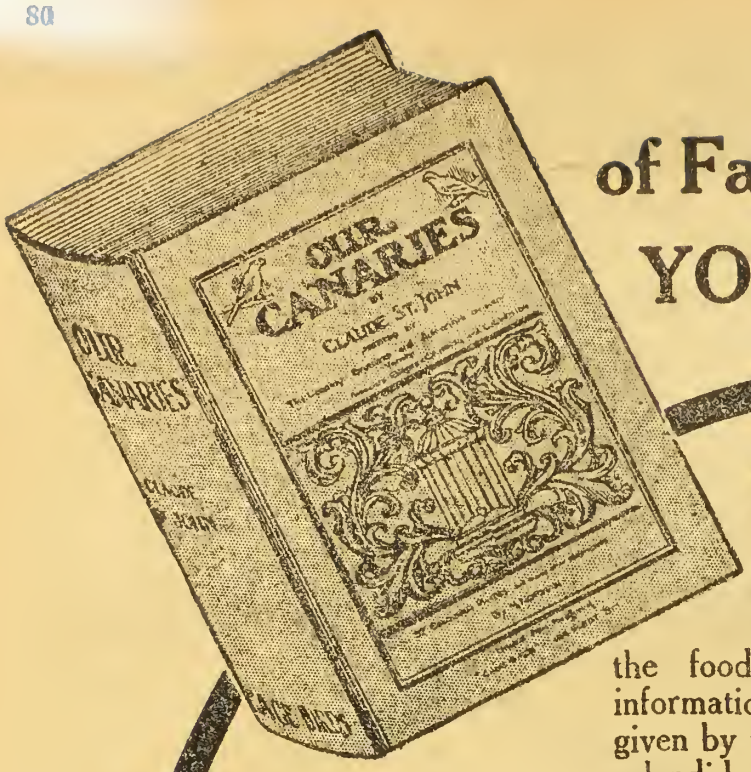
SECRETS
of Famous Canary Breeders
YOURS for only 1/-down



Judging the position of a bird by the clock.

HOW well-known Canary Fanciers bred their prize-winning birds—birds literally worth their weight in gold—how they trained them—the foods used. All this priceless information and much more is clearly given by the Breeders themselves in this splendid Canary Book. Every page—every line—is full of the *practical experience* of practical men—experts in their line. Fanciers who have specialised in Lizards give valuable information. Breeders of famous prize-winning crested varieties contribute to its 380 pages. Every feature of Canary Breeding and Exhibiting is clearly and fully dealt with—you have only to glance at the comprehensive index to turn up the information you desire.

The book contains 133 illustrations, a few of which are here reproduced. Thus, "Our Canaries" not only *tells* you but *shows* you. If you are a novice, or breed only for pleasure, you will be delighted with the increased enjoyment which the book will enable you to derive from your hobby. If you are an "old hand," or breed for profit, it will help you to *increase* profits.

"Our Canaries" will be sent you for Free Examination—Approval for a deposit of only 1/-. If, after examination, you return the book, your deposit will at once be refunded. If, however, you decide to keep the book, you can pay the balance by easy monthly instalments. Thus you have everything to gain and nothing to lose by sending for a copy. Do so TO-DAY

THE "WEE GEMS" OF THE CANARY FAMILY.

The charming Green Border Fancy Canary on the left of our picture won 2nd Prize at Cardiff Show for Mr. D. Raymond, of Cardiff. The other is the Cinnamon Border, owned by Mr. J. S. Nicholas, Swansea, which won 1st Prize at the same show.

F. CARL, Publisher, 154, Fleet Street, London, E.C.

Advertisement Charges.

One Halfpenny for each word up to 48, 1d. per word afterwards. Name and address to be reckoned. Minimum, 12 words 6d.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together, and are charged at two words a penny up to 48 words; after that 1d. per word. No single advertisement, even if accompanied by others, will be charged at less than the minimum price, viz., Sixpence.

Headlines or Footlines, 9d. 1/-, 1,6, 2/-, 2/6, according to size.

The rate for displayed advertisements is 7/6 per inch. Rates for a series on application.

ADVERTISEMENTS UNACCOMPANIED BY CORRECT REMITTANCE WILL NOT BE INSERTED.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL.

The Proprietor reserves the right to refuse any advertisement, or to cancel any advertisement ordered for a series, at any time, without assigning any reason for so doing.

Advertisements must in all cases bear the bona-fide name and address of the advertiser, and no advertisement will be inserted if addressed to a receiving office, or similar place of call.

Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

ALWAYS USE "CAGE BIRDS"

DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor of the *bona-fides* of either buyers or sellers In all transactions the adoption of our Deposit system should be insisted upon

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from both parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has not been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty-eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit will be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion. The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient plus the extra postage incurred has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

NOTICE TO BIRD PURCHASERS.

It is advisable that all newly-purchased birds, especially foreign birds, be kept isolated from established stock for a week or ten days, until by their condition they establish the fact that they are thoroughly healthy.

STARLINGS are very amusing, and make ideal pets and show birds. I have several nice cocks, caged since October, and are finger tame, 3/6 each, if with cage 7/6 each; approval: A. Smith, 17, Cattel-rd., Smallheath, Birmingham. (814)

ON receipt of 1s. 6d. will send securely packed the loudest singing cock Skylark ever heard, measuring 14ins. from tip to tip; also my method of feeding, which keeps them in full song nine months out of twelve; free: Gale, 113, West-st., Dunstable. (678)

SOFTBILL keepers, take expert advice before proceeding to buy and keep the larger species of Insectivorous birds. You will then have no trouble in keeping your pets in the best of health. This advice is offered in "Nutshell No. 26," by H. J. Fulljames. It is a wonderful little work, dealing with most varieties in a highly interesting and instructive manner. Foods and their preparation, and the various styles of cages also receive full attention. Can you breed Mealworms? This booklet tells you how. Post free, 2½d. from CAGE BIRDS, 154, Fleet-st., London, E.C. Look at our list of agents; call on the nearest and get it for 2d.

KNOWLEDGE IS POWER.

You can get it in 6d. Vols.

READERS of "Cage Birds" can to-day secure at pre-war prices volumes of the well-known **"Everybody's" Series.** Each volume is, on its particular subject, the handiest and best book obtainable. Although small enough to fit one's pocket, each book is packed with a vast amount of valuable information. Consider the wonderful price—only **6d.** each (8d. post free), strongly bound in cloth; in attractive leather binding, **1s.** each (1/2d. post free). The number of these books is very limited, and owing to the enormous increase in the cost of printing and paper, it will be impossible to reprint them at present prices. There are sure to be some of these books that YOU need—some that will give you just the information you have been seeking on some knotty point. Send in your order **NOW.** It is only necessary to state the *Number* of each book as given opposite the name in the list shown here.

(816)

Champion YORKSHIRES & NORWICH

Bulldog Strain.

NOW IS THE TIME TO PROCURE YOUR BREEDING STOCK, to ensure getting **the best birds,** and to get them settled in their new home before pairing up. I have an enormous stock of all varieties on hand, and, having almost finished my export trade for this season, I can now concentrate my attention to the requirements of the home trade. My long experience as a breeder and exhibitor, and the large stock of birds I have to select from place me in a position to send you just such a bird or birds as you require. As regards the quality of my stock, it is surely sufficient to refer you to the reports of all the leading shows, from which you will find that both my **Yorkshires** and **Norwich** are not only maintaining but adding to, their great reputation. In addition to this, I have sold several birds that have won leading honours at all the principal shows. Kindly write, stating wants. I am now offering a limited number of grand stock and exhibition birds, either Yorkshires or Norwich, which I can guarantee as bred from my own **Bulldog Strain,** at 20/-, 25/-, 30/-, 40/-, 50/- each, cocks or hens. Also a few grand matched pairs at 40/-, 45/-, 50/-, 60/- per pair upwards. These are splendid value, and have only to be seen to be appreciated.

I have also a grand selection of stock birds from other well-known strains, as follows:—

YORKSHIRE COCKS, grand lengthy birds, in full song, 15/-, 17/6, 20/-, 25/-, 30/- each, upwards.
YORKSHIRE HENS, smart, racy, typical hens, 7/6, 10/-, 12/6, 15/-, 20/- each, upwards.
MATCHED PAIRS, 20/-, 25/-, 30/-, 40/-, 50/-, 60/- per pair upwards.
NORWICH PLAINHEADS. Grand, thickset, cobby birds at same prices as Yorkshires.
BORDER FANCIES, Real good birds, both for stock and exhibition. **Cocks,** 12/6, 15/, 20/-, 25/-, 30/- each. **Hens,** 6/-, 7/6, 8/6, 10/- each. **Matched Pairs,** 17/6, 20/-, 25/-, 30/-, 40/- per pair.
CRESTS AND CREST-BREDS.—A few real good pairs at 30/-, 40/-, 50/-, 60/- per pair. Odd birds, Cocks or Hens, at proportionate prices.

ROLLERS. ROLLERS. ROLLERS.

I have a magnificent collection of pure British Rollers from the best and purest strains, at following prices:—

HIGHLY TRAINED COCKS, 20/-, 25/-, 30/-, 40/- each.
PURE-BRED HENS, 6/-, 7/6, 8/6, 10/- each.
MATCHED FAIRS, 25/-, 30/-, 35/-, 40/-, 50/- per pair.
Travelling Cages, 4d. extra in all cases.

One word more—**Please remember, I invite you** to come at any time and make your own selection, but if you cannot come, **Don't Forget** that I send every bird on 7 days' approval, at my sole risk. I personally select every bird that is sent away. I have over 4,000 (four thousand) birds in my rooms at the present time to select from, and I guarantee to give absolute satisfaction to every customer or return cash in full. Terms: Cash or deposit with Editor.

Send for 1917 Price List.

WANTED TO PURCHASE!
WANTED TO PURCHASE!
WANTED TO PURCHASE!

YORKSHIRE AND NORWICH CANARIES

FOR EXPORTATION ONLY
FOR PROMPT CASH PAYMENTS.

In Quantities of 5 Pairs to 1,000 Pairs.

To save time, I beg most respectfully to state that my limit for the remainder of the season

is 12/6 pair.

It is absolutely essential that pairs should be sent. Cheque is sent the day following arrival, for every bird has to be examined and reported on by a well-known Canary Judge and Breeder. Don't send hens for cocks, that is now useless.

JOHN HAMLYN, 221, St. George's Street, LONDON, E.

WHAT offers? Eight Norwich Canaries (six cocks, two hens), all splendid birds; also Crystal Palace aviary, in good condition, and several breeding cages, etc. Can be seen any time at: 116, Queen's-rd., Finsbury Park, N. (811)

5 Norwich cocks, 1 Buff Flaked, 1 Yellow Flaked, 1 Clear Yellow, 4 cock Twites, 1 H.M., 4 hen Twites, Greenfinch Mule hen, Chaffinch H.M., Greenfinch cock; will exchange Yellow Norwich hens or what offers: Jas. McQueen, 31, Boz-lane, Ardwick.

CHAMPION Norwich stock birds, clinking big headed, clear yellow cock, bouncer, wonderful quality, £2 2/-, worth double; extra large cap marked buff cock, good head, grand one, 21/-, very cheap; four extra big deep-chested buff hens, two clears, two marked, 15/6 each; big, deep chested marked buff cock, stormer, only £1; all bred 1916, cold room, from cup winners; apply: George Cubley, Long Sutton, Lincolnshire. (814)

ALL MY WINNERS

Must clear stock, twenty pairs from 25/- to £10; few cocks, spare hens, buffs, yellows, also twenty breeding cages and show cages, utensils; state wants: Gordon Stewart, Ipswich.

W. N. TURNER

BREEDER OF CHAMPION NORWICH OF 20 YEARS' STANDING

I have bred and supplied birds which have won this season, and still have a grand stock to select from, related to my winners. See show reports Liverpool, Manchester, Sheffield, Barrow, Leicester, Halifax, Huddersfield, Ardwick, etc., etc. This strain heralds itself. Inspection invited. Approval; stamp reply: 3a, Percival-st., Hightown, Manchester.

J. C. BARNS

Well known strain; 25 years' study. One of the finest private collections of Norwich in England; type, quality, colour, and substance combined: to those who can visit me do so and see for yourself; 200 birds to select from, all judiciously bred; grand pairs, 30/- up; odd cocks, 20/- upwards; special pairs, £3 to £5; guaranteed correctly matched and robust; state requirements, stamp; approval; satisfaction ensured; all fanciers welcome and cordially invited: 113, Northfield-rd., Walkley, Sheffield.

WANTED.

12/6 Per Pair 12/6

Will give 12 6 per pair for good surplus stocks of YORKSHIRES, NORWICH or ROLLERS.

12/6 to 15/- per pair for CRESTS,

Cock Goldfinch Mules 7/- each

Hen Mules 2/- each

and will deposit cash with Editor.

I am also open to consider offers of good class birds at higher prices.

YORKSHIRE Canaries. 2/2, by H. W. Battye (Past President of the Yorkshire Union); absolutely the best handbook dealing with the Yorkshire and its sub-varieties. Contains complete instruction upon pairing, breeding, moulting, and successful exhibiting; also how to treat in both health and disease: CAGE BIRDS, 154, Fleet st., London, E.C.

ARE THERE ANY READERS of "Cage Birds" that are SCEPTICAL

as to the wonderful collection of high-class birds of every variety that I possess? If so, I invite them to call and see with their own eyes, and thereby test irrefutable facts; or I offer another **solution,** of which all those that choose can avail themselves. Amongst many others who have visited me, seen my stock (at various periods), seen my methods of business, etc., are the **Editor** of this journal, **J. Robson, Esq.,** and **C. House, Esq** These names are "household words" wherever Canary breeders of experience are found; they are names to be conjured with, and cannot be bought with money or influence. The two latter are also known as upright, fearless judges and reporting critics. So I invite any who would like to

READ THE OPINIONS OF THESE GENTLEMEN

of what they have seen, and the impressions formed by them after their visits, to send me their names and addresses, clearly stating their desire to

READ THESE REPORTS

and I will at once post the same free, together with several other reports of interviews, including "The Court Journal" and the Local Press of this city.

I have also been visited by fanciers from most countries in the world, including all the important countries in Europe.

Meanwhile I shall be pleased to send you any of the following on approval, you to be your own judge as to the value I am in a position to supply.

NORWICH PLAINHEADS AND YORKSHIRES.

You may have all the so-called strains and bogus pedigrees in the world, but you cannot purchase better blood than I now hold, and I am certain you cannot procure the same value. Cocks, **15/-, 20/-, 30/-, 40/-, 50/-.** Hens, **10/6, 15/-, 20/-,** upwards. Pairs, **25/-, 30/-, 40/-, 60/-.** These prices are for show birds and stock birds to breed winners. These are the best value in Great Britain to-day. For **OTHERS,** really good, containing many of the best combined strains in Great Britain, at lower prices, see my February List. Cages, **4d.** and **6d.** I may here state that amongst the Norwich, both cocks and hens are, for type, etc., some real models; in Yorkshires I can produce some of the longest and full of quality procurable.

For particulars and prices of all other varieties an illustrated List should be seen.

YOU CAN MAKE YOUR BREEDING PAY IN 1917

if you only pair up right; or if you want to purchase pairs, leave it to me, for it is no trouble to me to produce documentary proof that the foundation of many past and present exhibition studs have been laid by birds purchased from me. Great value for money has always been my forte, and will continue to be.

W. RUDD, The Bird Specialist, NORWICH.

EIGHT well bred Yorkshire hens, healthy, 6/- and each: Thomas, 29, Stevenage-rd., East Ham, E.

AIDS TO SUCCESS.

Our Books and a Commonsense Application of the Advice therein MUST bring you Profit as well as Pleasure.

All the experience of years of careful study by experts is at the disposal of readers.

YORKSHIRE CANARIES, 2/2.—By H. W. Battyo (Past President of the Yorkshire Union). Absolutely the very best Handbook dealing with the Yorkshire and its sub-varieties. Contains complete instructions upon Pairing, Breeding, Moulting, and successful Exhibiting, also how to treat in both health and disease.

NORWICH CANARIES, 1/1.—By C. A. House. Tells the fancier all that he needs to know to enable him to become successful as a breeder, and exhibitor of the Norwich Plainhead. The chapters on "Forming a Stud," and "How to Produce the Ideal" are worth the cost of the whole book.

THE SECRETS OF HYBRID BREEDING REVEALED AND EXPLAINED.—By many notable Mule and Hybrid Breeders. Among the contributors are such well-known breeders as Messrs. R. Colton, W. H. Vale, C. Houlton, C. J. Ward, J. Beswick, G. Lander, T. H. Kinch, T. Smith, etc. This Handbook, which contains 212 pages, 7 inches by 5, is brimful of the most practical information on the highly interesting subject of Hybrid Breeding. Price 1/-, post free 1/2.

AVIARIES, BIRD-ROOMS, AND CAGES, 2/3 (cloth gilt).—By H. Norman. Contains ten lovely full-page photographic plates. A practical guide which deals thoroughly with the proper Building, Fitting, and Management of Aviaries and Bird-rooms, and the making of Cages.

SEEDS, FOODS, AND WILD PLANTS FOR CAGE BIRDS, 1/2.—By various leading authors. Full information on the seeds suitable for all cage birds, their food values, uses, etc., with descriptions and illustrations of the wild plants indispensable to the successful keeping of British and other birds.

BRITISH BIRD MANUAL, 2/3 (cloth bound).—By H. Norman; or may be had in two parts. Part 1: "Hardbills," and Part 2. "Softbills." Either Part, price 1/1, post free. Each part contains a beautiful and life like coloured plate and numerous illustrations of birds and cages. Up to date information on the keeping of British Birds.

HOUSE'S CANARY MANUAL, 1/2.—By C. A. House. A thorough, practical guide to the general management and breeding of Canaries, dealing fully with the breeding, etc., of every member of the Canary family, including the Roller (or Singing) Canary. An illustration of each bird, by the master Canary artist, Mr. H. Norman; exhaustive chapters on aviaries and cages, breeding procedure, moulting, exhibiting, diseases, and seeds—a compendium of knowledge.

FOREIGN BIRDS FOR BEGINNERS, 1/1½.—By W. T. Page, F.Z.S., etc., Foreign Bird Expert to "Cage Birds." A highly instructive Manual. It contains a magnificent coloured plate and a number of black and white illustrations. Indispensable to all keepers of Foreign Birds.

CANARY BREEDING FOR BEGINNERS, 7d.—By Claude St. John. A Practical, up-to-date guide to Canary breeding, designed specially for the use of the beginner. Deals very fully with the choice, sexing, and mating of the birds, feeding for condition, the cages and their fittings, the bird-room, egg-food, nest-building, rearing and moulting the young, colour-feeding, training for show, and all the difficulties likely to confront the breeder.

THE STOCK BOOK, 7d.—Of our invaluable "Breeding Room Register" a well-known fancier has said:—"It makes bird-breeding easy." No breeder of birds can possibly afford to be without it. It simplifies the operations in the bird room and makes it possible for everyone, even the veriest novice, to breed his birds as they should be bred. Contains both Pedigree, Breeding, Young Bird, and Show Registers of simple and unique character, in adition to useful account pages.

FANCIERS' PRINTING.—Fanciers requiring business notepaper, postcards, trade envelopes, etc., should write us for a quotation. We are now in a position to supply these at specially low rates combined with first-class work. Artistic memos., with block of any desired bird, and fancier's name, address, and words of description as desired, 250 5/-, 500 7/6, carriage paid.

CAGE-BIRD HYBRIDS. Complete bound in cloth, 7/6 carriage paid. This great work is written by Charles Houlton, an authority with a reputation extending over 25 years as a leading exhibitor and a leading expert and judge. Magnificently illustrated by that great bird artist, H. Norman. There are no less than sixteen coloured and sixteen art plates in this work. Each plate is a perfect study of an individual Hybrid.

Club Reports.

STOKE-ON-TRENT C.B.S.

Annual meeting, 10, Brook Street, Feb. 5. Report and balance-sheet submitted by the sec. showed a balance in hand of £8 17s. 1d., which was considered eminently satisfactory. All officers were re-elected, excepting vice-chair and treas. Mr. Davis was elected vice-chair, and Mr. Bagshaw treas. Subs. for 1917 will be as last year, 2s. 6d., entry fee 1s. Syllabus is in course of preparation, and we are assured of an instructive season. Will fanciers who intimated their desire to join please communicate with me?—J. Glover.

CLAPHAM C.B.A.

Meeting, Feb. 6th. Final arrangements made for Pair and Finch show, Feb. 28th. Schedule was compiled, stewards appointed, and specials allotted. Sec. reported that Mr. J. Robson had kindly promised to judge the show free of charge in view of the Association's straitened financial condition. Arrangements have been made with the landlord of the Clock House Hotel which enable us to receive birds on the evening before the show. Members who are unable to bring their birds before 6 on Feb. 28 may deliver them on Feb. 27 before 9.30.—A. R. Coe.

L.C.B.A.

Annual meeting, Feb. 8th, "Red Lion" Hotel, York Street, St. James's, Mr. Robson chair. Meeting night was changed to third Thursday in the month. Balance-sheet was read and passed, showing a total in hand of £42. Officers elected:—Pres., Mr. Crisp; chair, Mr. Robson; auditors, Messrs. Sayers and Goymer; treas., Mr. Trower; Press correspondent, Mr. Wallington; asst. sec., Mr. Johnston; sec., Mr. Watcham. Committee: Messrs. Shepherd, Leech, Pretty, Offord, Burt, Neighbour, Mugford, Wright, Thurley, Rooke, Thynne, Soper.—A. Wallington, asst. sec.

LIVERPOOL B.B.A.

Meeting, Oldham Hall, Feb. 6; our worthy President being present; Mr. Bunner chair. Correspondence was read from Messrs. Minoprio, Compton, and Lonsdale. Decided to hold Nest Feather shows June 23 and July 28. Will local secretaries kindly note? At next meeting an egg food competition for novices will be held, three good specials being promised. The year has started well for the Association; 11 new members were elected, Messrs. Johnson, Compton, Barnes, Farley, Fitzsimmon, Baker, Wakeman, Barr, Pendleton, Douglas, and Sinclair. The officers beg to thank those members who came from outlying districts for their attendance at the meeting.—T. R. Jones, sec.

CHESTER-LE-STREET C.B.S.

Meeting, Jan. 21, only five or six members present owing no doubt to the day being Sunday, some of the members being there on Saturday night. Please note date next time. Balance-sheet was read and adopted. Decided to give 2s. cash as special to make a special for each member; there are eight short. Prize money was paid out to those present at the rate of 11s. per class, which I think will be hard to beat for a 6d. entry fee; and five entries making a full class. Specials were drawn for. Decided that Mr. J. Marron get 15s. for his services in connection with the social, and the Sec. £1 for his year's work. Members kindly look for next notification of meeting, as there will be some special business to bring forward.—R. Ward, Sec.

ATTERCLIFFE C.B.S.

Meeting, Feb. 8, Mr. L. Havenhand presiding. Balance sheet for 1916 was unanimously passed. Eight new members enrolled. Table show for Canaries and British was held. Mr. G. Browning judge. Yorks: 1, 2, vhc, Exton; 3, 4, c, Hutchby; hc, Coldwell. Nor.: 1, 2, 3, 4, vhc, Brady and Stokes. Nov. Nor.: 1, 2, Coldwell. Goldf. or Bullf.: 1, 3, D. Havenhand; 2, Walker and Son; 4, Green and Wilks; vhc, Stamp. Greenf.: 1, vhc, Walker and Son; 2, 3, 4, Green and Wilks; hc, Gillott. Linnet: 1, Walker and Son; 2, 4, Green and Wilks; 3, Hammond Bros.; vhc, D. Havenhand. Less. Redpoll: 1, Hammond Bros.; 2, vhc, Green and Wilks; 3, c, Grainger; 4, D. Havenhand; hc, Brady and Stokes. Siskin or Twite: 1, 2, Hammond Bros. Chaff. or Bramble: 1, 2, D. Havenhand; 3, Green and Wilks. A.O.V.: 1, Green and Wilks; 2, 3, Hammond Bros. Softbill: 1, 2, 3, Darlow; 4, Green and Wilks. Hyb. or Mule Pairs: 1, 3, D. Havenhand; 2, Green and Wilks; 4, hc, c, Brady and Stokes; vhc, Grainger.—D. Havenhand, sec.

LEEDS C.B.S.

Annual tea, concert, and prize distribution, headquarters, Griffin Hotel, Mr. H. J. Mennard chair. About 60 members and friends sat down to an excellent tea, and a fine musical programme was gone through. Special mention must be made of Miss Nellie Gough, whose rendering of "Farewell in the Desert," "Love's Garden of Roses," "Idle Words," "A Perfect Day," and "A Long Trail," as an encore, was highly appreciated, and Mr. Fred Bucknall, who fairly brought down the house with "When you come Home," "I hear you calling me," and "Mother McCree." Amongst those who also largely contributed to the pleasure of the evening were Misses Blythman and Blore, and Messrs. Britton, Thompson, Ted Wrightson, and J. W. Goldthorpe (ventriloquist). Our esteemed President and Host presented the prizes to the winners, after expressing pleasure at seeing so many happy faces. After a vote of thanks to the President and the artistes, the singing of the National Anthem brought a very enjoyable evening to a close.—W. A. Wilson, hon. sec.

BARROW C.B.A.

Meeting, Feb. 10th. Weights and Measures Office. Mr. McFarlane, late sec., was presented with a beautiful timepiece in recognition of services rendered as sec. Mr. W. Crosby made the presentation, thanking Mr. McFarlane for the able way in which he had conducted the business of the society, and saying that the society was sorry to lose the services of such a capable secretary. Mr. McFarlane thanked the members for the generosity shown to him, and thought Mrs. McFarlane would be pleased to share the present with him, as she had always been ready to assist him with his work as sec., and to attend to his birds when his time was taken up with society work. He would still keep to his birds and be a member of the society, and would always look upon the present as a mark of appreciation shown to him by the members of the Barrow and District C.B.A. Prize money was paid for members' show; any member who has not received his prize money kindly communicate with the sec. On Jan. 24th there was a washing exhibition and competition for novices.—T. A. Croft, hon. sec.

LOCHGELLY C.B.S.

Meeting, Jan. 20, ante-room, Drill Hall, Mr. M. Smith chair. Agreed to hold general meeting Feb. 17 in the same place, and to have a social on March 3; also a washing exhibition by W. Grewar, G. Raith, and J. Anderson; also a competition open to 1916 members, W. Grewar giving a gold-centre medal for best washed bird, 3d. per entry, competitors to supply their own birds.—W. Grewar, Sec. pro tem.

DULWICH AND PECKHAM C.B.S.

Judging competition of pairs, matched for breeding, Feb. 6. A class each of Norwich and Yorkshires was arranged, and Mr. Geo. Sands was final judge of Yorks, and Mr. J. Hazell Norwich. Three special prizes were offered and 20 members competed. Mr. Hodson secured the first prize; Reeks, second; and Gilbert, third. An interesting discussion followed on the pairs shown, and members present expressed themselves freely on the various points of them, according to their judgment. A vote of thanks to Mr. Sands and Mr. Hazell closed an enjoyable meeting.—W. Hodson, hon. sec.

BLAYDON ON-TYNE C.B.S.

Annual meeting, Feb. 3. The balance sheet shows a substantial balance in hand. Decided to have annual show this year on the old dates, Nov. 9 and 10; local societies please note, so that there may be no clashing of dates. Hon. Pres., Col. F. B. Simpson, Esq., J.P., re-elected, also vice-pres. Mr. G. Dolson was re-elected chairman, and Mr. P. Lynn vice-chair. Mr. G. Simpson was elected treasurer, and a strong committee was formed with power to add to their number. Decided to get another room, so that there can be exhibitions of washing birds, etc. Mr. J. Humble and Mr. J. Ivison were elected members.—Geo. Harver, Sec.

STOCKTON C.B.S.

Meeting, Feb. 1, Little Regent Hotel, Mr. Yates chair. Decided to hold pair show, March 1. Mr. J. Carr, Middlesbrough, to be asked to judge. A protest was lodged against Mr. Burnett, British Sec. Cup winner, for having shown birds contrary to rule. This was upheld by the society, and he therefore forfeited all prize money and claim to cup, which was handed over to runner-up, Mr. G. Saville. Classification for pair show: Yorks, Yell. Ck., Buff Hen; Buff Ck., Yell. Hen; Nor., Yell. Cock, Buff Hen; Buff Ck., Yell. Hen; A.O.V. Can., Muling Pairs. Hybrid Pairs, Goldf. or Bullf., Linnet, Greenf., A.O.V. Seedeater. New members elected: Messrs. Stothard, Mills, York, Ford, and Kitchen; and there is every prospect of the society forging ahead.—T. Carlisle, hon. sec.

ALFRETON C.B.S.

Meeting and table show, Red Lion, Feb. 10, a good number present, Mr. J. Adnitt chair. Decided to hold a table show of Mules and Hybrids, one class for each, March 10, with special in each class. Mr. W. Evans judged. Mr. J. Adnitt judged table show of stock pairs and gave satisfaction. Mr. H. Parkin won judging competition. Specials were won by Butler and Barlow, A. Spencer, T. Cope, and Sewer Bros. Nor. Yell. Ck., Buff Hen: 1, Butler and Barlow. Buff Ck., Yell. Hen: 1, Butler and Barlow. Nov. Yell. Ck. and Buff Hen: 1, Spencer; 2, Evans; 3, Newton. Nov. Buff Ck., Yell. Hen: 1, Spencer. Nov. Yorks. Yell. Ck. and Buff Hen: 1, 3, Sawer Bros.; 2, c, Abbott; vhc, Andrews; hc, Cope. Nov. Buff Ck. and Yell. Hen: 1, c, Sawer Bros.; 2, 3, Cope; vhc, Abbott; hc, Newton. —G. Sawer, Sec.

SOUTHAMPTON C.B.S.

Meeting, Feb. 6, Mr. W. G. Fellows, chair. Hon. Sec. was instructed to write thanking Mr. E. Holliday for kindly consenting to give a lecture on Yorkshires this season. Letter read from the treasurer, Mr. A. G. Washer, stating that he was joining up shortly, and resigning his office. It was decided to retain Mr. Washer in his position. Mr. W. G. Fellows kindly undertaking his duties during his absence. A vote of thanks was passed to Mr. Washer (who is the original treasurer of the society), with all good wishes for his career. Schedule was arranged for table pairs on Feb. 28, seven classes. Mr. Fellows to judge Yorkshires, Mr. Melnuish remainder. A judging competition to follow show, prize 2s. 6d., given by Dr. Weekes. Mr. H. Norman was elected judge for the annual show. —G. J. Slade, Hon. Sec.

LEEDS ROLLER C.C.

Meeting held after the annual members' contest, Mr. E. Peel chair, and a crowded attendance. Sec. was pleased to report that the Birmingham Club have decided to join the Federation, and he had good hopes to include another two clubs amongst the Federation clubs. Decided to provide another silver cup to be sung for at annual contest for the novice, and that the winner be presented with a gold medal as a memento. The following were elected members: Messrs. Jones, Bedford, Vernon, Hopkins, Jack Tomlinson, Best, McGafferty, Wainwright, Brettell, Inman, Cotterill, Cookson, Lipman, Britton, Dexter, Midgley, Alexander and Gower. A hearty invitation is given to all to see how the newly-elected judges go to work, for our next meeting, Mar. 3, at the Griffin Hotel. Intending members please let me have their names so that they can be inserted in the rule books. A hearty vote of thanks to the judges terminated a good day.—H. Best, Sec.

GLASGOW AND WEST COUNTIES

Meeting and annual pairs show, Good Templars Halls, Ingram Street, 3rd Feb. Mr. Wm. Dinwoodie presided over a good attendance. Specials won at annual show were handed over by the donors to winners present. The Committee would thank those who were unable to be present kindly to hand in their specials, ticket money, etc., to the treasurer as early as possible, as they would like to have the financial statement read at a special meeting, 24th Feb., when Mr. J. H. Adam will lecture on Canary Breeding, Moulting and Colour Feeding. New members admitted: Messrs. W. Wilson, J. Hamilton, W. D. Fraser, G. McColl.

The entry for pairs show did not come up to former exhibitions, the cause no doubt being that the show was held a week after the annual show, and it is to be hoped that this will be rectified in another year. Cl. Nor.: 1, spl, Blair; 2, Cassells; 3, 4, Findlay; 5, McGowan. Variegs.: 1, spl, 2, Findlay; 3, Cassells; 4, 6, Bannerman; 5, Pettigrew. Cl. Bord.: 1, spl, 2, Findlay; 3, Johnstone. Var.: 1, spl, Findlay. Green or Cinn. Bord.: 1, Findlay. Cl. Yorks: 1, spl, 2, McMillan; 3, 4, Eccleston; 5, Steel. Crest: 1, spl, 2, Findlay. Classification for next monthly show, 3rd March: Hybrid Pairs, Bullfinch Hen, gross; A.O.V.: Goldf. Muling Pairs; Linnet do.; A.O.V. A good attendance is desired on March 3rd, as it is the annual meeting and election of officers. Messrs. Alexander McFarlane and James Dick judged, and were cordially thanked, as also were the donors of specials.—J. H. Adam, Hon. Sec.

CLUB AND SOCIETY NOTICES

ONE NOTICE of any forthcoming Society meeting inserted free. It must reach us not later than Tuesday morning's post. Specially printed Club Notice Postcards may be had free on application to our Manager. Secretaries should always use them.

NOTE.—Only the details asked for on our cards can be published. Such phrases as "a large attendance desired," etc., must not be included. Classification for forthcoming shows, appeals for new members, and any other matter in the nature of an advertisement will only be inserted if paid for at advertisement rates.

Ardwick and Manchester C.B.A.—Feb. 20, St. Thomas's School, 8. Arrangements for social, selection of club card, and general business.—A. E. Thorpe.

Birmingham Roller Club.—Feb. 21, Crown Hotel, Hill Street, 8. Rules, etc. Birds will be present.—W. Taylor.

Birkenhead C.F.A.—Feb. 20, Ablett's Cafe, 8. Open meeting.—Geo. Morton.

Warrington C.B.S.—Feb. 22, Blue Bell Sale Rooms, 8. Question night. Each member is asked to submit two questions.—H. Warburton.

West Stanley F.F. C.B.S.—Feb. 17, Victoria Hall, 7. Important business.—R. Hutchinson.

Wakefield O.S.—Feb. 21, Crown and Anchor Hotel, 7. Pair show; other important business; members bring as many pairs as they please.—T. H. Alexander.

FINE SHOW AT GOUROCK.

A grand show, under the auspices of Greenock, Gourock and Port Glasgow O.S., in aid of the Red Cross Work Party, was held in the Gamble Institute, Gourock, on Feb. 2, 3. The show was under the patronage of the Provost, Magistrates and Town Council of Gourock. Lt.-Col. Darreck and Mrs. Darrock opened the exhibition. Mr. Park judged Canaries, and Mr. Jamieson, Brit., and their opinions were well received. The staging was nicely arranged round the four sides of the building, with a row of tables up the centre of the hall, which left great space for the public comfort. Well on in the evening, however, the rush of visitors was so great that the space at command was packed beyond one's liking. Great interest was displayed in the well-known team of Hybrids belonging to Mr. Jas. Crong, Glasgow, who so kindly placed his specimens in the hands of the officials for exhibition only; this was greatly appreciated, and lent much to the interest of the show. The selling by auction of the gift birds created much amusement, and very good prices were realised. The show was a great success, and we expect to hear of a good round sum being handed over. Mr. Molloy makes a fine president, and Messrs. Watson and Smith as vices, are good seconds, while the general sec., Mr. Dooley; show sec., Mr. Campbell, and treas., Rollo, are all of standard quality; enthusiastic fanciers and very popular. They were ably backed up by a hard working committee Messrs. Brown, McDermid, Rodden, Allison, Campbell, Wyllie, Craig and Best.

SCOTS FANCY CK.: 1, Gillies, good clear buff, fine top-end, grand shoulders and reach, nice side and depth, well staged; 2, 3, Rollo, former, light tailed green, close up in size and cond., barely the shoulder or reach; 3, cl. buff, good type, stylish, neat, smaller built; 4, McAleese. HEN: 1, Gillies, cl. buff, real good model, fine shoulder, grand reach and droop, thick through, fine drive, best in the section; 2, cl. buff, quite up for size and cond., not so thick; 3, McAleese, yell. pied, good feather; 4, Rodden. YORKS. Ck.: 1, 2, sp, Mount, fine col. and qual., lengthy, neat well braced, in fine bloom; 2, Wyllie, good broken green, fine qual. feather, not just so shapely or perfect in carr.; 3, McCarthy, fine lengthy var. yell., nice feather, inclined to lift at front, unsteady; 4, Best. HEN: 1, sp, 4, Mount, leader cl. buff, top qual. feather, but open, neat carr., style, looked little soft; 2, Best, cl. yell., lengthy, fine type and qual., staged to disadvantage; 3, McCarthy, cl. buff, good length, type, well tapered, close up. CL. or VAR. YELL. BORD. CK.: 1, Dooley, sweet var., neat, shapely, clean cut, fine head and neck, correct carr. and style, we fancied best in section; 2, McKendrick, cl., fine stamp, neat head, wings and tail, just a bit hollow between wings; 3, Gillies, head tkd., nice qual. feather, A1 cond., neat and shapely, falls very little to 2; 1, Wyllie. BUFF: 1, Gillies, nicely mkd., fine type, grand qual., neat, well rounded, in top order; 2, Fleming, neck mkd., droops wing, and fails staging; 3, Murray, wing mkd.; 4, Wyllie. YELL. HEN: 1, sp, 4, Dooley, in grand order, neat type, fine qual., shapely, stylish; 2, Gillies, top col. and qual., clean cut, neat and typical, wee shade longer in head, close run for top; 3, Murray, nice qual., good carr. BUFF: sp, best in section, Gillies, good cl., grand type and qual., neat, clean cut, in the pink; 2, Fleming, neat, jaunty type, compact build, lacks the cond. of leader; 3, Wyllie, grizzle cap, nice type and qual.; 4, McKendrick. GRN. and CINN.: 1, Campbell, fine jonque Cinn., grand type qual., neat, well rounded and drawn, perfect carr., A1 col. and pencilling, nice win; 2, 4, Gillies, former, yell.-green, good grassy cl., well pencilled, fine type, neat carr and style; 3, Galbreath, buff Cinn., good cl., nice type, not so perfect in feather, wee bit unsteady. CREST: 1, Best, even wing, D.C., good col. and feather. YELL. CK.: 1, McLean, grand check, neck, grand subs. and type, full, shapely, well braced; 2, Allison, heavy var., lovely col. and qual. of feather, falls head and body subs.; 3, Yuill, non-fed, short, cobby body, nice col., well braced; 4, Wyllie. BUFF: 1, sp, 4, Park, leader, cl., short, well filled, cobby build, fine qual., neat carr, and style; 2, Allison, hot col., wing mkd., throughout, could have gone up. YELL. HEN: 1, 4, good size, neat head, neck, lacks the breadth of Park, heavily var., good head and col.; 2, McLean, barely so hot col., full size, A1 type and qual., well braced, clean cut, might have been top dog; 3, Allison, cl., well up in size, fine level col., grand feather, wee shade longer in build. BUFF: 1, 3, sp, best bird in show, McLean, well known, cl., in her usual form, often described, needs no further comment; 2, 3, 4, Allison, former, good undli., cl., nice size, col. and qual., fine top end, grand front, shade long behind, will fill out yet; 3, well up for size, good col. and qual. feather. COMMON or SINGER: 1, Porter, heavily var., of the Bord. persuasion, nice feather, bit lucky; 2, Turner, good cl. buff Bord., well staged, excels leader all round 3, Wise, fine cl. Nor., nice size and type, might have won. We liked No. 12 fine yell. Nor., in grand order. SELL.: 1, 2, Wyllie, nice buff Linnet Mule and Goldf. Mule. GIFT: 1, 3, Allison, leader cl. buff Bord.; 3, Cinn. Nor.; 2, Campbell, nice jonque Greenf. Mule. LIGHT MULE or HYB.: 1, 2, Campbell, even mkd. Goldf., nice col. and marks, perfect feather, well staged, steady; 2 jonque Siskin, nice size and col., perky, neat, fine order. DRK.: 1, 2, Campbell, fine jonque Greenf. in capital order, nice level col., good size, steady well put down; 2, jonque Siskin, warm col., steady perfect feather; 3, Young, looks like Siskin, Redpoll, perfect feather, steady; 4, O'Donnell. GOLDF.: 1, sp, best Brit., Gillespie, good Finch, quickly claimed at catalogue price, £2, fine size, rare col., pure markings, full square blaze, nice moons and tans, good wings, well coloured and buttoned steady, in the pink; 2, McDermid, shade smaller, but all there for col. and mks., falls a trifle in size; 3, Trotter, similar in size, falls in blaze; 4, Laird. BULLF.: 1, McCartney, fine size, good col. and markings, sound cond., steady; 2, Kerr, not quite up in size, excels in depth and purity of col., fine expansive cap and well defined wing bars, close up; 3, Trotter, topper for purity of col. and markings, falls in size only; 4, Molloy. H.M. LINNET: 1, McDermid, not large, nice level ground col., distinct pencilling, typical, well benched, 2, Campbell, quite up in size, cond., closer, but very distinct pencilling, right up on leader; 3, Trotter, fine size, grand buffy colour, beautiful pencilling, nice type, perfect feather, steady, we fancied; 4, Laird. F.-M.: 1, McDermid, fine size and type, grand col., markings, steady, well shown; 2, 4, Gillespie, former well up for size and cond., nice shape, falls breast work; 3, Trotter, shade smaller, but better in col. and pencilling, we preferred for a step up. GREENF.: 1, sp, McCartney, nice jonque, good size, sound col., hard cond., steady, well put down; 2, 3, McDermid, former buff, lovely feather, not quite so massive, but in creditable order; 3, similar in size and cond., steady, perfect feather; 4, Campbell. SISKIN LTC.: 1, 2, Fleming, leader with nice Twite, in good cond., nice pencilling, steady, perfect order; 2, jonque Siskin, good cond., nice col. and marks, fine cap and bib; 3, 4, Trotter, former Twite, nice size, grand level col., distinct pencilling, steady, our choice. LESSER REDPOLL: 1, Campbell, little beauty, in the pink, good size, col. and cond., neatly pencilled, fine poll and bib, steady; 2, Wyllie, not just the size or subs. of leader, scarcely the col., well staged; 3, Mount, fine size, grand cond., nice poll and distinct bib, well shown; 4, Gillespie. A.O.V.—CK.: 1, McDermid, fine Hawfinch, capital size, col., markings rich, and well defined, very steady, in the pink; 2, Urquart, Yellowhammer, fine size, nice body col., head lines not quite so pure and well defined as might be, 3, Campbell, good Chaffinch, fine size, nice cond., richly and distinctly mkd., steady; 4, Molloy. HEN: 1, Martin, fine Bullf., lovely feather, nice tone of col., neat fittings, broad, jet cap, perfect bars, steady, well benched; 2, Campbell, good Greenf., lovely feather, nice size and cond., steady; 3, McIntyre, Bullf., good size, col. and marks, not quite the condition of leader; 4, Molloy. VOR.: 1, Campbell, fine Goldf., grand size, pure col., rich markings, fine blaze, expansive and square, lovely wings, well buttoned, good moons and tans; 2, Fleming, Goldf., nice size and top order, not just so pure in col.; 3, Jones, Indian Ringneck Parrot, in lovely feather; 4, Campbell, nice Australian Cockatoo.

Twitterings.

Nine of the 45 members of the Southampton C.B.S. are serving with H.M. Forces.

A melanistic specimen of the "Black-headed Gull is to be seen daily in St. James's Park, London.

At Paisley Show, writes W. Mossie, in Border Fancy Yellow cock, I was 2nd, not Brooks as reported.

Mr. R. Spiby writes that he has changed his address from 21, Queen Street, to 52, Devon Street, Farnworth.

Owing to pressure of business, writes Mr. J. T. Smith, I am compelled to resign the office of Secretary of the Provincial Roller Club, which has been taken over by Mr. E. Hibbert, 27, Pendlebury Road, Swinton, near Manchester, to whom all correspondence should be addressed.

Wedding Bells.

A wee bird whispers that wedding bells will be ringing in Kirkcaldy on Friday, Feb. 16, as that popular fancier, Mr. George Arnott, is then to take unto himself a partner. Hearty congratulations, George.

A Correction.

Kindly publish correction of my recent report, writes Mr. R. Garnett, Sec., C.M.Y.C.C., C.M.Y.C.C. open competition. 1st, Dr. Craig, 229 points; 2nd, L. Dykes, 176; 3rd, C. Morrison, 173; 4th, H. H. Towers, 163.

Coventry's Show Date Fixed.

The date of the show of the Coventry O.S. has been fixed for Nov. 14 next. I am pleased to state, writes Mr. J. Kent, hon. sec., that we have again booked the Corn Exchange, a hall which last year delighted those who attended the show.

THE POULTRY WORLD.

The up-to-date, efficient poultry journal. Every number grandly illustrated and full of practical articles by experts. Invaluable for the beginner and the amateur.

Every Friday, 1d.

Advertisement Forms & specimen copy from

"POULTRY WORLD,"

154, Fleet St., London, E.C.

An Address Wanted.

Will the Galashiels gentleman who answered my advertisement in CAGE BIRDS kindly communicate, as I have mislaid his address, writes Mr. A. Barrett, 25, Becho Road, Cambridge.

Another Tame Seagull.

A Seagull has recently been captured at Cardigan, writes Mr. W. J. Thomas, bearing a ring marked "Vogel Warte Rossiten Germania, 28538 E." Hundreds of Seagulls are seen here daily, actually feeding on the street, driven by the stress of hard weather we have experienced of late.

"Two Grand Books."

I have received the British Bird Manual and Birdrooms, Aviaries, and Cages, writes F. W. Stone, and I must say they are two grand books. I can highly recommend them to novices. Knowing what British birds require, I have no hesitation in saying they are indispensable to any British fancier.

Prize Money at Penygraig.

Will those exhibitors who so kindly patronised Penygraig Open Show and have not yet received their prize money please have a little patience, as we have had a difficulty or two, writes Mr. G. Padfield. I am pleased to announce that we have got things in going order again, and all prize money will be paid in the course of a few days.

OBITUARY

Mr. J. H. BAILEY (Wimbledon).

It is with deep regret, writes Mr. G. Griffiths, I have to record the death from influenza of Corporal J. H. Bailey, a well known member of the Wimbledon C.B.S. Mr. Bailey joined up soon after the outbreak of war, entered the A.S.C., and had served in France for the past two years. Mr. Bailey was home on leave in December, and returned to France on Christmas morning in the best of health and spirits. I am sure all fanciers will deeply sympathise with Mrs. Bailey and her three daughters in their great sorrow.

Mr. W. W. CORKHILL (Wavertree).

I enclose advertisement of the stock of the late W. W. Corkhill, who died very suddenly from neuritis and paralysis on Jan. 29, writes Mr. R. T. Lonsdale. Though only in the fancy for two years, Mr. Corkhill spared no expense in trying to get a team of exhibition and stock birds together, and the birds advertised include some of his winners at our local shows. It is to be regretted that such a promising fancier's time in the fancy has been cut so short, as he was a most energetic worker in any hobby in which he became associated, and his loss will be felt not only in the bird fancy, but in local cricket, bowling, and hockey circles. He held office in several associations, and I am sure that all fanciers who came in contact with him will always remember his genial and sporting disposition, and tender to Mrs. Corkhill deepest sympathy in the sad loss which she has sustained after only five years of married life. Mr. Corkhill died on the fifth anniversary of his wedding.

"A Fancier in Distress."

I beg to thank you for putting in my appeal on behalf of Mr. McLaughlin (writes Mr. H. Lilley), but I notice you have made an error in the name of the road—it is 10a, Penwith Road, and not Penville Road.—[Penville Road was the best our printers could make of the word as written.—ED.]

In connection with this deserving case we have received the following generous offer from Mr. J. P. Lloyd, 84, Chichele Road, Cricklewood, N.W.:—"In response to Mr. Lilley's appeal on behalf of Mr. McLaughlin in last week's CAGE BIRDS, I shall be pleased to send him a smart unflighted yellow or buff Yorkshire hen, and trust that other fanciers with surplus stock will come forward and assist a brother fancier in distress."

A Novel Travelling Box.

Mr. F. Thomas, of Ramsgate, has sent for our inspection a box intended for the conveyance of live birds by rail. It is of very solid construction so as to afford complete protection for the inmate. At each end of the front a small pane of glass is inserted to give light into the interior, and the glass is protected by strong cross wires which would prevent the escape of the bird even if it were broken. A perch runs across the middle of the box close to the bottom, so that the bird may rest upon it rather than on the bottom of the box. A seed trough is at one end, and at the other is a drinker from which the water cannot be spilled in transit, a bottomless cone which is easily removable for cleaning, reaching almost to the bottom of the drinker. In such a box a bird should take no harm upon the longest journey, and as it would last for many journeys only the cost of returning the box as an empty has to be considered as a set-off against the humanity of its use.

A Redwing in the City.

Last week a Redwing was to be seen among the Sparrows in Lincoln's Inn Fields, and the severe weather has made them quite plentiful in the London Parks.

Birds and the War.

It is interesting to learn that some of the sea-birds that were originally plentiful on our coasts, and then declined in numbers until they were in danger of disappearance, are now beginning to respond to the efforts made to protect them. The Great Skua, for example, is increasing in the Shetlands, though whether these Huns of the great Gull family will be popular with their relations is at least unlikely. We have yet to learn the result of increasing the numbers of predatory birds. It remains to be seen, too, what disturbance in the old order of distribution will be effected by the war; we may rest assured that it will be considerable. The number of Gulls and Terns nesting on our coasts in the spring of 1916 was apparently quite abnormal, and one hears of comparatively rare birds having been seen inland, though the evidence is not as conclusive as one might wish. But it is clear that changes of habitat have been imposed upon many species by the war, and it may be that the protective orders now current may avail to bring over here certain birds that came here of old time.—"Illustrated London News."

With the Wild Birds in the Snow.

In and Around the Newark District.

By W. LIDGETT, Hon. Sec. Newark C.B.S.

SURELY a true bird fancier's heart must go out in pity to our feathered friends in such very severe weather as has been experienced during the last five or six weeks.

As my home is situated in the suburbs of the town I have many opportunities of which I do not fail to take advantage, and as I am a keen observer of all that takes place, I have seen many strange visitors not only in the suburbs but right in the heart of the town also. In a main thoroughfare of a busy part of Newark I saw on one day the following species: Jackdaws, Starlings, Chaffinches, Thrushes, Robins, and a Pied Wagtail. The latter caused quite a mild sensation, even among ordinary passers-by, who stopped to look at the bird, which, with his stately walk, accompanied with short, jerky flights, seemed to all a stranger indeed in a street of a town.

I have also seen in my own garden many visitors which are rarely found so near to houses. The Tits and the Robins were, of course, in the majority, but it was nothing strange to see Thrushes, Blackbirds, Starlings, and Sparrows all feeding together in the steeped dog-biscuits I put outside for them.

While out walking in the country the effects of the weather could also be seen evidenced by the way the birds congregated in flocks around the farm buildings. It was a pleasure to a fancier to be able to see the birds at such close quarters, and it is a marvel how tame many were, but no doubt the want of food had much to do with this.

I picked up a Seagull almost frozen to death in a valley of the River Trent, and it tends to show how very severe the weather must have been that a bird of so hardy a species found its way so far from its usual haunts to be picked up nearly dead. I took the bird in my hand and breathed on it, and then walked over two miles with it tucked under my overcoat. I then let it go, and it took a short laboured flight over a field and settled. I watched it walk about, and I think it would be able to get away—the great difficulty it would find would be to get food so far from water.

Large flocks of Linnets and Starlings were also seen, and the Rooks seemed to monopolise the fields. The air was black and white in another place with Plovers on the wing. I also saw Greenfinches and Yellow Buntings in another place, and a walk taking me five miles from home to the place where I knew Goldfinches were to be found (having had a day with a catcher there on one occasion), I had the pleasure of seeing quite a score of these beautiful Finches on the wing. They did not look so sprightly as when the weather is milder, but, all the same, they seemed to be standing the hardship of existence well.

Those who love birds and Nature in its wild state have had ample opportunity these last few weeks to get their fill in the study of them, and although I like the fireside, I do not fail to get the most out of anything when there is so much to learn outside in the doings of our birds of the country.

A Roller Canary Club for Radcliffe.

It has been decided to form a Roller club in Radcliffe, writes Mr. C. Ollier. We shall hold a meeting at the Boar's Head on Feb. 21 at 8, and all intending members and those interested are invited to attend.

The Need of a Grain of Salt.

"The Schoolmistress" in a "lesson" on the Sparrow, after giving the valuable information that it has "three toes in front and one behind," and that when it rests on a tree or branch the three toes bend round from the front, and the other from the back, says: "The story is told of some farmers who, tired of the sparrows' thieving, made up their minds to destroy them all. This they did with guns and traps until there were practically none left. The next year, however, their crops suffered so from insects that they were willing to buy sparrows to let them loose in the fields."

A Thrush as a Camp Follower.

Our friend, Mr. T. H. Trower, of Trower and Co., the well-known seed merchants, has kindly brought for our information a photograph of his nephew and four of the cooks of the military camps at which he is stationed. On the hand of one of the cooks sits a Song Thrush, and the bird displays as much consciousness of being part of the picture as any of the five soldiers in the group. Mr. Trower tells us that the Thrush is in absolute freedom, and is entirely without fear. It goes in and out of the camp kitchen as it will, and is often to be seen sitting on the head or shoulder of one or the other of the cooks as he goes about his duties. We regret that the interesting photograph is too small to permit of satisfactory reproduction.

Mr. Allen Silver Wounded in Action.

The many friends of Mr. Allen Silver, whose name is known, of course, to every keeper of foreign birds in our country, and whose cheery and obliging personality has made him a universal favourite with those who have the pleasure of his personal acquaintance, will be shocked to hear that he has been dangerously wounded in action, and has had to have a leg amputated. The army chaplain, writing to Mrs. Silver, the widowed mother of our young friend, at The Laurels, 7, Bampton Road, Forest Hill, says that although the wound is dangerous, and the operation has been a serious one, Mr. Silver, so far, is going on well. Mrs. Silver is prostrate with the shock of the news of what has happened to her only son and her sole support, and we are sure that all our readers will join with us in the hope that she will soon hear that her beloved is out of danger. Mr. Silver had been for less than two months in France, and our personal knowledge of his character leads us to conclude that he was doing more than "his bit" when he received the injury which has at least put an end to a promising career.

BIRDS' NESTS IN THE FIGHTING LINE.

In the course of a long and very interesting article in the London "Times," describing a second year's observation of birds at the Front, A. Buxton writes:

"In 1915 I failed to see a single Wood-wren, but last winter I noticed a wood which seemed to me a typical Wood-wren covert, and I was not disappointed, for three pairs of them came to it, and no doubt nested, but I never could find a Wood-wren's nest and only know one man who can.

"It was a noisy wood in the summer, being full of Golden Orioles and other songsters of various sorts and sizes. The only nest of a Golden Oriole I saw last summer was in an alder, and very easy to see, though I confess I walked under it and stared at it many a time before I saw it, and then had to be shown it by a man who had never seen one before. The nest is at least one size too small for the bird, and must be very uncomfortable to sit in.

"On this same lucky day, while I was plodding through the marsh, a little rich-brown creature raced away from under the tussock I had stepped on. It seemed to run too fast for a mouse, and in the base of the tussock were the perfect nest and six rich-coloured eggs of a Grasshopper Warbler—the first I had ever seen, though there are many Grasshopper Warblers in this world who must have cursed me for my inquisitiveness about their homes.

"Some day no doubt, in times of peace, crowds of all nationalities, among them many who have fought, will visit the battlefields of the Western Front, but if I come back I shall avoid the ruined towns and battered trenches, and refresh pleasanter memories of birds that I have known and trout that I have failed to catch."

THE GOLDFINCH.

By S. A. REYNOLDS, Stourbridge.

An appreciation by a birdlover of England's most beautiful Finch, and a story of a Goldfinch which voluntarily returned from freedom to captivity.

ONE cannot *write* the full beauty of our English Goldfinch, even the cunning hand of the artist fails to portray all the wonderful charms of this little gem. To everyone he is pretty, but to a few he is the essence of all that is most beautiful in Nature. The very shape of its body is a perfect type of symmetrical form, the red blaze a sparkling ruby reflecting the roses of June or the bashful poppies that hang their heads in waving corn, the streak of gold that flashes from its wing the bloom of April's gorse promising the sunny days to come, its actions sweetness itself.

"P, seet," "P, seet," it calls to its mate, or if you happen to have been one kind enough to understand and enter its little world it will welcome you thus, and ofttimes curtsey with "P, o; seet, o;" with such charm that you will love a Goldfinch even as a friend, and what better friend can we have than one that is the soul of cheerfulness, keeping our hearts fresh and our eyes ever observant to Nature's law?

In the Goldfinch's Haunt.

To appreciate the Goldfinch fully you must see him in his native haunts. I have in my mind a field in autumn, a day when the sun shone through a haze of mist and the world looked golden. In the field a few cattle lounged among the coarse herbage. Hardheads grew in abundance, and as it was early the greater part of them were in flower, dots of blue among them showed the blue bottom and spurts of soft white thistle down carried on the breeze reminded me I was approaching Nature's table spread for her feathered kind.

"T. Check," warned a Blackbird, and a score of Starlings glided up, wavered, and then dropped twenty yards ahead. "Look up," shouted a cock Pheasant, whereat a rabbit sat up on its haunches, still nibbling a blade of grass, and eyed me closely a few seconds. "Oh, its only him," thought the rabbit. "Let's get on with breakfast," and forthwith he proceeded to enjoy the "spread." Anxious not to disturb this little family, I took advantage of the thick, bushy hedge, and on a hazel stump I sat and watched. What a glorious garden for the birds! Sheltered on one side stood the forest primeval.

"The murmuring pines and the hemlocks,
Bearded with moss, and in garments green,
indistinct in the twilight."

A tinkling stream sang on its way on another side, affording drink and cool, clean water wherewith the birds could bathe and preen their dainty garments. Here, far from the smoke and dust of the city, grasses grew green, and the pods of the seedlings were bursting with wholesome food, no clanking of engines, bare pit heaps, and the huddled dwellings of man to mar the scenery. Nature had been left alone, and lovingly she had clothed the earth with wild, luxuriant beauty. Was it to be wondered that I heard the music. "P, seet; P, seet?" Up from the stream they came calling and singing to greet the morn.

Feathered Jewels.

Streaks of gold, patches of grey, flashed in the light, and as they swerved nearer the rubies shone, they dropped quite near my hiding place, a few alighted on the tall thistles and began to dig for the seeds, sending clouds of white down to the breeze; others preferred to hunt for ripe hardheads, and on finding would perch upon the slender stalk and weigh it down to the grass, then with one foot on the pod, and its long slender beak soon made short work of the seeds. "P, seet," came from a score of little throats as they flitted from plant to plant.

Then a most handsome bird mounted the topmost thistle, "P, seet," "P, o; seet, o" came forth his challenge; it was taken up by our of the leading musicians, and the field rang with such exquisite music that even the proud Pheasant stopped in its feeding to listen. Was there ever such charm, such inspiring beauty in the teachings of man? This was no forced performance, they sang because they could do no other, their little hearts overflowed with the joy of life, the mystery of the meadows, the sunlight and the stream. What a refreshing scene for the tired toilers of our cities, they whose eyes are weary of dusty streets and discordant sounds.

All of us more or less have the love of the beautiful implanted in our hearts, and there is much honour due to the city worker, whose love of bird life overcomes the many other alluring temptations. Who shall deny him his hobby of bird-keeping? It unfolds pages of natural history that broadens his outlook on life and gives him joy which he could never have known. Every bird that is staged in our shows is the finest tribute to the heart of the working man.

The Escape of the Captive.

Two seasons ago I took my favourite Goldfinch into a wild country place in the South of England. On hanging up its cage one evening I forgot to secure the door. Next morning I was surprised to hear a Goldfinch singing close to my bedroom window. "And jolly tame, too" I thought as I peeped out with sleepy eyes. I dressed with frantic haste and was soon outside in the crisp morning air, and then I saw it was my own bird.

My thoughts flew to an old landing net I knew of, and when this was procured I crept up very cautiously and, made a dash, but only with the result that a frightened bird circled round and then made for the top of the tallest pine tree.

Whilst I was pondering over the many suggestions that crowded my mind of how to capture him, he evidently took my predicament as a joke and curtseyed "P, o; seet, o" with much warmth. From up aloft there came many more "P, seets," and looking up I could see a flock of birds turn in flight, hover, and then vol-plane down into the very pine from which my own Goldfinch sent forth his clarion call. I dimly remember such music, but more so my feelings, for what I dreaded most came quickly; the flock soared high up into the clouds and my little friend with them.

Exactly five days after this happened the keeper hurried down in the afternoon with the news that he had my Goldfinch in his garden, and added "the missus tried to throw her hat over it several times, but he is too blamed stubborn for her."

The Wanderer's Return.

Taking all the nets, etc., we could lay our hands on, also the cage to put him in, we started in high spirits. In the garden true enough we saw him, there was no mistaking the familiar call note from yonder apple tree. Nets were being put down with all possible speed when the keeper shouted out. "Blamed if that old bird ain't perched on top o' his cage," and to my surprise it was so, he was even trying to get inside. Leaving the nets, we went towards the cage, and the Goldfinch flew back to the apple tree.

I opened the door of the cage thinking he might be induced to go inside, and we had not got more than half-a-dozen yards away before down he came again, making straight for the open door, and was feeding inside, all within a few seconds. He made no attempt to fly out as I approached him to shut the door; it was evident he was glad to be home again, though strange to say this cage was not his usual home, for previous to this visit in the country he had been flying in a large aviary.

This little incident is by no means a unique occurrence, I have had several such brought to my notice recently; but it shows how happy and contented our captive birds can be with the kind attention bestowed on them by all true bird lovers. Let the pessimist hear the song of the Goldfinch, show him the rubies and the bloom of yellow gorse, and "P, seet;" sweet "P, seet" will come to him as summer's rain after the heat of the day.

"Food."

THE GREAT NEW NATIONAL WEEKLY.
A practical journal which shows how to grow our own food.

The profitable rearing of Poultry and animals which help to fill our food bill is dealt with each week, and invaluable advice is given to those who have started to produce home-grown fruit and vegetables.

No one with a garden, large or small, should be without this wonderful penny-worth, and the small holder will find in it a veritable treasury of practical knowledge.

Every Thursday 1d.

Advertisement forms and specimen copy sent post free on application to "Food" Offices,

154, Fleet Street, London, E.C.

THE GOLDFINCH.

This beautiful specimen of a British Goldfinch won 1st Prize at the City of Glasgow Show for its owner, Mr. A. McLellan, Polokshaws.

The Essentials of Aviculture.

By J. W. N.

(Continued from page 789, Dec. 30 issue.)

A Series of comprehensive articles, embracing the proper management of all kinds of birds in captivity, their housing, feeding, general management and diseases, and the breeding of species, Mules and Hybrids.

IT is not every birdkeeper who has the knowledge and experience necessary to breed a number of prize birds each year, but everyone delights in the young bird whatever its pedigree may be. It is the purpose of this chapter to set forth clearly the underlying principles, and so to ensure a more or less successful result even to the most ignorant novice, with the possibility that one or more of his birds may be looked upon with a favourable eye on the show bench.

Although all sorts and conditions of birds are bred in captivity, perhaps the commonest to propagate its species in cages is the Canary. Of Canaries, there are many varieties, and each has its devoted band of enthusiasts. British birds are not as a rule successful if confined to cages, but in the aviary there is hope of a gratifying result. The same remark holds good for the many varieties of imported foreigners, although a few of the more prolific will breed almost equally well in cages.

The breeding of Mules and Hybrids is always popular amongst the more experienced breeders, and this I shall deal with later on. Perhaps the great fascination of the latter type of breeding is the glorious uncertainty which gives even the beginner a chance of breeding a bird which will bring him fame at one bound.

In the Beginning.

As a preliminary to breeding operations the birds must be properly paired. By this is meant that the birds are so chosen that the bad points of one will be neutralised by the correspondingly good points of the other. To do this one must have a clear mental picture of the perfect bird of the species.

A great aid is to get a life size picture well drawn and correctly coloured, and to become thoroughly conversant with every feature of it. Then see as many birds as possible of this species, and note their agreements with and differences from the standard of comparison. A visit to any show will be a useful completion to a novice's education in the appreciation of the many points which tend to produce the perfect specimen.

The mind and eye having now been trained to criticise with a certain degree of freedom, take all the birds from which breeding is intended and cage them off separately. With notebook in hand, examine each carefully, noting the excellences and deficiencies at every point. Devote a page to each bird, having the points, such as size, shape, colour, position, etc., in a column down the left half of the page, whilst on the right the remarks of the same are entered.

It is impossible to give a list of all the points for every bird that may fall into the hands of a birdkeeper, but the following should always be noted:—

Points that Matter.

First of all the size, whether the bird is bigger or smaller than the standard picture. Then the colour, which can never be too rich. With the colour should be noted the markings, whether clean cut and of good colour, or ragged and dirty in hue. The size and shape of these are important; to mention only a few examples in illustration there are the blaze of the Goldfinch, the cap of the Bullfinch, and the bib of the Hawfinch.

The condition of the legs and feet, although not so important as many other points for breeding purposes, may be conveniently noted here, along with the position on the perch, i.e., whether the bird stands well up or crouches over it. This latter is a fault that is almost certain to be handed down to the offspring, and should be carefully watched for.

A more detailed examination can now be proceeded with, the beak and head coming in for a full share of attention. The two curves of the body, from the beak to the vent and of the back are of great importance. A hollow back should have a definite black mark against it, while a bird that has the space between the wings well filled in and nicely rounded is one to take special notice of. In a good bird the wings should fit nicely to the sides, and the tips just meet.

A very important factor, especially in the pairing up of Canaries is the feathering. The plumage should fit tightly to the body, giving rise to the show reporter's phrase, "like wax." It should be soft and silky, and, although the sheen on it is not an anatomical point, yet the fact that it shows the bird to be in good health is an indication that the young bred from it will have brought into the world a fair share of stamina, which is a very important quality indeed, especially in forming a strain.

(To be continued.)

Correspondence.

Birds Stolen During Transit.

Carriage Charged on the Empty Box.

SIR,—I am sorry to inform you that the above method of obtaining birds still appears to be in vogue by some unscrupulous persons. On Jan. 3, I had despatched to me from Mr. Andrews, the well-known breeder of Weston Olney, a house-moulted hen Bullfinch, but on arrival at Thirsk the box was empty. Notwithstanding that this was observed by the N.E. Company's servants at Thirsk Station, the box was delivered at my house, and carriage collected just as if everything was in order, the person delivering the box even signing the delivery sheet himself, but before he had got five yards from the door my wife discovered that the box was empty, and informed him of the fact.

On returning home about an hour later I went to make inquiries, when I learned that it was known that the box was empty before being delivered. Under the circumstances I think the least they could have done was to have drawn my wife's attention to the fact on delivery, when it is certain she would have refused to pay carriage on same. I think it is quite time something was done to detect and make an example of the person or persons responsible for the many cases lately of birds being stolen during transit.

E. W. HUMPHREY.

How to Strafe the Red Mite.

Petrol Does the Trick.

SIR,—As "Red Mite" asks for a way of exterminating that pest without injuring cages, I would, without hesitation, say use petrol. I have used nothing else for a number of years, and have found it most successful; it evaporates quickly, and leaves no smell, which is more than can be said of most remedies. One does not quite like having the smell of camphor, paraffin, creosote, etc., hanging about their birdroom for months on end, as it is doubtful which is most detrimental to the health of the birds, the mite or the smell.

I use a camel hair throat brush, dipped in hot water to take out the twist, then it can be inserted into the neck of any bottle; keep the bottle properly stoppered when not using it, as petrol soon loses strength if allowed to remain any time exposed, and see that the room is well ventilated when applying same. I have often, during the breeding season, given the cages a light run over without removing the birds, which took no bad effect. All the bird fanciers I know who have tried it say it is the most effective, cleanest, and most easily applied, likewise the cheapest. Get the best grade "Shell" if possible. I may add I have not seen a Red Mite for two years, and we breed about 50 birds every year.

W.R.

Fir-tree Oil and Hollow Perches.

SIR,—Add a wineglassful of fir-tree oil to half a gallon of rain water (warm), and give the cages a good wash inside and out. There will be no need for re-painting, and the birds can be put back as soon as the cages are dry, which only means a few minutes. I myself use bamboo perches for about two days per week (not regularly, as they are too hard for the birds' feet). The surface of these must be filed to take off the slipperiness, or the birds cannot grip them; also the pith must be got out and the ends wedged a bit. If there are any red mite about they will find a good hiding place in these when they have been in use for two days. Then take the perches out and tap them on a hot stove, and you will think you have joined the machine gun section. Finally, put them in a hot oven to finish those that won't come out, and then it will be "no red mite." Wishing CAGE BIRDS every success.

F. BENDALL.

The Value of a "Cage Birds" Recipe.

SIR,—In answer to your correspondent "Red Mite," in CAGE BIRDS of Jan. 20, I will tell him; but first I must thank Mr. Clayton, for it was an article in CAGE BIRDS, July 24, 1915, by Mr. Clayton, on "Oxalic Acid for Red Mite," that has done the trick. Why should your correspondent "Red Mite" want pretty cages? It is far better to have healthy, comfortable birds. Before using oxalic acid I tried all kinds of things, and one thing I used was ammonia and methylated spirits, with camphor dissolved in it. I soaked two breeding cages inside and out with it, put them in the cellar for a week, and there were more red mite than ever.

In CAGE BIRDS of March 11 last year you published a letter of mine asking Mr. Clayton for further details, and to this he was kind enough to reply as follows:—"I get an old wine or whisky bottle, scald about 4 ounces of oxalic acid, and fill up the bottle with water; shake well before using. I have just finished cleaning down, as we say in Yorkshire; every cage was washed with a soft brush with the acid out of the bottle; this makes the old lime boil (get well into the joints), and gives a smooth face for the new coat of lime or distemper.

"In mixing the oxalic acid with the lime I use about a breakfast cup full of the solution to half a bucket of prepared lime, and a rather less quantity for distemper. I keep the bottle of oxalic acid always charged, and when cleaning the perches from time to time I dip the perch ends into the bottle, particularly during the summer months or breeding season."

Wanting to get in order for the breeding season, I had already treated some spare cages with oxalic acid and lime. I put the birds in them, cleared the bird room out, gave it two coats of the same, and had the floor done with some in water.

I gave all the cages two coats inside and out, and, not knowing what quantity to use, I dissolved four ounces of oxalic acid and added it to a bucket of lime. That is about as much again as Mr. Clayton says, and the birds had been in it nearly a month, and were all in the pink, but I followed Mr. Clayton's instructions next time. Don't put washing soda in the water for cleaning the floor with any of the acid, for it makes it boil.

Now, Mr. Editor, my birds have been in the cages nearly twelve months. The cages were done again after the breeding season, and I have not seen a single red mite or any other insect on the birds, in the cages, or in the room, not even a spider. I have had a record year, and I have watched one or two of my old birds picking it off more than once, and they always seem in the best of health. This time I am painting the cages black outside.

G. L. B.

The Disqualified Hawfinch at Bristol.

Mr. House Goes Into Detail.

SIR,—I have not charged Mr. Andrews with trimming. At Bristol the bird in question was deficient in feathering. I considered it had been trimmed, therefore I passed it. I had no knowledge of ownership, and even if I had it would have made no difference. Mr. Andrews and myself have been good friends for many years, but that is no reason why I, as a judge, should treat him in any way different to what I would treat the greatest stranger. I handled the bird carefully before I passed it, and am absolutely certain that part of its plumage was missing from the bib. Had I not been convinced I should not have passed it. It was no question of not taking time, nor of disarrangement of plumage. I had the bird in my hands for several minutes, and examined the bib carefully and minutely, turning back the feathers, etc. Mr. Andrews was not present, so what can he know about the disarrangement of plumage, or the time I took over the class. For his own sake it would have been better had he not made these suggestions. A simple denial without suggestions would have carried more weight.

As I was judging this class Mr. A. Birch, the well-known pigeon judge, of Seaforth, was standing by me, and if Mr. Andrews needs confirmation as to the state in which I found the bird at Bristol I have no doubt he would be pleased to give it to him.

What took place at the two Northampton shows has nothing to do with Bristol. At the first the bird was staged in a dark corner under a gallery or balcony, and it may happen that I did not notice the bareness, if it existed, or it may be that it did not exist at that time.

As to the show on December 26th, I was not present, so can say nothing about the state of the bird then. But on the general principle enunciated by Mr. Andrews, I may say that it is quite possible for the feathers to have been removed, say a week or ten days before Bristol, and then for the new feathers to have been in such a state on December 26th, some five weeks later, that Mr. Robson could describe my action as "absolutely ridiculous."

I don't say Mr. Andrews did trim his bird in the way I suggest, I am only combating the theory he has himself put forth in self defence. I know nothing whatever as to what Mr. Andrews had done, or not done, but I do know that the bird was not in the state it should have been when I judged it at Bristol. Further, neither of the other Hawfinches in the class were in the same state. I handled them, and examined their bibs to assure myself on this point.

C. A. HOUSE.

The Judging at Llanelly.

Why the Judge Was Changed.

SIR,—In reply to the note from Mr. A. Hirst, in "Twitterings" of Jan. 27, re judging at Llanelly show, I beg to explain the reason why the committee changed the judge. When Mr. Hirst was appointed, he never wrote acknowledging his appointment. I wrote two letters and sent him a schedule, which he never acknowledged. I then sent a prepaid wire and got a reply: "Will come if you want me; writing to-night."

Two days later I received a letter to say that he would come if we required him, but in this he began to talk about the increased cost of travelling, etc.

I may say that Llanelly Society have always been prepared to pay good money for judges, and Mr. Hirst's fee was considerably higher than that of anybody we have written to this year, but he was adding the extra railway fare to this.

Mr. Norman, as soon as he heard about the extra cost of travelling, wrote and asked me to consult my committee with regard to this, and even suggested that he should be released of his engagement. I called a meeting of the committee, and we came to an arrangement with Mr. Norman. At this meeting I reported not having heard anything from Mr. Hirst, and I was instructed to send a prepaid wire. On the receipt of Mr. Hirst's letter I called another meeting, and the committee came to the conclusion that Mr. Hirst was not at all particular about coming to Llanelly, so I was instructed to wire several gentlemen. As a result Mr. Allsopp was engaged, and we were very glad that Mr. Allsopp was able to come. Mr. Hirst is quite right in saying it was by the desire of the committee, but hardly so when he said it was not his fault. I hope this will make everything clear.

HY. WEBSTER.

Canary Breeding and Green Food.

Green Food Not a Necessity.

SIR,—The following may be of interest and possible benefit to some of your readers. I have read for years books and papers of instruction on how to breed Canaries, and I think I am correct in saying that all of them mention a good supply of fresh green food, and most of them warn the reader of the danger of allowing any stale green food to be left in the cages, a danger which I know to be very real.

Now, to fanciers and would-be fanciers living in big towns, especially if they put up many pairs, a good supply of fresh green food is not always easy to procure regularly, whilst others who have not much time during the day to attend to their birds cannot always feel sure that there is no stale green food in the cages.

From the general run of instructions it would appear almost impossible to breed and rear Canaries without green food, whereas I have proved by several years' experience that it is not so, as for the past six years I have discarded the use of it entirely, and have bred as many and as strong and healthy youngsters as when I used it, and with no risk of losing any from the danger mentioned. They can also be kept in perfect health and show condition by the same treatment, in proof of which I have birds four years old in perfect condition that have never seen any green food.

I do not write these lines in opposition to the orthodox methods, and do not wish any reader to change them if they are doing well, but losses in youngsters caused me to experiment, which I did dubiously at first with one pair, and the experience gained proved to me beyond doubt that anyone who has any difficulty with green food can do just as well without it. In conclusion, I may mention that I use the ordinary egg and biscuit and mixed seed.

J. B. HAYTER.

The Federation of Roller Societies.

The Bell Glucke Tour and the Standard.

SIR,—Mr. Montague makes the error that I did some years ago when writing in this journal, CAGE BIRDS. In a jocular moment I used a sentence in an illjudged manner, leaving something to be inferred. Some deduced the humour, others did not, yet it taught me the lesson to write literally, saying only what I mean, and meaning only what I say.

Mr. Montague makes reference to some "intrigue which tried to wreck the formation of the Federation," and also to members with prejudiced minds, and to "some of these gentlemen who have been shouting loyalty to the B.R.C.C. from the house-tops." Am I to take any of these references as personal to myself? I asked for the rule to be held in abeyance until our house was put into good working order. To which he replies, "How much time do they want? Do as we of the Federation did this year, and ring with two rings. What is sauce for the goose is sauce for the gander."

Exactly; I ask for no more time than he is prepared to allow in that answer, and my mind is easy on that point, for now any outstanding clubs can enter on their own free will, instead of, as I thought, being lashed to it. My idea of a time limit would be until such a time as the Federation judging standard was decided upon, and published. Cannot this standard be decided upon by circular to the Federated clubs, Mr. Best, instead of waiting for the next delegates' meeting, for I know there are those who are anxious to know whether B.G. is to find a place thereon.

In my article on the B.G., I endeavour to predict that the B.G. will have its place on that standard, in view of the rapid circulation throughout the majority of the members of the "new B.G." with its lesser propensity to fault.

It is my intention to advocate again that in justice to those fanciers having the good tour a space be properly provided to penalise any faulty rendering, and I do not think that any just-minded fancier will object to this.

I would like at this moment to correct a misunderstanding that occurs in the report of Audley annual meeting. It is my opinion that there are birds singing an objectionable sounding, highly pitched Bell Roll, and it was asked that birds with Sharp Bell, or other highly pitched tours be brought to the meeting, also Hollow Glucke, and Glucke Roll singers. This objectionable tour is not limited to any particular type of singer. This explanation will alter the meaning of the sentence as written by the Audley Secretary.

J. TOMLINSON.

The Trouble About the Exclusion Rule.

SIR,—I was surprised to find Mr. Montague stating in this week's CAGE BIRDS that the drastic rule which he says was passed at a meeting of the Federation delegates was the outcome of the date fixed by the Midland Roller Club for their last contest, and accusing the same club of discourtesy.

I was at the meeting when the date was fixed, and it was fixed to suit our own members, and them alone. A good many of our fanciers had bad luck with their first round, and it was thought that to put the show back a few days would give the unfortunate ones a chance to enter more birds. Most Roller fanciers know a week at that time of the year makes a great difference in the song of young birds. As for being discourteous to Leeds club, as far as I can remember Leeds show or club was never mentioned. Besides, the date was fixed and mentioned in Club Reports three or four months before the show, so that if it had caused so much trouble as Mr. Montague would have us believe, surely their sec., Mr. Best, could have dropped a line to us, and this would have had our careful consideration. To rake it up some six months after, and try to put the blame on us for a rule which evidently does not suit some of the federated delegates is unfair.

If Mr. Montague or anyone else thinks that such a rule will frighten the M.R.C.C. into joining the Federation they are mistaken. The matter has been thrashed out at our meetings, and we have decided not to join. Threats may frighten some clubs, but not a club like ours, over 100 strong, and mostly exhibitors. As for our clashing with the idea of smashing another club's show—well, all I can say, Mr. Montague does not know the type of sportsmen that form the Midland Roller Club. We would rather give them a lift up than a kick down, and we never hit below the belt.

As regards the paragraph referring to the B.R.C.C., I have a rule book before me dated 1914, and I cannot find Mr. M. as a member at that date, so the management of that club should be of no interest to him. He may be a member of the B.R.C.C. for aught I know. If he is, I'm sure a courteous letter to Mr. Norris, the sec., would bring a courteous reply. There is a good reason, I'm sure, why things have been left in abeyance somewhat during this terrible war; lots of things have been left undone that ought to have been done by much more important people than Roller fanciers. I for one shall be proud indeed when our club can point to as great amount of good work done to the Roller fancy as has been done by the B.R.C.C. and its sec., Mr. Norris. Now, sir, I hope you will allow me to finish in the same style as Mr. Best, and that is by saying that any fancier wishing to join a club that is not federated, and where he will not be tied down by any drastic rules or restrictions, our secretary, Mr. Thomson, or myself will be pleased to give him information. Twenty new members joined last month. Vide Club Reports last week.

(Continued from page 90.)

To Straighten Cage Wire.

SIR,—As a reader of CAGE BIRDS, I should be glad if any fellow reader could kindly tell me the best way to straighten wire for cage making?

B. LEWIS.

A Recipe for Egg Cake.

A Reader Obliges With a Cutting.

SIR,—I am enclosing a cutting from CAGE BIRDS regarding egg cake for feeding old and young Canaries, as asked by Mr. McLean in this week's issue.

I am enclosing also a sample of this egg food. When damped with warm water it is ready for use, and I have been giving my birds this twice a week.

G. W. GRIMSDITCH.

"I have been reading a lot of advice lately on the treatment of our pets, but I have not seen much on the saving in the cost of egg food. Some time ago I read an article in CAGE BIRDS on egg bread, and I thank the writer for his advice, which has meant a big saving to me, as eggs have been so dear this breeding season. As directed in the recipe mentioned, I used 1 lb. of finest ground whole wheat meal flour to four eggs, at the cost of 10d., mixed well together, then baked for three hours in a slow oven, then cut up and let it dry. When crushed the egg bread is ready for use. I have found that it will keep thirty-five birds for a fortnight, twenty-five young ones and ten stock birds, and from March to September this will have saved me about 13s. 6d., which I think will pay for the seed used through the breeding season.

"Then, again, I read in a letter in CAGE BIRDS that eggs were too rich a food for hens, causing them to be lazy and leave their young. My hens have not fed better for many a season, and some of my young cocks are now under training; others going through the moult finely. I shall continue to give them this food about three times a week, and I should think if this feed high-class Rollers it should prove all right for others. I have only lost two young on sticks, and if my luck continues I hope to advertise my stock later through your valuable paper."

[The sample received is certainly eminently suitable for the purpose for which it is intended. It is crushed to a fine powder, of which any desired portion may be taken for the day's supply, sweet to the smell, and pleasant to the taste. We should think that nothing better could be suggested for the proper rearing of young Canaries.—Editor, CAGE BIRDS.]

A Black Redstart's Nest on a Railway Buffer.

And a Theory as to the Sexing Experiments.

SIR,—The controversy in CAGE BIRDS about the Black Redstart, sent me to the public library to see what my favourite book on natural history (by the Rev. J. G. Wood) had to say on the subject, and I found he told such a pretty story of a hen Black Redstart that lived so long ago as 1852, that I am copying the exact words of the author:—

"A railway carriage had been left for some weeks out of use in the station at Giessen Hesse, Darmstadt, in May 1852, and when the superintendent came to examine the carriage he found that a Black Redstart had built her nest upon the collision spring. He very humanely retained the carriage in its shed until it was imperatively demanded, but at last had to attach it to the train which ran to Frankfort-on-the-Main, a distance of nearly forty miles. The train remained at Frankfort for thirty-six hours, and was then brought back to Giessen, and after one or two short journeys came back again to rest at Giessen, after a period of four days.

"The young birds were by this time partly fledged, and finding that the parent bird had not deserted her offspring, the superintendent carefully removed the nest to a place of safety, whither the parents soon followed. The young were, in process of time, full fledged and left the nest to shift for themselves. It is evident that one, at least, of the parent birds must have accompanied the nest in all its journeys, for, putting aside the difficulty which must have been experienced by the parents in watching for every carriage that arrived at Giessen, the nestlings would have perished from hunger and cold during their stay at Frankfort, for everyone who has reared young birds is perfectly aware that they need food every two hours. Moreover, the guard of the train repeatedly saw a red-tailed bird flying about that part of the carriage on which the nest was placed."

Then, again the discussion as to sexing birds with a needle threaded on silk and a coin has interested and amused me. When I was young we often used to suspend a wedding ring on a long human hair, holding both ends with the right hand so that the ring reached halfway down inside a glass tumbler. Then somebody asked a question, and presently the ring began to sway backwards and forwards, and tap the glass at intervals, spelling out the answer.

A white hair or a cotton thread would not serve the purpose. Why? Because the fine hair was elastic and the steadiest hand could not hold it quite still for any length of time, but I am sure the mind could direct the taps.

I have an idea that silk is slightly elastic, too, and what I want to know is, in any case, why the sex of the person that holds the needle is not determined by this means as well as of the subject.

Perhaps here may be found a reason for the needle sometimes going round as well as across, as one of your correspondents experienced. It must be something like thought reading (it can't be magnetism, because there is no completed circle), and the dominant mind must be the subject. In this case it is stated that the subject, a bird or animal, rules the experimenter, and, through the holder of the thread, rules the needle. In animal magnetism you rule the subject, if it is pliant enough; if not, you come to a standstill.

I should think an old fancier would unconsciously know the sex of the bird from its shape, having handled so many, and in the case of a human being the same thing applies to the hand holding the thread. Most of us, after a few years of breeding, can tell at the end of four or five days if the eggs of a bird are fertile or no, without taking them out of the nest, and it is quite possible that one could form a very good opinion from the shape of them what sex they contain.

I am sending you a letter from France (and a stamp for its return), that you may see CAGE BIRDS safely reaches the trenches and gives pleasure, even in such surroundings. I do not know the young man, but as I saw an appeal for back numbers which you had so kindly responded to, I sent some of my own copies. Some other of your readers might just post their copies on as I do. The Editor of the "Saturday Westminster" supplied me with the address on application, and I expect he could supply many more.

(MRS.) E. M. SARGEANT.

The Proposed National C.B.S.

A Poor Response.

SIR,—I have not received nearly enough names to justify my calling a meeting for formation, so perhaps a few remarks as to what I think the chief objects of such a society should be, will be appreciated. The first should be the holding of an exhibiton worthy of the name, and one which every fancier would endeavour to win at. There should be a council to which fanciers could appeal in cases of disqualifications; we want no further proof of this than the late Halifax case. All societies could be affiliated to the National, such application to give them the right to nominate one member on the Council. Then there is the treatment he gets at the hands of the railway companies. This could be dealt with better jointly than single-handed, and there are many more things that such a society could do for the benefit of the fancy. But it is no use starting with less than 200 members, so if I do not secure that number of post-cards from fanciers who would join, I shall let the matter drop.

J. BASTOCK.

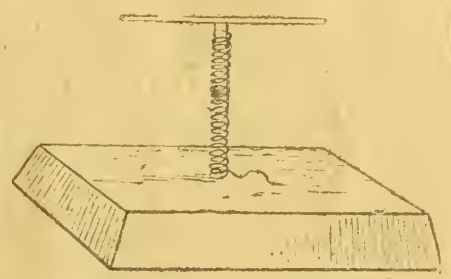
Springfield Road, Moseley.

Exercise for Cage Birds.

A Novel Appliance which Affords Birds Exercise and Amusement.

SIR,—After reading so many good hints for bird lovers contained in CAGE BIRDS, I thought a few lines about my "blind donkey," would be of interest to my fellow readers. I might mention that the name is the one given by my wife to the contrivance as soon as she saw how it operated; I named it the birds see-saw.

The first thing is to get a coil spring, one out of an old gig lamp, the spring that pushes the candle up to maintain the light answers perfectly, but of course any of the same pattern will do. Now get a block of wood six inches square, and at least an inch thick; if you have none of that thickness nail two or more pieces together until the thickness is obtained. Now fasten one end of the coil spring in the centre of the block so that it stands straight up as the block lies flat. I find the best way to make a sound job of this is to uncoil one or two turns of the spring, then bend it in a zig-zag way, and nail the part so bent fast to the block; small staples are fine for this. Next get another piece of wood of a thickness to let in the top end of the spring. This must be only about two inches long, for if it is too long it will prevent the spring from bending. Now nail another thin piece of round wood firmly to one end of this, to act as a perch, being careful not to have this piece too thick or too smooth, for the birds must be able to grasp it firmly. The wood that fits in the end of the spring should not be fastened with nails, for this, if unnailed, can be easily taken out and washed without wetting the spring, thus preventing it getting rusty; just fit it in the top of the spring, and the "blind donkey" is finished; of course, it may be enamelled if desired. My contrivance when in use stands on the floor of the flight; the birds may be shy the first day, but the second day they will fight for it.



MR. ARNOLD'S "BLIND DONKEY."

In my opinion the "blind donkey" is far before a branch or swing, or anything I have ever seen, for the amusement of the birds, for the moment the bird gets on the crossbar it begins to swing backwards and forwards, and often you can see one on each end swaying to and fro, as though they had been taught exactly what to do to make it work.

I visited a fellow breeder in Stourbridge the other day, and noticing a suitable spring in his bird room, I asked if I should make him a "blind donkey." Of course he had no idea what it was going to be, but as soon as he saw the way it operated, and the grand exercise it afforded the birds, he said: "I'll have one in all the lot."

Should any reader be unable to make the appliance from the above hints, and wishes to ask me any question on the making, I shall be glad to enlighten him, provided he encloses ½d. stamp for reply.

A. H. ARNOLD.

Clovelly, Beech Rd., Norton, Stourbridge.

New Rape Seed versus Old Seed.

Is English Rape Seed Poison?

SIR,—The notes on the Roller Canary in CAGE BIRDS of Jan. 6 supplied by Mr. F. A. Lester, and that Bell Glucke explanation by Mr. J. Tomlinson, must have been very interesting to amateurs like myself, and those who think CAGE BIRDS dear at twopence cannot have much of the fancier about them. I consider we have been getting full value for our money, and a bit more. Reading about the feeding of Roller Canaries reminded one of a discussion in CAGE BIRDS some 13 or 14 years ago. Some of the experts held that rape seed ought to be over a year old before it should be given to the birds, as it contained too much oil when new. Others said it was best when new. If I remember rightly, the discussion finished up where it began, each one holding to his own views. About that time another fancier gave us advice not to use English rape upon any account, as it was simply poison to Roller Canaries. This I doubted, as I had used a good deal of it long before this, and as an experiment I put two hens on English rape and a little Canary seed mixed, and the results were quite satisfactory. We used to get some fine translations in CAGE BIRDS in times gone by, and some of them should be worth printing over again, as Roller fanciers in those days were not so many as now.

METHIL.

To Popularise the Scotch Fancy Canary.

Surplus Birds Should be Cheaper.

SIR,—I think our friend Mr. Dunlop misunderstands the gist of my remarks re the price of the Scotch Fancy Canaries. What I meant to convey is the price of them, in comparison with either Yorkshire or Norwich Canaries, to the fancier who neither breeds or keeps birds for exhibition, but simply keeps and breeds a few decent birds as a hobby and sells his surplus as songsters.

Now all Scotch Fancies are not bred up to exhibition standard, any more than are Yorkshires or Norwich, yet one can get decent birds from the breeders of Yorkshire and Norwich Canaries at from, say, 10s. to 15s. each for cock birds and from 6s. to 7s. 6d. each for hens, but I never see any such offers of Scotch Fancies that are not good enough to exhibit.

I freely admit that for exhibition stock one can spend equally as much on any other variety of Canary as on Scotch Fancies, but for my part I neither want to make money out of my hobby nor, at present, to breed for show, but I have often remarked that any bird with the least sign of Scotch or Belgian showing is the first to be admired. I quite believe, therefore, like Mr. D., if they were better known, and if we had a few more fanciers like Mr. D., who has the welfare of the Scotch Fancy at heart, they would again come to the front.

And now, Mr. Editor, might I ask your help with a sketch or two on the front of CAGE BIRDS? We dare not ask for coloured plates while the war lasts, but afterwards who knows what we shall see. Then perhaps Mr. Jowett and I will both become fanciers of the real gentleman of the Canary tribe, the Scotch Fancy.

BIRD FANCIER'S SON.

The Pros and Cons of Inbreeding.

Pedigree Not Necessarily Inbreeding.

SIR,—The correspondence re inbreeding and its results proves that in Canary breeding, as in many other matters, people working in entirely different ways sometimes attain the same object; personally, I cannot understand that in this century any thoughtful person would question the possibility of such an occurrence, and I am convinced that the advocates of inbreeding do not for one moment intend to question such a possibility, but to point out what in their opinion is the most probable and direct way to the desired goal.

One of your correspondents, while objecting to inbreeding, stated that he was a believer in pedigree breeding, an opponent replied that pedigree and inbreeding are one and the same. In Nuttall's Standard Dictionary, however, inbred is defined as "innate or bred within," while pedigree is defined as "lineage, genealogy." Accepting these definitions as correct, it therefore appears to be quite clear that while inbreeding would include pedigree it by no means follows that pedigree must necessarily include inbreeding; this, however, illustrates the somewhat hazy and nebulous definitions and ideas respecting the term "inbreeding." With many people I have met the term conveys nothing more than the haphazard pairing together of closely-related stock (probably brother and sister), and they refer, with contempt writ large on the countenance, to its horrible effects as "proved" by the occasional medical and newspaper "special correspondent" reports referring to some remote country village where the inhabitants are said to be closely related, and where the use of crutches and spectacles is exceedingly common. If promiscuous interbreeding takes place (and as with the human race love or sentiment is frequently the sole determining factor in these matters) I can quite believe that the medical and other reports upon its evils are quite correct, but the difference between this method and the method adopted by the stock-breeder is so great that the results are as different as "chalk and cheese."

No intelligent stock breeder inbreeds merely for the sake of inbreeding; he inbreeds with a specific object; it may be to increase the tendency in his stock to reproduce, say, head points, or maintain and increase the size, type, and stamina, and a long experience has proved to me that it is possible to accomplish any or all of these objects within a comparatively short time so long as an intelligent method is followed. My experience has been chiefly gained in the breeding of fowls, my primary object being to increase size, stamina, and egg production, and the results obtained have shown a continuous improvement, and, after making allowance for what was probably suitable material to work on, I may say the cumulative results have been simply astonishing.

For several years past I have experimented with Canaries on the same lines, with a view to producing a show bird, or birds, and, although the orthodox method of pairing together the two colours yellow and buff was something of a stumbling block during the first year or two, yet on the whole the method might reasonably be said to have been justified by results.

I regret that the correspondence appears at present to be left in a somewhat unsatisfactory position, and hope that it will again be taken up by your readers.

R. GIBDIE.

(Correspondence continued on next page.)

CORRESPONDENCE.

(Continued from page 91.)

"A Thought for the Birds."

SIR,—In CAGE BIRDS of Feb. 10 I see that Mr. E. G. Fairholme, chief sec., R.S.P.C.A., is asking us to feed the birds outside during bad weather, so I have pleasure in sending you one of my poems relating to same. If you think it worthy of your valued paper I shall be pleased, as I take a great interest in feeding the birds outside my aviary.

GEORGE TAYLOR.

DON'T FORGET.

Don't forget the little birdies,
Now the frost and snow has come;
Can't you see them through the window,
Waiting for a welcome crumb?

All the berries in the woodland
Now are hard as any stone;
Forced with hunger—they are driven,
Just like beggars, to your home.

All the insects now lie dormant,
All the worms are down below,
Out of reach of all the birdies,
Sleeping underneath the snow.

Some of you who do believe in
Feeding children free at school,
Give free meals to all the birdies;
Sure this is a golden rule.

Thrushes, Blackbirds, Larks, and Starlings,
Housetop Sparrows by the score,
Bullfinch, Chaffinch, Linnets, Redpolls,
Crowd around my own back door.

If I could; but, then, I cannot,
I would just cage every one,
Care and keep them—what a pleasure—
Till the winter months had gone.

They are songless through the winter,
But the time will soon be here,
When they'll break forth in thanksgiving,
When the springtime does appear.

Then, Oh, then, you'll give them welcome,
Wandering from the busy throng,
To the woods where you will find them—
Nature's bards rapt in full song.

But I need not now remind you,
Winter time is with us yet;
Save your crumbs for little birdies,
They are hungry—don't forget.

What is a Ticked Bird?

Some Slight Corrections.

SIR,—I am sorry the printer is responsible for one or two slight errors in my letter in your last issue, which, however, would not, I think, lead to any misunderstanding.

In subdivision 5 "slightly" should read "lightly." In subdivision 6 the word "not" should be omitted.

My reference to Mr. Midgley's letter was to the one in your issue of 13th Jan. (not 31st Jan.).

OLD HAND.

Could it Go in Two Classes?

SIR,—I read in CAGE BIRDS of Feb. 10 that "a bird broken in colour is variegated," also that "any two colours make variegation." Nothing is said as to the proportions of the "two colours." Is a ticked bird, therefore, "broken in colour"? And does it possess "two colours," yellow (or buff) and green? If so, in the Aberavon Show, would a ticked bird be eligible in Class 55, "clear or ticked," and also in Class 56, "uneven or variegated"?

PUZZLED.

A Vote for the Judge.

SIR,—I have been greatly interested in the above controversy, and as Mr. House asks the question as to what class Messrs. Stubbs' bird should have been entered at Aberavon I certainly should say Class 55, "clear or ticked." How anyone could enter such a bird in class 56 "uneven or variegated," I cannot understand.

If there were more uniformity in the wording of the schedules it would make things more pleasant for exhibitors and judges alike. Nothing beats the old time reading "a class for 'clears,' or better still "clear or invisible tick," (for many a clear has been found to have a tick whilst being tubbed), and a class for "ticked, marked, or variegated." According to the Aberavon classification the even-marks could only come in the A.O.V. Bit rough this, even though they are few and far between.

If a vote were taken on the question, outside of personal influence, I feel sure that class 55 would come out on top by long odds and prove Mr. House to be in the right.

J. H. HALLIDAY.

Many Ticks Do Not Make One Mark.

SIR,—I must congratulate you and our artist, Mr. Norman, in reproducing the sketch of Messrs. Stubbs Bros.' Norwich Canary; it is a very typical bird indeed. If the drawing is anything to go by, I consider the bird ticked undoubtedly. You cannot confine yourself to one slight mark as denoting one tick. In this particular bird you have a plurality of marks (ticks), and you would not in all reason consider these marks technical. Naturally one would look for solid marks to exist on other parts of the body to classify the bird as a marked specimen. I hope in the interest of the fancy that the Norwich Plainhead Club will take the matter up and give us a definite rule once for all as to what constitutes a ticked bird.

MANXMAN.

The Point at Issue.

SIR,—The letters which are appearing do not get us any nearer the subject at issue. It is of no use being personal; this does not do any good whatever. Mr. Johnson quotes my letter in a contemporary of some 20 years ago re variegation. Let me tell him that I am still of the same opinion. But we are not arguing variegation, we are trying to define the classification of the ticked bird, and to know which class at Aberavon show Messrs. Stubbs' bird should have been shown in. Now I have read Mr. House's wording of the schedule I am convinced he was right.

C. E. SILK.

[We venture to think that the correspondence to which we have allowed so much space is directed to the solving of a much greater question than whether Mr. House was right in disqualifying the bird at Aberavon. If it results in the prevention of similar misunderstandings in the future our space will have been used for a good purpose, but if Mr. House's decision is the only point at issue the correspondence may as well be closed.—ED. CAGE BIRDS.]

Another Suggested Classification.

SIR,—Mr. House asks who is right, himself or Messrs. Stubbs. After reading the heading of classes 55 and 56 as stated in CAGE BIRDS of Feb. 10, I feel more strongly than before that the bird was in its right class. Therefore, giving an impartial opinion, I say, Messrs. Stubbs.

The bird can be fairly classed as uneven, but according to the sketch I share the same views as Messrs. Stubbs, that the bird is a lightly variegated.

Regarding Mr. Jowett's suggestion that the bird is purely and simply a "speckled" one, I think the word "mottled" as applied to pigeons would be a more suitable definition, but how Mr. House makes it a ticked bird I fail to understand. A tick is a tick and nothing more, and I would accept Nuttall's before any concocted definition, that a tick is a small mark not larger than a pin's head.

I beg to submit the following classification which I think would meet all possibilities and save disputes:

1. Clear or invisibly marked.
2. Single visible uneven marked.
3. Two visible uneven marked.
4. Three or more uneven marked.
5. Technical even marks (both eyes, or both wings or both sides of tail, or all combined).
6. Mottled or multiple ticked.
7. Self green.
8. Self cinnamon.
9. Broken green.
10. Broken cinnamon.

J. KERSHAW.

The Judge on Classification.

SIR,—The contest waxes warm, but some of your correspondents are leading us far away from the original purport of the matter, viz., "Was my action at Aberavon right or wrong?"

Mr. Jowett seeks to make confusion more confounded by suggesting "splashes and speckles." Would it not be better for us to get out of the imbroglio we are already in instead of plunging deeply into another? That is if we are in a muddle. Personally, I have never yet failed to satisfy myself as to whether a bird is ticked or marked and I cannot understand why others should.

Mr. Foxen suggests a new definition. But is it logical? All fanciers with whom I have ever discussed classification have been agreed that a bird to be "marked" must have a solid mark of some kind. It is the first time I have ever heard of "grizzle marks." Mr. Foxen should remember that all technicalities puzzle novices. A child at school does not commence with words of six or seven syllables, but with A, B, C. If novices are willing to learn and seek knowledge from CAGE BIRDS, from the many books which we now have, and from their fellow fanciers, they will in time master all the technicalities. But by whatever names you classify the different ticks and marks they would be just so much Greek to the uninitiated novice.

Mr. Johnson is not satisfied to discuss this question. He opens up another concerning my disqualification of Capt. Hamilton-Jones' even marked at Cheltenham on Nov. 18th, 1896. A case not on all fours with this at all. I had judged a class for "Ticked or Variegated Norwich," and then when I came to the "A.O.V. Canary" class I found an evenly marked Norwich, which I at once disqualified, because it was obviously a variegated bird, and should have been in the class provided for it in the Norwich section. Mr. Johnson admits I was right in 1896, so I cannot see the aptness of his quotation. Where was the hole in my coat in 1896?

But that is not Mr. Johnson's point; he seeks to trip me by my words of twenty years ago. I said then, as I say now, that "any two colours make variegation." But that does not make Messrs. Stubbs grizzle backed buff eligible for the "uneven or variegated" class at Aberavon. Had class 55 read "clear," and not "clear or ticked," my action would have been wrong.

Ticks and marks are degrees of variegation, and it is for the judge to be guided by the particular schedule under which he is judging, and the birds which are at the moment before him.

Generalities are all very well in conversation of this kind, but they are altogether out of place when a judge is making his awards. In my opinion a judge cannot stick too closely to the schedule. Exhibitors enter by the schedule, and as they are bound by its wording, so are the committee which issued it, and the judge who has to work to it.

Mr. Johnson's letter is a long one, but I cannot see that he has helped to answer the question. Every ticked bird is a two-colour bird, even as is a variegated one, and Mr. Johnson's fancy knowledge is not great if it needed an old discussion of twenty years ago to teach him this. What a happy coincidence that his friend, Mr. Sam Cook, should give him that particular volume of "Fur and Feather," just now when Mr. Johnson so much needed it to help in this discussion. A mere coincidence? Certainly!

"Old Hand" would lead us into a veritable labyrinth of classification. What we want is not terms that are more involved than those now in use, but greater simplicity. It seems simple to talk about the size of a sixpence. But should it be a modern King George sixpence, or an early Victorian sixpence? They differ in size. I agree with "Old Hand," we do want "clearness and precision." Personally, I think we have it when we stick to the definitions "clear," "ticked" "unevenly marked," and "evenly marked." But when we branch off into "Invisible ticks," and "variegated" we are courting trouble.

Mr. Allsopp charges me with attempting to shift the onus of the responsibility of my action at Aberavon upon the shoulders of others. This is news to me. So far as I know I have stood my corner right through, and have not attempted to shift any responsibility. On the contrary, I have reiterated the position I took up at the show. This is no personal matter, and I am not going to make it one. Therefore I decline Mr. Allsopp's invitation to name those judges who take the line of least resistance. They are known. By their deeds the Fancy knows them.

As to my failing to grasp the fact that I was judging Norwich and not Yorkshires at Aberavon. What does Mr. Allsopp mean? Are judges to have one standard for the ticks and marks on Norwich, and a separate one for each and every other variety? If such was the case we should indeed be in a maze, and a stock question would be—When is a tick not a tick? A Norwich tick would not be a Yorkshire tick, and a Yorkshire tick would not be a Border tick, and so we should go on through Crests, Belgians, Whites, and others. In such a case not only would Mr Foxen's novice be in a fog, but even our most experienced judges.

I should like to explain to Mr. Allsopp what he evidently has failed to grasp thus far, and that is the Yorkshire Union is not a Yorkshire Canary Specialist Club. It is a body which governs the working of the many societies which are affiliated to it. I am not a Yorkshireman, neither am I a member of any society affiliated to the Yorkshire Union, and have no wish to thrust it or its rules down the throat of anyone. But surely I have a right to quote those rules in defence of my action at Aberavon? I have been asked for authorities, I have given them, and now a new Daniel comes to judgment, and condemns me for so doing.

The position taken up by Mr Allsopp is difficult to understand. He says he disagrees with me as a fancier, but not as a judge. Yet farther on in his letter he tells us he accepts this bird as a marked bird. Here he contradicts himself. He speaks of Llanelly show, but he does not give us the classification.

It is quite possible that at some shows Messrs. Stubbs and myself would agree as to which class the bird should be in. At Aberavon we did not. Mr. Allsopp finishes his letter by saying a lot of nice things about myself; for this I thank him, and may say that so far as I am concerned in this matter I know no man. I did what I considered my duty at Aberavon, and I have since defended my action because I have been asked to do so. Because Messrs. Stubbs or anyone else differs from me there is no reason for ill-feeling. The man who cannot agree to differ with another and yet be friends is no fancier and no sportsman. We cannot all think alike, but surely we can give one another credit for being honest and sincere in the convictions we hold, even as do politicians, who often in public life are the bitterest foes, yet socially the closest friends.

C. A. HOUSE.

Judges Not Afraid of Brickbats.

SIR,—Underlying Mr. House's letter there is a current of strong feeling, and his remark that we said we would not show under him again goes to prove this. I am not in a position to say whether this is true or not because I was not at the show myself, it was my brother, and he is now in the army, but I am writing him to find if such a thing was said or not. This much I know, that whatever was said at Port Talbot the attitude Mr. House adopted when approached upon the subject fully deserved it. I have a suspicion that it is not true, because had it been said I do not doubt it would have been in print long before now.

It is amusing to see how Mr. House clutches at those men that support him. He appreciates Mr. Cook's remarks; he agrees with Mr. Spink; and he has no hesitation about the opinion expressed by Mr. Collins, but when it comes to Mr. Johnson, well, I will draw the line.

Mr. House has not yet proved that he was right in "wrong classing" our bird. He does not seem to be able to give a definition of what a tick should be; he can only quote the Yorkshire Union and Blakston. Against the Yorkshire Union rules we have nothing to say; they were no doubt passed by a vote and it is the duty of the members to go by those rules, but, as Mr. Allsopp says, we Norwich men are not going to have these rules pushed down our throats. We have our specialist clubs, and it is for them to decide what should constitute a tick in the Norwich Canary.

Mr. House says that he cannot see that any other form of classification is needed other than that at shows held under the jurisdiction of the Yorkshire Union. Perhaps not, but perhaps there are others that do, and I can assure him that at present we do not come under its sway as he so fondly believes.

Mr. House asks if it would have been right to ask the Aberavon society what a ticked bird should be. He was not asked to do so. Had he asked them what was the generally accepted tick, seeing that there are no rules, it would have been a different question altogether. The suggestion that as some of the society knew to whom the bird belonged it might sway their decision is nonsense. Why should that make any difference?

We gave the wording of the class under which we exhibited our bird, and Mr. House then quotes Tennyson. We do not think this at all brilliant. We left it to fanciers' intelligence to know that there was a class provided for ticks, or how would there have been any trouble. Of Blakston we have very little to add to our previous remarks, except to say that as regards the breeding of a Norwich Canary we could give him a few lessons; we do not rely upon others, but use our own brains, and this is the only way in which a fancier will meet with success.

Mr. House asks readers to note that none of the Aberavon committee have said that he was wrong. It should also be noted that neither have they said he was right. We do not cry out for the opinion of others, we can stand on our own ground. Why not do the same?

Now, Mr. House, it is for you to prove that you did the right thing in wrong classing the bird, the opinion of four judges is recorded against you. Had they done what you did, we should have been bound to confess that we were in the wrong. I disagree entirely with your statement when you say they are afraid of the brickbats. I do not know many of our judges, and we show our birds without fear or favour, but of this I am certain, they would not hesitate to do the same as Mr. House did at Port Talbot, did they feel justified in so doing, and it is not right for Mr. House to say otherwise.

STUBBS BROS.

HEALTH & STRENGTH

Deals with all kinds of athletics, including Foot ball Wrestling, Boxing, Weight Lifting Fencing Running, Ju-Jitsu, Gymnastics of all kinds Swimming, &c., &c. Gives free advice on all questions of Health, Diet, &c. to all readers. EVERY THURSDAY, 1d. Sold Everywhere. SHOWS.

(Continued from page 87.)

ABERTILLERY.

Abertillery (Six Bells), F. and F.S. eighth annual open show, Feb. 7. Unfortunately entries did not realise expectations, still the quality was very fine. In Yorks, Messrs. Newell and Pritchard put down grand teams, the latter also staging a splendid team of Norwich. In British the charming Waxwing exhibited by Mr. Burrows was much admired, as also were the brace of Bullfics put down by Mr. G. Edwards. Three specials presented by Mr. Mortimer for highest points: 1, Newell (51 points); 2, Pritchard (42); 3, Edwards (32). The sec., Mr. W. J. Baker, is an ideal official, and had everything well in hand, and judging by the attendance the show would turn out a great financial success. Mr. A. W. Hill judged Yorks and Borders, Mr. H. H. Mortimer the remainder.

YORKS. YELL. CK.: 1, 4, vhc, Newell, cl., grand col. and qual., neat head, grand shoulders and back, splendid length and pos., fine nerve and leg; 2, Pritchard, cl., tip-top col. and qual., fine head, grand back, flights and tail, well up on leg, hardly length of leader; 3, Griffiths, eye and wing mkd., another good one, close up, splendid col. and qual., fine length, good wings and tail, grand leg and pos.; hc, Blackmore; c, Powell. BUFF: 1, 3, hc, Newell, nice col. and qual., good head, neck, and shoulders, splendid flights and tail, nice pos. and nerve, good leg; 3rd, nicely moulded throughout, lovely col. and qual., nice leg, pos. and nerve; 2, c, Pritchard, eye and wing mkd., tip-top col. and qual., beautifully moulded, splendid length, grand nerve, nice pos. and leg; 4, Griffiths; vhc, Powell. YELL. HEN: 1, Griffiths, cl., nice col. and qual., splendid shoulders and back, grand wings and tail, fine length and pos., stands well; 2, 3, Newell, cl., grand type and qual., nicely moulded, hardly length of leader; 3rd, eye and wing mkd., fine col and qual, neat head and shoulders, good back, flights and tail, nice pos. and leg; 4, c, Blackmore; vhc, hc, Pritchard. BUFF: 1, 3, Newell, neck and wing mkd., nice col. and qual., clean cut, very stylish, fine length, well up on leg; 3rd, eye mkd., splendid col and qual., nice head, well moulded body, capital flights and tail, good nerve and pos.; 2, 4, Pritchard, neck and wing mkd., splendid type, good head and neck, fine shoulders and back, lovely col. and qual., nice pos. and leg; vhc, Griffiths; hc, c, Powell. NOV. CK.: 1, 4, Webber, var., neat head, nice shoulders and back, capital length, good nerve and leg, tip-top qual. and cond.; 2, Thomas, cl., nice col and qual., splendidly moulded, fine leg, pos. and nerve; 3, vhc, Scott, cl., neat head and shoulders, good flights and tail, lovely col. and qual., very nervy, nice pos. and leg; hc, Hyde. HEN: 1, Scott, Cinn. mkd., lovely col and qual, splendid type, plenty of length, good nerve, pos. and leg; 2, Thomas, cl., close up, neat head, good shoulders and back, nicely moulded, fine qual and cond, stands well; 3, 4, Webber, capital length, grand nerve, nice pos. and leg, well moulded throughout; vhc, Hyde. BORD. YELL. CK.: 1, Cooper, cl., nice col. and qual., well moulded, in capital order. BUFF: 1, Lycett, cl., neatly moulded, nice col. and qual., very jaunty; 2, Cooper, lovely col. and qual., fine type, well moulded throughout. HEN: 1, Lycett, eye and wing mkd. yell., lovely col. and back, very typical, put down in grand order; 2, Cooper, cl., capital type, lovely col. and qual. NOR. YELL. CK.: 1, Pritchard, wing and head mkd., grand col. and qual., nice subs, specimen cond. BUFF: 1, Lycett, wing mkd. Buff, lovely head and neck, nice subs, fine cond and col. HEN: 1, Pritchard, cl. Buff, good col. and qual., neat head, nicely moulded, well put down; 2, Lycett, nice type and qual. NOV.: 1, 2, Lycett, cl. yell., neat head and neck, nicely moulded body, good wings and tail, fine col. and qual. A.O.V.: 1, 2, 3, 4, hc, Edwards, well known Crests and Crestbreds, in grand order. MULE: 1, Jones, Dk. Goldf., nice size, good col. and qual., tip-top order; 2, Phillips, var. Goldf., nice col. and qual., very shapely. HARDBILL: 1, 2, Edwards, both Bullies, nice size, good heads, fine, dense caps, good breast col., lovely qual. and cond.; 3, Jones, Goldf., nice size, good square cut blaze, fine tans, bars and buttons, inclined to be wild; 4, Thomas; vhc, Lewis. SOFTBILL: 1, Burrows, Waxwing, a real gem, fine size, lovely col and qual, staged in perfect order. SELL.: 1, 3, Griffiths; 2, Cooper; 4, Edwards.

GLASGOW AND WEST COUNTIES CLUB.

Annual show, City Good Templars Halls, Ingram Street, Jan. 27. The show proved a gigantic success both numerically and financially. Entries reached the respectable total of 613, an increase of 129 over last year, and a record for a club show in Glasgow this season. The hall is very suitable for an exhibition, having good light and an even temperature of heat kept the exhibits in good order, despite the intense cold that prevailed.

Norwich were a very even lot. The wee gems made a good show, and many well-known winners were on exhibition. The increased classification in the Yorkshire classes met with unbounded success, and the fanciers of this variety are to be complimented. The class for Lizards maintained its inception, and Secretary Adam states that quite a number of enquiries have been made of late anent this charming variety. Mules were a fairly balanced lot, and here the evergreen Mr. Pettigrew was still to the fore.

British made a good show, and were quite the feature of the exhibition, some grand specimens being on view. The Foreign class contained only one entry, a Waxwing.

The management was all that could be desired. Composed of sterling fanciers of ripe experience, they were ably led by President Cross, and are as under: — President, Mr. Cross; vice, Messrs. Finalay, Barrie, Brown, and Dinwoodie; committee, Messrs. Dick, Cassells, Cochrane, Hamilton; treas., Mr. Whitelaw; sec., Mr. J. H. Adam; auditors, Messrs. Thomas, Fitzpatrick, and Steel.

The society's cups were won as follows: Norwich cup, Dick; Crest, Brown; Border, Gillies; Mule, Pettigrew; British, Hamilton. Judging was got through in good time, but the great array of spls. took some little time to get over. The judges were: Norwich and Yorks, Mr. A. McFarlane, Glasgow; Borders, Mr. A. Walker, Glasgow; Mules, British, and Foreign, Mr. J. Cranna, Auchterarder; and their awards on the whole were well received.

Young Birds.—Nor., Cl. or Tkd. Yell. Ck. (9): 1, Brown; 2, 4, Dick; 3, Findlay; 5, Blair; 6, Adam. Buff (8): 1, 3, Dick; 2, 6, Findlay; 4, Blair; 5, D. Dinwoodie. Var. Yell. Ck. Members' Shows.

NOTE.—Secretaries will greatly facilitate the work of ourselves and our printers if they will kindly endeavour to send their reports as nearly as possible as they see these accounts printed, and it they will also write the names of exhibitors as distinctly as possible.

SOUTH SHIELDS C.B.S.

Annual pair show, Feb. 3, headqnarters, "The Cyprus." About 60 birds. J. Riseborough judged. Nor. Yell. Ck., Buff Hen: 1, Thompson and Pattison; 2, 3, Foreman. Buff Ck., Yell. Hen: 1, 2, Learmount; 3, Thompson and Pattison. Bord. Yell. Ck., Buff Hen: 1, 2, 3, Smith. Buff Ck., Yell. Hen: 1, Smith. Crest-breeding: 1, Winter. Mule: 1, Smith. Bullf.: 1, 2, Curry. Greenf.: 1, 2, Curry. Linnet: 1, 2, Curry; 3, Smith. Redpoll: 1, Curry; 2, Smith. Softbill: 1, 2, 3, Curry.—W. L. Smith, hon. sec.

ARDWICK AND MANCHESTER.

In place of the usual series of table shows which has been the custom of the society for a number of years, we decided to hold them all as one Jan. 27, at the St. Thomas' Schools, Ardwick. In future, according to the alteration of rules, the society will add another fixture, the members' Jan. show, commencing 1918. The society's spl. prizes, which include gold medals, rose bowls, etc., for highest points, will count from this show. This year, 1917, the points will count as in previous years. The show did not get the support anticipated, only 70 entries. Rev. J. W. Wragg judged Canaries, and Mr. S. S. Oldham British; their awards were highly satisfactory. Specials were won by Messrs. Warburton, Garbutt, Moss, Spencer, Fairhurst, Burston, Hubbard, Thorpe, and Emms.

Open, Nor. Yell. Ck.: 1, 2, Thorpe. Buff: 1, 2, Thorpe. Yell. Hen: 1, 2, Thorpe. Buff: 1, 2, Thorpe. Amat., Yell. Ck.: 1, 4, Warburton; 2, 3, vhc, Spencer; hc, Garbutt. Buff: 1, 3, Spencer; 2, Garbutt. Yell. Hen: 1, 3, Spencer; 2, Garbutt. Buff: 1, 2, 4, Warburton; 3, hc, Garbutt; vhc, Spencer. A.O.V.: 1, Garbutt. Nov., Yorks. Yell. Ck.: 1, Burston; 2, Akitt. Buff: 1, Akitt; 2, Burston. Yell. Hen: 1, Akitt. Buff: 1, Akitt. Nor. Yell. Ck.: 1, Emms; 2, Cartwright. Buff: 1, Emms. Yell. Hen: 1, 2, Moss; 3, Davis. Buff: 1, 2, Emms; 3, 4, Davis; vhc, Cartwright. Goldf., etc.: 1, Strafford; 2, Fairhurst. Greenf.: 1, Moss; 2, 4, Fairhurst; 3, Williams; vhc, Austin. Redpoll, etc.: 1, 3, Fairhurst; 2, Strafford. Goldf. or Bullf.: 1, 2, vhc, Mays; 3, Jobling; hc, Atkinson; c, Graham. A.O. Brit.: 1, 2, Jobling; 3, Readman. Mule or Hym.: 1, Allinson; 2, Ditchburn; 3, vhc, Jobling.—J. S. Campbell, sec. (Please see note at head of Members' Shows.—Ed.)

GOLBORNE ROLLER SOCIETY

First show of the society, Victoria Hotel, High Street, Feb. 10. Mr. Geo. Smith, Newtown, Wigan, judged. Considering the conditions, the entries were very short, only six competing for the four prizes offered.

1, J. Owen, 6 HR, 3 HB, 3 BR, 2 S, 2 F, 4 WG, 1 WR, 2 BR, 4 GE—total 27, very good bird; 2, 4, E. Cook, 2nd, 4 HR, 2 HB, 3 BR, 3 S, 2 F, 3 WG, 2 WR, 2 BR, 1 BT, 4 GE—total 26, very nice bird; 4th, 4 HR, 2 HB, 3 BR, 2 S, 2 F, 4 WG, 1 DBWT, 1 BR, 1 BT—total 23; faults, 1 Auf, 1 TBT—net, 21; 3, Geo. Unsworth, 6 HR, 3 HB, 4 BR, 3 S, 3 F, 1 BR—total, 20.

There were a good many visitors to view the birds and hear them sing. A meeting was afterwards held and a good many members joined the society. It was decided to join the National Roller Federation, and meetings will be held at the Victoria Hotel, headquarters, the first Sat. in each month at 7. Mr. Ernest Cook was appointed President.—P. Ashcroft, sec., pro tem.

WEST LONDON F.A.

Annual pair show, headquarters, the Windsor Castle, King Street, Hammersmith, Feb. 1st. Entries were very short in most classes, though two very fine classes of Norwich were entered in Champ. section. Yorks were few in numbers, but good in quality, Mr. Bonniwell putting down a fine team. Mr. R. L. Crisp was down to judge, but through indisposition was unable to officiate, Mr. Dewhurst taking his place. There are three sections, Champ., Amat., and Nov., all with the same number of classes, and qualifications.

Yell. Ck., Buff Hen: 1, hc, Bonniwell; 2, c, Chappell; 3, vhc, Butterfield. Buff Ck., Yell. Hen: 1, 3, vhc, Butterfield; 2, c, Bonniwell; hc, Chappell. Yorks: 1, 2, 3, Bonniwell. Class 4: All Bonniwell. Classes 8, 9, 10, 11, Amateurs, all to Beavington. Nov. Nor.: 1, Martin; 2, Hollingsworth; 3, Carr; vhc, Snow. Class 16: 1, Hollingsworth; 2, vhc, Carr; 3, Martin; vhc, Snow. Yorks: 1, 2, Starsmere; a few very nice Hybrid pairs were shown, honours being divided between Beavington, Snow, Starsmere, Hollingsworth, and Martin.—H. Chappell.

Y.C.C. OF SCOTLAND.

Members' show, Central Hall, Bath Street, Glasgow, January 27. Entries were fairly good considering a number of members are on active service. 70 birds were staged, among which were some splendid specimens in both champion and novice classes. C. Martin, Glasgow, judged, and gave entire satisfaction. Champ. (Old).—Cl. or Yell. Ck. (11): 1, spl, Wood; 2, Park; 3, spl, hc, c, Heggie; 4, spl, Findlay; vhc, Pinnock. Buff (8): 1, hc, c, Heggie; 2, spl, Park; 3, Pinnock; 4, Hilson; vhc, Ross. Cl. or Tkd. Yell. Hen (5): 1, spl, Pinnock; 2, spl, Heggie; 3, spl, Park; 4, spl, Hilson; vhc, Wood. Buff (7): 1, Pinnock; 2, Heggie; 3, McLellan; 4, Wood; vhc, Hilson; hc, Ross; c, Findlay. Var. Ck. (6): 1, McLellan; 2, spl, 3, spl, vhc, Heggie; 4, hc, Hilson. Hen (2): 1, spl, Heggie; 2, Wood. Young.—Cl. or Tkd. Yell. Ck. (3): 1, Pinnock; 2, Hilson. Buff (3): 1, spl, Pinnock; 2, spl, Wood; 3, spl, McLellan. Cl. or Tkd. Yell. Hen (5): 1, 4, spl, Heggie; 2, spl, Pinnock; 3, spl, McLellan. Buff (5): 1, spl, Pinnock; 2, Heggie. Var. Ck. (3): 1, spl, Park; 2, spl, McLellan. Hen (2): 1, Heggie; 2, McLellan. Nov. Ck. (5): 1, spl, Findlay; 2, spl, 4, Hilson; 3, spl, Ross. Hen (5): 1, 3, spl, 4, Findlay; 2, Hilson; vhc, Ross.—S. F. Wood, Sec.

LEEDS ROLLER C.C.

Annual members' show, Griffin Hotel, Boar Lane, with a fair entry in three classes, which were judged to perfection by Messrs. Roebuck and Oldroyd (Wakefield). Although the day was bitterly cold and all against good singing, some good scores were returned. Champ. Young Birds: 1, Best, HR 6, HB 3, B 3, S 3, F 2, WR 3, WG 4, BR 2, GE 4, total 30 points; 2, Walton, HR 6, HB 4, B 4, S 3, F 2, WR 2, WG 2, BR 2, GE 4, total 29; 3, Peel, HR 6, HB 3, B 3, S 3, F 3, WR 2, WG 3, BR 2, GE 3, total 28; vhc, Best, HR 6, HB 2, B 4, S 3, F 2, WG 3, BR 2, GE 3, total 25; hc, Kramer, HR 5, HB 3, B 5, S 3, F 2, WR 3, BR 2, GE 3, 26 points, 1 off, 25; c, Best, HR 6, HB 2, B 3, S 4, F 2, WG 3, BR 2, GE 3, total 25. Novice: 1, 2, Atkinson, 1, HR 5, HB 3, B 3, S 3, G 3, F 2, WG 4, BR 1, BT 2, GE 4, total 30; 2, HR 5, HB 3, B 3, S 3, F 2, WG 4, BR 2, BT 2, GE 4, total 28; 3, Simpson, spl. best H. Roll., HR 6, HB 3, B 4, S 3, E 3, WG 4, BT 1, BR 1, GE 4, total 29, 1 off, 28; vhc, Thwaites, HR 5, HB 3, B 3, S 3, F 3, WG 3, BT 1, BR 2, GE3, total 26; hc, Hunter, HR 4, HB 2, B 3, S 4, F 2, WG 4, BT 2, BR 2, GE 3, total 26. Open Any Age: 1, Boyd, HR 6, HB 3, B 5, S 3, F 2, WG 4, BR 2, GE 4, total 29; 2, Gallagher, HR 6, HB 3, B 4, S 3, F 2, WR 2, WG 3, BR 2, GE 4, 29; 3, Taylor, HR 6, HB 3, B 4, S 3, F 2, WG 4, BR 2, GE 3, total 27; vhc, Thwaites, HR 6, HB 4, B 3, S 3, F 2, WR 2, WG 3, BR 2, GE 3, total 28, 1 off, 27; hc, Stones, HR 7, HB 3, B 3, S 3, F 3, WG 4, BR 2, GE 3, total 28, 1 off, 27; c, Best, HR 6, HB 3, B 3, S 3, F 2, WG 4, BR 2, GE 3, total 26.—H. Best, Sec.

HUDDERSFIELD O.S.

First monthly table show of season, Jan. 29, at headquarters, 89 birds staged. Judges, Messrs. F. Sykes and H. Mallinson (Huddersfield). Yell. Yorks Ck. (13): 1, vhc, Bray; 2, A. Radley; 3, W. Buttle; hc, Gledhill; c, Holmes and Schofield. Buff (10): 1, A. Radley; 2, Smithies; 3, Holmes and Schofield; vhc, hc, Whitehead; c, J. H. Beaumont. Yell. Hen (11): 1, Bray; 2, J. H. Beaumont; 3, Holmes and Schofield; vhc, Buttle; hc, c, Smithies. Buff (6): 1, 2, A. Radley; 3, Smithies; vhc, Cheetham; hc, J. H. Beaumont; c, Looney. Unflig. Yell. Ck. (8): 1, Cheetham; 2, Smithies; 3, J. H. Beaumont; vhc, Holmes and Schofield; hc, Looney; c, A. Radley. Buff (11): 1, c, Bray; 2, Armistead; 3, Smithies; vhc, Gledhill; hc, Buttle. Unflig. Yell. Hen (8): 1, c, A. Radley; 2, Morris; 3, Hargreaves; vhc, hc, J. H. Beaumont. Buff (7): 1, 3, Holmes and Schofield; 2, vhc, Bray; hc, J. H. Beaumont; c, Smithies. Cinn. Mkd. Ck. (3): 1, Wood; 2, Morris; 3, Cox. Hen (9): 1, vhc, Wood; 2, Buttle; 3, Smithies; hc, Whitehead; c, Gledhill. Nor. Ck. (2): 1, Jackson; 2, Morris. Hen (3): 1, Morris; 2, Armistead; 3, Jackson. Next table show, Feb. 26. Matched pairs, 2 dark-eyed, 2 cinn. mkd., and 2 Nor. classes. Judge, Mr. H. Mallinson.—A. Lawford, Sec.

MAESTEG C.B.S.

First open district (6 miles radius) show, Co-operative Hall, Feb. 3. Mr. C. Williams (the new sec.), with his energetic committee, are to be congratulated upon the result, seeing that some 130 exhibits were on view. Many were of tip-top all-round excellence, and gave the judge, Mr. E. W. Allsopp, quite a busy time. In Plainheads, Messrs. James, Huntley, and Morgan, each received firsts with typical birds, put down in good order. Of the same excellent standard were the Yorkshires, the red tickets falling to Messrs. Sargent, Phelps, and C. Williams, the latter winning special for best Yorkie. In the British and Mules, a class of 17 field moulted Goldfinches needed some sorting out, the plum falling to Thomas, with an exhibit that fully atoned for its lack of averdupois by displaying a generous wealth of rich-coloured blaze, of correct shape, and was wonderfully steady. The general failing in this class seemed to be a tendency to stage birds with blazes much too dark in colour. The house-moulted Finches were a treat, and Evans richly deserved the first and second, and special for best in show. Other prizes in the section fell to Messrs. Thomas, C. Williams, Mortimer, W. Williams, Evans, James, and Breslauer.

CHESTER-LE-STREET C.B.S.

Sixth annual show, Jan. 13, King's Head Hotel, nearly 200 of the pick of the season's birds were on view. Three or four members could not get their birds to the show owing to being on munitions and other causes, or the entry would have been much larger. Mr. T. C. Crawhall (Newcastle) judged, and his awards met with general approval. Nor. Ck.: 1, Stanger; 2, A. Bailes; 3, J. Briggs. Hen: 1, G. F. Bates; 2, Bailes; 3, H. Briggs. Yell. Ck., 1916: 1, H. Briggs; 2, J. H. Elliot; 3, S. Kendall. Buff: 1, H. Briggs; 2, Elliot; 3, Bates. Hen, 1916: 1, Stanger; 2, H. Briggs; 3, Bailes. Nor. Nov.: 1, J. Taylor; 2, 3, Kendall. Yorks Buff Ck.: 1, Stanger; 2, Ward; 3, Bates. Hen: 1, Bates; 2, Stanger; 3, Towers. Yell. Ck., 1916: 1, 2, Bates; 3, Towers. Buff: 1, Towers; 2, Stanger; 3, Marron. Hen 1916: 1, Towers; 2, Ward. Yorks Nov.: 1, Marron; 2, Clarkson. Bord. Yell. Ck.: 1, 3, Lowerson; 2, Elliot. Buff Ck.: 1, 3, Marron; 2, Elliot. Yell. Hen: 1, 2, 3, Lowerson. Buff: 1, 2, Lowerson; 3, Thos. Bewicke. Green or Cinn.: 1, Lowerson; 2, Elliot; 3, Towers. Foul Green or Cinn.: 1, Elliot; 2, Clarkson. Bord. Nov.: 1, 2, 3, J. Marron. Yell. Crest: 1, R. P. Bewicke. Buff: 1, Stanger; 2, 6, Bewicke. Yell. C.-B.: 1, 2, 3, Bewicke. Buff: 1, 2, Forster; 3, Bewicke. Crest 1916: 1, 3, Bewicke; 2, Stanger. C.-B.: 1, Stanger; 2, 3, Bewicke. A.O.V.: 1, Stanger. Mule or Hyb.: 1, Bates; 2, Stanger; 3, Boyd. Goldie or Bullf.: 1, Stanger; 2, Boyd; 3, Bates. Greenf.: 1, Towers; 2, 3, Boyd. Linnet, H.-M.: 1, 2, 3, Boyd. F.-M.: 1, Boyd. Redpoll: 1, 2, Towers; 3, Forster. Siskin or Twite: 1, Towers. Bunting: 1, Towers; 2, Boyd. A.O. Hardbill: 1, Boyd; 2, Towers; 3, Battersby. Softbill: 1, Bates. Brit. Hen: 1, 2, Boyd; 3, Ward. For.: 1, 2, Ward; 3, Bates. Nat. Col., Nor. or Yorks: 1, Arnold; 2, 3, Stanger. Sell. 15s.: 1, Bates; 2, Stanger; 3, Bailes. 10s.: 1, Lowerson; 2, Stanger. 7s. 6d.: 1, Stanger.—R. Ward, Sec.

Singing Contests.

Announcements of forthcoming contests in the nature of advertisements must be paid for at advertisement rates, two words a penny.

SHEFFIELD.

Linnet contest, Sportsman Hotel, Paternaster Row, Feb. 11; 30 birds sang; 1, Parkett; 2, 3, Wainwright.—E. Phillipson, sec.

KIPPAX.

Kippax Linnet Club headquarters, Commercial Hotel, Members' sing, Feb. 10; 39 birds entered, and some good singing was heard; we had visitors from Castleford: 1, Collinson; 2, 3, Potter. Timekeepers, J. Cooper, A. Cooper; tappers, B. Norton, J. Wallis.—R. Plows, sec.

BARNSLEY.

Dove Inn Linnet Club, Doncaster Road, Feb. 10; 21 birds sang for five prizes, some very good singing again; 9 birds sang over 3 min. in 4: 1, J. Norburn, 3 min. 52 sec.: France, 3.40; Jones, 3.39; Hardman and Wright, tie, 3.23. A novice, Nuttall, is coming to the front very well, beating 3 min. twice in succession.—J. Hardman, sec.

LEEDS.

Open contest, Glassmakers' Arms, Greyhound Place, York-rd., 17 Linnets singing: 1, Marshall and Watson, tie; 3, Buckley.—G. Marshall, hon. sec.

West Leeds Linnet and Canary Association, Linnet contest, Prince of Wales, Feb. 4, 20 birds competed: 1, 2, Goodwill; 3, Adams. Judges, Clegg and Kippling; timekeeper, Goodwill. Canary contest, Viaduct Hotel, Feb. 4, 10 birds competed: 1, Wood; 2, Kippling; 3, Dobson; 4, McNichols. Judge, J. Sellers; timekeeper, W. Moss.—T. Cawood, Sec.

Linnet singing contest for quality, Clarence Hotel, Skinner Lane, Feb. 11, 29 birds sang for four prizes: 1, Bamfield; 2, Johnson; 3, 4, shared, Wigfield and Kilbride; judges, Butterfield and Yewal; timekeeper, Rayner.—T. C. Summers, Hon. Sec.

Nests of Birds, Poultry, etc., should be regularly sprinkled with KEATING'S POWDER, especially when hens are sitting. Don't forget to do this just previous to the eggs hatching, to destroy the Red Mite. Kills all insects. Harmless to everything else.

Queries Answered

For Rules, see last week's issue.

CANARY QUERIES

Answered by CLAUDE ST. JOHN

MOPY AND SOFT.

R. G. M.—Glad to hear that the birds previously advised about are now better. I am inclined to think the two that are now ailing are somewhat exceptional specimens that have not quite accommodated themselves to an unheated room after being reared in a warm one. Individuals vary a good deal in their powers of adaptability in this respect, and whereas one will quickly accommodate itself to the altered circumstances, another will take a much longer time, or perhaps never become quite acclimatised. You would be well advised to keep these birds in a mild temperature, but not overdo it, or place them in the cosiest part of the room until this severe spell of weather has disappeared. Then I think the following treatment will set matters right. Continue the dietary advised before, but instead of the carrot give a morsel of banana on two occasions each week. In the drinking water give six drops of syrup of rhubarb and a crystal of sulphate of soda the size of a small pea for three consecutive days, and afterwards give four drops each of tincture of gentian, tincture of calumba and aromatic sulphuric acid every second day for a week or fortnight, as may seem necessary. The male bird's habit of flying at the others is simply an idiosyncrasy, and is of no importance.

TO KEEP OUT MICE.

A. F. Cundy.—It is not really possible for an absentee to tell the best method of keeping mice out of a bird-room. So much depends upon the position and locality of the room, and its environments. But in a general way the least possible temptation should be put in their way in the shape of waste husks, seeds, foods, etc., left lying about in the room where the mice, once they get in, can find them easily accessible. Keep all stock seeds and foods of all kinds in mouse-proof tins or boxes, and never allow any waste seed from the cages, or loose husks, to remain lying about in the room, or in its near vicinity. If they have already found their way in, then, in addition to these precautions, about the simplest effectual measures you could take short of employing poisons, which are always much better left alone, would be to put down first a course of the Danysz Virus, which you may often see advertised in our columns, and when this has had time to act fully, search out all the holes by which they have gained entrance and fill them with cement, in which you have mixed a proportion of finely broken glass or china. If you look through a few back numbers you will find the matter dealt with in another reply quite recently.

SWOLLEN VENT.

Cleansweep.—The bird seems to be suffering with anal prolapse, and your painting with iodine would only increase its pain and discomfort. If the bird is a valuable one it might be worth your while to show it to a veterinary, who might put matters right by means of a slight operation. Failing this course, I would only advise you to keep it in a moderate-sized cage by itself, continue your present dietary, but omit the chemical food, and keep cage as clean as possible for the time being, so that grit or dirt from the floor does not get a chance to adhere to and irritate the protruding part. To correct the droppings add ten drops of lemon juice and as much Epsom salts as will cover a sixpence to the drinking water every second day for a week, and after this give four drops each of tincture of gentian, tincture of calumba and aromatic sulphuric acid, every second day for another week. Beyond this leave the matter to nature—which may cure the trouble, or it may not; but in any event I do not advise you to attempt any further interference with the swelling, as you term it.

MATE FOR GREEN HEN.

R. V. A.—You ought to have mentioned the colour of the parents of the green hen, and also said what kind of young you wished to produce for preference. If the hen is bred from green stock and you wish to perpetuate this colour, your best course would be to mate her with a self green, yellow or buff, according to the type of the hen. Thus, if the hen is a yellow green, then the cock should be a buff green, and vice versa. If the hen runs light on the throat or vent, you should be careful to select a cock to mate with her that is sound and solid in colour on these parts, and see that the legs and beak are also sound in colour. Any other defects in the hen, such as size, shape, muddy colour, or too profuse or indistinct pencilling, should be similarly compensated by superexcellence in the cock. Of course, this mating is designed to produce self greens, though a sprinkling of foul greens may creep in, more or less, according to the parentage of the hen.

REMEDY FOR CHRONIC DIARRHŒA.

C.B., Waterloo.—You should have given full particulars of your feeding and general treatment over again, as I do not keep queries by me and cannot at the moment refer to my previous reply. But try the following treatment continuously for two or three weeks, and then if the trouble returns when you discontinue it, write again, and repeat the particulars, and also enclose a copy of the previous reply, or say in which issue it appeared and under what pseudonym. Keep the bird in a comfortable temperature, and see that the cage floor and perches are kept as clean as possible. Stick a morsel of cuttlefish in the wires for it to peck at when it likes. In addition to a staple diet of three parts canary to one part summer rape, give a morsel of bread and milk well dusted with carbonate of bismuth, and then sprinkled with maw seed, every third day. On the intervening days give first about half a teaspoonful of rape, which has been boiled for about ten minutes and then wiped dry, and next a similar quantity of a mixture of good sound hemp, niger, teazle, and broken groats, and a morsel of banana—the latter in lieu of any fruit or green food. In the drinking water add thirty drops of infusion of cascarilla and four drops of tincture of opium, every second day for a week, and after this give instead four drops of dilute sulphuric acid and a crystal of sulphate of iron the size of a small pea, every second day for a fortnight.

LOST HIS VOICE.

Roller.—The first and most essential thing to do is to remove the exciting cause of the condition. See that the bird is not exposed to cold draughts nor rapid extremes of temperature, and do not hang it near or over burning lights in the evenings nor high up near the ceiling. In addition to the staple seed diet, give a piece of bread the size of a hazel nut, soaked in cold milk, drained, two drops of cod liver oil emulsion on it, and then sprinkled with soft sugar, every second day for a fortnight, and on the alternate days give a pinch of a mixture of equal parts maw, gold of pleasure and sesame, with about half a part each of linseed and niger, and on these days give also a morsel of banana or green salad if you can get the latter quite free from frost and snow. The tender tips of the inner stalks of celery are an excellent substitute for green salad at this season, and are much relished by the birds. In the drinking water add ten drops of lemon juice, five of sweet spirit of nitre, and as much chlorate of potash as will cover a three-pennypiece, every second day for a fortnight.

COLOUR OF WILD CANARIES.

Arthur Dixon.—Please note that you should write queries relating to different classes of birds on separate sheets of paper, as they have to go to different persons. See under heading Foreign Birds for reply to your foreign bird query. As regards your query about the colour of Canaries in their wild natural state, it is extremely doubtful if any of our domestic Canaries exist in that state, and as regards their original progenitors, it is a matter of dispute as to what species they sprang from, and no real evidence is to be found on the subject, so that it is merely a matter of opinion how they originated. The consensus of opinion, backed with what scraps of evidence are to be met with, is that they originated from one of the Serins or closely allied species, and the probability of a cross with more than one of these closely allied species is not without some weight of evidence. You would find the question rather fully dealt with in Part I. of "Our Canaries," which our Manager might be able to send you. All these species are of a green colour, varied a little with olive green and yellowish. There are quite a number of species known as "Wild Canaries," from different parts of the world, but chiefly coming from Southern Europe and Africa, which belong to the class of Serins or Seed-eaters. The Saffron Finch, Alario Finch, and even our own Siskin, are, for instance, amongst others, each called the Wild Canary in some parts, so that it is not an easy matter to conjecture just what species is meant by the simple term Wild Canary. There is no room for doubt whatever that the yellow colour of our domestic Canaries is wholly the outcome of domesticity, and the controlling influence of man over the propagation of the race, and if left to themselves they would quickly revert again to the green type, as is shown by the rapidity with which the clear yellow type disappears when ticked or marked birds are mated together. It is a very much shorter road from the lightly variegated type to the green than it is from the lightly variegated to the clear.

SWELLING ON NECK.

Miss E. C. W.—Sorry, I cannot say definitely what is wrong without more details as to the appearance of the swelling, how long it has been coming, and your method of feeding, etc. The absence of feathers around the substance is of no moment, as it is probable that this is simply due to the stretching of the surface which exposes the bare skin, upon the greater portion of which feathers do not grow at all. If the bird is a valuable one your best course would be to show it to a veterinary, or even your medical man, and ask their opinion of it. It may be merely due to an obstruction of the crop, or possibly to a serious abscess, either of which cases would be best relieved by a little operation, which I would not advise an amateur to attempt. If this course does not appeal to you, try giving the bird a drop of pure salad oil morning and evening, and for three consecutive days add to its drinking water ten drops of lemon juice and as much Epsom salts as will cover a threepenny-piece, and daily for a week add to the diet a morsel of bread and milk, with two drops of cod liver oil emulsion on it and sprinkled with soft sugar, and meantime write again and give the fullest particulars you can, when I will advise you further.

SWOLLEN JOINT.

W. T. H., Dowlais.—Thanks for further particulars. Lightly paint the swelling twice with an interval of four days between with the tip of a small feather dipped in tincture of iodine, and beyond this follow the treatment advised in last reply as to keeping it as quiet and restful as possible, so as to give the joint as complete rest as possible, until the bird begins to resume an active condition, and uses the joint again of its own accord. For the rest, leave the remedy entirely to Nature, which will make a better job of it than you are likely to do.

EGG TURNING SOUR.

Economist.—Apart from the risk of it turning sour, it is not a wise plan to give larger quantities of egg food at a time than is necessary to last until next feeding time comes round, but still, considering the character of the weather of late, your food seems to become sour with unusual rapidity. Do you add any water or other moisture to it when mixing? If so, you should discontinue doing so, as there is quite sufficient moisture in the hard-boiled egg itself to make the mixed food of the required crumbly moistness without the addition of any other moisture at all, and such addition would only tend to increase its liability to sour quickly. As regards keeping a portion of the hard-boiled egg from the morning until evening, or from the afternoon feeding until the next morning, you can do this quite safely, especially during cool weather, by allowing the egg to become cold after boiling, then carefully crack the shell in a line round the centre of the smaller circumference, and remove a narrow strip of shell all round, then with a sharp knife cut the egg clean through the centre. Leave the half you wish to save in the shell and place it in a saucer or on a small plate with the cut side downwards, and turn a cup over it and keep it in a cool place, when it should keep perfectly sweet and good until next morning. Another and equally good method is to bury the half of the egg in the shell in a cup of meal of some kind, such as flour or oatmeal, and keep it in a cool place. The meal may be used over again time after time if you keep it dry, by drying it well in an oven after use a time or two, as it absorbs a certain amount of moisture from the egg. The main point is to protect the surface of the egg from the air, and keep it in a cool place, free from dampness.

MATING QUERIES.

N. U, R.—(1) Failing your ability to get a pure Norwich with the necessary excellence of head properties to improve this point in your own stock, and provided the cinnamon green cock, No. 5, is fairly free from heavy overhanging eyebrows, your plan would answer tolerably well as a substitute, but as you already have made one introduction of Crest-bred blood, a good typical pure Norwich would certainly be the best infusion now. Otherwise you would do well to mate him with the hen you describe as No. 6 this season, and then mate the progeny of this pair next season with the most typical Norwich specimens from among the progeny of Nos. 1 and 2, including 3 and 4 bred last season from 1 and 2. Discard No. 1 after this season, and also reject next season any showing distinct reversions to the Crest-bred type, such as heavy eyebrows, or fish or hinge tails; select the size for substance of body and chest rather than a deceptive appearance of large size due to superabundance of feather. (2) The progeny of Nos. 3 and 7 would probably be chiefly variegated, with a sprinkling of ticked specimens, and possibly a stray clear or green, and the double-buffing should tend to increase the size, and produce a useful bird or two to mate back with the progeny of 1 and 2, and this should be a more useful mating than pairing 3 and 4 with the object of starting a muling strain and thereby losing the best part of a season in the production of material to improve the head points, which is the main object in view. To save wasting the season with No. 4 hen, you might mate her with No. 2 cock, as both birds are of good size, and any young from this mating which come near your ideal in head properties may be usefully employed in helping to counteract the Crest-bred blood introduced.

THE REASON WHY.

R. E.—In all probability the reason only certain birds have become affected by moulting whilst others kept under the same conditions have not, is simply that these specimens are more susceptible to any exciting influences that may be at work, and may also be more than usually predisposed to the trouble. It is with birds as with humans, some possess more vital resistance to certain complaints than others, and all do not always respond in exactly the same way to the same set of exciting causes of lowered vitality. And you must remember that so far this season has been somewhat exceptional. One thing you might look into is the position and structure of the room in which the affected birds are kept to see whether it is more susceptible to sudden changes of temperature or damp than the others. Apart from this, go on with the treatment advised for at least two or three weeks, and if the trouble has not then disappeared, write again, and repeat particulars, and I will do my best to help you further.

BARE PATCHES.

Foundry, D.S.M.—(1) It is very doubtful whether the bird will recover the plumage on the bare patches before next moulting season, even if she does so then. Try the following for a month: In addition to the staple diet give a piece of bread the size of a hazel nut, soaked in cold milk, drained, lightly dusted with flour of sulphur, and then sprinkled with soft sugar every third day for a month. On the intervening days give first a morsel of banana, and next half a teaspoonful of a mixture of equal parts hemp, niger, white millet, teazle, and broken groats. In the drinking water add ten drops of lemon juice and as much chlorate of potash as will cover a sixpence, every third day for a month. You may also slightly moisten the bare patches with olive or salad oil twice a week, but do not soil the surrounding plumage unnecessarily. Allow the bird to bathe freely in mild, bright weather. (2) There is no reason why you should not breed with the bird in the coming season.

BRITISH BIRDS, MULES AND HYBRIDS

Answered by H. NORMAN.

ABOUT TITS.

George Baldwin.—Tits as a rule do not do well in cages for any length of time, particularly if kept in couples. If one should be at all seedy the other is sure to attack it, and the stronger generally finishes up the scuffle by killing the weaker and making a banquet of its brains. If yours are doing well you can have a try with them, but I am extremely doubtful about them breeding in a confined space. It is odds on the eggs being smashed, and should this not happen, and young ones appear, I fear their existence would be a short one, for these birds are born cannibals. Add sunflower seed to their bill of fare and give sprays of plants with green fly on them as soon as you can obtain same, also a little soft food, as given to Canaries or Softbills. A bone with just a scraping of meat left on it will amuse them for hours. The sexes are distinguished by a slight difference in richness of colouring; if you have a cock and hen you should be able to distinguish them by carefully comparing one with the other. If you find you have pairs and they get along well together, put in a cigar box next month with a hole cut in one side for entrance, and supply them with plenty of moss, short grass, cow hair, and a few feathers; should they build, perhaps you will kindly write again.

FRESHLY-CAUGHT BLACKBIRD.

Salopian. Keep the bird in a quiet corner of the building where the light is not too strong, and let him see you as much as possible, but do not take too much notice of him at first; simply give him food and water. A little later, when he has somewhat settled down, give him a mealworm, or something he is particularly fond of, whenever you go near him. Move about quietly, any sudden fright will throw him back. Later on you can make him take the dainties from the finger, and when he will do this, you will not have much trouble to work with him. As a rule, young birds caught at this time of the year are not difficult to steady. He will probably begin to record his song next month, and gradually increase in strength; it all depends upon your feeding and general treatment. Give him a piece of apple occasionally, or add scraped carrot to his soft food.

GOLDFINCH WITH CRAMP.

Goldfinch.—Considering the age of your bird, I am afraid you cannot do much for him, but you might try the following treatment: Give 15 drops of a mixture of tincture of rhubarb and tincture of gentian in his drinker for 5 or 6 days. Add a little egg-food to the daily menu, and if he will eat mealworms give a couple daily. Bathe the foot and leg in warm water night and morning, and gently massage with the finger and thumb, using a little embrocation or capsicum vaseline.

GREENFINCH NOT SINGING.

J. K. Laurie.—I do not think you need worry about your bird not singing yet, as they are generally influenced by the weather conditions, which have not been lately of the kind to make them tuneful. I would advise you to add a little sound hemp to his food, giving it about three times a week. Your other seed, of which you send a sample, is excellent, and has nothing to do with his silence. Just watch him rather closely, and if you see him going through the actions of song without making any sound, he is probably suffering from loss of voice; then mix equal quantities of fresh lemon juice, whiskey and honey in a small bottle, shake it well, and give him twenty drops in his drinker, fresh daily, for three days, rest three days, and, if necessary, repeat. Give apple or green food every other day; see that the latter is free from frost.

SKYLARK DOING BADLY.

R. Tetlow.—Undoubtedly the bad moult is the cause of the trouble with your bird. I would advise you to give him an aperient at once, and repeat it in a few days; add 5 drops of syrup of buckthorn to a tablespoonful of water, and give him to drink. Are you mixing any carrot or green food with the soft food? If not, you should do so, and, as you cannot get mealworms, you should also add a little hard-boiled egg to it occasionally. Just handle the bird and see what his condition is; if he is thin, give a morsel of lean mutton or rabbit, minced very fine, but discontinue it as soon as you are able to collect insects for him. When you clean him out run him into a spare cage, and gently spray him with tepid water, but do not make him very wet.

FOREIGN BIRDS.

Answered by WESLEY T. PAGE, F.Z.S.

PARROT BREEDING IN ENGLAND.

A. Dixon.—One or two species of Parrots and Cockatoos have successfully nested, hatched out, and fully reared their young in English aviaries, also very many Parrakeets, Lovebirds, and Conures, and in less numbers, Lories and Lorikeets. With a few exceptions these successes have occurred in properly constructed aviaries. "Properly constructed aviaries" does not necessarily imply costly structures; some have quite "ramshackle" and "home-made" erections, yet put up to answer the birds' needs, and to supply them with the necessary shelter, space for flight, exercise, etc., without which chances of success are not large. There are isolated cases of success in cages, but these were cages about 3 ft. to 4 ft. square at base and 4 to 6 ft. high.

YOUNG BLUE-FRONT WITH COLD (?)

Enigma.—I am not at all sure that indigestion is not more responsible than anything for your bird's indisposition. Put one teaspoonful of fluid magnesia in its drinking water every fourth day, and in the intermediate days half a teaspoonful of the following mixture:—Glycerine, oxymel of squills, and ipecacuanha wine, in equal parts in the drinking water. Cease giving the tea sop and table scraps at once. It can have boiled maize seed mixture, ripe fruits, nuts, biscuits, dry crusts of household bread, raw carrot, and a little plain cake; from the above quite a varied dietary can be maintained. The first three items can form the staple dietary, the others being given as extras, not necessarily all at once, but "ring the changes" on them. Also put ten drops of cod liver oil emulsion into the daily supply of boiled maize for, say, a month. Spread a little honey and borax thinly on a piece of bread, biscuit or cake, whichever it will take most readily, and give this daily. Do not omit to keep continuous supplies of grit and cuttlebone in the cage, also a chunk of wood for it to exercise its mandibles upon. Keep in a warmish room, where it will get light and air, yet be free from draught. Treat as above and report progress in five or six weeks.

DOVES WITH BUDGERIGARS.

Dove.—Doves and Parrakeets (the Budgerigar is a Grass Parrakeet) have been kept together quite successfully in many aviaries, and the only mishaps have been the occasional upsetting of the Dove's nesting arrangements, owing to the Parrakeets applying their woodcutting propensities to the slender constructions which pass for Doves' nests. You do not say where or how you are keeping your Budgerigars; if they are in an outdoor aviary you can safely put the Dove among them; there may be a bit of commotion when the Dove is first placed among them, but they will soon settle down. I do not advise you to put the Dove with the Budgerigars if the latter are in a cage, for as soon as the Budgies had got used to the larger size of the Dove I fear they would lead it rather a sad life, and as a result of their playful nips, the Dove would soon be minus toes and claws, if nothing worse. On the other hand, if it got too close quarters, a Budgerigar might suffer considerable damage from a blow from the Dove's wing.

VALUE OF AMERICAN MOCKING BIRD.

C. Harrison.—It is rather a thankless job putting prices on birds in these times. Quite fancy prices have been paid for quite ordinary species, owing to shortage in the supply, and on the other hand, very low prices have been accepted by those wanting to sell quickly, owing to the scarcity of buyers. You may find a buyer quickly, or you may not, however good your bird may be. However, you ought at any rate to make two guineas of it if it is a decent songster—possibly you could get half as much more if you could drop across anyone wanting such a pet. "Finger-tame" is a quality many bird-lovers are quite prepared to pay for.

POST MORTEMS.

Mr. G. Yates, M.R.C.V.S., 1, College Road, Hartow, Middlesex, will examine and report upon dead cage birds for a fee of 1s. 6d. each bird; for reply direct, 2s. 6d.; analysis, 21s. The Post Office regulation is that bodies of birds must be sent at the letter rate of postage, and must be packed in hermetically-sealed receptacles which must themselves be enclosed in strong wooden, leather, or metal cases. If this regulation be infringed the packets may be destroyed by the authorities. **Any bodies sent to the office of this paper will be thrown away,** and if a fee is enclosed the loss will be the sender's.

GENERAL.

TO EXTERMINATE MICE.

D. Potter.—Please see reply to A. F. Cundy under Canary Queries in this issue.

A QUESTION OF A DEAL.

E. Parsons.—We are not quite sure whether we have got your name correctly, as it is not distinctly written, and as the address you give is at a Post Office, we are unable to gather whether this is your proper address. For these reasons we have not inserted a Twittering asking the seller to communicate with you. Our opinion is that as you elected to keep the bird rather than accept the offer of an exchange as made, you should abide by your bargain. If the bird had turned out better than you expected you would have had the best of the deal and now the contrary has happened we think you must abide by the consequences.

BOOK ON BIRD KEEPING.

H. W. Cross.—There is no book which is a complete guide to the keeping of all kinds of birds. If you will let us know whether your desires are in the direction of Canaries, Hybrids, British, or Foreign birds, we shall be pleased to help you. In the meantime you will find many useful books advertised on page 70 of our last issue.

PRESERVING FOWLS' EGGS.

Glaswegran.—There are several methods of preserving eggs, one of which is to immerse them in a solution of salycilate of soda (water glass), and another is to rub lard or other grease into the pores of the shells. As the matter, however, is rather out of our line as a cage-bird paper, we have handed your query to the Editor of "The Poultry World," and you will see an answer in the query columns of that paper.

(Advertisements continued from page 86.)

BE PATRIOTIC!

Wanted, Common or Crossbred Canaries, cocks or hens, also Mules, cocks or hens, for patriotic purposes. **Not for Export.**

NO LOT TOO LARGE. NONE TOO GOOD.
NONE TOO SMALL. NONE TOO COMMON.
ALL VARIETIES PURCHASED.

I wish it also to be distinctly understood that I cannot only give as much as you can obtain elsewhere, but in nearly every case more—in accordance with what the birds are.—**RUDD, Specialist, Norwich.**

One packet sufficient, however listless your hair. One testimonial says: "My hair soon became a mass of wavy curls." For either ladies or gentlemen. Results certain. Price **2/9.** Special reduction for a few weeks. Send **1/6** only for large size 2/9 packet. **The NEW WAVCURL Co., 55, Fulwood House, High Holborn, London, W.C.**

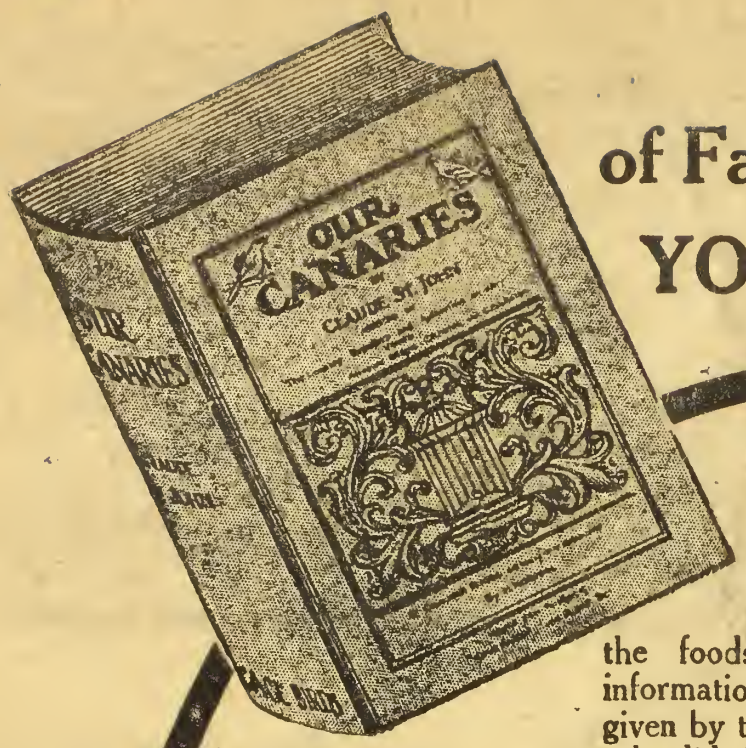
A POST CARD ONLY You cannot hold your own in life's battle if weak, worn, or easily jaded. Periodical attacks of moodiness, languor, despondency, depression, and groundless fears mean nerve troubles and lead to brain fag, impaired memory, and unfits one for study, business or pleasure. The chosen ones in every walk of life are the alert, the bright, and the intelligent, nature's natural gift, but marred for lack of a little knowledge. A post card to the Useful Knowledge Publishers, P.O. Box 94, Bradford, will put you in possession of a 48-page book, neatly bound, of valuable information, and will be sent post paid free of any charge whatsoever if you will mention CAGE BIRDS. A little knowledge saves much medicine. [Copyright.

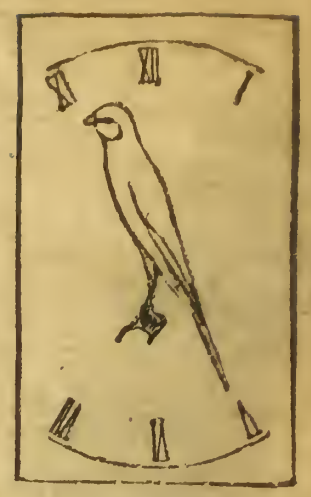
ROSES. LOVELY ROSES

7 for 1/6; bush rose, Crimson Rambler, Lady Gay Dorothy Perkins, Seven Sisters, Dunee Rambler, Little Wonder, all two years old; also seven shrubs and climbers for 1/6, 1 White Jasamine, 1 yellow Jasamine, 1 Virginian Creeper, 1 Lad's Love, 1 Honeysuckle, 1 English Lavender, 1 French Lavender: all free on rail: A. Stratton and Son, Rose Growers, Wymington, Rushden, Northants.

A MARVELLOUS BARGAIN £50 A life's collection of sea shells, eggs, and curios, the work of a collector now deceased; arranged in artistic designs and mounted in about 50 cases, the majority 3ft. by 2½ by 2½, and the rest under large glass shades; also a quantity of boxes of loose shells of all sizes from all parts of the world; should be seen to be fully appreciated; the collection is suitable for a museum, and fills a large room; cheap at double the price: W. R. King, 200, Kingston-rd., Portsmouth, N.B. Mention "Cage Birds." (812)

SECRETS
of Famous Canary Breeders
YOURS for only 1/- down





Judging the position of a bird by the clock.

HOW well-known Canary Fanciers bred their prize-winning birds—birds literally worth their weight in gold—how they trained them—the foods used. All this priceless information and much more is clearly given by the Breeders themselves in this splendid Canary Book. Every page—every line—is full of the *practical experience* of practical men—experts in their line. Fanciers who have specialised in Lizards give valuable information. Breeders of famous prize-winning crested varieties contribute to its 380 pages. Every feature of Canary Breeding and Exhibiting is clearly and fully dealt with—you have only to glance at the comprehensive index to turn up the information you desire.

The book contains 133 illustrations, a few of which are here reproduced. Thus, "Our Canaries" not only *tells* you but *shows* you. If you are a novice, or breed only for pleasure, you will be delighted with the increased enjoyment which the book will enable you to derive from your hobby. If you are an "old hand," or breed for profit, it will help you to *increase* profits.

"Our Canaries" will be sent you for Free Examination—Approval for a deposit of only 1/-. If, after examination, you return the book, your deposit will at once be refunded. If, however, you decide to keep the book, you can pay the balance by easy monthly instalments Thus you have everything to gain and nothing to lose by sending for a copy. Do so TO-DAY

LIKELY BIRDS FOR CREST BREEDING.

In the breeding of Crested-Canaries one of the parents used is a Crested and the other a Crest-bred, i.e., the offspring of a Crest and a Plainhead Canary. Our picture shows typical examples of the two varieties. The Crested-Canary won 3rd Prize at Birmingham Show for Mr. B. Steel, Sheffield, and the Crest-Bred, shown by Mrs. Madagan Hart, Cheltenham, won 2nd Prize in the Novice Class at the same Show.

F. CARL, Publisher, 154, Fleet Street, London, E.C.

Advertisement Charges.

One Halfpenny for each word up to 48, 1d. per word afterwards. Name and address to be reckoned. Minimum, 12 words 6d.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together, and are charged at two words a penny up to 48 words; after that 1d. per word. No single advertisement, even if accompanied by others, will be charged at less than the minimum price, viz., Sixpence.

Headlines or Footlines, 9d. 1/-, 1/6, 2/-, 2/6, according to size.

The rate for displayed advertisements is 7/6 per inch. Rates for a series on application.

ADVERTISEMENTS UNACCOMPANIED BY CORRECT REMITTANCE WILL NOT BE INSERTED.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL.

The Proprietor reserves the right to refuse any advertisement, or to cancel any advertisement ordered for a series, at any time, without assigning any reason for so doing.

Advertisements must in all cases bear the bonafide name and address of the advertiser, and no advertisement will be inserted it addressed to a receiving office, or similar place of call.

Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, **CAGE BIRDS**, 154, Fleet Street, London. Terms for Display Advertisements on application.

ALWAYS USE "CAGE BIRDS" DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor of the *bona-fides* of either buyers or sellers In all transactions the adoption of our Deposit System should be insisted upon

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from **both** parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has not been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty-eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit will be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion. The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient plus the extra postage incurred has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

NOTICE TO BIRD PURCHASERS.

It is advisable that all newly-purchased birds, especially foreign birds, be kept isolated from established stock for a week or ten days, until by their condition they establish the fact that they are thoroughly healthy.

MEDICINES.

"AILING Cage Birds and How to Cure Them," "Nutshell No. 6," an account of the troubles which beset captive birds, with the treatment and list of medicines to restore our pets to health. This will save you much discouragement and money, and costs only 2½d. post free.—From "Cage Birds," 154, Fleet-st., London, E.C. Or 2d. from agents (list frequently published).

Not Singing

If you have any birds you are relying upon for the breeding season that have gone into Soft Moult, we Guarantee you a perfect cure.

DITCHFIELD'S TONIC DROPS

are a certain cure for loss of voice, soft moult, slow moult, going light, feather plucking, and inflammation of the bowels.

DITCHFIELD'S FAMOUS REVIVO

is absolutely unequalled for giving new life and vigour to the birds, and for producing that smart tight appearance of the plumage so much desired by all fanciers.

These two Medicines, given on alternate days, will bring any bird into breeding condition.

DITCHFIELD'S SPECIAL LUNG TONIC

the grandest medicines ever introduced for chest and lung affections in cage birds. Can be given with absolute confidence to the most weak or delicate birds. All medicines can be given in the drinking water, and the birds take them freely, with marvellous results.

All the above remedies are sold in **8d., 1/2,** and **2/2** bottles; two 8d. bottles for **1/2,** two 1/2 bottles for **1/11,** or three for **2/8.** P.S.—The 1/2 bottles are treble the 8d. size. All orders sent per return, post free.

KNOWLEDGE IS POWER.

You can get it in 6d. Vols.

READERS of "Cage Birds" can to-day secure at pre-war prices volumes of the well-known **"Everybody's" Series.** Each volume is, on its particular subject, the handiest and best book obtainable. Although small enough to fit one's pocket, each book is packed with a vast amount of valuable information. Consider the wonderful price—only **6d.** each (8d. post free), strongly bound in cloth; in attractive leather binding, 1s. each (1/2d. post free). The number of these books is very limited, and owing to the enormous increase in the cost of printing and paper, it will be impossible to reprint them at present prices. There are sure to be some of these books that YOU need—some that will give you just the information you have been seeking on some knotty point. Send in your order **NOW.** It is only necessary to state the *Number* of each book as given opposite the name in the list shown here.

100% (ONE HUNDRED PER CENT. AT LEAST.)

"Ibrox, Glasgow, Feb. 21, 1917.—Birds arrived to-day in best of order. I tender you my thanks and consider them at least 100 per cent. better than can be got in this district at the price. H.G. to W. Rudd."

"CANNOT EXPRESS IN WORDS."

"Boot Stores, New Quay, Feb. 24, 1917.—Received birds safely. I cannot express in words my great satisfaction.—G. E. to W. Rudd."

"MORE THAN PLEASED."

"Mansfield, Notts, Feb. 27, 1917.—Received birds. I am more than pleased with them, and have decided to place another order with you. A. Joyce to W. Rudd."

"YOUR STRAIGHTFORWARD WAY."

"Aberdare, Feb. 21, 1917.—The pair of Yorkshires I am pleased to say are very satisfactory, and I thank you for your straightforward way of business. —J. James to W. Rudd."

"WELL SATISFIED."

Dykehead, Shotts, Feb. 23, 1917.—Received Yorkshires yesterday and am well satisfied with same.—David Johnstone to W. Rudd."

"COULD NOT HAVE BE EN, &c."

"Rochdale, Feb. 21, 1917.—Birds arrived safe. Am well pleased. I could not have been more satisfied had I selected them myself.—S. Byron to W. Rudd."

"STRONGLY RECOMMEND TO ALL."

"Ferndale, Rhondda, Feb. 21, 1917.—Bird arrived safely. I am most pleased with same. Will strongly recommend you to all.—E. Edwards to W. Rudd."

Now, I could copy scores more of similar dates and in the same strain, but the above should suffice for those who wish for **solid facts**—not fiction. Also I wish it to be distinctly understood that the writers are entirely unknown to me, and that the opinions are entirely unsolicited.

NORWICH PLAINHEADS and YORKSHIRES

IF I HOLD THEM THEY CAN BE SEEN

You cannot purchase better blood than I now hold, and I am certain you cannot procure the same value. Cocks, **15/-, 20/-, 30/-, 40/-, 50/-.** Hens, **10/6, 15/-, 20/-,** upwards. Pairs, **25/-, 30/-, 40/-, 60/-.** These are the best value in Great Britain to-day. For **OTHERS**, really good, containing many of the best combined strains in Great Britain, at lower prices, see my list. Lizards, Borders, high-shouldered Belgians, Crests, Rollers, Mules, muling hens, etc., etc., my current price list should be sent for. It is free for the asking. Cages, for one bird, **4d.**, for two to four, **6d.**—**W. RUDD, The Bird Specialist, NORWICH.**

There will be several birds present, and the newly-appointed judges connected to the Leeds Club under Federation rules will be given an opportunity of showing their skill. Intending new members and critics will be welcomed. Fanciers please note the following clubs now comprise the Federation: Wigan, Bolton, Hull, Nelson, Swinton, Provincial Potteries, Scottish National, Birmingham, Audley, Haslingden, Leeds, and Bacup. Will any intending new members of Federation in these districts please communicate with the club secretaries so that they can be supplied with rings: H. Best, Sec., National Federation and Leeds Roller Clubs, 5, Alma-place, Beckett-street, Leeds.

Champion YORKSHIRES & NORWICH
Bulldog Strain.

NOW IS THE TIME TO PROCURE YOUR BREEDING STOCK, to ensure getting **the best birds,** and to get them settled in their new home before pairing up. I have an enormous stock of all varieties on hand, and, having almost finished my export trade for this season, I can now concentrate my attention to the requirements of the home trade. My long experience as a breeder and exhibitor, and the large stock of birds I have to select from place me in a position to send you just such a bird or birds as you require. As regards the quality of my stock, it is surely sufficient to refer you to the reports of all the leading shows, from which you will find that both my **Yorkshires** and **Norwich** are not only maintaining but adding to, their great reputation. In addition to this, I have sold several birds that have won leading honours at all the principal shows. Kindly write, stating wants. I am now offering a limited number of grand stock and exhibition birds, either Yorkshires or Norwich, which I can guarantee as bred from my own **Bulldog Strain,** at **20/-, 25/-, 30/-, 40/-, 50/-** each, cocks or hens. Also a few grand matched pairs at **40/-, 45/-, 50/-, 60/-** per pair upwards. These are splendid value, and have only to be seen to be appreciated.

I have also a grand selection of stock birds from other well-known strains, as follows:—
YORKSHIRE COCKS, grand lengthy birds, in full song, **15/-, 17/6, 20/-, 25/-, 30/-** each, upwards.
YORKSHIRE HENS, smart, racy, typical hens, **7/6, 10/-, 12/6, 15/-, 20/-** each, upwards.
MATCHED PAIRS, 25/-, 30/-, 40/-, 50/-, 60/- per pair upwards.
NORWICH PLAINHEADS. Grand, thickset, cobby birds at same prices as Yorkshires.
BORDER FANCIES, Real good birds, both for stock and exhibition. **Cocks,** 15/-, 20/-, 25/-, 30/- each. **Hens,** 7/6, 8/6, 10/- each. **Matched Pairs,** 17/6, 20/-, 25/-, 30/-, 40/- per pair.
CRESTS AND CREST-BREDS.—A few real good pairs at **30/-, 40/-, 50/-, 60/-** per pair. **Odd birds,** Cocks or Hens at proportionate prices. Matched pairs for Mule or Hybrid breeding, **15/-** pair.

ROLLERS. ROLLERS. ROLLERS.

I have a magnificent collection of pure British Rollers from the best and purest strains, at following prices:—
HIGHLY TRAINED COCKS, 25/-, 30/-, 40/- each.
PURE-BRED HENS, 7/6, 8/6, 10/- each.
MATCHED PAIRS, 25/-, 30/-, 35/-, 40/-, 50/- per pair.
Travelling Cages, 4d. extra in all cases.
One word more—**Please remember, I invite you** to come at any time and make your own selection, but if you cannot come, **Don't Forget** that I send every bird on 7 days' approval, at my sole risk. I personally select every bird that is sent away. I have over 4,000 (four thousand) birds in my rooms at the present time to select from, and I guarantee to give absolute satisfaction to every customer or return cash in full. Terms: Cash or deposit with Editor.

Send for 1917 Price List.

JOE THOMAS,

Muling Pairs: 1, Evans; 2, Harrison; 3, Carrington. Hyb.: All to Evans. Novice Nor. Yell. Ck., Buff Hen: 1, 2, Smitham; 3, Evans; vhc, Turner; hc, Goddard; c, Storer. Buff Ck., Yell. Hen: 1, Turner; 2, 3, Smithson; vhc, Evans; hc, Goddard. Yorks. Yell. Ck., Buff Hen: 1, Taylor; 2, Beresford. Buff Ck., Yell. Hen: 1, Taylor; 2, 3, Goddard; vhc, Beresford. Muling Pairs: 1, 3, Evans; 2, Storer. Hybrid: 1, 2, Evans. Sell: Evans. We have close on thirty members, and our society has a radius of ten miles. Anyone desirous of becoming a member should write F. Harrison, Sec., 16, New-st., Hepthorne Lane, near Chesterfield; or W. Turner, 29, Highfields, North Wingfield, near Chesterfield, assist. sec.

LONDON AND COUNTIES A.C.B.

Annual pair show, Feb. 17, Victoria Hotel, Charterhouse Street, E.C., with 64 entries, the best the society has had for a few years. The exhibits were well arranged by the stewards, Messrs. W. Dyer, J. Durham, J. Greenland, and Mrs. Gilbert. The show was well attended by fanciers and friends. Norwich were a good collection, and Yorks. too, were a grand lot, Mr. J. Herring taking special for best in show. Cup winner, Gilbert, 20 points; M. A. Bell won special for Norwich section with 15, and special for most points scored by vhc. hc. and c went to Hurst, with 9 points. Mr. Robson judged.

Champ. Nor. Yell Ck., Buff Hen (4): 1, 3, Gilbert; 2, vhc, Bell. Buff Ck., Yell. Hen (4): 1, 3, vhc, Bell; 2, Gilbert. Yorks. Yell. Ck., Buff Hen (4): 1, 3, Herring; 2, vhc, Gilbert. Buff Ck., Yell. Hen (4): 1, 2, Herring; 3, vhc, Gilbert. Amat. Yell. Ck., Buff Hen (4): 1, Knight; 2, 3, Culliers, vhc, Stubbs. Buff Ck., Yell. Hen (2): 1, 2, Knight. Yorks. Yell. Ck., Buff Hen (4): 1, Knight; 2, 3, Durham; vhc, Stubbs. Buff Ck., Yell. Hen (8): 1, 2, Ayris; 3, hc, Durham; vhc, Stubbs. Nov. Yell. Ck., Buff Hen (7): 1, 3, Bell; 2, Etherington; vhc, Greenland; hc, c, Hurst. Buff Ck., Yell. Hen (6): 1, 2, Greenland; 3, Bell; vhc, hc, Hurst; c, Furr. Yorks. Yell. Ck., Buff Hen (4): 1, vhc, Dyer; 2, 3, Furr. Buff Ck., Yell. Hen (2): 1, 2, Dyer. Goldf., and Can. Hen (4): 1, hc, Bell; 2, Gilbert; 3, vhc, Hurst. Greenf. and Can. Hen (1): Knight. Bullf. and Can. Hen (3): 1, Knight; 2, Gilbert; 3, Greenland. Hyb. (2): 1, E. Ayris; 2, Knight.

PLYMOUTH W.C.O.S.

Meeting and club show, Feb. 20, Oddfellows Hall, Morley; 86 birds were staged, a record for an evening show. We are holding a British show in March and hope to beat this hollow. Yorks. were judged by Mr. W. Dyer, and 22 of the very best had to go through it. Mr. S. Gill judged Norwich, and 29 was the number; not very special for this variety, but some of Plymouth's hot stuff was there. Crests were judged by Mr. French, and Cinnamons by Mr. W. Spillman. The latter were an eye-opener, 24 of them, and all the winners fit for open competition. Plymouth Norwich are famous, but if our members are allowed to buy the class of Cinnamons they want we are going to give up-country birds a run for their money.

Yorks. Yell. Ck.: 1, sp, Craven; 2, 4, 5, Woodley; 3, Oliver; 6, Fitzwalter; 7, Tooze. Buff: 1, 2, 3, Woodley; 4, 6, Craven; 5, Oliver. Yell. Hen: 1, Oliver; 2, 4, Craven; 3, Hambley; 5, Tooze. Buff: 1, Woodley; 2, FitzWalter; 3, Craven. Nor. Yell. Ck.: 1, 4, Mollit; 2, 5, Deakin; 3, Hambley; 6, 7, Garland. Buff: 1, sp, Garland; 2, Rowe; 3, 5, 6, Deakin; 4, Hambley; 7, Mollit. Yell. Hen: 1, Hambley; 2, Deakin; 3, 7, Garland; 4, 5, Mollitt; 6, Rowe. Buff: 1, 3, Garland; 2, 5, Mollitt; 4, 6, 7, Jolly. Crest Ck.: 1, Hutchings. Hen: 1, Rowe. C.B. Ck.: 1, 3, Bavage; 2, Rowe; 4, Hutchings. Cinn. Yell. Ck.: 1, Rapson; 2, Geach; 3, Perrin; 4, Craven; 5, Hutchings. Buff: 1, 3, sp, Geach; 2, Perrin; 4, 5, Rapson; 6, Craven. Yell. Hen: 1, Rapson; 2, Perrin; 3, Geach, 4, Craven; 5, Hutchings. Buff: 1, Craven; 2, Rapson. Nat. Col. Cinn.: 1, 3, 4, Dyer; 2, Rapson. A.O.V. Ck.: Cheney. Hen Cheney.—W. A. Dyer, hon sec.

WAKEFIELD O.S.

Meeting and pair show, Crown and Anchor Hotel, Mr. F. Bedford presided over a good attendance. Messrs. Isherwood and Thorpe judged, and were cordially thanked. A very good discussion ensued on the birds present, which should help the novices: 1, 3, Barber; 2, Hough; 4, Rolling, vhc, Alexander; hc, Talbot; c, Cousins. We have made a few new members, but could do with plenty more, and shall be pleased to furnish any information to anyone desirous of joining us.—T. H. Alexander, Hon. Sec., 11, Regent Street, New Scarboro, Wakefield.

CLYDEBANK C.B.C.

Pair show, Feb. 24. Sixty pairs were staged—a record for the club—and the exhibits were of a very high order. Crests: 1, 2, Ritchie. Nor. Yell. Ck., Buff Hen (7): 1, McLean; 2, Docherty; 3, Robertson. Buff Ck., Yell. Hen (6): 1, sp, McLean; 2 Docherty; 3, Cummings. Bord. Yell. Ck., Buff Hen: 1, 2, McCardle. Buff Ck., Yell. Hen (3): 1, 3, McCardle; 2, Morton. Yorks (5): 1, 2, 3, McLellan. Muling Pair (10): 1, McIntyre; 2, Trotter; 3, Struthers. Linnet-Can. (10): 1, Beattie; 2, McNeil; 3, McIntyre. Hyb. Pairs (8): 1, McCardle; 2, 3, Trotter. With Bullf. Hen (7): 1, McKirdy; 2, McIntyre; 3, McNeil. The club is now open to all and meets every third Thursday in month at Morrison's Restaurant, Kilbowie Road. Mr. Kane resigned secretaryship.—R. McCardle, Sec.

GLASGOW (Queen's Park) C.B.S

Very successful show of matched pairs, Y.M.C.A. Rooms, Eglinton Toll, Feb. 17. Upwards of 50 pairs were staged, many of the past season's winners being on view, necessitating some care on the part of the judges to decide. The classes, on the whole, were fairly well supported, and the Border class was a hot one of 16 pairs. Messrs. A. Chalmers, Kirkintilloch, and C. Campbell, Glasgow, judged. Nor. Yell. Ck., Buff Hen (7): 1, sp, 2, Cairns; 3, Stewart; 4, Hunter; 5, McLellan; 6, Knox; 7, McLuskie. Buff Ck., Yell. Hen (6): 1, 2, Cairns; 3, Stewart; 4, Knox; 5, Hunter; 6, McLuskie. Nov., Nor. (4): 1, sp, 2, Robertson; 3, 4, McLuskie. Yorks. (2): 1, sp, 2, McLellan. Bord. (16): 1, 3, Sellars; 2, 4, 7, Livingstone; 5, sp, 6, Campbell. Crests (2): 1, 2, Hamilton. Goldf. and Can. (3): 1, sp, Connelly; 2, Knox; 3, McLellan. Linnet and Can. (3): 1, McClymont; 2, Connelly; 3, Knox. Greenf. and Can. (1): 1, Connelly. Bullf. Hen and A.V. Ck. (5): 1, McClymont; 2, Knox; 3, Lawson. Hyb. Pairs (1): 1, McClymont. A.O.V. (5): 1, 3, sp, 5, Hamilton; 2, sp, Knox; 4, Connelly. The Society is making rapid strides in popularity, and with the present season just opened new members are coming forward, and the prospects are rosy.—A. Foreman, Sec.

LEADGATE C.B.S.

Second annual show, Feb. 17, 18, in the Victoria Working Men's Club, kindly lent for the occasion by the Committee, who also kindly gave £2 10s. towards expenses and prize money. We had a total of 110 entries, not as many Canaries as we would like, but a grand display of British. Great credit is due to the sec., Mr. J. W. Rowell, who had show arrangements well in hand. He was ably assisted by the Committee, and everything passed off without a hitch. Mr. George Barkass, Westwood, judged.

Nor. Yell. Ck. (1): 1, Anderson. Yell. Hen (1): 1, sp, Anderson. Buff (2): 1, 2, sp, Peart and Hutchinson. Yorks. Yell. Ck. (5): 1, Reed; 2, Peart and Hutchinson; 3, vhc, Collins; hc, Graham. Buff (5): 1, Collins; 2, vhc, Reed; 3, Graham; hc, Forster. Yell. Hen (3): 1, Reed; 2, Collins; 3, Peart and Hutchinson. Buff (3): 1, Foster; 2, Reed; 3, Collins. Bord. Yell. Ck. (2): 1, 2, Cant. Buff (1): 1, Cant. Hen (2): 1, Cant; 2, Anderson. A.O.V. (5): 1, hc, Peart and Hutchinson; 2, 3, vhc, Simpson. Goldf. (9): 1, Havells; 2, Forster; 3, Cant; vhc, Blight; hc, Brough; c, Jackson. Bullf. (7): 1, Johnson; 2, c, Blight; 3, sp, Rowell; vhc, Hall; hc, Gardner. Greenf. (13), a grand class: 1, sp, Rowell; 2, Brough; 3, hc, Peart and Hutchinson; vhc, Henderson; c, Atkinson. Siskin, etc. (9): 1, 2, Mason; 3, Peart and Hutchinson; vhc, Havells; hc, Simpson; c, Henderson. Linnet, H.M. (13): 1, sp, Cant; 2, Johnson; 3, Hall; vhc, Bentick; hc, Mason; c, Coulte. F.M. (12): 1, Mason; 2, Forster; 3, Bentick; vhc, Blight; hc, Armstrong; c, McKenna. Hen (6): 1, Johnson; 2, Gardner; 3, Armstrong; vhc, Blight; hc, Proudfoot; c, Atkinson. A.O.V. (8): 1, Johnson; 2, Armstrong; 3, Allinson; vhc, Bentick; hc, Havells; c, Ford. Mule or Hyb. (3): 1, Peart and Hutchinson; 2, sp, Rowell; 3, Hall. Special most points British, R. Johnson.—J. W. Rowell, Sec

CARDIFF C.B.S.

Annual match pair show held North Royal Stores, The Hayes. Entries came up well, considering a number of the members are now serving with the colours. Norwich and Yorks. were extra good, a number of well-known winners being on view, the Rev. C. B. Jolliffe, Messrs. James S. Wells, H. C. Smith, E. J. Banks, E. Thomas putting down some warm teams. We admired the pluck of Mr. Bevan, coming down from Perth, also M. Pugh from Senghenydd. Messrs. Emerson and Winston put down 15 pairs of muling and hybrid pairs, having to employ a conveyance to bring the birds all the way from Whitchurch. Special winners: Best Norwich and Norwich pair, Thomas; best Yorks., Smith; best Yorks. pair, Banks; best Brit., Paterson, with a grand Goldfinch. The judges were: Canaries, A. Maggs; British and Mules, E. J. Davies. Three drawings of the Norwich Plainhead by Mr. E. W. Allsopp were much admired, one being the now well-known buff of Mr. Crawshaw.

Yell. Ck.: 1, E. Thomas; 2, Rev. Jolliffe; 3, 4 James and Wells; vhc, Williams. Buff: 1, Thomas, 2, James and Wells; 3, Rev. Jolliffe. Yell. Hen: 1, Rev. Jolliffe; 2, James and Wells; 3, Thomas. Buff: 1, Rev. Jolliffe, 2, Thomas; 3, Williams. Yell. Ck., Buff Hen: 1, 4, Thomas; 2, 3, vhc, James and Wells; hc, Rev. Jolliffe; c, Pearce. Buff Ck., Yell Hen: 1, vhc, James and Wells; 2, Pearce; 3, hc, Thomas; 4, Rev. Jolliffe; c, Williams. Nov., Nor.: 1, Wilson. Pairs: 1, D. Paterson. Yorks. Yell. Ck.: 1, 3, Banks; 2, 4, Smith. Buff: 1, 4, Smith; 2, 3, Banks, vhc, hc, Bevan. Yell. Hen: 1, Smith; 2, 3, Banks. Buff: 1, 3, Banks; 2, Smith. Yell. Ck., Buff Hen: 1, 2, Banks; 3, Bevan; 4, Smith. Buff Ck., Yell. Green, HR 5, B 5, Sch. 2, WG 2, F 2, WR 2, BR 1, BT 1, GE 4, total 24; vhc, H. Burns, 24; F. Gulshaw, 23; c, A. Baggaley, 23. A. Baggaley, Sec.

READING C.B.S

Members' annual pair show, London Tavern, Feb. 21. Taking in consideration so many members being either in H.M. Forces or working out of the town an entry of 46 pairs must be considered satisfactory. Norwich were the pick and most numerous, Yorks being very poor in entries, only 5 pairs, and four belonging to Miss Garland. It is hoped that this lady will soon be getting more opposition, as it is no sport exhibiting against oneself. In champion Norwich some real good birds were exhibited. In yell. cock buff hen Mr. Lovegrove had first with a splendid pair, and Mr. Wilson ran him close with a cock, but failed with hen. In buff ck., yell. hen Mr. Lovegrove again scored with a typical pair, Mr. Smith running him close, but failed in colour. Amateur Nor. were not quite up to the standard of former years, but some good birds were staged. Nov. Nor., too, were a little on the decline, but, being new fanciers, they have something to learn. Special mention must be made of a fine buff hen in Mr. Palmer's pair. Mr. Robson judged, and afterwards gave comments on the birds exhibited.

Champ. Nor. Yell. Ck., Buff Hen: 1, 3, Lovegrove; 2, vhc, Wilson, hc, Foster; c, Smith. Buff Ck., Yell. Hen: 1, hc, c, Lovegrove; 2, 3, Smith, vhc, Wilson. Yks. Yell. Ck., Buff Hen: 1, 2, Miss Garland. Buff Ck., Yell. Hen: 1, 2, Miss Garland; 3, Hatch. Muling Pairs: 1, Foster; 2, Mrs. Wilson. Hyb.: 1, 2, Mrs. Wilson. Amat. Nor. Yell Ck., Buff Hen: 1, Hatch; 2, hc, Larkcom; 3, vhc, Mrs. Bidmead. Buff Ck., Yell. Hen: 1, 2, Larkcom; 3, Hatch; vhc, hc, Mrs. Bidmead. Novice Nor Yell Ck., Buff Hen: 1, 2, vhc, Turnham; 3, c, Palmer; hc, Mrs. Wright. Buff Ck., Yell. Hen: 1, 2, Turnham; 3, Mrs. Wright. O. C. Smith, Sec.

Singing Contests.

Announcements of forthcoming contests in the nature of advertisements must be paid for at advertisement rates, two words a penny.

LEEDS.

Linnet singing contest for qualifiers, Clarence Hotel, Skinner Lane, Feb. 25; 20 birds sang for four prizes. 1, 2, Bamfield; 3, Binns; 4, Brophy. Judges T. C. Summers, A. Butterfield.—T. C. Summers, hon. sec.

West Leeds Linnet and C.F.A. Linnet contest, Feb. 25, Viaduct Hotel, 24 birds contested: 1, Tate, 2, Dobson; 3, Jarrow; 4, Chadwick and Wood shared. Judges, D. Clegg and T. Kippling; timekeeper, G. Batcholer.—T. Cawood, Sec.

Canary contest, Feb. 25, Prince of Wales Hotel, 19 birds contested, and a few visitors turned up from Woodhouse way. 1, 3, Wood; 2, McNichols. Judges, C. Towes and T. Cawood; timekeeper, G. Batcholer.—T. Cawood, Sec.

Open contest, Glassmaker's Arms, York-rd., Feb. 25. Linnets, 1st match, 28 birds: 1, Marshall; 2, W. Buckley; 3, Hurst; 4, A. Buckley. 2nd match, night singing, 18 birds: 1, Marshall; 2, Hurst; 3, Newsome. Judges, Messrs. Bonfield, Dearlove Smith.—G. Marshall, Hon. Sec

SHEFFIELD.

Linnet contest, Sportsman Hotel, Paternoster Row, Feb. 25. 36 birds sang, and some very good singing was heard: 1, 2, Parlett; 3, Jackson.

Driver will match any bird in Sheffield, time singing, 1½ minutes face, 1½ minutes tin, for £5.—(Advt.). E. Phillipson, Sec.

PONTEFRACT.

Linnet contest, Woodman Inn, Horsefair, Club sing, Feb. 25, with a very good entrance of 51 birds for four prizes, three minutes' time singing: 1, Scotson, 92; 2, Plows, 87; 3, 4, W. Nelson, 76, 65.—S. Pugh, Sec.

KIPPAX.

Kippax Linnet Club, Commercial Hotel, Members' sing, Feb. 24. 37 birds entered for 3 min. sing Next Saturday, March 3, we commence with 4 min. sing, 1 min. spring, and 3 min. bluff: 1, 3, Collinson; 2, Potter. Timekeepers, J. Cooper, R. Plows. Tappers, J. Liversedge, H. Collinson.—R. Plows, Sec

BARNSLEY.

Dove Inn Linnet Club, Doncaster Road, Feb. 18; 20 birds sang for 5 prizes; Shepherd timer, Bamforth chalker. 1, Jennings, 3min. 40sec.; 2, Norman, 3-20; 3, Norburn, 3-15; 4, 5, Hardman and France, tie, 3-13 each. Feb. 25, 20 birds sang for 5 prizes, same timer and chalker. 1, tie, Norburn and Hardman, 3-30 each; 3, Jones, 3-28; 4, Brushy, 3-27; 5, Wright, 3-25, 8 birds doing over 3 minutes in 4. Can any club in Yorkshire beat this for time singing?—J. Hardman, Sec.

"CAGE BIRDS" will be sent post free weekly, on the day of publication, at the prepaid rate of 10s. per annum for the United Kingdom, and 13s. annually for foreign countries.

Twitterings.

Mr. S. Wilcock, Eccleshill, will judge at the show of the Wakefield O.S., Dec. 26 next.

At Sale Show Mr. Lloyd James won 2nd in the Goldfinch class, and 5th in A.O.V. Field Moulted, not Lloyd as in our report.

Mr. J. Kent, hon. sec. Coventry O.S., writes that Mr. J. H. Roe has been elected judge of the annual show of the society, Nov. 14th.

I thank you on behalf of my wife for the honour bestowed upon her Siskin Canary exhibited at Birmingham Show, writes Mr. T. Fisher, Lancaster. To see it so life-like on the front of CAGE BIRDS is a great pleasure, and much credit is due to your artist.

Prize Money Paid.

We hear that prize money has been paid in respect of Sutton-in-Ashfield and Huthwaite Amalgamated C.B.S., according to schedule. Any exhibitor requiring further information should write to the Sec., Mr. A. Parker, 151, Sutton Road, Huthwaite, Notts.

Changes of Address.

Mr. H. Rushton writes that he has removed from Moss Street to Stanley Arms Cottages, Eccleston, Nr. Prescot, and Mr. J. A. Davis that he has changed from 4, Church Road, Bedminster, to 27, Old Market Street, Bristol.

Annual Meeting of the Crested C.C.

The general meeting of the Crested C.C., writes Mr T. Heath, Hon. Sec., will be held March 22, at 7.30 p.m. sharp, at the Red Lion Hotel, York Street, Piccadilly, to pass the accounts for last year, elect new members, and transact any other business.

Cheltenham's 1917 Show.

We have fixed our next annual show for Wednesday and Thursday, Nov. 7 and 8, write Messrs. Treasure and Pomsett, hon. secs. Cheltenham C.B.S. This is a week later than the date on which we have held it for a number of years, but we have altered to avoid clashing with Sheffield and Leicester.

A Removal.

Mr. J. Glover, hon. sec. Stoke-on-Trent C.B.A., writes that the headquarters of the Society in future will be the Victoria Hotel, opposite Stoke football ground. This, says Mr. Glover, is more central than the old headquarters, and there is a spacious room which will be ideal for the purpose of bird shows.

ALL JUDGES AND SHOWS SHOULD USE OUR
specially prepared and up-to-date
JUDGING BOOK.

The advantage this book has over others is that it has 3 columns for awards, and is therefore a great help to, and a double check for judges, while there is always a slip free to be sent to the printers of the catalogue.

Prices:—1 Copy, 6d. post free.
6 Copies 2/6 post free.
12 Copies 4/6 post free.

Starving Gulls.

From all round the coast come stories of birds driven inland in search of food. Miles from the sea, in Lincolnshire, Suffolk, and Essex, these C III. Gulls mix with the Rooks and follow the plough, picking up grubs and upturned worms. At Deal they have been stealing the fish from the very nets as the fishermen drag them ashore, and on Romney Marsh, where the keddle-nets are used, the men often have to arm themselves with sticks to beat the ravenous birds away. "The Star," London.

Migratory Movements of the Thrush and Blackbird.

From a reprint which has been forwarded to us by Messrs. Witherby, of the account in "British Birds" of February, of the results of ringing various British Birds under the "British Birds" marking scheme, we take the following as especially interesting to our own readers.

BRITISH SONG THRUSH (*Turdus ph. Clarkei.*)

Of Song-Thrushes ringed as nestlings in England and the southern half of Scotland and recovered in following winters we have twenty-four records. Exactly half of these have been found at or near home and half away. Those which were reported from Ireland, France, and Spain were ringed on the western side of Great Britain, with the exception of one bird ringed in Yorkshire and found in France.

Apart from those recovered in winter, I may mention here that of ten Song-Thrushes ringed as nestlings and recovered in following summers, all were found at or near the place of their birth—eight in the following summer, and one each in second and third summers.

An interesting record which may also be referred to here is that of a Song-Thrush ringed in Westmorland in February and found in the following February in co. Clare. This bird may, of course, have been an immigrant to Westmorland; the single record provides no proof whatever, but it suggests that these birds do not always winter in the same place each year, and in such cases weather conditions may be an important factor.

The following is a summary of the records of Song-Thrushes ringed as nestlings and recovered in winter.

Totals and Percentages.

	Total recovered.	Near or at home.	Away.
Ringed as nestlings in England and Scotland	24	12	12

Periods between Ringing and Recovery.

	Recovered at home.	Recovered away.
In following winter	5	11
,, 2nd winter ...	3	1
,, 3rd winter ...	3	—
,, 4th winter ...	1	—

Extent and Direction of Movements.

Recovered in—
Ireland, 6 from S.W. Scotland and Lancashire.
France, 2 from Lancashire and Yorkshire.
Spain, 1 from Lancashire.
Lincolnshire, 1 from Oxfordshire.
Norfolk, 1 from Berkshire.
Isle of Man, 1 from Northumberland.

THE BLACKBIRD (*Turdus m. merula*).

There are twenty-one cases of Blackbirds ringed as nestlings and recovered in winter. The proportion of these which moved is very small, as will be seen from the summary, compared to that in the Song-Thrush, only 28 per cent. having gone away as compared to 50 per cent. in the Song-Thrush. Here again Ireland is the most favoured wintering place.

We also have ten records of Blackbirds ringed as nestlings and recovered in following summers. All these, as in the cases of Song-Thrushes, were found at or near the place of their birth—six in the following summer and two each in the second and third summers.

Wild Seed for British Birds.

Mr. Hepwood, Allbrighton, has sent us a sample of the wild seed he is advertising in our columns. Our Mr. Norman reports this is quite a good collection of useful seeds, such as charlock, dandelion, thistle, corn marigold, etc., all of which are relished by British Finches, and form a nice addition to the usual stock mixture. Canaries would also pick over the wild seed, and select those which they fancied.

Instructive Evenings for London Fanciers.

At the meeting of the S.W. London C.B.A., Mar. 7, at the Plough Hotel, St. John's Hill, Clapham Junction, at 8, Mr. J. Jeffrey will lecture on "Preparing for the Breeding Season," and at the meeting on Mar. 6 of the Dulwich and Peckham C.B.S., at the Reindeer Hotel, Rye Lane, at 8, Messrs. G. Sands and C. H. Grendell will speak on Breeding and General Management of Canaries, with an open debate to follow. Our artist and British bird expert, Mr. H. Norman, will lecture at the meeting of the London and Counties A.C.B., at the Victoria Hotel, Charterhouse Street, E.C., on March 3, at 7.30. Fanciers interested will be welcome at these meetings, and should be certain of hearing something to their advantage.

Beautiful Bird Pictures.

"The Sphere" of Jan. 27, has an article on the Bird Life of Salonika, by Mr. W. P. Pycraft, which is illustrated by some very beautiful photographs. The picture of a tame Golden Eagle on the hand of an officer is a wonderful presentation. The inscription to this remarkable picture reads as follows:—"This magnificent Golden Eagle belongs to an officer on the Balkan front, and is so tame that strangers can handle him. When first caught he was only just fledged, a mere ball of fluffy feathers, but he flourished exceedingly in captivity, and does full credit to his upbringing. He takes long flights daily, but never fails to return to his master, with whom he is here seen indulging in a friendly tussle. The Eagle balancing on the leathern glove recalls the hawking scenes of ancient days."

THE ESSENTIALS OF AVICULTURE

(Continued from page 121.)

To bring the cocks into condition a teaspoonful of a mixture of equal parts of hemp, linseed, niger, maw and broken groats given three times a week is very efficacious, and might also be given to the hens if at all backward.

For green food there is nothing as reliable as the young leaves of the dandelion. These act as an excellent tonic, and the birds ought to have it daily when possible. Many authorities state that the hens are better with a less stimulating form of green food, such as groundsel or chickweed, but, if the dandelion is used judiciously it is a very valuable adjunct.

Mention must also be made of the bath, and on all fine days this ought to be given.

Sometimes it is found that the hens are coming on much more rapidly than the cocks, and here it is necessary to remove the cocks from their sight and hearing, and a pinch of sulphate of soda in the drinking water will assist. It is unnecessary to add that the more stimulating parts of the diet should be discontinued.

To prevent egg-binding and soft shelled eggs cuttlefish bone must always be in the cages, and a pinch of niger seed every second day is a valuable preventive of the former.

The time has now come to introduce the hen to the breeding quarters, about the third week in March being a rough date for this proceeding. If a double breeding cage is to be used, and this is strongly advised, she must be put on one side of the partition, and when she has settled down, her mate can be placed on the other. Do not allow the birds to fly together suddenly, or quarrelling, which will seriously affect breeding operations, will result.

If a single breeding cage is used some plan must be devised for introducing the cock to the hen, and at the same time keeping them apart. A nursery cage fastened on the front is of use, but there is always the possibility of the cock bird contracting a chill.

Soon the cock will start singing and calling to the hen, who in response will be noticed to fly excitedly from perch to perch, probably carrying a feather or any light material that comes to her beak and hopping down occasionally to be fed by him. Now is the time to pull the slide. Do not delay when the birds are in breeding condition. It is equally harmful to put the birds together prematurely, but the signs are unmistakable, and should be carefully watched for.

The behaviour of the birds now varies very much, some settling down quickly to the important business of nest building, whilst others appear to consider it an appropriate time to decide which is to hold the reins of government, with the result that what appears to be a pitched battle takes place. This, however is only a temporary condition, and the next thing that will be observed is the cock calling to the hen from the side of the nest.

Before supplying the birds with nesting material, fasten in the lining of the nest pan with some adhesive material, shaking a layer of insect powder between the pan and the lining. Nesting material should be given sparingly at first; a few beakfulls of the coarser part is all that is necessary. A hen who builds her nest quickly and is not ready to lay usually pulls it to pieces, so small quantities at a time should be the rule.

Some hens, especially the more highly bred individuals, refuse to make the nest, and then it falls to the owner to construct one. The material should be well teased out, and placed evenly over the nest pan, and a hot hard-boiled hen's egg allowed to remain in the centre until it cools. This moulds it, and makes a splendid substitute for the more carefully formed nest built by the birds themselves.

As the time for the first egg to appear draws near, the hen seems drowsy, and a careful watch should be kept for egg binding. It should be a matter of routine to examine all hens at this stage as early as possible each morning, and although no symptoms have appeared with the first egg, do not imagine that all cause for anxiety has been removed. It sometimes happens that it is with the third or fourth egg that the trouble commences, so no one can afford to disregard this important complication until the full number has been laid.

This varies widely in the Canary, the usual number being four to a clutch, but as low as two, and as many as seven or eight have been recorded. To prevent the eggs being hatched out at different periods, with the result that the youngest might go to the wall, it is the usual custom to remove each egg as it is laid, and substitute a false egg for it. These are easily procurable, and are made to represent the natural egg in size and colour. When four eggs have thus been collected they are all returned at once, and the times of hatching out will be approximately the same.

A useful receptacle for the eggs is an empty shallow cigar box filled with sawdust, and kept in a cool place. Where there are several pairs of birds this is divided into sections, which are numbered to correspond with one previously assigned to the cage from which the eggs have been removed.

The hens usually lays an egg each day, and the period of incubation, which dates from that on which the last one appeared, is 14 days. During this time, if the cock does not annoy the hen, it is very probable he will be a great help in the feeding of the young, and in such case he should be allowed to remain, but, if at all mischievously inclined the best plan is to remove him to the other side of the breeding cage, and use a wooden slide between.

During the period of incubation the diet should be the usual staple diet of seeds, with the addition of a little crushed hemp occasionally and green food daily. Dandelion can now be dispensed with, and the less stimulating kinds such as watercress and chickweed substituted. The daily bath must not be forgotten, and a pinch or two of salt added to it goes a long way to keeping the hen in condition.

On the 13th day give a little egg food as described in the chapter on "The feeding of birds," and on the morning of the 14th use pure yolk of egg. The day after the young are hatched a little breadcrumb should be added, gradually increasing the quantity until on the 4th day the staple mixture of two-parts breadcrumb to one-part egg is reached. The white can be added to the yolk if desired, but it is very difficult to macerate sufficiently to get a satisfactory mixture, and so it is best omitted until later on when the digestions of the young birds are stronger.

If on the 14th day nothing happens it is just as well to test the fertility of the eggs. There are many ways which are supposed to be infallible tests, but the easiest of all is to place the egg opposite a hole cut in a piece of black cardboard, and hold it to the light. If clear or blotchy it is useless, and can be discarded, but if of a uniform opaqueness then it in all possibility contains a chick which will soon make its presence known if placed for five seconds in warm water and returned to the nest. Occasionally the young die almost immediately, and these must be removed from the nest as soon as possible.

We have now a nest of young Canaries to deal with, and the added interest ought to be reflected in the carefulness with which the owner observes details.

The egg food should be supplied freshly made two, or better still three times daily, regulating the amount to the appetites and needs of the birds. Half a teaspoonful at a time is usually ample to start with, and will serve as a guide to the quantity required. Make quite certain all utensils are scrupulously clean, and that no stale remnants get into the fresh supply.

(*To be continued.*)

THE NIGHTINGALE IN NATURE AND CAPTIVITY.

By the kindness of a reader, Mr. O. S. Manners, Stapleford, Notts., we are enabled to republish the following interesting article, which appeared in a work published in 1799. The wording is reproduced exactly as printed, and we have thought it as well to add an occasional foot note.

A SAXON word is said to form the etymology of the name, viz., galan, "to sing," combined with night, as the Nightingale pours forth its strains in the lonely hours of repose. These vigils did not pass unnoticed by the ancients, who have remarked that "to have less rest than a Nightingale is a sign of a bad sleeper."

Our favourite poet, Milton, omits no opportunity of introducing this lovely bird. How finely does it serve to compose the solemn scenery of his Penseroso.

"In her saddest, sweetest plight,
Smoothing the rugged brow of night;
While Cynthia checks her dragon yoke,
Gently o'er the accustom'd oak.
Sweet bird, that shunn'st the noise of folly,
Most musical, most melancholy.
Thee, chauntress, oft the woods among,
I woo to hear thy evening song."

In another place he styles it "the solemn bird," and he says again—

"As the wakeful bird,
Sings darkling, and, in shadiest covert hid,
Tunes her nocturnal note."

We hope the reader will pardon one or two more quotations on a subject so truly engaging to the mind.

The same poet, describing the retirement of animals to repose, says—

"Silence accompanied; for beast and bird,
They to their grassy couch, these to their nests,
Were slunk; all but the wakeful Nightingale;
She all night long her am'rous descant sung.

When Eve passed the irksome night preceding her fall, she, in a dream, imagines herself thus reproached with losing the beauties of the night:—

"Why sleep thou, Eve? Now is the pleasant time,
The cool, the silent; save where silence yields
To the night-warbling bird, that now awake,
Tunes sweetest its love-labour'd song."

We now proceed to the more immediate subject of the chapter.

Extract from a French Treatise on the Art of Catching, Feeding and Keeping of Nightingales.

The Nightingale has ever been allowed the first rank among singing birds; his size is less than a Sparrow's, weighing hardly an ounce; his bill is long and pliant, and when opened, discovers a wide, orange coloured throat. The feathers of the head, neck, and back are sallow, the wings and tail brighter than the rest of the body. The hen is a little more upon the ash-colour. This bird loves solitude; some resort in mountains, some in fields, and some near the banks of rivers.

It is admirable from so small a body to obtain such charming sounds. One of the greatest pleasures the country affords in the summer season is listening to the rural melody of the Nightingale, which exceeds not only that of any other singing bird, but no instrument can vie with it.

At his return in the spring his voice is much stronger than towards the autumn. When the young are hatched the cock sings no more, or but very little; if young ones are taken before they have learned their lesson from their parents they never will sing so well as others.

Nightingales take great care of their young; the old cock instructs them in singing, he repeats his lesson, and they attentively hearken to him. What Gesner relates, as communicated to him in a letter from a friend of his, concerning the dialogue in High Dutch between two Nightingales, has too much of the miraculous to insert here; it would be of little use to the reader, and therefore we shall omit it altogether.

An Old, Old Story.

A Nightingale cannot endure much cold, and if, when in a cage in the winter season, he is not kept warm, he will soon perish. What becomes of the Nightingales in winter is not quite agreed on; however, it is the opinion of some that they do not pass the sea, but shelter themselves from the cold without leaving the country; sportsmen aver that they have killed many in winter that have concealed themselves in quarries and other places exposed to the south.

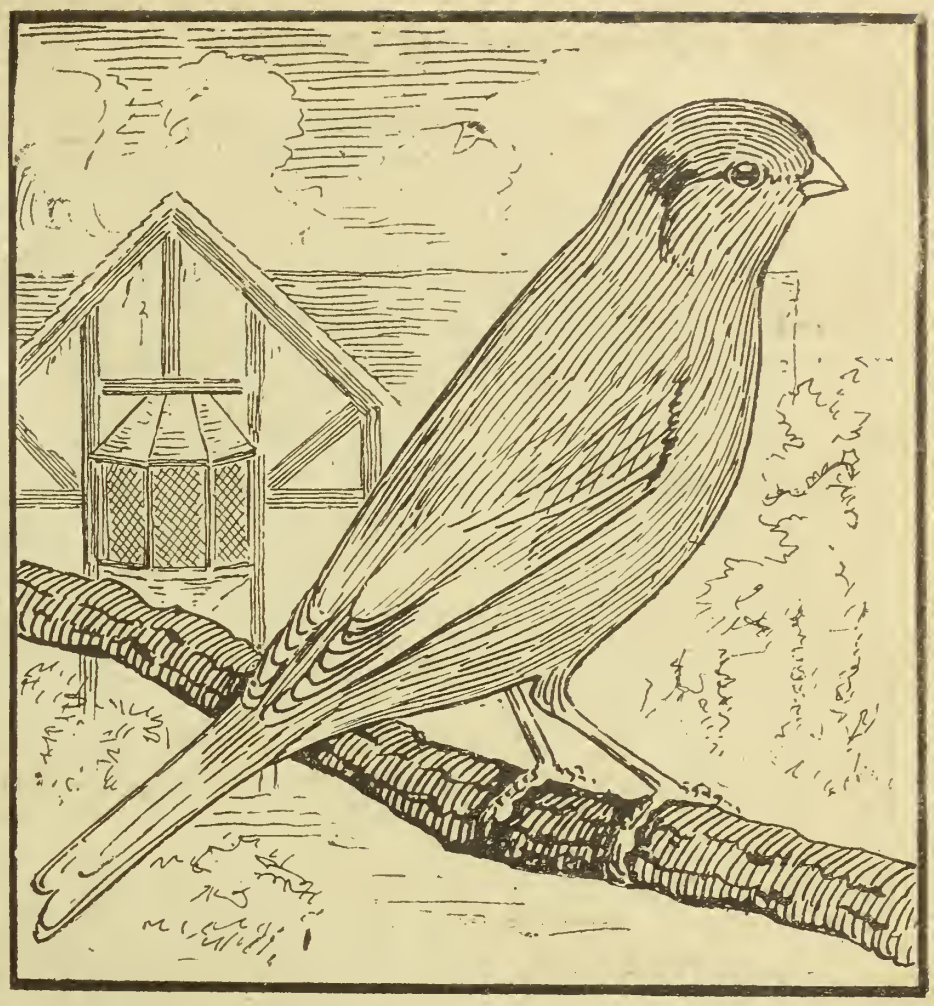
The ordinary resort of Nightingales is near hills or brooks; of these favourite places he prefers that which has the advantage of an echo. Whilst the hen is laying her eggs, and more especially when she sits, the cock utters his most beautiful notes, and redoubles night and day the energy of his song, to divert and comfort his female from the pains of laying and the fatigue of sitting.

The Nightingale builds his nest usually among briars, in box or yew trees, or at the foot of a hedge or a bush, for which reason many layers of eggs are destroyed by dogs, foxes, weasels, polecats, etc. The nest is pretty long and deep, consisting of dry oak leaves chiefly.

In hot climates they will produce four layers of eggs in a year; in this country but three at most; the third seldom comes to anything on account of the advancing cold nights. They commonly lay four or five eggs, which look as if they were splashed over, and are hatched more by cocks than hens* The fittest time to look for nests is in the morning at sun-rising, or in the evening towards sunset, near the place where the cock has been heard to sing, which commonly is not far from the nest. There you are to remain still, without making the least noise, and before long you will know where abouts the nest is by the cock and hen flying backwards and forwards, and by the chirping of the young ones.

(To be continued.)

This statement is inserted as printed. It is to be noted, of course, that "this country" in the text refers to France. Nightingales certainly do not have three clutches of eggs in our country.—(Editor "Cage Birds.")



This fine Ticked Norwich Canary won 2nd prize at the show of the City and Suburban Association of Canary Breeders for its owner, Mr. G. Butterfield, Hammersmith.

The Essentials of Aviculture.

By J. W. N.

(Continued from page 89.)

A Series of comprehensive articles, embracing the proper management of all kinds of birds in captivity, their housing, feeding, general management and diseases, and the breeding of species, Mules and Hybrids.

LASTLY, there is the tail; this should be full feathered, have good carriage, and not droop, and well feathered underflue.

If the age be now added to this little list the breeder will have a full description of any one of his birds, and will be able to refer to it at a future date. If the breeding results be subsequently added it will prove a source of absorbing interest.

For the novice who has only a limited experience it is strongly recommended that he should have what doctors term "a second opinion." Let a friend older in the ways of birdkeeping go over the birds, noting the same points as the owner, and after a comparison of results, the final decision will be fairly accurate.

The preliminaries to pairing are now finished, and there are definite rules to help the breeder at this stage.

Axioms in Pairing Canaries.

If two birds with the same fault or the same virtue be bred from, the faults or virtues tend to be perpetuated in the offspring. The practical bearing of this axiom is that great care should be exercised in making quite sure that the two matched birds do not both have the same weakness, as not only is it certain to be reprodnced, but there is a tendency for it to be accentuated.

In practice it will be found that birds, like human beings, have their good and bad features, and that no two are alike. It is here that another law steps in and provides the fascination of breeding. In simple language it is this:—

If two birds are bred from both of which are faulty in a certain particular, but in the one case it is greater than, and in the other less than the standard, there is every possibility that there will be one or more of the resulting young which closely approximates to the ideal.

To make the meaning clearer we will take the neck, the standard of which is "of medium thickness." In the case mentioned one of the parents would have a thin snake-like neck, whilst that belonging to the other would be thick and stubby. The result of breeding from this pair would be that some of the young would err on either side of the standard, but there is a chance that one will appear with a well-formed typical neck, and this is the result that has been hoped for.

If all the anatomical points are carefully weighed in the balance, with a clear understanding of the basic principles just mentioned, then a bird of good shape is sure to be hatched, which in its turn can be bred from, and this forms the nucleus of a prize strain.

Of course to start with it is very seldom that the beginner has the luck to have one or more pairs of birds whose young will take premier honours, and so it is only by breeding out the faults and breeding in the virtues that the show bird appears after a season or two of careful matching.

A Hobby for Everybody.

Hence the absorbing nature of this pursuit which appeals alike to the man of science who, noting his results, applies them to other and wider problems of heredity, and to the working man who feels pleased that his judgment has been rewarded after a longer or shorter period, and who delights in the appearance which a prize bird presents.

The same principles apply to the inheritance of markings and colour, but the texture of the feathers requires a little amplification. As many readers will own Canaries, the following remarks apply particularly to them:—

The object to be aimed at is to have the feathers of good size and quality. Now the character of the plumage varies very much in the buff and yellow varieties, in fact they are distinctly opposed. The buff feather is broad, and carries down, whilst the yellow is finer and narrower in the web; hence the reason for always mating buff to yellow as a general principle. True there are occasions when one mates buff to buff, or yellow to yellow, but this is only temporary, and the next mating will conform to the rule stated above.

Whilst on the subject of Canaries it is not out of place to say a few words about colour. Unless the parents are very rich in colour it is best to match a marked bird with a clear one. The former will have a good deal of green in its composition, and, as this is the source of all natural colouring, its value will be appreciated.

Certain varieties of Canaries carry crests, and in matching those for breeding purposes the best results are found to take place with only one parent being crested, the other being what is known as "Crest bred. This is a bird one of whose parents was crested whilst the other had a plain head. It is in this way the finest Crests are produced.

There only remains now the question of age. The best birds are undoubtedly bred from young parents; a year-old cock and an unflighted hen is a very strong combination, but as long as the birds are healthy and vigorous there are prospects of success.

The final word in regard to pairing lies with the discussion of inbreeding. This is the mating of related birds, and is a process that requires very careful watching. It is a most excellent method for fixing some point in a strain, but the process in unskilled hands tends to a rapid deterioration of stock. Any sign of degeneracy must be immediately counteracted by the introduction of fresh blood.

With these directions the would-be breeder is in a position to make a judicious selection of those he intends to pair. To illustrate the process of breeding in cages I will take the Canary as an example, and describe fully the procedure.

A Spring Cleaning.

Before the breeding season commences, start preparing. About the middle of March overhaul thoroughly all cages that are to be used. See that they are clean, and, if necessary, re-enamel or distemper them, treating all cracks and crevices with a preventive of red mite. The fittings must be examined to prevent any disturbance being created later on when the cages are occupied. Special care must be devoted to the perches that they are securely fastened, and do not move when the birds perch on them. Finally, the nest pan is hung up.

The position of this varies with the fancy of the breeder. If placed at the back of the cage the birds enjoy more privacy, but it is not so easily accessible as when hung at the side. In the modern breeding cages there is a small wire door which allows all operations to be carried out with the minimum of disturbance, and the nest in the latter position beside it is recommended.

For the birds to come into breeding condition they must be in perfect health, and it should be the birdkeeper's great aim to promote this. At the same time they should not be unduly forced, the end of March or beginning of April being quite early enough for the commencement of breeding operations. If the weather be at all severe, however, an extra fortnight is not time lost, for if early breeding is indulged in, egg-bound hens, infertile eggs, and a host of other troubles will assail the owner.

A more generous diet is required at this time, and at about the end of February a little egg food can be given to the cocks twice a week, and to the hens once a week.

(Continued on page 120.)

Correspondence.

Decoying Larks with Looking Glass.

Sir,—One of your readers wanted to know how this was done; it is a very old method. Before the Wild Bird Protection Act I have passed many an hour away with good results. March and early April is the time when the Larks are running, and then they claim a space of ground for nesting, fighting with all intruders. Two or three small pieces of looking glass, and two limed twigs at front of each on the ground they claim will soon result in a capture. F. Fisher.

A New Society for Gourock.

A Good Start.

Sir,—A new bird club for Gourock, to be known as Gourock Cage Bird Association, with its meeting place the Gamble Institute, every second Saturday at 7.30, has been established. The first meeting was held Feb. 24, when 40 members and 25 hon. members were enrolled, thus making a good start. The officials for the ensuing year are: President, Mr. J. Allison; vice-pres., Messrs. M. C. Campbell, and J. Murray; sec., Mr. David Rolls, 15, Bath Street, Gourock; treas., Mr. H. Haigreaves; committee, Messrs. Watt, Shaw, Naiper, Young, McCarry, McKendrick, Brownlie, and Yaille; auditors, Mr. M. C. Campbell and Mr. J. Turner. We shall at all times welcome new members; the annual sub., 4s., can be paid in twice, 2s. on admission, and 2s. on or before the first meeting in September. Fanciers in Greenock, Port Glasgow, Largés, and District are eligible.

D. Rolls, Sec.

Oxalic Acid for Killing Red Mite.

A Serious Objection to Its Use.

Sir, I read the letter of "G. L. B." in Cage Birds, of Feb. 17, and think it advisable to warn him and others of your readers against the too free use of oxalic acid in bird cages. Oxalic acid is, in itself, an active and certain poison. Chalk, lime, and whiting are the antidotes to its poisonous effects. In other words, these three forms of lime neutralise or kill the acid, forming oxalate of lime which is comparatively harmless, owing to its insolubility in water and the fluids of the stomach. If pecked by birds from the boards of a cage, it will pass through their bodies like so much grit, simply because the natural fluids and water cannot dissolve it. The "boiling" which follows the mixing of oxalic acid with white-wash is caused by the chemical combination of the acid and the carbonate of lime, commonly known as, and called, whiting, the carbonic acid in the latter being set free and being the cause of the "boiling."

Dipping the ends of perches in a water solution of oxalic acid is running serious risks, as the water will evaporate and may leave crystals of the acid on the perch ends, which if pecked off might poison a valuable bird. Old Helpmate.

Tits and Coco Nuts.

Sir Having read lately in Cage Birds an account of the Blue Tits enjoying the coco nuts provided by one of their kind friends, I thought perhaps I might also tell how they come daily to my balcony, where I keep them supplied with their favourite food.

One half of the nut hangs inverted from a hook, and the other portion is fastened edgeways on a small board, on which I also put nuts of all sorts cut into small pieces. From my window I can thus see and admire the little creatures in various amusing attitudes, sometimes suspended from the hanging shell and sometimes standing on the edge of the upright piece where the handsome Coal Tit with black cap and white striped wings hammers away noisily at the nut, while the more timid little Blue Tit awaits his turn.

I was much amused one very cold morning to see one of the latter species stand on the edge of a saucer of water and after making various attempts, plunge boldly in and take a good bath. Sometimes when the [illegible] a very fine Robin will call and help himself to the nuts or biscuit crumbs provided for my birdy visitors, who are always so welcome. I should like to add that I have taken your paper regularly for many years, and always find it most interesting and instructive.

(Miss) O. De Pass.

Bedford Park.

The Scotch Fancy Canary.

Why is it Not More Popular?

Sir,—I notice that "Bird Fancier's Son" states that he can buy Yorkshire and Norwich Canaries at from 10s. to 15s. each, but that he never sees offers at that price of Scotch Fancy Canaries good enough to exhibit. In the same letter "Bird Fancier's Son" invites some sketches, and I hope you will be able to see your way clear to find space for a finished drawing of the rough sketch of a Scotch Fancy, which I am enclosing with this letter.

I would like to ask "Bird Fancier's Son" a fair question. Does he think it feasible that breeders with stock of the quality depicted in the sketch would sell such birds at from 10s. to 15s. each? I know myself that I could never buy such birds at five times the price quoted. In breeding Scotch Fancies I have always, as far as possible, bred from the best, that is to say, I have paid the highest price which I could afford for stock birds bought for breeding purposes. No price would stop me from buying them if I could find the money and could get the bird I wanted. It is always a pleasure to look upon first class stock of any variety, and a still greater pleasure to be able to breed first class stock. If breeders in general kept the best quality possible of birds, it would be much easier for one to obtain a good bird when wanting a change of blood.

I have kept during a period of considerably over 40 years nearly all varieties of Canaries, but Belgians and Scotch Fancies have to me charms of their own possessed by no other kind of Canary. I am a lover of Canaries in general, but must confess that the Belgians and Scotch Fancies appeal to me more than any other variety of Canary. No other breed has such a bold and commanding appearance as either a refined Belgian or a Scotch Fancy; they are, without doubt, the aristocrats of Canarydom. They are so intelligent, and have such beautiful contour and action, that they should appeal to all Canary lovers. I trust that the bird depicted will appeal to "Bird Fancier's Son," to Mr. Jowett, and to a host of others, and will make them converts to the breeding of Scotch Fancy Canaries.

George Dix.

Nets and How to Use Them.

"Yelneh" Answers Some Questions.

Sir, I am sorry Mr. McNaught could not quite understand my sketch and letter in Cage Birds of Jan. 13th. I tried to make both as plain as possible. The answers to questions asked are as follows:—

The nets are very much deeper than the staves used, and always should be, but by setting the nets back as sketched a clear space up the middle is made for braced birds to work in, and it also makes plenty of loose net, which will hold caught birds better.

The nets rise to the upright simultaneously. No one can control the wind, but must make the best of the circumstances. Nothing is sure in this world, not even bird catching.

The staves must go up together, and then drop together to one side as stated, and if using a live braced bird it will not be between the nets, but under one, as when used in the ordinary way. A coal scoop might do to take caught birds out of nets, but I use my hand whilst the nets are lying together. 'Tis quite simple.

The benefits are that the nets are easier to set, work as quickly, do not want such a wide space to lay, and for rough and uneven ground are much better to use, the only disadvantage is that the ground space covered by nets is not so much. "Yelneh."

Another Doubter.

Sir, I am of the same opinion as J. McNought re "Yelneh's" method of clapnetting on "ground as uneven as a camel's back." I have used clapnets and sidenets on all conditions of ground, but never once can I remember doing much good on such ground as described by "Yelneh." I would like to ask "Yelneh" one question. Suppose there is a nice thistle field which abounds with Goldies; now this field is ridge and furrow, and smothered with anthills, with not a decent set anywhere. How will he set his nets to be successful without choping off the unevenness caused by the anthills? If he can use a pair of nets 24ft. by 5ft. under such circumstances I should like to know how, and I am sure hundreds more of Cage Birds readers too. I am open to tell readers of Cage Birds anything about clapnets or sidenets, or any branch of catching under ordinary conditions so they will hand in birds as fast as an old hand can. Wishing your invaluable paper every success.

F. W. Stone, Stoker, R.N.

A SCOTCH FANCY CANARY.
Drawn from a sketch by Mr. Dix to illustrate his letter on this page.

The Federation of Roller Societies.

The Midland R.C.C. and the Federation.

Sir,—I crave the indulgence of your columns to reply to Mr. Montague's letter in Cage Birds of Feb. 24. Taking the first portion of his letter, where he suggests I took Mr. Tomlinson's letter literally, and quoting my expression. "Rule which does not suit some of the delegates" as supporting him, I would say that it was published in your valuable paper that three delegates voted against the drastic rule (which is proof it did not suit them). Your report is my evidence for the quotation I used. It is not for me to say whether Mr. Tomlinson knew his subject or not before writing to you on the new rule, but I should imagine he did, as most likely he was at the meeting when it was brought forward.

Mr. Montague still suggests some intriguer had informed us at Wolverhampton what was done at the meeting of delegates. I can assure Mr. Montague that I personally knew nothing about it at the time of our show, and I don't think any of our other members did, and I would say that judge baiting is a sport not carried on at Wolverhampton.

It will be news to a good many fanciers that in Mr. Montague's opinion the supposed new Bell Glucke is really a fine Water Glucke, and my opinion is that the Glucke Mr. Tomlinson and other judges have been calling the new Bell Glucke is not a new Glucke at all, but the old deep hollow Glucke we used to have 8 or 10 years ago when Glucke birds first became popular. The Bell Glucke when well done is a lovely tour (I don't mean the clattering sledge hammer and anvil type of Glucke, but the lovely full throated, mellow, round, musical Glucke we all knew when it was given points on the judging standard).

In Mr. Montague's next paragraph he deals with our show date, and states our calendar consists of two weeks only. The same remark can be applied to other clubs. If Leeds had wished to be one week behind the Midland I know of nothing that would have prevented them, and it would not have been altogether new for them to be in the third week of November. I have prize cards won at their show dated Nov. 14th and 15th, which would certainly be in the third week.

Also, as far as I can make out from the catalogues, fourteen birds were entered at their show from members of our club, and we received thirteen from Leeds, so on that point we are about quits.

Lastly, I cannot understand why Mr. Montague says "we," meaning the federation, when in his previous letter he said he had resigned from the Leeds Club.

What the Federation stands for I only know from what has appeared in Cage Birds, but the main object of its members seems to me to be to oust the British Roller Canary Club from its premier position in the fancy, and take it up themselves, and they go so far as to threaten outstanding clubs with a boycott next show season to obtain their object. Still, one or two of the smaller clubs, and certainly the two largest clubs in England, do not intend to join, viz., the British Roller Canary Club, and the Midland, which is going stronger than ever; eleven new members were elected this week.

I thank you for granting me space in your valuable columns to make our position quite clear to the Roller Fancy, and I assure a hearty welcome to our ranks to all fanciers who do not desire to be tied down by the drastic rules of the Federation. Particulars from our Secretary, Mr. Thomson, 9, Gorsebrook Road, Wolverhampton, or myself, will be gladly given. J. H. Willows.

HEALTH & STRENGTH
Deals with all kinds of athletics, including Football Wrestling, Boxing, Weight-Lifting, Fencing Running, Ju-Jitsu, Gymnastics of all kinds, Swimming, &c., &c. Gives free advice on all questions of Health, Diet, &c., to all readers. EVERY THURSDAY, 1d. Sold Everywhere. Get a copy to-day, or send for Free Specimen to "Health and Strength," Windsor House, Kingsway, London.

CORRESPONDENCE.

(Continued from page 122.)

To Make a Drying Cage.

Sir,—Would any reader of your most valuable paper, Cage Birds, be so good as to let me know how to make and work a simple drying cage. Also I would like to ask Mr. H. W. Gutierrez if any other kind of meal would do to make the egg cake, as I cannot get any wheatmeal about our district, Bigrigg, Cumberland. I have tried every place I can think of without success.

A. Mackie.

A Fancier in Distress.

Plymouth to the Fore.

Sir,—At the monthly meeting of the Western Counties O.S. on Feb. 20th, our Mr. Gill brought forward the appeal which appeared in your very valuable paper, Cage Birds, on behalf of Mr. McLaughlin, and it is with the greatest pleasure I am enclosing 10s. 4d. (ten shillings and fourpence) which I collected from members present towards helping a fancier in distress to get together a stock. We did not finish with that, for our Mr. Craven, 8, Yelverton Terrace, Plymouth, promised a yellow hen, which can be had for the writing to him. If only a few of the Societies do the same, our friend will soon have his stock replaced. It is very true many can help one, but one cannot help many. Wishing him the best of luck.

W. A. Dyer, Hon. Sec.

Egg Cake for Rearing Canaries.

Is Fat Required?

Sir,—With reference to the recipe for "Egg cake" by Mr. Grimsditch, published in last week's issue of Cage Birds, and the additional suggestions to same supplemented by Mr. Gutierrez in the issue of Feb. 27, might I ask either gentleman whether the flour is baked with the eggs only or whether the addition of fat, or any other baking commodity is required?

W. G. Butt.
